?

WHICH

WOULD YOU
CHOOSE TO
BE YOUR

SALESMAN

Would you trust your firm's prestige to a shabby, down-at-heel salesman? Of course not. Yet many otherwise progressive firms entrust the selling of their goods to cheap-looking shoddy print. Such print has as bad an effect on the public as a disreputable looking salesman. Avoid it. ensure selling success at a reasonable cost by letting The Times of India Press dress your print smartly and impressively.

PREFACE

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence Department, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before January have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay,

July, 1937

An Indian Glossary.

- ABKAPI**—Excise of liquors and drugs
- ACHHUT**—Untouchable (Hindi) Asuddhar

- ZIKR**—Commemorative prayer said at the tomb of the prophet or a Mahomedan saint
- ZILA**—A District
- ZOR-TALAH**—Tribute paid to Junagadh Darbar by numerous Kathiawar States
- ZULM**, **ZULUM**—Tyranny, Oppression

Manners and Customs.

Next to the complexion of the people, which varies from fair to black the tourist's attention in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the loins. Many an ascetic, who regards dress as a luxury wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and behind and were totally innocent of clothing do not appear to day within the precincts of civilisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich. The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress—The next stage in the evolution of the Hindu dress brings the lolu cloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. In the greater part of India they are tucked up behind—a fashion which is supposed to belit the warrior or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat and serves as a belt in which one may carry money or a weapon, if allowed. The greatest variety is shown in the head dress. More than seventy shapes of caps, hats, and turbans, may be seen in the city of Bombay. In the Punjab and the United Provinces, in Bengal in Burma and in Madras other varieties prevail. Cones and cylinders, domes and truncated pyramids, high and low, with sides at different angles folded brims, projecting brims long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the 'parrot's beak' of the Maratha turban—all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he hails from Poona or Dharwar, Ahmedabad or Bhavnagar.

Fashion Variations—Fashions often vary with climate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket yet as he must work for long hours in water, he does not cover his legs, but suspends only a coloured kerchief from his waist in front. The Pathar

of the cold north-west wears loose baggy trousers, a tall head dress befitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes, notably the Indian Christians and Parsis. Most Parsis however have retained their own head-dress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes. Those who can afford them wear sandals slippers and shoes and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes—The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head. The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petticoats, or drawers, or both are worn. Many Mussalman ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are *goshas* and their dress and persons are hidden by a veil when they appear in public. A few converts from Hinduism have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussalman practice of seclusion. In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed, parted in the middle of the head plaited and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not as a rule, completely shave their heads. Mahomedans in most cases do. The former generally remove the hair from a part of the head in front over the temples, and near the neck, and grow it in the centre the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bhiragis as distinguished from Sanyasis, do not clip their hair, and generally coil the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society. Ornaments bedeck the head, the ears, the nose, the neck, the arms, wrists, fingers, the waist until motherhood is attained, and by some even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon. Serpents with several heads, and flowers, like

the lotus, the rose, and the champaka, are among the most popular object of representation is gold or silver

Caste Marks—Caste marks constitute a mode of personal decoration peculiar to Hindus, especially of the higher castes. The simplest mark is a round spot on the forehead. It represents prosperity or joy, and is omitted in mourning and on fast days. It may be red or yellowish as when it is made with ground sandalwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity it is said to represent her. A more elaborate mark on the forehead has the shape of U or V, generally with the central line, sometimes without it, and represents Vishnu's foot. The worshippers of Shiva adopt horizontal lines made with sandalwood paste or ashes. Some Vaishnavas stamp their temples near the corners of the eyes with figures of Vishnu's conch and disc. Other parts of the body are also similarly marked. The material used is a kind of yellowish clay. To smear the arms and the chest with sandalwood paste is a favourite kind of toilet, especially in the hot season. Beads of Tulsi or sacred Basil and berries of Rudraksha *æcocalpus gaudius* strung together are worn round their necks by Vaishnavas and Shalvas,

respectively. The Lingayats, a Shalva sect suspend from their necks a metallic casket containing the Linga or phallus of their god. Bairagis, ascetics, besides wearing Rudraksha rosaries round their necks and matted hair, smear their bodies with ashes. Religious mendicants suspend from their necks figures of the gods in whose name they beg. Strings of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's feathers.

Hindu women mark their foreheads with a red spot or horizontal line. High caste widows are forbidden to exhibit this sign of happiness, nor may they deck themselves with flowers or ornaments. Flowers are worn in the chignon. Hindu women smear their faces, arms, and feet sometimes with a paste of turmeric so that they may shine like gold. The choice of the same colour for different purposes cannot always be explained in the same way. The red liquid with which the evil eye is averted may be a substitute for the blood of the animal slaughtered for the purpose in former times. In many other cases this colour has no such associations. The Muslim dervish affects green, the Sikhs Akali is fond of blue, the Sanyasi adopts orange for his robe, and no reason can be assigned with any degree of certainty.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality, an animal, a relationship, or a deity. The uneducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, uncle, or mother or sister, as the case may be. This practice survives among the higher classes as well. Appa Sahib, Anna Rao, Babaji, Bapu Lal, Bhai Shankar, Tatacharya, Jijibhai, are names of this description, with honorific titles added. It is possible that in early society the belief in the rebirth of departed kinsmen lent popularity to this practice. Nothing could be more natural than to call a man white, black, or red, gold or silver, gun, diamond, ruby, pearl, or merely a stone, small or tall, weak or strong, a lion, a snake, a parrot, or a dog, and to name a woman after a flower or a creeper. Thus to take a few names from the epics, Pandu means white and so does Arjuna, Krishna black, Bhima terrible, Nakul a mongoose, Shunaka a dog, Shuka a parrot, Shringa a horn. Among the names prevalent at the present day Hira is a diamond, Ratna or Ratan a jewel, Sonu or Chinna gold, Velli or Belli, in the Dravidian languages, means white metal or silver. Men are often called after the days of the week on which they were born, and hence they bear the names of the seven heavenly bodies concerned. When they begin to assume the names of the Hindu deities they practically enter upon a new stage of civilisation. It is doubtful whether the Animists ever venture to assume the names of the dreaded spirits worshipped by them. To pronounce the name

of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings the reason seems to be that they were originally human.

High caste practices—The high caste Hindu, on the other hand, believes that the more often the name of a deity is on his lips, the more merit he earns. Therefore he deliberately names his children after his gods and goddesses, so that he may have the opportunity of pronouncing the holy names as frequently as possible. These are also sonorous and picturesque. Shiva is happy, Vishnu is a pervader, Govinda is the cowherd, Krishna Keshava has fine hair, Rama is a delighter, Lakshmana is lucky, Narayana produced the first living being on the primeval waters, Ganesha is the Lord of Shiva's hosts, Dhanakara is the luminary that makes the day, Subrahmanya is a brother of Ganesha, Sita is a furrow, Savitri a ray of light, Tara a star, Radha prosperity, Rukmini is she of golden ornaments. Bhama of the glowing heart. Shiva and Vishnu has each got at least a thousand names, and they may be freely drawn upon and paraphrased in naming one's children, and the whole Hindu pantheon is as crowded as it is large.

Family names—When a person rises in importance, he adds to his personal name a family or caste name. It was once the rule that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Gupta to a Vaisya's, and Dasa to a Shudra's. This rule is fairly well observed in the case of

the first two titles, but the meaning of the other two has changed. Dasa means a slave or servant, and the proudest Brahmin cannot disdain to call himself the servant of some god. Thus, although Kalidas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivali, was a Brahmin. The Vaishnavas have made this fashion of calling oneself a servant of some god exceedingly popular, and in Western India high caste Hindus of this sect very commonly add Das to their names. The Brahmans of Southern India add Aiyar or Aiyangar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal into Mukerji, are among the titles indicative of the Brahminical profession of studying and teaching the sacred books. Among warlike classes, like the Rajputs and Sikhs the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mal, as in Gidumal, means brave and has the same force. Raja changed into Raya, Rao and Rai was a political title, and is not confined to any caste. The Bengali family names like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed. Shet, chief of a guild or a town, becomes Chetty, a Vaishya title, in Southern India. Mudaliar and Nayudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers. Nayar and Menon are the titles of important castes in Malabar. Ram, Lal, Nand, Chand, are among the additions made to personal names in Northern India. Suffixes like Ji, as in Ramji or Jamsheji, the Kannarese Appa, the Telugu Garu the feminine Bai or Devi are honorific. Prefixes like Babu, Baba, Lala, Sodhi, Pandit, Raja, and the Burmese Maung are also honorific.

Professional names—Family names sometimes denote a profession in some cases they might have been conferred by the old rulers. Mehta, Kulkarni, Deshpande, Chitnavis, Mahanavis are the names of offices held in former times. One family name may mean a flour seller, another a cane seller, and a third a liquor seller. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the suffix 'kar' or 'wallah' is added to the name of the place and it makes a family surname in Western India. Thus we may have Chiplunkars and Suratwallahs, or without these affixes we may have Bhavnagris, Malabaris and Bilimorias as among Parsis. Thus Vasudev Pandurang Chiplunkar would be a Hindu, whose personal name is Vasudev, his father's name Pandurang, and family name derived from the village of Chiplun, is Chiplunkar. In Southern India the village name precedes the personal name. The evolution of Musalman names follows the same lines as Hindu names. But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and picturesque as Hindu appellations. The agnomen Baksh, Din Ghulam, Khwaja, Fakir, Kazi, Munshi, Sheikh, Syed, Begum, Bibi and others as well as honorific additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the case of Hindus in Western India. Bathiwallah, Readymoney, Contractor, Saklatwallah, Aden wallah and others like them are tell tale names.

Indian Art.

In India there has never been so marked a reparation between what are now known as the Fine Arts, and those applied to industry as was the case in Europe during the nineteenth century. As, however, Industrial art forms the subject of a special article in this book, the term Indian Art will here be confined to Architecture, Sculpture and Painting.

Historical—The degree of proficiency attained in art by Indians prior to B.C. 250, can only be conjectured by their advancement in literature, and by the indirect evidences of indebtedness shown by the works of the historic period, to those which preceded them, or direct records of artistic work of an earlier date than B.C. 250 do not exist. The chief historic schools of architecture are as follows—

Name	Dates	Locality of the best examples
Buddhist	B.C. 250— A.D. 750	Ellora, Ajanta, Kail, Sanchi
Jaina	A.D. 1000— 1300	Ellora, Mount Abu, Palitana
Brahminical	A.D. 530 to the present day	Ellora, Elephanta, Orissa, Bhuvaneswar, Dharwar

Name	Dates	Locality of the best examples
Chalukyan	A.D. 1000— 1200	Umber, Somnathpur, Ballur
Dravidian	A.D. 1350— 1750	Ellora, Tanjore, Madurai, Tinnevely
Pathan	A.D. 1200— 1500	Delhi, Mandu, Jaunpore
Indo Saracenic	A.D. 1520— 1760	Lahore, Delhi, Agra, Amber, Bijapur

Buddhist Architecture is mainly exemplified by the rock cut temples and monasteries found in Western India and in the *Topes* or sacred mounds. The interior decorations, and external facades of the former and the rails and gates surrounding the latter point unmistakably to their being derived from wooden structures of an earlier period. The characteristic features of these temples are horse shoe openings in the facades to admit light, and colonnades of pillars with richly ornamented caps in the interior halls. Jaina Architecture is found in its most highly developed form in the Ellora temples at Mount Abu. The ground plan consists of a shrine for the god or saint, a

porch, and an arched courtyard with niches for images. The characteristic of the style is grace and lightness, with decorative carving covering the whole interior, executed with great elaboration and detail. Constructional methods suggest that original types in wood have been copied in marble.

Brahminical, Chalukyan and Dravidian styles differ little in essential plan, all having a shrine for the god, preceded by pillared porches. The outer forms vary. The northern Brahminical temples have a curved pyramidal roof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, decreasing in size, is ornamental with a central cell and figures in high relief. The Chalukyan style is affected by its northern and southern neighbours, taking features from each without losing its own special characteristics of which the star-shaped plan of the shrine, with the five fold bands of external ornament, is the principal feature. Pathan Architecture was introduced into India by the Mahomedan invasion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Minar. The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindu craftsmen. The mosque and tombs at Ahmedabad already show Hindu influence, but purer examples are to be found at Jaunpore and Mandu. Indo Saracenic Architecture reached the climax of its development during the reigns of the Moghul Emperors Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Taj Mahal at Agra. The buildings erected during the Adil Shahi dynasty at Bijapur at a slightly later date exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account of their simplicity, grandeur and fine proportions. The era of great civil architecture in India was revived by the Mahomedan powers. Splendid palaces and fortresses were built at Madras, Delhi, Agra, Fathpore Sikri and Bijapur and the example thus set was copied by the Hindu princes at Jaipur, Udaipur and elsewhere in India. The application of great architectural treatment, unequalled in extent elsewhere, is to be seen in the Ghats or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture—The use of sculpture and painting in isolated works of art was practically non-existent in India until modern times. One or two reliefs and certain gigantic figures may be quoted as exceptions, but taken generally it may be stated that these arts were employed as the decorative adjuncts of architecture. No civil statuary, such as is now understood by the term, was executed, for no contemporary portrait figures or busts in marble or bronze, have come down to us from the ruins

of ancient India, as they have from those of Egypt, Greece and Rome. Sculpture has been used exclusively as the handmaid of religion, and to this fact may be attributed the stereotyped forms to which it became bound. The lavish use of sculpture on Indian temples often exceeds good taste, and mars the symmetry and dignity of their mass and outline, but for exuberance of imagination, industrious labour and vivid expression of movement, Indian sculpture is perhaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhist and Brahminical cave temples of Ellora, Ajanta and Elephanta. The great Trimurti in the last named of these temples ranks for mystery and expressive grandeur with the greatest masterpieces of art.

Painting—Much of the carved stonework upon ancient Indian buildings was as in ancient Greece decorated with colour but the only paintings, in the modern acceptation of the term, now existing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta, Bagh, and in Ceylon. These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristics of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. The Ajanta caves remained hidden in the Deccan jungles for nearly twelve hundred years, until accidentally rediscovered by officers of the Madras army in 1829. They are painted in a species of tempera, and when first brought to light were well preserved, but they have greatly deteriorated owing to the well meant, but misguided action of copyists, and the neglect of the authorities. The Nizam's Government have in recent years done a great deal towards the preservation and study of these mural paintings. The second period of Indian painting owed its origin to the introduction of Persian methods of painting by the Moghul Emperor Akbar and the establishment of the indigenous Moghul school was due to the encouragement and fostering care of his successors, Jehangir and Shah Jahan. Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque water-colour upon paper or vellum, resembling to some extent the illuminated missals produced by the monks in Europe during the middle ages. Some of the finest of the earlier specimens in India are of a religious character. This phase of development being closely allied to the art of the calligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicacy and finish in the painting of detail. The artists of a Hindu off-shoot of this movement, known as the Rajput school were less interested in portraiture than in depicting poetic and imaginative subjects. The pictures of both branches of the Moghul school although highly decorative in character, were not intended for exhibition upon the walls of rooms, according to Western practice, and

when not used as illustrations or decorations to manuscript books, were preserved in portfolios

Modern Painting—As the reign of Shah Jahan exhibits the high tide of artistic development in India, so the reign of his successor Aurangzeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor, to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule, and partly to the fact of the school of Moghul painting becoming stereotyped in its practice. Foreign designers, painters and craftsmen who had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment. At the time when the British East India Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the battle of Plassey and the Indian Mutiny, the Company was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic practice which had survived. Without any deliberate intention of introducing western art into the country, Greek and its derivative style of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings of indigenous pattern. The practical result was the same for the Indian craftsmen employed upon their erection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there were no sculptors in India capable of modelling or carving civil sculpture, the monuments to distinguish public servants were imported from Europe, and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in Europe. Although a considerable amount of research work of a voluntary nature was done by Archaeologists, no official interest was taken in artistic education until the Government of India was transferred to the British Crown in 1859.

The Schools of Art then instituted throughout England in the 18th Century were imitated in India and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to elsewhere, and as several of them have confined their activities almost exclusively to this branch of the subject it is sufficient to mention only the work of a few of the Indian

Art Schools in the present article. The Calcutta school, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become chiefly a school of painting and drawing. That at Bombay covers a wider field, for in addition to classes for modelling, painting and design it possesses a special school of architecture, and a range of technical workshops, in which instruction is given in the applied arts. It is in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters. Mr. Havell, who several years ago was the Principal of the Calcutta School, (he left India in 1907) banished from within its walls every vestige of European art, and claimed that the traditional art of India, in its old forms, is not dead, but merely sleeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour.

Bombay School of Art—The attitude towards the development of art in modern India taken by its successive Principals Messrs. Lockwood Kipling, Griffiths, Greenwood, and Cecil Burns was on wider lines than that favoured by Mr. Havell. In general the view this School of Art has taken is that with European literature dominating the system under which the educated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern artists in India to work on purely artistic models, and that to copy these would be as unprofitable as it would be for the artists of Europe to harness themselves to the conventions of the Greek and Roman sculptors or to those of the mediæval painters that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art, and that, with the wide adoption of European styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and reference. There are certain basic principles common to the technique of all great art such as line and accurate drawing in its widest sense, composition and design, and the science of colour harmony.

Among the developments during Mr. Burns' administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to inspect and report on the drawing classes in the schools. A Pottery Department was also started and was abolished in 1926. Mr. Burns retired in 1918 and was succeeded in 1919 by Mr. W. E. Gladstone Solomon, C.I.E., D.Sc., who retired in 1937. He was succeeded by the present Director, Mr. C. R. Gerrard, A.R.C.A., B.A., R.O.I. Mr. Solomon entirely reorganised the courses of study. He also, as Chairman of the Govern-

ment Art Examinations, revised and reconstructed the code which governs these tests in co-operation with the Board of Examiners. The result is an efficient system of tests of efficiency in Painting, Sculpture and Architecture, and the latest development in the curriculum has been the introduction in 1935 of a section devoted to the study of Commercial Art. The popularity of the improved curriculum is shown by the great influx of students to the School of Art. There are now numbered some six hundred including at least sixty-five ladies. It is noteworthy that whereas no candidates had entered for the Government Diploma of Sculpture prior to 1930 in the year 1937 no fewer than 54 competed in this very advanced test of capacity. The Life Classes which were organised at the end of 1919 have been pronounced by competent judges as well up to the level of the Life Classes of the European Schools of Art. But proficiency in technique forms only one side of the present system of training, for even in Europe too much of the study from Life is quite capable of negating its own object. In India, where the decorative instinct is inherent and where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more palpable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art on a basis of scholarships under the patronage of the Governor of Bombay (Lord Lloyd). As this class specialises in Mural Painting it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many public and private buildings and painted the ceiling and panels of a specially constructed Indian Room which was exhibited at Wembley in 1924, and found a purchaser in England.

The School of Art has of late years enjoyed the patronage of successive Governors of Bombay and, largely due to the efforts of Sir Leslie Wilson the Government of India inaugurated a competition of Indian Artists in 1927 for the decoration of wall spaces in the new buildings at New Delhi. The result of the competition was notified in October 1928 when five artists of Bombay, and the Bombay and Lahore Schools of Art were com-

missioned to paint Mural Decorations in the new Secretariat buildings. The Bombay School undertook the decoration of Committee Room "A" (in the North Block) and the paintings, which were executed in oils on canvas were finished and successfully placed in position on the dome and walls by the middle of September 1929. These decorations were original compositions of life-size figures symbolising the main periods of Indian Art and the different branches of the Fine and Applied Arts. In April 1929, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr W. E. Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House London. The Exhibition was very well patronised by the public and extremely well received by the art critics and the Press. Her Majesty the Queen Empress graciously patronised the exhibition and selected several of the paintings displayed.

Exhibition in London—The India Society of London organised an Exhibition of Modern Indian Art in London which was opened by H. H. the Duchess of York at the New Burlington Galleries on December 10, 1934. The most instructive feature of this Exhibition was that the representation of India was secured by means of Regional Committees which collected pictures and sculptures from their own districts. Thus the respective sections of the Exhibition devoted to Bombay and Pencil were compared and the work from Western India received a most favourable welcome from most of the prominent art critics and journals in England. The Regional Committee of Bombay had selected a varied and fairly representative collection of paintings, sculpture and architectural drawings. At the request of this Committee the Government of Bombay deputed Mr Gladstone Solomon to supervise, arrange, and catalogue the Bombay exhibits in London. The whole enterprise was a successful demonstration of the aims and ideals of the Bombay School of Painting and since this Exhibition the long standing controversy as to the Bombay methods of art training has collapsed though it is hardly to be expected that it will not occasionally reassert itself in sporadic outbursts hereafter.

Indian Architecture.

The architecture of India has proceeded on lines of its own, and its monuments are unique among those of the nations of the world. An ancient civilization, a natural bent on the part of the people towards religious fervour of the contemplative rather than of the fanatical sort, combined with the richness of the country in the sterner building materials—these are a few of the factors that contributed to making it what it was, while a stirring history gave it both variety and glamour. Indian architecture is a subject which at the best has been studied only imperfectly, and a really comprehensive treatise on it has yet to be written. The subject is a vast and varied one, and it may be such a treatise never will be written in the form of one work at any rate. The spirit of Indian art is foreign to the European and few

can entirely understand it, while art criticism and analysis is a branch of study that the Indian has not as yet developed to its full extent. Hitherto the best authority on the subject has been Fergusson whose compendious work is that which will find most ready acceptance by the general reader. But Fergusson attempted the nearly impossible task of covering the ground in one volume of moderate dimensions and it is sometimes held that he was a man of too purely European a culture albeit wide and eclectic, to admit of sufficient depth of insight in this particular direction. Fergusson's classification by races and religions is, however, the one that has been generally accepted hitherto. He asserts that there is no stone architecture in India of an earlier date than two and a half centuries before the Christ-

lan era, and that "India owes the introduction of the use of stone for architectural purposes, as she does that of Buddhism as a state religion, to the great Asoka, who reigned B.C. 272 to 236."

Buddhist Work

Fergusson's first architectural period is when the Buddhist, of which the great type at Sanchi with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan topes and monasteries. Perhaps the examples of Buddhist architecture of greatest interest and most ready access to the general student are to be found in the Chaitya halls or rock-cut caves of Karli, Ajanta, Nasik, Ellora and Kanheri. A point with relation to the Gandhara work may be alluded to in passing. This is the strong European tendency, variously recognized as Roman, Byzantine but most frequently as Greek, to be observed in the details. The foliage seen in the capitals of columns bears strong resemblance to the Greek acanthus while the sculptures have a distinct trace of Greek influence, particularly in the treatment of drapery, but also of hair and facial expression. From this it has been a fairly common assumption amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later.

The architecture of the Jains comes next in order. Of this rich and beautiful style the most noted examples are perhaps the Dilwara temples near Mount Abu, and the unique "Tower of Victory" at Chittore.

Other Hindu Styles

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock cut temples as at Ellora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior. It is, as it were, a life-size model of a complete building or group of buildings several hundred feet in length, not built, but sculptured in solid stone, an undertaking of vast and, to our modern ideas, unprofitable industry. The Pagoda of Tanjore, the temples at Srirangam, Chidambaram, Vellore, Vijayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style.

Amongst a vast number of Hindu temples the following may be mentioned as particularly worthy of study—Those at Mukteswara and Bhuvaneswar in Orissa at Khajuraho, Bindrabun, Udaipur, Bunasars, Gwalior, &c. The palace of the Hindu Raja Man Singh at Gwalior is among the most beautiful architectural examples in India. So also are the palaces of Amber, Datia, Udaipur, Dig and Udaipur.

Indo Saracenic

Among all the periods and styles in India the characteristics of none are more easily recognizable than those of what is generally called the "Indo-Saracenic" which developed after the Mahomedan conquest. Under the new influences now brought to bear on it the architecture of India took on a fresh lease of activity and underwent remarkable modifications.

The dome, not entirely an unknown feature hitherto, became a special object of development, while the arch, at no time a favourite constructional form of the Hindu builders, was now forced on their attention by the predilections of the ruling class. The minaret also became a distinctive feature. The requirements of the new religion—the mosque with its wide spaces to meet the needs of organized congregational acts of worship—gave opportunities for broad and spacious treatments that had hitherto been to some extent denied. The Moslem hatred of idolatry set a taboo on the use of sculptured representations of animate objects in the adornment of the buildings and led to the development of other decorative forms. Great ingenuity came to be displayed in the use of pattern and of geometrical and foliated ornament. This Moslem trait further turned the attention of the builders to a greater extent than before to proportion, scale and mass as means of giving beauty, mere richness of sculptured surface and the æsthetic and symbolic interest of detail being no longer to be depended on to the same degree.

Agra and Delhi may be regarded as the principal centres of the Indo Saracenic style—the former for the renowned Iaj Mahal, for Akbar's deserted capital of Fatehpur Sikri, his tomb at Secundra, the Moti Masjid and palace buildings at the Agra fort. At Delhi we have the great Jumma Masjid, the Fort, the tombs of Humayun, Sufdar Jung, &c., and the unique Quth Minar. Two other great centres may be mentioned, because in each there appeared certain strongly marked individualities that differentiated the varieties of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bijapur on the Deccan, both in the Bombay Presidency.

At Ahmedabad with its neighbours Sirkhey and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion. The Ahmedabad work is probably most famous for the extraordinary beauty of its stone "jail"—or pierced lattice-work as in the palm tree windows of the Sidi Sayyid Masjid.

Bijapur

The characteristics of the Bijapur variety of the style are equally striking. They are perhaps more distinctively Mahomedan than those of the Ahmedabad buildings in that here the dome is developed to a remarkable degree, indeed the tomb of Mahmud—the well known "Gol Gumbaz"—is cited as showing the greatest space of floor in any building in the world roofed by a single dome not even excepting the Pantheon. The lintel also was here practically discarded in favour of the arch. The Bijapur style shows a bold masculine quality and a largeness of structural conception that is unequalled elsewhere in India though in richness and delicacy it does not attempt to rival the work of the further North.

II MODERN

The modern architectural work of India divides itself sharply into two classes. There is first that of the indigenous Indian "Master builder" to be found chiefly in the Indian States, particularly those in Rajputana. Second there is that of British India, or of all those parts of the peninsula wherever Western ideas and methods have most strongly spread their influence, chiefly, in the case of architecture, through the medium of the Department of Public Works. The work of that department has been much animadverted upon as being all that building should not be, but considering it has been produced by men of whom it was admittedly not the *metier*, and who were necessarily contending with lack of expert training on the one hand and with departmental methods on the other, it must be conceded that it can show many notable buildings. Of recent years there has been a tendency on the part of professional architects to turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy initiated in Lord Curzon's Viceroyalty.

To the work of the indigenous master builder public attention has of recent years been drawn with some insistence, and the suggestion has been pressed that efforts should be directed towards devising means for the preservation of what is pointed out—and now universally acknowledged—to be a remarkable survival—almost the only one left in the world—of "living art," but which is threatened with gradual extinction by reason of the spread of Western ideals and fashions. The matter assumed some years ago the form of a mild controversy centring round the question of the then much discussed project of the Government of India's new capital at Delhi. It was urged that this project should be utilised to give the required impetus to Indian art rather than that it should be made a means of fostering European art which needed no such encouragement at India's expense. The advocates of this view appear for the most part to have been adherents of the "indigenous Indian" school of archaeologists already mentioned, and to have based their ideas on their own reading of

the past. They still muster a considerable following not only amongst the artistic public of England and India, but even within the Government services. Their opponents, holding what appears to be the more official view both as to archaeology and art, have pointed to the "death" of all the arts of the past in other countries as an indication of a natural law, and deprecate as waste of energy all efforts to resist this law, or to institute what they have termed "another futile revival"! The British in India, they contend, should do as did the ancient Romans in every country on which they planted their conquering foot. As those were wont to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the task of designing and directing the construction of the principal buildings in the new Capital was accordingly entrusted jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as India is concerned. The building of New Delhi is perhaps too recent an event for the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many.

The controversy of East and West, however vital to the interests of the country's architecture, is too purely technical for its merits to be estimated by the general reader or discussed here. Its chief claim on our attention lies in the fact that it affords an added interest to the tourist, who may see the fruits of both schools of thought in the modern buildings of British India as well as examples of the master builders' work in nearly every native town and bazaar. The town of Jaisalmer in Gwalior State may be cited as peculiarly rich in instances of picturesque modern Indian street architecture, while at Jaipur, Udaipur, Benares, etc., this class of work may be studied in many different forms both civil and religious.

Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon, architecture, the second comprises those applied to articles devoted to religious ritual, military weapons and trappings, domestic accessories and to personal adornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their design was less constricted and their workmanship was more varied.

Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood, metal and textiles.

Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles

are Hindu and Mahomedan. The former may be termed indigenous, dating as it does from remote antiquity, the latter was a variation of the great Arabian style, which was brought into India in the fourteenth century, and has since developed features essentially Indian in character. The art of both Hindus and Mahomedans is based upon religion and the requirements of religious ritual. The obvious expression of this is shown in the different motifs used for their ornament. In Hindu art all natural forms are accepted and employed for decorative purposes, but in that of the Mahomedans, nearly all natural forms are rejected and forbidden. The basis of Mahomedan decoration is therefore mainly geometrical. In each of them, racial characteristics are strikingly exhibited. The keynote of Hindu work is exuberance, imagination and poetry, that of Mahomedan, reticence, intellect and good taste. The Hindus are lavish, and often indiscriminate in their employment of ornament, the Mahomedans use more restraint.

Stone Work—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and scope it ranges, from the massive figures in the Buddhist and Brahminical Cave Temples, and the detached sculpture of the temples of Southern India, to the delicately incised reliefs and elaborately fitted ornament of the Jain temples at Mount Abu. A curious fact in relation to Hindu work is that priority of date appears to have no relation to artistic development. It is not possible to trace, as in the case of Greek, Roman and Medieval craftwork, the regular progressive steps from art in its primitive state to its culminating point and its subsequent decay. Styles in India seem to spring into existence fully developed, the earlier examples often exhibiting finer craftsmanship than those of a later date. There can be little doubt that stone carving in India was simply the application of the wood carvers' art to another material.

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples. The fact that geometrical forms were almost exclusively used dictated lower relief and greater refinement in the carving, while the innate good taste of the designers prompted them to concentrate the ornament upon certain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible, while wonderful decorative use has been made of Arabic and Persian lettering in panels and their framing. To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials, veneering the surfaces of their buildings with polished marble which they decorated with patterns of mosaic composed of jade, agate, onyx and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman, and many wonderful examples of their skill in the form of book rests, tab-

les, thrones, footstools, vases and sword handles are extant to show the height of proficiency they attained.

Wood Work—With a fine range of timbers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings. Unfortunately, much of the ancient woodwork has been destroyed by the action of the climate and the teeming insectivorous life of India, and that which escaped these enemies was wiped out by fire and the sword. It is therefore only possible to conjecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved. Few if any examples of a date earlier than the sixteenth century are to be found. Many of these, and specimens of a later date, to be seen in towns and cities throughout the country, are masterpieces of design and craftsmanship. The carved timber fronts and inner courtyards of houses in Ahmedabad, Nasik and other parts of Western India are notable for their picturesqueness and beauty. The structural beams, the overhanging balconies, with their screens and supporting brackets, being carved in a manner which unites richness of effect with good taste and propriety. Of furniture, as the term is now understood, few examples were in use in India before Europeans introduced their own fashions. These were confined to small tables and stools, book rests, clothes chests and screens, the designs of which conformed somewhat closely to the architectural style of the period. Many of these were decorated with inlays of coloured woods, ivory and metal, while in some cases the wooden basis was entirely plated with copper, brass or silver. In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving, executed with the attention to detail and the finish generally associated with the carving of ivory. Coloured lac was freely used to decorate many articles of furniture, especially those turned on the lathe, and rich colour effects were obtained in this, perhaps the most distinctive and typically Indian development of decoration as applied to woodwork.

Metal Work—With the exception of weaving, the metal working industry employed and still employs the greatest number of artistic craftsmen in India. Copper and brass have always been the two metals most widely used for domestic purposes by Mahomedans and Hindus. The shapes of many of these humble vessels are among the most beautiful to be found in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human hand, and the shapes are those which grow naturally from the working of the material with the simplest implements. In the technical treatment of brass and copper Indian craftsmen have shown a taste and skill unsurpassed by those of other nations, except in the department of fine casting. In this, and in the working of gold and silver, a higher standard of technical and constructive exactness has been reached by the metal workers of Europe and Japan. It may be taken as an axiom that the more beautiful the shape of an article is, and this especially

applies to metal work, the less need exists for the decoration of its surface. It is equally true that the highest test of craftsmanship is the production of a perfect article without any decoration. The reason being that the slightest technical fault is apparent on a plain surface, but can be hidden or disguised of one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of perfectly plain work from the hands of the gold and silversmiths of India is rarely to be met with. Much of the excessive and often inappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose.

Textiles—The textile industry is the widest in extent in India and is that in which her craftsmen have shown their highest achievements. Other countries, east and west of India have produced work equal at least in stone, wood, and metal, but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken fabrics. Some of the products of the looms of Bengal are marvels of technical skill and

perfect taste, while the plum bloom quality of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repetition, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the mills of Lancashire. But for beauty of surface and variety of texture no machine-made fabrics have ever equalled the finest handwork of the weavers of India. Many of the most beautiful varieties of Indian textile work have disappeared, killed by the competition of the power loom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving. The printed silks and calicoes of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations, whose craftsmen learnt many valuable lessons from the technical skill and artistic taste they display. Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was introduced from Persia, but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or design.

Archæology.

The ancient monuments of India are as varied as they are numerous. Until a few years ago the earliest known were the brick and stone erections of the Maurya period, a group of mounds at Laurya Nandangarh illustrative of the Vedic funeral customs and assignable roughly to the 7th or 8th century B.C., and some rough stone walls at the ancient city of Rajagriha of about the same period. The absence of structures of an earlier period was then supposed to be due to the fact that all previous architecture had been of wood and had completely perished. The recent excavations, however, at Mohenjo-daro in Sind and at Harappa in the Punjab have completely revolutionised ideas on this subject and proved that as far back as the 3rd or 4th millennium B.C. and probably much earlier still India was in possession of a highly developed civilization with large and populous cities, well built houses, temples and public buildings of brick and many other amenities enjoyed at that period by the peoples of Mesopotamia and Egypt. Both at Mohenjo-daro and Harappa there are the remains of some 5 or 6 cities superimposed one upon the ruins of another.

The structures that have so far been exposed at Mohenjo-daro belong to the three latest cities on the site. Those of the third or earliest are the best in style, those of the first the poorest. Most of the structures are dwelling houses or shops, but there are others which appear to have been temples and one—of particularly massive proportions—is a large bath, surrounded by fenestrated galleries and halls. All were built of well burnt brick and most of them were of two or more storeys with staircases giving access to the upper rooms. In and around the ruins have been found many minor antiquities

including gold and silver jewellery, engraved seals of stone and ivory and paste copper implements and vessels, terracotta figurines and toys, shell ornaments and potteries both painted and plain.

These discoveries establish the existence in Sind and the Punjab during the 4th and 3rd millennia B.C. of a highly developed city life and the presence in many of the houses, of wells and bathrooms as well as an elaborate drainage system betoken a social condition of the citizens at least equal to that found in Sumer and superior to that prevailing in contemporary Babylon and Egypt. The inhabitants of these cities lived largely no doubt by agriculture and it is a point of interest that the specimens of wheat found at Mohenjo-daro resemble the common variety grown in the Punjab to day. Besides bread, their food appears to have included beef, mutton, and pork, the flesh of tortoises, turtles and gharial, fresh fish from the Indus and dried fish from the sea coast. Among their domesticated animals were the humped Indian bull, the buffalo, a short horned bull, the sheep, pig, dog and elephant. Besides gold and silver they used copper, tin, bronze and lead, they were familiar with the arts of spinning and weaving and with the cultivation of cotton and had attained a high degree of proficiency in the jewellery and potter arts.

That they possessed a well developed system of writing is evidenced by the discovery of over a thousand tablets engraved with well executed animal devices and pictographic legends in an unknown script. The method of disposal of the dead at Mohenjo-daro is uncertain but at Harappa two types of burial have been met

with namely, complete burials along with funerary pottery, and "pot burials. Only 27 of the latter have been examined and these were found to contain skulls and human bones and are seemingly fractional burials.

This Indian Valley culture has now been traced as far as Rupar in the Ambala District, relatively close to the watershed of the Sutlej and Jumna and it is therefore highly probable that this civilization was confined to the Indus Valley and there can hardly be any reasonable doubt that future researches will trace it into the valley of the Ganges. Of the long period of more than 2,000 years that separate the pre-historic monuments referred to above from the historic period of India little or nothing is yet known but there is every hope that this gap in our knowledge may be filled in by further excavations. From the time of the Mauryas to the 3rd century B.C. the history of architecture and the formative arts of India is clear and can be traced with relative precision. The financial stringency caused by the world economic depression caused almost the suspension of excavation in these areas.

Monumental Pillars.—The monuments which have come down to us from the Maurya period include besides the caves to be referred to below, the wooden palisade (4th century B.C.) which surrounded the ancient city of Pataliputra (modern Patna) and of which a large section has been exposed, the rock and pillar edicts of Asoka (c. 250 B.C.) the remains of a large pillared hall constructed by the same emperor at Pataliputra, a number of brick stupas and a monolithic rail which originally surmounted an Asoka stupa at Sarnath near Benares. Altogether thirteen pillars of Asoka are known besides the Elephant capital of a 14th at Sankisa and a fragment of a 15th at Benares. Ten of them bear his inscriptions. Of these the Lauriya Vandana pillar column in the Champaran District is practically uninjured. The capital of each column like the shaft, was monolithic, and comprised three members viz., a Persepolitan bell abacus, and crowning sculpture in the round. By far the best capital of Asoka's time was that exhibited at Sarnath near Benares. The four lions standing back to back on the abacus are carved with extraordinary precision and accuracy, and originally supported a wheel symbolizing the law of piety preached by the Buddha. Several pieces of this wheel were found and are now preserved in the Archaeological Museum at Sarnath. Of the post-Asokan period one pillar (B.C. 150) stands to the north east of Benares in the Gwalior State another in front of the cave of Karli (A.D. 70) and a third at Fran in Central Provinces belonging to the 5th Century A.D. All these are of stone but there is one of iron also. It is near the Qutb Minar at Delhi, and an inscription on it speaks of its having been erected by a king called Chandragupta II (A.D. 375-413) of the Gupta dynasty. It is wonderful to find the Hindus at that age forging a bar of iron larger than any that have been forged even in Europe to a very late date and not frequently even now. Pillars of later style are found all over the country, especially in the Madras Presidency. No less than twenty exist

in the South Kanara District. A particularly elegant example faces a Jaina temple at Mudabidri, not far from Mangalore. An interesting discovery was lately made concerning the Iron Pillar at Dhar, Central India. The Pillar is like that at New Delhi one of those large sized products of ancient Indian metal workers which have excited the admiration of modern metal burglars. The Pillar is now broken in three pieces, measuring together more than 43 feet in length and there is reason to believe that a fourth piece 7 feet long has disappeared. The date and purpose of the Pillar were uncertain until a recent discovery which is of an inscription of the time of the Paramara King Bhoja of Dhar, A.D. 1018-60 fragments of which were found in a Dhar mosque which occupies the site of a grammar school established by that King. This is held to fix the period when the pillar was made. A ninth monastery lately brought to light at Nalanda the site of one of the ancient universities contained 75 bronze or copper and stone images representing Buddha and Brahma (all gods and goddesses). Bronze statues previously found at Nalanda had been secured from a Pala king at Bengal at the request of Lalitpura of the Saikendra dynasty of Suvarnadvipa (Sumatra) and it was surmised that these statues were either made at Nalanda by Javanese artists or brought from Java. The discovery of the new lot of bronze statues in a Monastery which has nothing to do with the Sumatran king is held finally to disprove this conclusion and to show that all the bronze images discovered at Nalanda were the work of local metal casters.

Topes.—*Stupas* known as *dagabas* in Ceylon and commonly called *topes* in North India, were constructed either for the safe custody of relics hidden in a chamber often near the base or to mark the scene of notable events in Buddhist or Jaina legends. Though we know that the ancient Jains built *stupas* no specimen of Jaina *stupas* is now extant. A notable structure of this kind which existed until recent times was the *Juna stupa* which stood on the Kankali Hill site at Muttra and yielded a large number of Jaina sculptures now deposited in the Provincial Museum at Lucknow. Of those belonging to the Buddhists, the great *Tope of Sauchi* in Bhopal is the most intact and entire of its class. It consists of a low circular drum supporting a hemispherical dome of less diameter. Round the drum is an open passage for circumambulation, and the whole is enclosed by a massive stone railing with lofty gates facing the cardinal points. The gates are essentially wooden in character and are carved inside and out, with elaborate sculptures. The original *stupa* which was of brick and not more than half the present dimensions, was apparently erected by Asoka at the same time as his lion-crowned pillar near the south gate but as Sir John Marshall's recent explorations have conclusively shown, its outer casing of stone railing and the gateways were at least 150 and 200 years later, respectively. Other famous Buddhist *stupas* that have been found are those of Sarnath, Bharhut, Benares, Allahabad and Jubbulpore, Amravati in the Madras Presidency, and Piprahwa on the Nepalese frontier. The *tope* proper at Bharhut has entirely disappeared, having been utilised

for building villages, and what remained of the rail has been removed to the Calcutta Museum. The bas-reliefs on this rail which contain short inscriptions and thus enable one to identify the scenes sculptured with the *Jatakas* or Birth Stories of the Buddha give it a unique value. The *stupa* at Auravati also no longer exists and portions of its rail, which is unsurpassed in point of elaboration and artistic merit, are now in the British and Madras Museums. The *stupa* at Piprahwa was opened by Mr. W. C. Peppe in 1898, and a steatite or soap stone reliquary with an inscription or it was uncarved. The inscription according to many scholars speaks of the relics being of the Buddha himself and enshrined by his kinsmen the Sakyas. If this interpretation is correct, we have here one of the *stupas* that were erected over the ashes of Buddha immediately after his demise.

Caves.—Of the rock excavations which are one of the wonders of India, nine tenths belong to Western India. The most important groups of caves are situated in Bhajji, Bodhi, Karli, Kanheri, Junnar, and Nasik in the Bombay Presidency, Ellora and Ajanta in Nizam's Dominions, Barabar and Nagarjuni 16 miles north of Gaya, and Udayagiri and Khandagiri 20 miles from Cuttack in Orissa. The caves belong to the three principal sects into which ancient India was divided, viz. the Buddhists, Hindus and Jains. The earliest caves so far discovered are those of Barabar and Nagarjuni which were excavated by Asoka and his grandson Dasaratha and dedicated to Ajivikas, a naked sect founded by Mankhaliputta Gosala. The next earliest caves are those of Bhajji, Pitalkhora and cave No. 9 at Ajanta and No. 19 at Nasik. They have been assigned to 200 B.C. by Fergusson and Dr. Burgess. But there is good reason to suppose from Sir John Marshall's recent researches and from epigraphic considerations that they are considerably more modern. The Buddhist caves are of two types—the *chaityas* or chapel caves and *viharas* or monasteries for the residence of monks. The first are with vaulted roofs and horse shoe shaped windows over the entrance and have interiors consisting of a nave and side aisles with a small *stupa* at the inner circular end. They are thus remarkably similar to Christian basilicas. The second class consist of a hall surrounded by a number of cells. In the later *viharas* there was a sanctum in the centre of the back wall containing a large image of Buddha. Hardly a *chaitya* is found without one or more *viharas* adjoining it. Of the Hindu cave temples that at Elephanta near Bombay is perhaps the most frequented. It is dedicated to Siva and is not earlier than the 7th century A.D. But by far the most renowned cave temple of the Hindus is that known as Kailasa at Ellora. It is on the model of a complete structural temple but carved out of solid rock. It also is dedicated to Siva and was excavated by the Rashtrakuta king, Krishna I. (A.D. 768), who may still be seen in the paintings in the ceilings of the upper porch of the main shrine. Of the Jain caves the earliest are at Khandagiri and Udayagiri, those of the mediæval type, in Indra Sabha at Ellora and those of the latest period, at Ankai in Nasik. The ceilings of many of these caves were once adorned with fresco paintings. Perhaps, the best preserved among

these are those at Ajanta, which were executed at various periods between 350-650 A.D. and have elicited high praise as works of art. Copies were first made by Major Gill but most of them perished by fire at the Crystal Palace in 1866. The lost ones were again copied by John Griffiths of the Arts School Bombay, half of whose work was similarly destroyed by a fire at South Kensington. They were last copied by Lady Herringham during 1909-11. Her pictures which are in full scale are at present exhibited at the Indian Section of the Victoria and Albert Museum, South Kensington, and have been reproduced in a volume brought out by the India Society. Another group of caves whose equally interesting though less well preserved paintings exist is found in Bagh in Gwalior State. These caves form the subject of a monograph issued by the India Society.

Gandhara Monuments.—On the north-west frontier of India, and only known as Gandhara are found a class of numerous, ruined monasteries and buried *stupas*, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The use of Corinthian capitals, friezes of nude figures bearing a long earland, winged Atlantes without number and a host of individual motifs clearly establish the influence of Hellenistic art. The mound at Peshawar, locally known as Shah Jiki Dheri, which was explored in 1904, brought to light several interesting sculptures of this school together with a reliquary casket, the most remarkable bronze object of the Gandhara period. The inscription on the casket left no doubt as to the mound being the *stupa* raised over a portion of the body relics of Buddha by the Indo-Scythian king Kanishka. They were presented by Lord Minto's Government to the Buddhists of Burma and are now enshrined at Mandalay. To about the same age belong the *stupas* at Manikyala in the Punjab opened by Ranjit Singh's French Generals Ventura and Court, in 1820. Some of them contained coins of Kanishka. There was brought to light at Taxila during the winter of 1932-33 what proved to be the largest monastery so far unearthed in north-west India. In it there was an inscription dated in the year 134 of an unspecified era and roughly corresponding with the year 76 A.D. The record is regarded as important because of the assistance it gives in dating Gandhara sculptures in various parts.

Structural Temples.—Of this class the earliest examples are the Varaha temple at Deogarh, District Jhansi, another temple at Sanchi, the brick temples at Bhitarwar in the district of Cawnpore, and the temples at Igurwa, Nachna, Iran and Bhimnall of which belong to the Gupta period and a later one at Tigawa in the Central Provinces. In South India we have two more examples, viz., Ladkhan and Durga temples at Aihole in Bijapur, the latter of which cannot be later than the eighth century A.D. The only common characteristic is flat roofs without spires of any kind. In other respects they are entirely different and already here we mark the beginning of the two styles, Indo-Aryan and Dravidian, whose differences become more and more pronounced from the 7th century onwards. In the Indo-Aryan style, the most prominent ones tend to the perpendicular, and in the Dravidian to the horizontal. The

salient feature of the former again is the curvilinear steeple and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Bhuvanewar in Orissa, Khajuraho in Bundelkhand, Anant in Jodhpur and Dilwara on Mount Abu. One of the best known groups in the Dravidian style is that of the Mamallapuram Rathas, or 'Seven Pagodas' on the seashore to the south of Madras. They are each hewn out of a block of granite, and are rather models of temples than *rathas*. They are the earliest examples of typical Dravidian architecture, and belong to the 7th century. To the same age has to be assigned the temple of Kailasasrath at Conjevaram and to the following century some of the temples at Ahole and Pattadakal of the Bijapur District, Bombay Presidency, and the monolithic temple of Kailasa at Ellora, referred to above. Of the later Dravidian style the great temple at Tanjore and the Srirangam temple near Trichinopoly are the best examples.

Intermediate between these two main styles comes the architecture of the Deccan, called Chalukyan by Ferguson. In this style the plan becomes polygonal and star-shaped instead of quadrangular, and the high storeyed spire is converted into a low pyramid in which the horizontal treatment of the Dravidian is combined with the perpendicular of the Indo-Aryan. Some fine examples of this type exist at Dambal, Rattihah, Tiliwalli and Hangal in Dharwar, Bombay Presidency, and at Ittari and Warangal in Nizam's Dominion. But it is in Mysore among the temples at Halebidu and Somnathpur that the style is found in its full perfection.

Inscriptions.—We now come to inscriptions, of which numbers have been brought to light in India. They have been engraved on varieties of materials, but principally on stone and copper. The earliest of these are found incised in two distinct kinds of alphabet known as Brahmi and Kharosthi; the latter being confined to the north-west of India. The Brahmi was read from left to right and from it have been evolved all the modern vernacular scripts of India. The Kharosthi was written from right to left and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.C. It was prevalent up to the 4th century A.D. and was supplanted by the Brahmi. The earliest datable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks and another on pillars. They have been found from Shahbazgarhi 40 miles north-east of Peshawar to Nigihla in the Nepal Terai, from Girnar in Kathiawar to Dhauli in Orissa, from Kalsi in the Lower Himalayas to Siddhapur in Mysore showing by the way the vast extent of territory held by him. The reference in his Rock Edicts to the five contemporary Greek Princes, Antiochus II of Syria, Ptolemy Philadelphus, and so forth is exceedingly interesting, and fixes B.C. 269 as the date of his coronation. His Rummindei pillar inscription, again discovered in Nepal Terai, now settles, beyond all doubt, the birth-place of Buddha which was for long disputed. Another noteworthy record is the

inscription of the Besnagar pillar. The pillar had been known for a long time but Sir John Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion, who is described as an envoy of King Antialcidas of Taxila. Heliodoros is herein called a *Bhagavata*, which shows that though a Greek he had become a Hindu and presumably a Vaishnava. Another inscription worth noticing and especially in this connection is that of Cave No. 10 at Nasik. The donor of this cave, Ushavadata who calls himself a Saka and was thus an Indo-Scythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmins and as having annually fed one hundred thousand Brahmins. Here is another instance of a foreigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are 'forlorn and blind'.

Saracenic Architecture.—This begins in India with the 13th century after the permanent occupation of the Muhammadans. Their first mosques were constructed of the materials of Hindu and Jain temples, and sometimes with comparatively slight alterations. The mosque called *Ahrar din-ka jompra* at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under the various dynasties, imperial and local. The early Pathan architecture of Delhi was massive and at the same time was characterised by elaborate richness of ornamentation. The Qutb Minar and tombs of Altamash and Ala-ud-din Khilji are typical examples. Of the Sharqi style we have three mosques in Jampur with several tombs. At Mandu in the Dhar State a third form of Saracenic architecture sprang up, and we have here the Jamī Masjid, Hoshang's tomb, Jahiz Mahal and Hindola Mahal as the most notable instances of the secular and ecclesiastical styles of the Malwa Pathans. The Muhammadans of Bengal again developed their own style, and Pandua, Malda and Gaur testify with the ruins of the buildings of this type, the importance of which are the Adina Masjid of Iskandar Shah, the Ikhlaki mosque, Kadam Rasul Masjid, and so forth. The Bahmani dynasty of Gulbarga and Bidar were also great builders and adorned their capitals with important buildings. The most striking of these is the great mosque of Gulbarga which differs from all mosques in India in having the whole central area covered over so that what in others would be an open court is here roofed by sixty three small domes. Of the various forms which the Saracenic architecture assumed "says Ferguson, that of Ahmedabad may probably be considered to be the most elegant. It is notable for its carved stone work, and the work of the perforated stone windows in Sidi Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured *Mihrabs* and domed and panelled roofs is so exquisite that it will rival anything of the sort executed elsewhere at any period. No other style is so essentially Hindu. In complete con-

trast with this was the form of architecture employed by the Adil Shahi dynasty of Bijapur. There is here relatively little trace of Hindu forms or details. The principal buildings now left at Bijapur are the Jami Masjid, Gazan Mahal, Mihlar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features. Noteworthy among the emperors' buildings are the tomb of Humayun, and the palaces at Fatehpur Sikri and Agra. Of Jehangir's time his mosque at Lahore and the tomb of Imdad ul daula are the most typical structures. "The force and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail. And it was during his reign that the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wife Mumtaz Mahal was constructed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time.

Archæological Department—As the archæological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archæological Department. The work of this Department is primarily two fold: conservation and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archæological Survey of India and entrusted it to General (afterwards Sir) Alexander Cunningham, who was also the first Director General of Archæology. The next advance was the initiation of the local surveys in Bombay and Madras three years after. The work of these surveys however was restricted to antiquarian research and description of monuments and the task of conserving old buildings was left to the fitful efforts of the local Governments often without expert guidance or control. It was only in 1874 that the Government of India under Lord Lytton woke to this deplorable condition and sanctioned a sum of 3½ lakhs to the repair of monuments in United Provinces and soon after appointed a conservator Major Cole who did useful work for three years. Then a reaction set in and his post and that of the Director General were abolished. The first systematic step towards recognising official responsibility in conservation matters was taken by Lord Curzon's Government

who established seven of the eight Archæological Circles that now obtain, placed them on a permanent footing and united them together under the control of a Director General, provision being also made for subsidising local Governments out of imperial funds, when necessary. The Ancient Monuments Preservation Act was passed for the protection of historic monuments and relics especially in private possession and also for State control over the excavation of ancient sites and traffic in antiquities. Under the direction of Sir John Marshall Kt. C.I.E. late Director General of Archæology a comprehensive and systematic campaign of repair and excavation was prosecuted. Under later directors general it was continued with equal vigour (the present D. G. is Rao Bahadur K. N. Dikshit) and the result of it is manifest in the present altered conditions of many old and historic buildings and in the scientific excavation of buried sites such as Taxila, Patalliputra Sanchi in the Bhopal State, Sarnath near Benares, Nalanda in Bihar, Pharapur in Bengal and Nagarjunkonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjodaro in Sind. Of all these works those of most general interest are the Mohenjodaro excavation for here the Archæological Department have unearthed remains of prehistoric cities dating back to 3000 B.C. and further. The Archæological Survey has devoted considerable attention to the organization and development of museums as centres of research and education. It maintains the archæological section of the Indian Museum at Calcutta, small museums at the Taj and at the Forts at Agra, Delhi and Lahore, the Central Asian Antiquities Museum at New Delhi and has erected local museums at the excavated sites of Taxila, Sarnath, Nalanda, Mohanjodaro and Harappa with the object of keeping the small movable antiquities recovered at these sites in close association with the structural remains to which they belong so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some distant place.

The epigraphical material dealt with by the Archæological Survey has enabled the history and chronology of the various dynasties of India to be established on a firmer basis and in greater detail. The Epigraphia India is now in the 21st volume, a revised edition of the Asoka inscriptions has been recently published while the companion volume of post-Asokan Brahmi inscriptions is under preparation. A volume of non-Asokan Kharoshthi inscriptions was published two years ago.

Indian Time.

For many years Indian time was in a state of chaotic confusion. What was called Madras or Railway time was kept on all the railways and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Governments,

and through them to all local bodies a long letter which reviewed the situation and made suggestions for the future. The essential points in this letter are indicated below.

"In India we have already a standard time which is very generally though by no means universally, recognised. It is the Madras local time, which is kept on all railway and telegraph lines throughout India and which is 5h 21m 10s in advance of Greenwich. Similarly

Rangoon local time is used upon the railways and telegraphs of Burma, and is 6h 24m 47s ahead of Greenwich. But neither of these standards bears a simple and easily remembered relation to Greenwich time.

The Government of India have several times been addressed by Scientific Societies, both in India and in England, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advises the Government of India upon matters connected with its observatories, writes—'The Committee think that a change from Madras time to that corresponding to a longitude exactly 54 hours east of Greenwich would be an improvement upon the existing arrangements, but that for international scientific purposes the hourly zone system, making the time 5 hours in advance of Greenwich in the west, and 6 hours in advance in the east of India would be preferable.'

'Now if India were connected with Europe by a continuous series of civilised nations with their continuous railway systems, all of which had adopted the European hour zone system, it would be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as she is as much isolated by uncivilised States as Cape Colony is by the ocean, it is open to her to follow the example of that and some other similarly situated colonies and to adopt the first suggestion.

'It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard. In the Madras time of the railways, and the substitution for it of a double standard would appear to be a retrograde step, while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike, and it is certain that the double standard would puzzle the latter greatly, while by emphasising the fact that railway differed from local time I might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India. The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour, whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs.

'It is proposed therefore, to put on all the railway and telegraph clocks in India by 8m 50s. They would then represent a time 54

hours faster than that of Greenwich, which would be known as **Indian Standard Time** and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures representing minutes, and F and S meaning that the standard time is in advance of or behind local time respectively.—Dibrugarh 51 S, Shillong 38 S, Calcutta 24 S, Allahabad 2 F, Madras 9 F, Lahore 33 F, Bombay 39 F, Peshawar 44 F, Karachi 62 F, Quetta 62 F.

'This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon respectively, and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that instead of using Rangoon Standard time as at present, which is 6h 24m 47s in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese railways and telegraphs which would be one hour in advance of Indian Standard Time, or 64 hours ahead of Greenwich time, and would correspond with 97° 30' F longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

'Standard time will thus have been fixed for railways and telegraphs over the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable is a matter which must be left to the local community in each case.

It is difficult to recall, without a sense of bewilderment, the reception of this proposal by various local bodies. To read now the fears that were entertained if Standard Time was adopted is a study in the possibilities of human error. The Government scheme left local bodies to decide whether or not they would adopt it. Calcutta decided to retain its own local time and to day Calcutta time is still twenty four minutes in advance of Standard Time. In Bombay the first reception of the proposal was hostile, but on reconsideration the Chamber of Commerce decided in favour of it and so did the Municipality. Subsequently the opposing element in the Municipality brought in a side resolution by which the Municipal clocks were put at Bombay time which is thirty nine minutes behind Standard Time. On the 1st January 1906 all the railway and telegraph clocks in India were put at Indian Standard Time, in Burma the Burma Standard Time became universal. Calcutta retains its former Calcutta time, but in Bombay local time is retained only in the clocks which are maintained by the Municipality and in the establishments of some orthodox Hindus. Elsewhere Standard Time is universal.

Coinage, Weights and Measures

As the currency of India is based upon the rupee, statements with regard to money are generally expressed in rupees, nor has it been found possible in all cases to add a conversion into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs 1 000=£100). But after 1873 owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England and also to relieve foreign trade and finance from the inconvenience due to constant and unforeseen fluctuations in exchange, it was resolved in 1893 to close the mints to the free coinage of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the rupee to 1s 4d and then introduce a gold standard at the rate of Rs 15=£1. From 1899 onwards the value of the rupee was maintained, with insignificant fluctuations, at the proposed rate of 1s 4d until February 1920 when the recommendation of the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. Instead of 1s 4d was adopted. This was followed by great fluctuations. (See article on Currency System)

Notation—Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions but in lakhs and crores. A **lakh** is one hundred thousand (written out as 1,00,000) and a **crore** is one hundred lakhs or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs 1 00 00 000) may be read as the equivalent of £10 000 before 1873, and as the equivalent of (about) £6 667 after 1899, while a crore of rupees (Rs 1 00 00 000 000) may similarly be read as the equivalent of £1 000 000 before 1873, and as the equivalent of (about) £666 667 after 1899. With the rupee at 1s 6d a lakh is equivalent to £7,000 and a crore is equivalent to £750 000.

Coinage—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was formerly reckoned as 1½d it may now be considered as exactly corresponding to 1d. The Anna is again sub-divided into 12 pies.

Weights—The various systems of weights used in India combine uniformity of scales with immense variations in the weights of units

The scales used generally throughout Northern India and less commonly in Madras and standardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maund=40 seers, one seer=80 tolas. The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombay Presidency. In the standard system the tola is of 180 grains and seer thus weighs 2 057 lbs and the maund 82 28 lbs. This standard is also used in official reports.

Retail—For calculating retail prices, the universal custom in India is to express them in terms of seers to the rupee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices not money prices. When the figure of quantity goes up this of course means that the price has gone down, which is at first sight perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England especially at small shops where pennyworths of many groceries can be bought. Eggs likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading) the following scale may be adopted—based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s 4d, 1 seer per rupee=(about) 3 lb. for 2s, 2 seers per rupee=(about) 6 lb. for 2s and so on.

The name of the unit for square measurement in India generally is the **bigha**, which varies greatly in different parts of the country. But areas have been expressed in this work either in square miles or in acres.

Proposed Reforms—Indian weights and measures have never been settled upon an organised basis suitable for commerce and trade characteristic of the modern age. They vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages were self-contained and before roads and railways opened up trade between one and the other. If we take for instance the maund denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the maund as between district and district the state of affairs is worse. Thus in the United Provinces alone, the maund of sugarcane weighs 48½ seers in Cawnpore, 40 in Muttra, 72½ in Gorakhpur, 40 in Agra, 50 in Moradabad, 4½ in Saharanpur, 50 in Bareilly, 48 in Fyzabad, 48½ in Shahjehanpur, 51 in Goshangunge. The maund varies throughout all India from the Bengal or railway maund of 82 2/7 lbs to the Factory maund of 74 lb 10 oz 11 drs, the Bombay maund of 28 lbs which apparently answers to the Forest Department maund in use at the

Fuel Depot, and the Madras maund, which some authorities estimate at 25 lbs and others at 24 lbs and so on

Committees of Inquiry—These are merely typical instances which are multiplied indefinitely. There are variations of every detail of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy. Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal units of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted a standard tola (180 grains) seer (80 tola) and maund (40 seers) and it was hoped that this would act as a successful lead which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the whole question in consultation with the provincial Governments in 1890-1894 and various special steps have at different times been taken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an *ad interim* report which has been issued for public discussion. In brief it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over large areas subject to many diverse conditions of trade and social life would not result in bringing about the desired reform so successfully as a lead supplied by local legislation based on practical experience. The want of coherence, *savoir faire* or the means of co-operation among the people at large pointed to this conclusion. The Committee pointed out that a good example of the results that will follow a good lead is apparent in the East Khandesh District of the Presidency, where the District Officer, Mr. Simcox, gradually, during the course of three years, induced the people to adopt throughout the district uniform weights and measures, the unit of weight in this case being a tola of 180 grains, but the committee abstained from recommending that the same weights and measures should be adopted over the whole Presidency preferring that a new system start in any area should be as nearly as possible similar to the best system already prevailing there.

Committee of 1913—The whole problem was again brought under special consideration by the Government of India in October, 1913, when the following committee was appointed to inquire into the entire subject anew—

Mr C. A. Silberrad (*President*)
Mr A. Y. G. Campbell
Mr Rustomji Fardoonji

This Committee reported, in August 1915, in favour of a uniform system of weights to be adopted in India based on the 180 grain tola. The report says—Of all such systems there is no doubt that the most widespread and best known is that known as the Bengal or Indian Railway weights. The introduction of this system involves a more or less considerable change of system in parts of the United Provinces (Gorakhpur, Barilly and neighbouring areas), practically the whole of Mitrar, parts of the Punjab (rural portions of Amritsar and neighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province. Burma has at present a separate system of its own which the committee think it should be permitted to retain. The systems recommended are—

FOR INDIA

8 kha-kh	= 1 chawal
8 chawal	= 1 rattī
8 rattī	= 1 masha
12 masha or 4 tanks	= 1 tola
5 tola	= 1 chatak
16 chataks	= 1 seer
40 seers	= 1 maund

FOR BURMA

2 small ywes	= 1 large ywe
4 large ywes	= 1 pe
2 pes	= 1 mu
5 pes or 2½ mu	= 1 mit
1 mat	= 1 ngann
2 nganns	= 1 tikal (wise)
100 tikals	= 1 pelktha or

The tola is the tola of 180 grains, equal to the rupee weight. The ywe has recently been fixed at 360 lbs or 140 tolas.

Government Action—The Government of India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly, they announced their decision not to adopt all India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading 'Weights', near the commencement of this article. This having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights the Government of India will be prepared to undertake such legislation but at present they consider that any such step would be premature.

Provincial Government Action—Amongst the various Provincial Governments in India, the Bombay Government is the only one which has taken action to standardize the weights and measures, etc., used in trade in the Presidency.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Iamiks etc. nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders including Aryans, Scythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided by Sir Henry Huxley (Caste, Tribe and Race, Indian Census Report 1901, The Gazetteer of India, Ethnology and Caste, Volume I, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negritos will be disregarded.

The Turko-Iranian represent the Baluch, Brabui and Afghans of Baluchistan and the North-West Frontier Province. Probably formed by a fusion of Turk and Persian elements, in which the former predominate. Stature above mean, complexion fair, eyes mostly dark but occasionally grey, hair on face plentiful, head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Panjab, Putana, and Kashmir, and having as its characteristic members the Rajputs, Khattris and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall, complexion fair, eyes dark, hair on face plentiful, head long, nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmins, the Kunbis and the Coorgs of Western India. Probably formed by a mixture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight, in the lower Dravidian elements are more pronounced.

The Aryo-Dravidian or Hindustani, found in the United Provinces, in parts of Rajputana and in Bihar and represented in its upper strata by the Hindustani Brahman and in its

lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Aryan and Dravidian types. The head form is long with a tendency to medium, the complexion varies from lightish brown to black, the nose ranges from medium to broad, being always broader than among the Indo-Aryans, the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Aryans while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a mixed one yet its characteristics are readily deniable and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The distinctive feature of the type, the character which gives the real clue to its origin and stamps the Aryo-Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Pargal Brahmins and Kayasthas, the Mahomedans of Eastern Bengal and other groups peculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad, complexion dark, hair on face usually plentiful, stature medium, nose medium with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Himalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa, the western limit coincides approximately with the hilly country of Chota Nagpur and Western Bengal.

The Mongoloid type of the Himalayas, Nepal, Assam and Burma, represented by the Kants of Lahul and Kulu, the Lepchas of Darjeeling and Sikkim, the Thabans, Murmis and Gurungs of Nepal, the Bodo of Assam and the Burmese. The head is broad, complexion dark, with a yellow tinge, hair on face scanty, stature short or below average, nose fine to broad, face characteristically flat, eyelids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chota Nagpur. Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extent by the admixture of Aryan, Scythian, and Mongoloid elements. In typical specimens the stature is short or below mean, the complexion very dark, approaching black, hair plentiful with an occasional tendency to curl, eyes dark, head long, nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian types, occupies the oldest geological formation in India, the medley of forest clad ranges, terraced plateau, and undulating plains which stretch roughly speaking, from the Vindhya to Cape

Comorin On the east and the west of the peninsular area the domain of the Dravidian is continuous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro like proportion of his nose. In the upper strata of the vast social

deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. They melt into each other insensibly and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the transformation had taken place.

TOWN AND COUNTRY

The progress of urbanisation in India—if there has been any progress at all—has been very slow during the past thirty years, the whole increase being a little more than one per cent. The percentage of the urban population to the total is only 11, which however shows an increase of 0.8 per cent since the last census due partly to the natural increase of the pre-existing urban population and partly to migration from rural areas. The percentage of urban population ranges from 3.4 in Assam to 22.6 in Bombay which is the most urbanised of the major provinces. Compared to this the urban population in France is 49 per cent, in Northern

Ireland 50.8 per cent, in Canada 53.7 per cent, in the U.S.A. 56.2 per cent and in England and Wales 80 per cent.

The greatest degree of growth has been in the number of towns with a population of from 20,000 to 50,000, the total population of which is now nearly double that of towns of 50,000 to 100,000. All classes of towns have increased in population, except those with populations of between 5,000 and 10,000 and those having under 5,000. Thus the large industrial and semi-industrial towns have benefited at the expense of the smaller towns.

DISTRIBUTION OF POPULATION IN GROUPS OF TOWNS ACCORDING TO SIZE AND IN RURAL TERRITORY

Class of Places	1931		1921		Percentage of total Population				
	Places	Population	Places	Population	31	21	11	01	91
Total Population	699,406	352,837,778	687,981	318,942,480	100	100	100	100	100
Rural Areas	696,831	313,852,351	685,665	286,467,204	89	89	89	69	100
Urban Areas	2,575	38,985,427	2,316	32,475,276	11	10	2	9	9
Towns having 100,000 and over	38	9,674,032	35	8,211,704	2	7	2	6	2
Towns having 50,000 to 100,000	65	4,572,113	54	3,517,749	1	3	1	1	1
Towns having 20,000 to 50,000	268	8,091,286	200	5,968,794	2	3	1	9	1
Towns having 10,000 to 20,000	543	7,449,402	451	6,220,889	2	1	1	9	2
Towns having 5,000 to 10,000	987	6,992,832	885	6,223,011	2	2	1	9	2
Towns having under 5,000	674	2,205,760	691	2,343,129	6	7	6	6	6

Migration—Of the population of the Indian Empire only 730,546 were enumerated as born in other parts of the world. Of these 595,078 are of Asiatic birth, 118,089 of European birth and 17,379 others. The emigration from India is approximately 2.5 million, the balance of migration being against India.

Nearly all of these migrants are resident in other parts of the British Empire. There are about 165,500 Indians in the Union of South Africa, of whom 142,979 are found in Natal. There are 26,759 in Kenya, the other overseas Indian communities in order of size are Mauri-

tius 268,870. Trinidad and Tobago 138,667. British Guiana 130,540. Fiji 75,117 and much smaller numbers in Tanganyika, Jamaica, Zanzibar, Uganda and Hong Kong. There are about 11,000 Indians scattered in numbers of under 2,000 in various other parts of the British Empire and probably about 9,000 in the British Isles. The total number of Indians in the Empire outside India is 2,300,000. Outside the Empire there are about 100,000 Indians, 25,000 in the Dutch East Indies, 35,000 in Dutch Guiana, 7,500 in Madagascar and smaller numbers in Portuguese East Africa, the U.S.A., Persia, Iraq and other countries.

The Chart below gives at a glance the changes in India's population in the decade 1921-31—the total, sex, urban, rural and literacy

RELIGIONS

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial all disputed inferences are excluded. As a matter of fact, Dr Hutton the Commissioner for the latest census, refers to an excess of zeal on the part of all parties to register as many adherents as possible in view of the possibility of a communal franchise based on the census returns. So high did feeling run over the return of religion in the Punjab, he says, that disputes as to whether a man was *Adi Dharmi* (Adherent of the original reli-

gion) or Sikh added to a number of affrays and at least to one homicide. Speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhists, 3 follow the religion of their tribes, one is a Christian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain much less probably a Parsi and just as possibly either a Jew, a Brahmo, or a holder of indefinite beliefs. The enumerated totals of the Indian religious are set out in the following table —

Religion	Actual number in 1921 (000's omitted)	Proportion per 10,000 of population in 1921	Variation per cent. (Increase + Decrease—)
Hindu	239 195	6,824	+10 4
Arya	468	15	+92 1
Sikh	4,336	124	+33 9
Jain	1,252	36	+6 2
Buddhist	12,787	365	+10 5
Iranian (Zoroastrian (Parsi))	110	3	+7 8
Musalman	77 678	2,216	+13
Christian	6,297	179	+32 5
Jew	24	1	+10 9
Primitive (Tribal)	8,280	236	—15 3
Miscellaneous (Minor religions and religions not returned)	571	16	+3,072 6

A feature of the above table is easily the large increase in the number of those returned as 'miscellaneous'. This is explained by the fact that the latest census grouped all those who returned their religion as *Adi Hindu*, *Adi Dravida*, etc., under miscellaneous.

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 88 per cent of the population. Hindus are in the majority in Assam, Bihar and Orissa, the United Provinces, the Central India tracts, Rajputana and Bombay. Muhammadans monopolize the North West Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Punjab and Eastern Bengal and Sind. They form about 32 per cent of the population of Assam, 15 per cent in the United Provinces and 10 per cent in Hyderabad. The Buddhists are almost entirely confined to Burma where they are 84 per cent of the population. The Sikhs are localized in the Punjab and the Jains in Rajputana, Ajmer Merwara and the neighbouring States. Those who were classed as following Tribal Religions are chiefly found in Bihar and Orissa, the Central Provinces and Assam, but Bengal,

Burma, Madras, Rajputana, Central India and Hyderabad also returned a considerable number under this head. More than half of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Punjab, the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam. The Parsis and Jews are chiefly residents of the Bombay Presidency.

Christians—The Christian community now numbers just 6½ millions of persons in India or 1.79 per cent of the population. This constitutes an increase of 32.5 per cent over the last census of which 20 per cent is ascribed to conversions during the decade 1921-31. Nearly 60 per cent of Christians are returned from the Madras Presidency and its States, and the community can claim 35 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent in Cochin and 31.5 per cent in Travancore. Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab and Bihar and Orissa.

MAIN STATISTICS OF THE INDIAN EMPIRE

The Census of India was taken on the night of February 24th in Burma and on that of 26th in India. The total population of India as thus ascertained is 352,837,778, viz., British Territory 271,526,933 and Indian States 81,310,845 giving an increase of 24,670,742 in British Territory and 9,224,556 in Indian States.

The following table shows the percentage of variation in the country's population at the

last two censuses and in the last 50 years —

	1921 to 1931	1911 to 1921	1881 to 1931
Whole India	+10 6	+1 2	+39 0
Provinces	+10 0	+1 3	+36 8
States	+12 8	+1 0	+46 6

POPULATION OF PRINCIPAL TOWNS

It is claimed that the city of Calcutta contains 35,000 more inhabitants than Bombay which is the next largest city in India. There are nearly twice as many inhabitants in Calcutta proper as there are in Madras and almost three times as many as there are in Rangoon. Alone of the large cities of India, Bombay records a decrease in population since the 1921 census.

Lahore which has expanded to more than half as large again as it was in 1921 has increased its population by actually a larger number during the decade than Calcutta. The same is true of Delhi and Madras which increased by 47 per cent and 22 per cent over their population of 1921. On the other hand, although the increase of 119,470 in the population of Calcutta during the last decade is greater than has been recorded in any of the other cities the percentage increase amounts to only 11 as compared with 21.5 in Karachi, 15.9 in Rangoon, 14.5 in Ahmedabad and 14.2 in Lucknow. Taking the suburban areas into account the population of Calcutta is 1,485,582 of which 1,196,734 are to be found in the city proper included in the municipal area.

‡ 1891-1921

AGE AND SEX.

The table below shows the age distribution of 10 000 males and females of the Indian population by 10 yearly age groups at the last two censuses —

Age group	1931		1921		Age group	1931		1921	
	Males	Fe males	Males	Fe males		Males	Fe- males	Males	Fe males;
0—10	2,802	2,889	2,673	2,810	40—50	968	891	1,013	967
10—20	2,086	2,062	2,087	1,896	50—60	561	545	619	606
20—30	1,768	1,856	1,640	1,766	60—70	269	281	347	377
30—40	1,431	1,351	1,461	1,398	70 and over	115	125	160	180
					Mean age	23.2	22.8	24.8	24.7

The mean age in India is only 23.02, as against 30.6 in England and Wales. The rate of infant mortality in India in the decade 1921-31 shows an appreciable reduction on the rate of the previous decade, even if allowance

be made for the heavy mortality of the influenza years. It is in the towns that the highest infantile mortality is found. The table below shows the rates from 1925 to 1930 for presidency towns and certain provincial capitals.

INFANTILE MORTALITY RATES PER 1,000 LIVE BIRTHS DURING

City	1925	1926	1927	1928	1929	1930
Bombay	357	255	316	314	301	298
Calcutta	326	372	340	276	259	268
Madras	279	282	240	289	259	246
Rangoon	352	320	294	341	321	278
Lucknow	260	287	256	301	269	329
Lahore	222	241	201	204	214	187
Nagpur	258	302	254	299	291	270
Delhi	183	238	201	210	259	199

Special causes contribute to the high mortality on infants in India.

Owing to the custom of early marriage, cohabitation and child birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. If the child survives the pre-natal and natal chances of congenital debility and the risks of child birth, it is exposed to the dangers of death in the early months of life from diarrhoea or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases coming next, then convulsions, then diarrhoea and enteritis.

Sex Ratio—The figures of the population of India by sexes, as recorded by the latest census, show a further continuation of the steady fall in the proportion of females to males that

has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The female infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at birth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all India ratio is 901 females per 1,000 males for Muslims and 951 females per 1,000 males for Hindus. The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded. Where females are in excess, the excess is still most marked in the lower castes and does not always extend to the higher. Among the aboriginal tribes, however, the numbers of the two sexes are approximately equal.

Marriage—The subject of polygamy has been discussed fully in the report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to married men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

The table below shows the percentage for each sex of married persons who are under the age of 15 years.

Number per 1,000 of total married who are under 15 years

Provinces, etc	Males	Females
India	65.7	157.3
Burma	1.8	6.7
India Proper	68.0	161.8
Hindus	73.1	164.1
Muslims	59.4	174.3
Jains	32.5	108.3
Tribal	49.6	93.3
Sikhs	26.9	74.6
Christians	15.4	43.3

Widows and Remarriage—Infant marriage naturally involves infant widowhood, a feature of no significance where remarriage is allowed but of serious importance where it is not. Widows among Hindus numbered just under two millions in 1931, but the general ratio of widows has decreased as compared with 1921. In the 1921 census there were 175 widows in every 1,000 females, a figure which had fallen in 1931 to 155. It is, however, Jains and

Hindus who place an effective ban on widow remarriage, and in both these communities the total ratio of widows has fallen. Jain widows in 1931 were 253 per 1,000 females, but in 1931 only 221, and the 1921 figure of 191 widows in every 1,000 Hindu females has fallen to 169 in 1931. On the other hand, there has already been a very remarkable increase in child widows particularly under the age of 5 years, which can be attributed to the rush of marriages anticipatory to the Child Marriage Restraint Act, a rush which it is to be feared will contribute large numbers of young widows to the figures of the 1941 census unless there is before then a very pronounced change of attitude towards widow remarriage in Hindu society generally. In every thousand Hindu women there are still 169 widowed, 22 of whom are under thirty years of age and over a quarter of those under 20. In spite of reformist movements to popularise widow remarriages, they are still uncommon enough to attract attention in Indian papers whenever they take place.

Proportion of widows in the population per 1,000 of all religions

SOCIAL AND ECONOMIC CONDITIONS

Literacy—The number of persons in India literate in the sense of being able to write a letter and read the reply.

Literacy, in the sense of ability to write a letter and to read the answer to it, has grown enormously in the past fifty years, although it is at present not very high in comparison with countries in the west. Ninety five out of every 1,000 of the population are now literate, as against 82 ten years ago and less than 40 half a century ago. Burma leads the provinces in the matter of literacy, for in that province literacy, even if not of a very high order, is a habit, traditional in both sexes and all classes, both boys and girls being taught in the monasteries of which almost every Burman village has at least one. Cochin, Travancore and Baroda follow Burma in the order of literacy. Cochin State, in spite of a very rapid growth

in population and in spite of having started with a very high ratio, has been able to do more than keep pace with that growth.

Literacy is much more prevalent in towns than in the country, as both the need for, and the opportunities of, acquiring it are greater. An analysis of the population of the cities shows that 348 out of 1,000 males and 149 out of 1,000 females are literate, while the corresponding figures for literacy in English in towns are 1,473 males and 434 females.

The country taken as a whole, female literacy is comparatively absent in India proper except in Kerala. Cochin State has more than one literate female to every two literate males and Travancore only a little less, while Malabar has nearly one to every three, Coorg a little less than one to every three, Baroda a little fewer and Mysore one to every five. Besides the

difficulty, still felt very strongly in most provinces, of getting good women teachers, one of the most serious obstacles to the spread of female education is the early age of marriage, which causes girls to be taken from school before they have reached even the standard of the primary school leaving certificate

Treated in communal or religious groups, the greatest progress has been made by Sikhs, Jains, Muslims and Hindus, in that order, but the leading literate communities are the Parsis, Jews, Burmans, Jains and Christians. The following table analyses the position of the Indian communities in respect of literacy —

Religion	Number per 1,000 who are literate
All religions (India)	95
Hindus	84
Sikhs	91
Jains	353
Buddhists	90
Zoroastrians (Parsis)	791
Muslims	64
Christians	279
Jews	416
Tribal	7
Others	19

hundred and twelve out of every 10,000 males and 28 out of every 10,000 females are literate in English, and both sexes taken together 123 out of 10,000. Viewed in relation to the various religions and communities, the figures are as follow —

Religion	Number per 10,000 aged 5 and over who are literate in English
All religions (India)	123
Hindus	113
Sikhs	151
Jains	306
Buddhists	119
Zoroastrians (Parsis)	5,041
Muslims	92
Christians	919
Jews	2,636
Tribal	4
Others	28

Territorially, Cochin State leads in literacy in English with 307 per 10,000. Coorg follows with 238, Bengal (211) and Travancore (158) coming next.

Languages—In the whole Indian Empire 225 languages were returned at the census, dialects, as has been previously explained, not having been separately considered.

English Language—Literacy in English language is still less in India and is confined mostly to the town dwelling population. Two

The principal languages are given in the following statement —

Language	Total number of speakers (000 omitted)				Number per 10,000, of total population	
	1931		1921		Males	Females
	Males	Females	Males	Females		
Western Hindi	37,743	33,804	50,210	46,504	2,090	1,990
Bengali	27,517	25,952	25,239	24,055	1,523	1,527
Telugu	13,291	13,083	11,874	11,727	736	770
Marathi	10,573	10,317	9,296	9,095	585	607
Tamil	10,073	10,339	9,284	9,496	558	602
Punjabi	8,799	7,040	8,961	7,272	487	414
Rajasthani	7,271	6,627	6,656	6,025	403	390
Kanarese	5,690	5,516	5,253	5,121	315	325
Oriya	5,485	5,709	4,952	5,192	304	336
Gujarati	5,610	5,240	4,967	4,585	311	308
Burmese	4,332	4,522	4,135	4,288	240	266
Malayalam	4,533	4,605	3,736	3,762	257	271
Lahnda (or Punjabi)	4,603	3,963	3,050	2,602	255	273

The necessity of a common medium of conversation and intercourse, which has given rise to bi-lingualism and the consequent displacement of tribal languages, has formed the subject of a considerable amount of discussion and suggestion during the last decade and a good deal has been written on the possibility of a *lingua franca* for India. The combined speakers of Eastern and Western Hindi considerably exceed in number the strength of any other individual language in India, and if we add to these two languages Bihari and Rajasthani, which so resemble Hindi as to be frequently returned under that name in the census schedules, we get well over 100 millions of speakers of tongues which have some considerable affinities and cover a very large area of northern and

central India. In their pure forms these four languages may be scientifically distinct, but this is not the popular view. There is a common element in the main languages of northern and central India which renders their speakers, with out any great conscious change in their speech, mutually intelligible to one another, and this common basis already forms an approach to a *lingua franca* over a large part of India.

Infirmities—These are classes under four main heads—insanity, deaf mutism, blindness and leprosy. The appended statement shows the number of persons suffering from each infirmity at each of the last six censuses and the proportion per hundred thousand of the population —

Infirmity	NUMBER AFFLICTED WITH RATIO PER HUNDRED THOUSAND OF THE POPULATION					
	—	1921	1911	1901	1891	1881
Insane	120,304 34	88,305 28	81,006 26	66,205 23	74,279 27	81,137 35
Deaf-mutes	230,895 66	189,644 60	199,891 64	153,168 52	196,861 75	197,215 86
Blind	601,370 172	479,637 152	443,653 142	354,104 121	458,868 167	526,748 229
Lepers	147,911 42	102,513 32	109,094 35	97,340 33	126,244 46	131,968 57
TOTAL		860,099 272	833,644 267	670,817 229	856,252 315	937,063 407

There had been a continuous decline in the total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmities, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901 many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891 there was a slight decrease in the total number of persons recorded as afflicted in 1911, the proportion per hundred thousand persons falling from 315 to 267. The increase in ratio as well as in numbers since then is attributed to increased accuracy of enumeration.

Occupation—It is a well known fact that the majority of the people in India live on agriculture. The latest census puts down the number of those engaged in the exploitation of animals and vegetation at 103,300,000, while those engaged in industry number 15,400,000. Thus about 87 per cent of the country's workers are employed in the former and 10 per cent in the latter. This does not, however, mean that all the 103 millions are land owners. Rights in land in India are complicated and involved to a degree, incredible to persons familiar only with the simpler tenures of western Europe.

Between the man who cultivates land and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land. If a comparison is made between the area of land under crops and the number of agriculturists actually engaged in cultivation in British India it is that for each agriculturist there are 2.9 acres of cropped land of which 0.65 of an acre is irrigated. The cultivation of special crops occupies under two per cent of the populations concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea. Forestry employs fewer than special cultivation.

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before. Transport by road has attracted more men while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea. About five million persons are engaged in organised industry.

It is noteworthy that less than one million people, who man, the army, the Navy, the air force, the police, the services, etc., manage the administration of this vast country, in other words, 350 odd millions are ruled by one million servants of the state.

There has of late been increasing unemployment, especially among the educated classes. An attempt to include these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs 10 per mensem and are held fortunate in getting even that.

Indian Roads.

India's road system may be briefly described as follows —

There exists four great trunk roads, stretching diagonally across the country, which form the framework with which most of the important subsidiary roads are linked. These trunk roads have been in existence for an immense period and are rich in historical association. The most famous is the ancient marching route — known as the Grand Trunk Road — which stretches right across the northern part of the country from the Khyber to Calcutta, the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 69,000 miles of metalled road in British India. None of these roads however can be considered safe all-weather trunk roads according to modern standards. The Madras-Calcutta road in particular is far from being bridged throughout its entire length and its improvement even in the Madras Presidency would be likely to absorb a large proportion of their funds for some years to come, whilst further North, where it enters Orissa, it has to cross so many large waterways that it will be quite impossible to make it a complete trunk road in the modern sense within any predictable period. And even the other three roads require a great deal of improvement, on the Grand Trunk Road from Calcutta to the North-West Frontier, for example, there is as yet no road bridge over the river Son in Bihar, and on all of them there are places where floods are liable to cause serious interruption to traffic. As regards the subsidiary roads the best and most numerous are to be found in Southern India. As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its aridity and sparse population and the latter because of the numerous unbridged and mostly unbridgable waterways which dissect it, in addition of course there are numerous other parts of the country, such as the lower Himalayas, where the difficulties of the ground provide obvious reason for the dearth of communications. Besides surfaced roads, there is a very large mileage of kutcha roads in India amounting to approximately 200,000 miles, some of which provide good going for motor traffic during the dry weather. On the whole it is reasonable to say that India's road system, even before the advent of motor

transport was altogether insufficient for her needs, and it is the increasing realisation of this fact that led to the appointment of the special Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing use of motor transport and suggest ways and means of financing it.

The recommendations put forward by the Committee were carefully considered by the Government of India, whose conclusions upon them were embodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit which had been effected in March 1929 should be maintained for a period of five years in the first instance and that the additional duty should be allotted as a block grant for expenditure on road development and credited to a separate Road Development Account, whose unexpended balances should not lapse at the end of the financial year.

The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legislative Assembly in February 1937. Its main features may be described as follows. The special tax on petrol introduced in 1929 shall continue to be levied for road development the proceeds of which, after retaining a reserve of 10% for administration, research and special grants in aid shall be allocated for expenditure in the different provinces, Indian States etc. in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, reconstruction or substantial improvement of roads and bridges including the cost of preparation of road schemes—but not for ordinary road upkeep or maintenance—on interest and amortization charges on road loans sanctioned hitherto by the Government of India and also on administration of Provincial Boards of Communications and establishment connected with the control of motor transport. A new clause inserted in the present resolution lays down that if in the opinion of the Governor-General in Council the Government of any Governor's province has at any time —

- (a) failed to take such steps as the Governor-General in Council may recommend for the regulation and control of motor vehicles within the province, or

(b) delayed without reasonable cause the application of any portion of the Road Fund allocated or re allocated as the case may be for expenditure within the province.

the Governor General in Council may resume the whole or part of any sums which he may at that time hold for expenditure in that province. The actual statement of the Account up to date is as follows —

	Takhs Rs	Takhs Rs
Gross Receipts to end of 1935 36		813 18
Gross Receipts for first half of 1936 37 (i.e. from 1st April 1936 to 30th September 1936)		71 9

On the administrative side, roads are a Provincial subject and may be divided into two main classes: Provincial Roads under the Public Works Department and Local Roads in charge of Local Bodies. The extent to which the administration of roads has been delegated to Local Bodies varies considerably from Province to Province but in British India as a whole about 80% of the extra Municipal mileage is under the charge of District Boards or District Councils including a certain mileage, mainly in Madras and the Central Provinces, which is termed Provincial but maintained under their agency and within Municipal areas all roads other than sections of main roads passing through the towns, are controlled by the respective Municipalities.

Up to the introduction of the Road Fund in 1929 all Provincial roads were financed exclusively from the General Revenues of the Provinces and Local roads from Local Revenue supplemented by Provincial Grants. Since 1929 however the Road Fund is being distributed to Provinces and is available for construction or reconstruction or improvement of roads but not for ordinary road upkeep. The object of creating the Road Fund was to supplement and not to replace the normal expenditure on original road works from Provincial and Local Revenue but unfortunately the years following the introduction of the Fund have been marked by acute financial stringency with the result that Provincial Governments and Local Bodies have had to make drastic curtailments in the allotments made for roads from their revenue.

The following table shows the sums charged to the revenue of Provincial Governments and Local Boards in 1934-35 as compared to the years 1913-14 and 1928-29 —

	1913-14			1928-29			1934-35		
	In Lakhs of Rs			In Lakhs of Rs			In Lakhs of Rs

The Government of India.

The impulse which drove the British to India was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24, 1699, a few years before the deaths of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Directors. The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume territorial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and unwieldy councils of the merchants at the Presidency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencies in a Governor and three councillors, including the Commander-in-Chief of the Presidency Army. The control of the Governor-General-in-Council was somewhat extended, as it was again by the Charter Act of 1793. Under the Charter Act of 1833 the Company was compelled to close its commercial business and it became a political and administrative body holding its territories in trust for the Crown. The same Act vested the direction

of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown, became known as the Viceroy. The Governor-General was the sole representative of the Crown in India, he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration.

Functions of Government

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in some provinces it has restricted the alienation of land from agriculturists to non-agriculturists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium. It owns the bulk of the railways of the country, and directly manages a considerable portion of them, it has constructed and maintains most of the important irrigation works, it owns and manages the post and telegraph systems, it had until 1st April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money to municipalities, rural boards, and agriculturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one third of the whole area of India and comprise more than one fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated. It was definitely regulated by the Reform Act of 1919, and the democratic principle then widely implanted is greatly developed in the constitutions for the Provinces and the centre enacted by the Imperial Parliament in 1935.

THE REFORMS OF 1919 AND 1935.

Great changes were made in the system of government in British India by the Government of India Act, 1919, which, together with the rules framed under it—almost as important in their provisions as the Act itself—came into general operation in January 1921, having received the Royal Assent on 23rd

December 1919. (For detailed particulars see *The Indian Year Book*, 1936-37 and preceding years.) Still vaster changes in the direction of Indian Self Government and of Dominion Status were brought about by the Government of India Act, 1935, which received the Royal Assent on 2nd August 1935. The new Act

embodied two main principles—(1) Provincial Autonomy, with a Government responsible to an elected Legislature in every Province and (2) at the centre a Responsible Government of India, based on a federation of British Indian Provinces and Indian States. Detailed provisions for the whole scheme are made in the Act of 1935, which includes 478 sections and 16 schedules and is the largest and most complex legislative enactment of the kind ever negotiated on to a statute book.

The new Constitutional provisions relating to the Provincial Governments were brought into force on 1st April 1937. Over the inauguration of Federation there is inevitable delay. The Indian States have except for a small minority indicated their readiness to enter a Federation

on the lines proposed by the Act. But, because of their Treaties with the British Crown no State can be compelled to enter and each State which decides to enter must do so by a separate Instrument of Accession negotiated in relation to that State's particular circumstances. The settlement of these Instruments requires time. This was foreseen and hence the Act of 1935 contains a chapter of Transition provisions for the regulation of the form and powers of the Government of India pending the inauguration of Federation.

In what here follows will be found an account of the new Constitutional arrangements for the Provinces and for the Government of India as it exists prior to Federation.

THE PROVINCES

The following are under the Act of 1935 the Governors Provinces of British India (there being besides these Provinces certain Chief Commissioners Provinces and also certain Excluded areas where the population is not yet ripe for the introduction of an advanced Constitution)—Madras, Bombay, Bengal, the United Provinces, the Punjab, Bihar, the Central Provinces and Berar, Assam, the North West Frontier Province, Orissa, Sind. The Act recognises Berar as being under the sovereignty of H. E. H. the Nizam of Hyderabad whose Heir Presumptive is elsewhere created Prince of Berar and the Act specially provides for its administration as part of the major Province to which its name is given. The Act creates Orissa and Sind separate Governors Provinces and provides for the separation of Burma from India and for its constitution as a separate country under the Crown. The Act gives powers for the creation of other Governors Provinces.

The Provincial Constitution provides for the exercise of the executive authority on behalf of His Majesty by the Governor. It also provides for a Council of Ministers to aid and advise the Governor in the exercise of his functions except in so far as he is or under this Act required to exercise his functions or any of them in his discretion. The Governor chooses his Ministers, who hold office during his pleasure and he is directed by his Instrument of Instructions to select such as are likely to have the support of the Legislature and is enjoined to accept their advice except in special cases for which other provision is made in the Act.

The following special responsibilities are laid upon the Governor—

- (a) the prevention of any grave menace to the peace or tranquillity of the Province or any part thereof,
- (b) the safeguarding of the legitimate interests of minorities,
- (c) the securing to, and to the dependents of, persons who are or have been members of the public services of any rights provided or preserved for them by or under this Act and the safeguarding of their legitimate interests,

- (d) the securing in the sphere of executive action of the purposes for which the provisions of chapter III of Part V of this Act are designed to secure in relation to legislation (these provisions are concerned with the prevention of legislative discrimination against British subjects in regard to taxation, trade, professional business and qualifications),
- (e) the securing of the peace and good government of areas which by or under the provisions of this Act are declared to be partially excluded areas,
- (f) the protection of the rights of any Indian State and the rights and dignity of the Ruler thereof, and
- (g) the securing of the execution of orders or directions lawfully issued to him under Part VI of this Act by the Governor General in his discretion (i.e., concerning agency functions in behalf of the Central Authority, inter-provincial co-operation in certain matters and so forth).

If and in so far as any special responsibility of the Governor is involved he shall in the exercise of his functions exercise his individual judgment as to the action to be taken. Where the Governor is required by the Act to act in his discretion or to exercise his individual judgment he is placed under the control of the Governor General in the latter's discretion.

The Provincial Legislatures—The Act provides that there shall for every Province be a Provincial Legislature consisting of His Majesty represented by the Governor and (a) in the Provinces of Madras, Bombay, Bengal, the United Provinces, Bihar and Assam two Chambers and (b) in the other Provinces one Chamber the two Chambers being called the Legislative Council and the Legislative Assembly and where there is only one Chamber the Legislative Assembly. Every Legislative Council is to be a permanent body not subject to dissolution but as near as may be one third of its members are to retire in every third year. Every Legislative Assembly of every Province unless sooner dissolved is to continue for five years.

The Houses of Legislature are electoral bodies with special electoral provisions for communal and other particular interests and are based on a considerably wider franchise than was provided by the Act of 1919

Special provisions are made for cases in which the Governor finds himself unable to assent to Bills passed by the Legislature

The Governor of a Province is given power to promulgate ordinances if when his Legislature is not in session, he is satisfied that circumstances necessitate immediate action and under certain other conditions and in certain circumstances and under prescribed conditions to enact Acts in his discretion

Provision is further made to enable the Government to be carried on if at any time the Governor is satisfied that a situation has arisen in which the government of the Province cannot be carried on in accordance with the provisions of the Act

Chief Commissioners' Provinces—The following are by the Act constituted as Chief Commissioners' Provinces—British Baluchistan, Delhi, Ajmer Merwara Coorg, the Andaman and Nicobar Islands Panth Piploda Provision is made for the possible creation of others. A Chief Commissioner's Province is to be administered by the Governor General acting, to such extent as he thinks fit, through a Chief Commissioner to be appointed by him in his discretion

DIVISION OF POWERS

The Act provides for the institution of a Federal Court consisting of a Chief Justice of India and such other judges as His Majesty may deem necessary the seat of the Court being Delhi and its original jurisdiction extending to disputes between the Federation any of the Provinces or any of the Federated States its appellate jurisdiction to include certain classes of appeals from the High Courts of British India and of the Indian States and appeals lying from it to His Majesty in Council

The Act also prescribes that the Executive authority of the Federation in respect of railway construction maintenance and operation shall be exercised by a Federal Railway Authority, for the establishment and activities of which it provides

Provisions are made in the Act in relation to the recruitment and control of the Public Services and for the appointment of a Public Service Commission for the Federation and of one for each Province The duties and powers of these Commissions in regard to the Services are laid down in the Act which also provides that two or more Provinces may agree to have one Commission between them

Provincial Legislation—The Act provides for a new division of functions between the Central and Provincial authorities and the following is the new Provincial Legislative List, which came into operation on 1st April 1937—

1 Public order (but not including the use of His Majesty's naval, military or air forces in aid of the civil power) the administration of justice, constitution and organisation of all courts, except the Federal Court and fees taken therein, preventive detention for reasons connected with the maintenance of public order persons subjected to such detention

2 Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list, procedure in Rent and Revenue Courts

3 Police, including railway and village police

4 Prisons, reformatories, Borstal institutions and other institutions of a like nature, and persons detained therein, arrangements with

other units for the use of prisons and other institutions

5 Public debt of the Province

6 Provincial Public Services and Provincial Public Service Commissions

7 Provincial pensions that is to say pensions payable by the Province or out of Provincial revenues

8 Works lands and buildings vested in or in the possession of His Majesty for the purposes of the Province

9 Compulsory acquisition of land

10 Libraries museums and other similar institutions controlled or financed by the Province

11 Elections to the Provincial Legislature subject to the provisions of this Act and of any Order in Council made thereunder

12 The salaries of the Provincial Ministers, of the Speaker and Deputy Speaker of the Legislative Assembly and if there is a Legislative Council, of the President and Deputy President thereof the salaries, allowances and privileges of the members of the Provincial Legislature and to such extent as is expressly authorised by Part III of this Act, the punishment of persons who refuse to give evidence or produce documents before Committees of the Provincial Legislature

13 Local government, that is to say, the constitution and powers of municipal corporations improvement trusts district boards, mining settlement authorities and other local authorities for the purpose of local self government or village administration

14 Public health and sanitation hospitals and dispensaries registration of births and deaths

15 Pilgrimages, other than pilgrimages to places beyond India

16 Burials and burial grounds

17 Education

18 Communications, that is to say, roads, bridges, ferries and other means of communications not specified in List I, minor railways subject to the provisions of List I with respect to such railways, municipal tramways, rope-

ways, inland waterways and traffic thereon subject to the provisions of List III with regard to such waterways, ports, subject to the provisions in List I with regard to major ports, vehicles other than mechanically propelled vehicles

19 Water, that is to say, water supplies, irrigation and canals, drainage and embankments, water storage and water power

20 Agriculture, including agricultural education and research, protection against pests and prevention of plant diseases, improvement of stock and prevention of animal diseases, veterinary training and practice, pounds and the prevention of cattle trespass

21 Land, that is to say rights in or over land, land tenures, including the relation of landlord and tenant and the collection of rents, transfer alienation and devolution of agricultural land, land improvement and agricultural loans, colonisation, Courts of Wards encumbered and attached estates, treasure trove

22 Forests

23 Regulation of mines and oilfields and mineral development subject to the provisions of List I with respect to regulation and development under Federal control

24 Fisheries

25 Protection of wild birds and wild animals

26 Gas and gasworks

27 Trade and commerce within the Province, markets and fairs, money lending and money lenders

28 Inns and innkeepers

29 Production, supply and distribution of goods, development of industries, subject to the provisions in List I with respect to the development of certain industries under Federal control

30 Adulteration of foodstuffs and other goods, weights and measures

31 Intoxicating liquors and narcotic drugs, that is to say, the production, manufacture, possession, transport, purchase and sale of intoxicating liquors, opium and other narcotic drugs, but subject as respects opium to the provisions of List I and as respects poisons and dangerous drugs, to the provisions of List III

32 Relief of the poor, unemployment

33 The incorporation, regulation and winding up of corporations other than corporations specified in List I, unincorporated trading, literary, scientific, religious and other societies and associations, co-operative societies

34 Charities and charitable institutions, charitable and religious endowments

35 Theatres, dramatic performances and cinemas, but not including the sanction of cinematograph films for exhibition

36 Betting and gambling

37 Offences against laws with respect of any of the matters in this list

38 Inquiries and statistics for the purpose of any of the matters in this list

39 Land revenue including the assessment and collection of revenue, the maintenance of land records survey for revenue purposes and records of rights and alienation of revenue

40 Duties of excise on the following goods manufactured or produced in the Province and countervailing duties at the same or lower rates on similar goods manufactured or produced elsewhere in India —

(a) alcoholic liquors for human consumption,

(b) opium, Indian hemp and other narcotic drugs and narcotics, non narcotic drugs,

(c) medicinal and toilet preparations containing alcohol or any substance included in sub paragraph (b) of this entry

41 Taxes on agricultural income

42 Taxes on lands and buildings, hearths and windows

43 Duties in respect of succession to agricultural land

44 Taxes on mineral rights, subject to any limitations imposed by any Act of the Federal Legislature relating to mineral development

45 Capital taxes

46 Taxes on professions, trades, callings and employments

47 Taxes on animals and boats

48 Taxes on the sale of goods and on advertisements

49 Taxes on the entry of goods into a local area for consumption use or sale therein

50 Taxes on luxuries, including taxes on entertainment, amusements, betting and gambling

51 The rates of stamp duty in respect of documents other than those specified in the provisions of List I with regard to rates of stamp duty

52 Dues on passengers and goods carried on inland waterways

53 Toll

54 Fees in respect of any of the matters in this list, but not including fees taken in any Court

CONCURRENT LEGISLATIVE LIST

There is also prescribed a concurrent Legislative List in which both the Governments of India and the Provincial Governments enjoy powers. Here it is —

PART I

1 Criminal law including all matters included in the Indian Penal Code at the date of the passing of this Act but excluding offences against laws with respect to any of the matters specified in List I or List II and excluding the

use of His Majesty's naval, military and air forces in aid of the civil power

2 Criminal Procedure, including all matters included in the Code of Criminal Procedure at the date of the passing of this Act

3 Removal of prisoners and accused persons from one unit to another unit

4 Civil Procedure including the law of Limitation and all matters included in the Code

of Civil Procedure at the date of the passing of this Act, the recovery in a Governor's Province or a Chief Commissioner's Province of claims in respect of taxes and other public demands including arrears of land revenue and sums recoverable as such, arising outside that Province

5 Evidence and oaths, recognition of laws, public acts and records and judicial proceedings

6 Marriage and divorce, infants and minor adoption

7 Wills, intestacy, and succession, save as regards agricultural land

8 Transfer of property other than agricultural land, registration of deeds and documents

9 Trusts and Trustees

10 Contracts, including partnership, agency, contracts of carriage, and other special forms of contract, but not including contracts relating to agricultural land

11 Arbitration

12 Bankruptcy and insolvency, administrators, general and official trustees

13 Stamp duties, other than duties or fees collected by means of judicial stamps, but not including rates of stamp duty

14 Actionable wrongs save in so far as included in laws with respect to any of the matters specified in List I or List II

15 Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list

16 Legal medical and other professions

17 Newspapers, books, and printing presses

18 Lunacy and mental deficiency, including places for the reception or treatment of lunatics and mental deficient

19 Poisons and dangerous drugs

20 Mechanically propelled vehicles

21 Boilers

22 Prevention of cruelty to animals

23 European vagrancy, criminal tribes

24 Inquiries and statistics for the purpose of any of the matters in this Part of this List

25 Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court

PART II

26 Factories

27 Welfare of labour, conditions of labour, provident funds, employers' liability and workmen's compensation, health insurance, including in old age pensions, old age pensions

28 Unemployment insurance

29 Trade unions, industrial and labour disputes

30 The prevention of the extension from one unit to another of infectious or contagious diseases or pests affecting men, animals or plants

31 Electricity

32 Shipping and navigation on inland waterways as regards mechanically propelled vessels and the rule of the road on such waterways, carriage of passengers and goods on inland waterways

33 The sanctioning of cinematograph films for exhibition

34 Persons subjected to preventive detention under Federal authority

35 Inquiries and statistics for the purpose of any of the matters in this Part of this List

36 Fees in respect of any of the matters in this Part of this List, but not including fees taken in any Court

THE CENTRAL GOVERNMENT

The structural changes made by the Act of 1919 in the system of government outside the Governors' provinces, were of comparatively minor scope though the spirit of the Act required considerable modifications of the relationship hitherto subsisting between the Provincial Governments on the one hand and the Government of India and the Secretary of State in Council on the other. The Act of 1935 provides for extensive further changes at the centre, but these will only come into force when the Indian States accede to Federation and meanwhile at the Centre the constitution established by the Act of 1919 prevails subject to certain modifications required to bring it into harmony with the new conditions in the Provinces. The only concrete changes made in the constitution of the Central Government by the 1919 Constitution were the removal of the statutory bar to the appointment of more than six members of the Governor-Generals Executive Council (which, however had the far reaching consequence that three of the eight members of the Council are now Indians) and the reconstitution in a much more enlarged representative and independent form of the central legislature. This became, like the Legislative Council in a Governor's province,

a legislature with all the inherent powers ordinarily attributed to such a body save such as are specifically withheld by the terms of the Act. It consists of two Chambers. The Council of State was constituted a body of 60 members, including 31 elected (including one member to represent Barar who, though technically nominated, was to be nominated as the result of elections held in Barar) and 26 nominated of whom not more than 10 might be officials. The Indian Legislative Assembly was constituted with 144 members of whom 105 to be elected (including in the case of the Council of State one Barar member who though actually elected had technically to be a nominee). Of the 40 nominated members not fewer than one third were required to be non-officials. The members of the Governor-Generals Executive Council were not made ex-officio members of either Chamber, but each of them has to be appointed a member of one or other Chamber, and can vote only in the Chamber of which he is a member. Any member of the Executive Council may, however, speak in either Chamber. The President of the Upper Chamber is a nominee of the Governor-General. So also, for the first four years after the constitution of the Chamber, was the President of the Legis-

lative Assembly. But after that period the Lower Chamber elected its own President and it elected its own Deputy President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years, but either Chamber, or both simultaneously may be dissolved at any time by the Governor General.

Election—The method of election for both Chambers is direct, and although the number of electors is considerably smaller than for the Provincial Councils, it is a great advance on the very restricted and for the most part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils already described except that, *firstly* the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies and past service with the colours is not *per se* a qualification for the franchise, and *secondly* that the constituencies necessarily cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencies, are on a provincial basis, that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the original allotment of the elective seats:—

	Legislative Assembly	Council of State
Madras	16	5
Bombay	16	6
Bengal	17	6
United Provinces	16	5
Punjab	12	4
Bihar and Orissa	12	3
Central Provinces	6	2
Assam	4	1
North West Frontier Province	4	2
Burma	1	
Delhi	105	34

The Government of India Act 1935, by separating Burma from India eliminated the Burma members.

Since the area which returned perhaps 80 members to a Provincial Council is the same as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis was made in the district, it may be said that the normal area unit in the case of the Legislative Assembly is the Division (the technical term for the administrative group of districts controlled by a Divisional Commissioner).

The Franchise—The general result of the first franchise arrangements under the Act was thus that there was in each province a body of electors qualified to vote for, and stand for election to, the Provincial Council, and that a selected number of these voters were qualified to vote for and stand for election to those seats in the Indian Legislative Assembly which were assigned to the province. The qualifications for candidature for the Indian Legislative Assembly were made the same in each province, *mutatis mutandis*, as for candidature for the Provincial Council, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency was insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council and the Indian Legislative Assembly. The concern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a 'Senate of Elder Statesmen' and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted or of its predecessor, or of the Provincial Legislature, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature.

Powers—The Powers and duties of the Indian Legislature under the 1919 Act differed but little in character within the central sphere from those of the provincial Councils under the same act within their provincial sphere and it acquired the same right of voting supplies for the Central Government. But as no direct attempt was made to introduce responsible government at the centre the step in that direction having been avowedly confined to the provinces and as consequently the Executive Government of India remained legally responsible as a whole for the proper fulfilment of its charge to the Secretary of State and Parliament, it followed that the powers conferred on provincial Governors to disregard an adverse vote of the Legislative Council on legislation or supplies were as conferred on the Governor-General in his relationship with the Indian Legislature, less restricted in their operation than in the provinces, that is to say, they covered the whole field and were not confined in their application to categories of subjects.

The new provisions made in the Government of India Act 1935, affecting the Government of India, were described in an earlier part of this chapter.

THE INDIA OFFICE.

The Act of 1919 made no structural changes in the role of the India Office in the administration of Indian affairs. Slight alterations were effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations were made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provisions were made which undoubtedly as time went on had a material effect on the activities of the Office. A High Commissioner for India was appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. The process of separation of staff and functions for the purpose of this transfer was necessarily somewhat slow, but a substantial beginning was made by handing over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationery in England for Government

use in India, with the payment of pensions to retired members of Indian services resident in the United Kingdom, and with the assistance of Indian students in England. Concurrently with this change, it became possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salaries of India Office staff and general maintenance which was attributable to the exercise of its administrative as distinct from purely agency functions.

The Act of 1945 provides for the appointment by the Secretary of State of not less than three nor more than six persons whose duty it shall be to advise him on any matter relating to India on which he may desire their advice. It also prescribes that the salary of the Secretary of State and the expenses of his Department shall be paid out of monies provided by Parliament. The Governor General is given in his sphere of responsibility reserve powers corresponding with those already mentioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible through the Secretary of State to Parliament.

PERSONNEL AND PROCEDURE.

The Governor General and the Executive members of his Council are under the Government of India Act 1919 as continued by the Act of 1935, pending the establishment of Federation, appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. There are seven Executive Members of Council. These members under the Government of India Act 1919 held respectively the portfolios of Education, Health and Land, Home, Finance, Commerce and Railways, Industries and Labour, Law. Following the decision taken in April 1937 to form a portfolio for communications a redistribution of portfolios has taken place. In lieu of the two existing departments of Commerce and of Industries and Labour there are three departments namely the Department of Commerce, the Department of Communications and the Department of Labour. The Commerce Department deals with all subjects hitherto entrusted to it except Ports (including pilotage within ports) and inland navigation which go to the Communications Department. In addition the Commerce Department is responsible for industries including stores, industrial research and exhibitions, and patents and designs. It thus deals generally with commerce, industries, industrial property, insurance and actuarial work and with blue water shipping. The department of Communications deals with posts and telegraphs, broadcasting, civil aviation, meteorology, ports, inland navigation and roads. Railways continue to form a separate department, but will be under the same member of the Council as the Communications Department. The Secretary for Communications attends the meetings of the Railway Board as an ex officio member. The department of Labour deals with all labour subjects hitherto dealt with in the Department of Industries and Labour. In addition it assumes responsibility for labour in docks and for the administration of certain statutes affecting labour on the railways. It deals also with public works and irrigation, mines, technical education so far as that concerns

industry, printing and stationery and various items of safety legislation and administration. Ecclesiastical affairs are placed under the Defence Department. The Department of Commerce and Labour is placed under the charge of a member who is designated member for Commerce and Labour and the Department of Communications and Railways is placed under a member who is designated Member for Communications. The change in portfolios took place at the autumn move of the Government of India from Simla to New Delhi in 1937.

The Viceroy acts as his own member in charge of Foreign affairs. The Commander in Chief may also be and in practice always is, an Ordinary member of the Council. He holds charge of the Army Department. The Governors of Madras, Bombay and Bengal become extraordinary members if the Council meets within their Presidencies. The Council may assemble at any place in India which the Governor General appoints. In practice it meets only in Delhi and Simla except for a meeting or two in Calcutta after Christmas when the Viceroy is usually in residence in the Bengal Capital.

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, must ordinarily be referred to the Viceroy. Any matter originating in one department which also affects another must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy. The Members of Council meet periodically as a Cabinet—ordinarily once or twice a week—to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council. If there is a difference of opinion in the Council

the decision of the majority ordinarily prevails, but the Viceroy can over rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departmental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under Secretary of State in the United Kingdom, but with these differences—that the Secretary is present though does not speak, at Council meetings at which cases under his cognisance are discussed that he attends on the Viceroy, usually once a week and discusses with him all matters of importance arising in his Department, that he has the right of bringing to the Viceroy's special notice any case

in which he considers that the Viceroy's concurrence should be obtained to action proposed by the Departmental Member of Council, and that his tenure of office is usually limited to three years. The Secretaries have under them Deputy, Under and Assistant Secretaries, together with the ordinary clerical establishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has no Civil Service of its own as distinct from that of the Provincial Governments, and officers serving under the Government of India are borrowed from the Provinces, or, in the case of Specialists, recruited direct by contract.

GOVERNMENT OF INDIA

VICEROY AND GOVERNOR GENERAL OF INDIA

His Excellency, The Most Hon. ble The Marquess of Louthgow, PC, KT, GMSI, GMBE, DL, TD, 18th April 1936

PERSONAL STAFF OF THE GOVERNOR GENERAL

Private Secretary—J G Lathwaite, Esq., CIE

Asst. Private Secretary—C B Duke, ICS

Military Secretary—Lt Col H H Stable, CI Horse

Personal Assistant—W H P de la Haye, MBE

Surgeon—Major H H Elliott, MBE, MC, MB, FRCs (Edin), IMS

Assistant to Surgeon—J A Rogers, MBE, MRCs, IMD

Comptroller of the House hold—Major W E Maxwell, CIE (The Baluch Regiment)

Aides de Camp—Squadron Leader J C L A Johnson, RAF, Major W H Goschen

Grenadier Guards, Lieutenant A H P Noble, RN Captain D Ross, 13th Lancers, Captain P M Borwick, Royal Scots Greys

Indian Aides de Camp—Risaldar Major (Hony Captain), Muhammad Zaman Probyn's Horse, Risaldar Major Muzaffar Khan, Governor General's Body Guard

Honorary Aides de Camp—Lt Colonel (Hony Colonel) A Mac L Robertson, MC, VD, Commanding, 1st Bn Bengal Nagpur Railway Regiment, AFI, Lt Colonel (Hony Colonel) A B Beddow, VD, Commandant, Surma Valley Light House, Lt Colonel (Hony Colonel) T Lamb, VD, The Bengal Artillery, AFI, Major (Hony Lt Colonel) W H Shoober, The Nagpur Regiment, AFI, Lt Colonel (Hony Colonel) E K Glazebrook, The Rangoon Battalion, AFI, Lt Colonel (Hony Colonel) A Duncan, VD, The Bengal Nagpur Railway Battalion, AFI, Lt Colonel (Hony Colonel) R S Weir, VD, Commanding, The Allahabad Contingent, Captain A G Maundrell CIE, RIN, Lt Colonel (Hony Colonel) M G Platts, OBE, MC, AICo, Lt Colonel (Hony Colonel) G D Moore, VD, Commandant, The Bombay Baroda and Central India Railway, AFI, Lt Colonel (Hony Colonel) D M Reid, MC, The Madras Contingent, AFI, Lt Colonel (Hony Col) A L Danby, ED, The Bihar Light Horse, AFI, Lt Colonel (Hony Col) O G Edwards, VD, The Great Indian Peninsula Railway Regiment, AFI, Lt Colonel (Hony Col) F B Hawkes, OBE, VD, The North Western Railway Battalion, AFI

Honorary Indian Aides de Camp—Colonel Shambhaji Rao Bhonsle, OBE, Adjutant General, Gwalior Army, Brigadier Rahmatulla

Khan, Thakur, General Staff Officer, Jammu and Kashmir State Forces, Brigadier Mirza Kader Beg, Sardar Bahadur, Commandant, 1st Hyderabad I S Lancers, Lt Col Thakur Anop Singh, MC, IOM, Sardar Bahadur, Commandant, Mewar Lancers, Subadar Major (Hony Captain) Mit Singh, Sardar Bahadur IOM late 53rd Sikhs, Risaldar Major Karam Singh, Bahadur, IDSM, late 15th (DCC) Lancers Risaldar Major (Hony Captain) Mohi-ud-din Khan, Sardar Bahadur, CIE, IDSM, late 31st (DCC) Lancers, Subadar Major (Hony Captain) Dalpet Singh, Sardar Bahadur, IOM, late 9th Jat Regiment, Subadar Major (Hony Captain) Gulab Shah, Sardar Bahadur, 3/10th Baluch Regiment, Risaldar Major (Hony Captain) Jaffar Hussain The Viceroy's Body Guard, Risaldar Major (Hony Lieut.) Sheikh Faizuddin, IDSM, 9th Royal Deccan Horse, Subadar Major and Hony Captain Bhikham Singh, Sardar Bahadur, MC, IDSM, 12th F F Regiment, Risaldar Major (Hony Lieut.) Mehtab Singh, Governor General's Body Guard

Honorary Surgeons—Lt Colonel A M Dick, OBE, MB, Ch B (Edin), LRCP (Lond), FRCs (Eng) VHS, IMS, Lt Colonel Sir Hassan Suhrawardy, Kt OBE, ITFMC, Lt Colonel G G Jolly, CIE, MB, Ch, B (Edin), DPH, DTM, & H, IMS, Colonel R E U Newman, OBE, MC, late RAMC, Colonel L V Thurston, DSO, late RAMC, Colonel J St Maughan, DSO, late RAMC, Lt Colonel J Taylor, DSO, MD, DPH, IMS, Colonel R P Lewis, DSO, late RAMC, Colonel H C Buckley, MD, FRCs, IMS, Colonel A C McNeight, BA, MB, BCh, DPH, IMS, Colonel A E S Irvine, DSO, (late RAMC), Colonel W J Powell, CIE, BA, MD, BCh, BAO, DPH, LM, IMS

Honorary Assistant Surgeons—Dr Dahiruddin Ahmad, OBE, (Bengal), Mr G R Govardhan, LM & S, (Central Provinces), Major J M Peretra, IMD, (Bihar), Khan Sahib Dr Salyid Wahiduddin Haidar (United Provinces), Khan Sahib Mir Muhammad Ismail (Punjab), Dr K R Menon, LM & S (Burma), Dr H S Hingman, OBE, LMS, MRCs (Eng), LRCP (Lond) (Madras), Dr K A Contractor, LM & S (Bombay), Sardar Sahib Dr Sohan Singh

EXECUTIVE COUNCIL

His Excellency General Sir Robert Cassels,
O C B, C S I, D S O, Commander in Chief in India

The Hon'ble Sir James Grigg, K C B, K C S I,
(Finance)

The Hon'ble Sir Nripendra Nath Sircar,
K C S I, K t (Law)

The Hon'ble Kunwar Sir Jagdish Prasad
K t, C S I, C I E, O B E, (Education, Health and
Lands)

The Hon'ble Sir Muhammad Zafrulla Khan,
K t, (Commerce and Labour)

The Hon'ble Sir Henry Craik, Bart
K C S I, I C S, (Home)

The Hon'ble Sir Thomas Stewart, O S I,
I C S, (Communications)

SECRETARIES

DEPARTMENT OF EDUCATION, HEALTH AND
LANDS

Secretary, Sir Girja Shankar Bajpai, K B E

The Bombay Presidency.

Consequent on the seperation of Sind from the Bombay Presidency as from April 1, 1936, Bombay has suffered a diminution territorially and otherwise. The following details relate to Bombay minus Sind

The Bombay Presidency now stretches along the west coast of India, from Gujerat in the North to Kanara in the South. It has an area of 77,221 square miles and a population of 18,192,475. Geographically included in the Presidency but under the Government of India is the first class Indian State of Baroda, with an area of 8,164 square miles and a population of 2,443,007. There are no States in political relations with the Government of Bombay, as they are all now under the Government of India.

The Presidency embraces a wide diversity of soil, climate and people. In the Presidency there are the rich plains of Gujerat, watered by the Nerbudda and the Tapi, whose fertility is so marked that it has long been known as the Garden of India. South of Bombay City the province is divided into two sections by the Western Ghats, a range of hills running parallel to the coast. Above Ghats are the Deccan Districts, south of these come the Karnatic Districts. On the sea side of the Ghats is the Konkan, a rice growing tract, intercepted by creeks which make communication difficult.

The People

The population varies as markedly as soil and climate. Gujerat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions and a people, who although softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity, the saying goes that the Deccan expects a famine one year in every three, and gets it, the population is much more homogeneous than in Gujerat, and thirty per cent are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sindhi, Gujerati, Marathi and Kanarese, with Urdu a rough *lingua franca* where English has not penetrated. The main castes and tribes number five hundred.

Industries

The principal industry is agriculture, which supports sixty four per cent of the population. In Gujerat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes splendid garden land. The dominant soil characteristic of the Deccan is black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sugarcane. The Konkan is a rice land, grown under the abundant rains of the submontane

regions, and in the south the Dharwar cotton vies with Broach as the best in India. There are no great perennial rivers suitable for irrigation, and the harvest is largely dependent upon the seasonal rainfall supplemented by well irrigation. A chain of irrigation works, consisting of canals fed from great reservoirs in the region of unfailing rainfall in the Ghats, is gradually being completed, and this will ultimately make the Deccan immune to serious drought. More than any other part of India the Presidency has been scourged by famine and plague. The evils have not been unmixed, for tribulation has made the people more self-reliant, and the rise in the values of all produce, synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dispossessed.

Manufactures

Whilst agriculture is the principal industry, others have no inconsiderable place. The mineral wealth of the Presidency is small and is confined to building stone, salt extracted from the sea, and a little manganese. But the handicrafts are widely distributed. The handloom weavers produce bright coloured saris, and to a diminishing extent the exquisite kincobs of Ahmedabad and Surat. Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city, Bombay.

Number of Looms in Bombay Island	68,385
Number of Spindles in Bombay Island	29,90,088
Number of hands employed in the Textile Industry in Bombay Island (daily average)	1,11,147
Consumption of Cotton by the Mills in Bombay Island (in candles of 784 lbs)	4,42,620
Number of Spindles in Ahmedabad	20,23,100
Number of Looms in Ahmedabad	50,400
Number of Spindles in Sholapore Dist	1,46,356
Number of Looms in Sholapore Dist	3,149
Number of Spindles in the Bombay Presidency (excluding Bombay Island and Ahmedabad)	12,35,534
Number of Looms in the Bombay Presidency (excluding Bombay Island and Ahmedabad)	25,857

Administration

With the introduction of Provincial Autonomy on April 1, 1937 the administration of the province has been largely altered at the top. There is now a Governor and a Council of four Ministers to aid and advise him in all matters except in so far as he is required by the Government of India Act to exercise his function in his discretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion; he fixes their salaries until determined by the Legislature. The Governor, as in other Provinces, has certain special responsibilities and these extend to (a) the prevention of menace to the peace or tranquillity of his province or any part thereof, (b) the safeguarding of the legitimate interests of minorities, (c) the safeguarding of the rights of civil servants past and present and their dependants, (d) the securing in the executive sphere of protection against discrimination, (e) the securing of the peace and good government of areas declared to be partially excluded areas, (f) the safeguarding of the rights of states and the rights and dignity of any ruler, and (g) the securing of the execution of orders given to him under Part VI of the Act (dealing with administrative relations) by the Governor General in his discretion.

The Governor is assisted by a special secretariat staff presided over by a Secretary whose emoluments are fixed in his discretion.

In the legislative sphere the Governor is assisted with two chambers known as the Bombay Legislative Assembly and the Bombay Legislative Council. The Council is a permanent body. One third of the members retire each three years and the Assembly unless sooner dissolved lasts for five years. The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Anglo Indians, 3 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Marathas. There are also six women.

The Legislative Council will contain not less than 29 and not more than 30 members of whom not less than three and not more than four shall be nominated by the Governor. Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May, and in Poona from June to November, but the Secretariat is always in Bombay. Under the Local Government the Presidency is administered by three Commissioners namely, the Commissioner for the Northern Division, with headquarters at Ahmedabad, the Central Division at Poona, and the Southern Division at Belgaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilians as Assistant Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages whose whole revenues belong to the State. The village officers are the patel, who is the

head of the village both for revenue and police purpose, the talati or kulkarni, clerk and accountant, the messenger and the watchman. Over each Taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions.

Justice

The administration of Justice is entrusted to the High Court sitting in Bombay and comprising a Chief Justice, who is a Barrister and nine puisne judges, either Civilian, Barristers, or Indian lawyers. Of the lower civil courts the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate Judge with special powers. District and Assistant Judges are Indian Civilian or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. District and Assistant Judges exercise criminal jurisdiction throughout the Presidency but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court. In some of the principal cities Special Magistrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates exercising the functions of English Justices of the Peace) and a Court of Small Causes corresponding to the English County Courts.

Local Government

Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka, and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has been to increase the elective and reduce the nominated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self Government in the Presidency. The Act provides more adequate basis for Municipal Administration in the larger cities of the Bombay Presidency. The larger municipalities are now styled as Municipal Boroughs which are now 30 in number. The executives of these Borough Municipalities are invested with larger powers than hitherto exercised. Another important change introduced by the Act was the extension

of municipal franchise to occupiers of dwellings or buildings with annual rental values of Rs 12 or with capital value of not less than Rs 200

Public Works

The Public Works Department is under the control of a Chief Engineer who acts as Secretary to the Government. Under him are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, and the Electrical Engineer.

There is a chain of protective irrigation works originating in reservoirs in the Ghat regions. The principal works are the Nira Canal fed by Lake Whiting impounded by the Lloyd Dam at Bhadgar, the Pravara Canals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandara, the Mutha Canals fed by Lake Tife at Khadakvisla, the Godavari Canals fed by Lake Tank at Nandur Madhmeshwar and the Gokak Canal. The Mutha Canals and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal which has been under construction since 1912 is practically completed. The Wilson Dam at Bhandara, the second highest yet constructed by Engineers the world over was opened by His Excellency the Governor on 10th December 1926. The Lloyd Dam at Bhadgar which is 533 feet in length 180 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 2½ million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence, but that contains 19 million cubic feet. It cost also nearly 50 per cent more than the Lloyd Dam. An idea of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police

The Police Force is divided into 3 categories, viz., District Police, Railway Police and the Bombay City Police. The District and Railway Police in the Presidency proper are for the purpose of control under the Inspector General of Police who is assisted by three Deputy Inspectors General, of whom two are in charge of Range and the third is in charge of the Criminal Investigation Department and the Fingerprint Bureau. The executive management of the Police in each district and on Railways in the Presidency proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police. For the purposes of effective supervision over the investigation and prevention of crime, some of the larger districts are divided into one or more sub-divisions each under a Sub-Divisional Officer who is either an Assistant Superintendent of Police, or an Inspector of Police, a Deputy Superintendent of Police

Sub-Inspectors are the officers in charge of Police Stations and are primarily responsible under the law for the investigation of offences reported at their Police Stations. Officers appointed directly to the posts of Assistant Superintendents of Police, Deputy Superintendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police Training School at Nasik before being posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education

Education is imparted partly through direct Government agency and partly through the medium of grants in aid. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad and Dhawar, the Grant Medical College, the Poona College of Engineering, the Agriculture College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant in aid. The Bombay Municipality is responsible for primary education in Bombay City (q.v., Education).

The total number of institutions including those in Sind at the end of the year 1935-36 was 17,314. Of these 16,097 were recognised and 1,217 unrecognised. Of the recognised 14,116 are for males and 1,981 for females. The recognised institutions consisted of 17 Arts and Science Colleges including the University School of Economics and Sociology, 13 Professional Colleges, 787 Secondary Schools, 14,952 Primary Schools and 327 Special schools.

There are 268-9 towns and villages in this Presidency. Of these 10,757 possessed schools as compared with 10,658 in the preceding year. The area served by a town or village with school was 11.5 square miles as against 11.6 square miles in the preceding year.

There were 1,476,494 pupils under instruction at the end of the year 1935-36 as compared with 1,422,146 in the preceding year. The number of pupils in recognised institutions was 1,430,465 and in unrecognised institutions was 45,979 as compared with 1,381,447 and 40,699 respectively in the preceding year. The percentage of pupils in recognised institutions to the total population of the Presidency increased from 6.34 to 6.57. Of the 1,430,465 pupils under instruction in recognised institutions 1,090,057 were boys and 340,408 were girls. The increase in the case of boys was 31,327 and of girls was 17,691 as compared with the increase of 32,802 and 16,121 respectively in the preceding year.

The total expenditure on Public Instruction increased from Rs 4,10,86,354 to Rs 4,21,65,908 during the year 1935-36. Out of this amount 42.1 per cent was met from Provincial Revenues, 18.8 from Local Funds, 24.6 from fees and 14.5 from other sources.

The Educational Department is administered by a Director, with an Inspector in each Division and a Deputy or Assistant Inspector in each district.

Higher education in the Presidency is controlled by the Bombay University which was established in 1857. The constitution of the University has recently undergone, however, considerable changes in virtue of a new enactment known as the Bombay University Act of 1923. This Act altered the whole constitution of the University so as to make it adequately representative with a view to bringing into closer association with the public the industrial, commercial and civic life of the people of the Presidency to enable it to provide greater facilities for higher education in all branches of learning including Technology and to undertake on a larger scale than heretofore post graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1923. The authorities of the University, as now constituted, are chiefly the Chancellor, Vice Chancellor, the Syndicate, the Academic Council and the Senate. The Senate consisting of fellows is the supreme governing body of the University. The number of fellows is 144 of whom 40 are nominated by the Chancellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

Medical

The Medical Department is in the charge of the Surgeon-General who is a member of the I M S, and Public Health in that of the Director of Public Health, who is usually a non I M S Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the district whilst sanitation is entrusted to one of the Assistant Directors of Public Health. Four large hospitals are maintained by the Government in Bombay, and the accommodation in them has been recently increased. The total number of beds available

in all the City Hospitals including private Institutions is 2,300 roughly. Well equipped hospitals exist in all important up country stations. Over 3,351,248 persons including 1,24,093 in patients were treated during the year 1933. The Presidency contains 6 Lunatic Asylums and 16 institutions for the treatment of Lepers. Vaccination is carried out by a staff under the direction of the Director of Public Health. Sanitary work has received an immense stimulus from the large grants made by the Government from time to time.

The problem of providing a more satisfactory system of Medical relief for rural areas is under consideration.

Finance

With the introduction of Provincial Autonomy, the financial arrangements have been revised. There is a clear cut division between the finances of the Federation and those of the Provinces.

The provincial sources of revenue in addition to grants from federal taxation now include taxes raised by the local Government on land as land revenue, taxes on land and buildings, hearths and windows, taxes on agricultural income and duties in respect of succession to agricultural land, duties of excise on goods manufactured or produced in the province and countervailing duties on goods produced or manufactured elsewhere in India being alcoholic liquors for human consumption, opium, Indian hemp and other narcotic drugs and narcotics, non narcotic drugs medicinal and toilet preparations, containing alcohol or any of the above substances, other excises being federal, taxes on mineral rights subject to any federal restrictions imposed in respect of mineral development, capitation taxes, taxes on professions, trades, callings, and employments, taxes on animals, boats, the sale of goods, advertisements, on luxuries including entertainments, amusements, betting and gambling, cesses on the entry of goods into a local area, dues on passengers and goods carried on inland waterways, tolls, stamp duties in respect of documents not included in the federal list.

GOVERNORS OF BOMBAY		John Romer (<i>Officiating</i>)	1831
Sir Abraham Shipman	1662	The Earl of Clare	1831
Died on the island of Anjediva in Oct	1664	Sir Robert Grant, G C H	1835
Humphrey Cooke	1665	Died, 9th July 1838	
Sir Gervase Lucas	1666	James Farish (<i>Officiating</i>)	1838
Died, 21st May 1667		Sir J Rivett Carnac, Bart	1839
Captain Henry Garey (<i>Officiating</i>)	1667	Sir William Hay Macnaghten, Bart (b)	
Sir George Oxenden	1668	George William Anderson (<i>Officiating</i>)	1841
Died in Surat, 14th July 1669		Sir George Arthur, Bart, K C H	1842
Gerald Aungler	1669	Lestock Robert Fild (<i>Officiating</i>)	1846
Died in Surat, 30th June 1677		George Russell Clerk	1847
Thomas Rolt	1677	Viscount Falkland	1848
Sir John Child, Bart	1681	Lord Elphinstone G C H, P C	1853
Bartholomew Harris	1690	Sir George Russell Clerk, K C B (2nd time)	1860
Died in Surat 10th May 1694		Sir Henry Bartle Edward Frere, K C B	1862
Daniel Annesley (<i>Officiating</i>)	1694	The Right Hon William Robert Seymour	1867
Sir John Gayer	1694	Vesey FitzGerald	
Sir Nicholas Waite	1704	Sir Philip Edmond Wodehouse, K C B	1872
William Aislabie	1708	Sir Richard Temple, Bart, K C S I	1877
Stephen Strutt (<i>Officiating</i>)	1715	Lionel Robert Ashburner, C S I (<i>Acting</i>)	1880
Charles Boont	1715	The Right Hon Sir James Fergusson,	1880
William Philipp	1722	Bart, K C M G	
Robert Cowan	1729	James Braithwaite Pelle, C S I (<i>Acting</i>)	1885
Dismissed		Baron Reay	1885
John Horne	1734	Baron Harris	1890
Stephen Law	1739	Herbert Mills Birdwood, C S I (<i>Acting</i>)	1895
John Geck (<i>Officiating</i>)	1742	Baron Sandhurst	1895
William Wake	1742	Baron Northcote, C B	1900
Richard Bouchier	1750	Sir James Monteth, K C S I (<i>Acting</i>)	1903
Charles Crommelin	1760	Baron Jamington, G C M G, G C I E	1903
Thomas Hodges	1767	J W P Muir Mackenzie, C S I (<i>Acting</i>)	1907
Died, 23rd February 1771		Sir George Sydenham Clarke G C M G,	1907
William Hornby	1771	G C I E (c)	
Rawson Hart Boddam	1784	Baron Willingdon, G C I E	1913
Rawson Hart Boddam	1785	Sir George Ambrose Lloyd G C I E, D S O (d)	1918
Andrew Ramsay (<i>Officiating</i>)	1786	Sir Leslie Orme Wilson, P C, G C I E,	1923
Major-General William Medows	1786	G M G D S O	
Major General Sir Robert Abercromby,	1790	Sir Frederick Hugh Sykes, P O, G C I E,	1928
K C B (a)		G B F K C B, C M G	
George Dick (<i>Officiating</i>)	1792	The Rt Hon Michael Herbert Rudolf	
John Griffith (<i>Officiating</i>)	1795	Knatchbull, Lord Brabourne G C I E, M C	1933
Jonathan Duncan	1795	Sir Ernest Holtson, K C S I, O B E, I C S Acted	
Died, 11th August 1811		for six months for Sir F H Sykes	
George Brown (<i>Officiating</i>)	1811	(a) Proceeded to Madras on duty in Aug 1793	
Sir Evan Nepean, Bart	1812	and then joined the Council of the Governor	
The Hon Mountstuart Elphinstone	1819	General as Commander-in-Chief in	
Major-General Sir John Malcolm, G C B	1827	India on the 28th Oct 1793	
Lieut General Sir Thomas Sidney Beck-	1830	(b) Was appointed Governor of Bombay by	
with K C B		the Honourable the Court of Directors on	
Died, 15th January 1831		the 4th Aug 1841, but, before he could take	
		charge of his appointment, he was assassi-	
		nated in Cabul on the 23rd Dec 1841.	
		(c) Afterwards (by creation) Baron Sydenham	
		(d) Afterwards (by creation) Baron Lloyd	

THE BOMBAY LEGISLATIVE ASSEMBLY

Elected Members

Name of Constituency	Name of Member
Sholapur District, Muhammadan Rural	Khan Bahadur Abdul Latif Haji Hajrat Khan
Bombay Chamber of Commerce and Bombay Presidency Trades Association, Commerce and Industry	Sir John Abercrombie
Broach Sub Division, Muhammadan Rural	Mr Asmal Musa Abhram
Sholapur North East, General Rural	Mr Jivappa Subhana Aidale
Bombay City North and Bombay Suburban District Urban Muhammadan Rural	Mr Ali Bahadur Bahadur Khan
Bombay City (Bvculla and Parel) General Urban	Dr Bhimrao Ramji Ambedkar M A D Sc Bar at Law
Sholapur City, General Urban	Dr Krisnaji Bhimrao, Antoliakar
Sholapur South West, General Rural	Mr Dattatray Trimbak Aradhya B A , LL B
Panch Mahals Sub Division, Muhammadan Rural	Khan Sahib Abdulla Haji Isa Bhagat
West Khandesh East, General Rural	Mr Shahgram Ramchandra Bhartiya
Thana South, General Rural	Mr Ramkrishna Gangaram Bhatankar
Poona West, General Rural	Mr Rajuam Ramji Bhole
Bombay City cum Bombay Suburban District European	Mr Courtney Parker Bramble
Poona cum Ahmednagar, Indian Christian Rural	Mr Bhiskariao Bhaurao Chakranarayan
Bombay Chamber of Commerce and Bombay Presidency Trades Association, Commerce and Industry	Mr Fred Watson Charlesworth

(4 members to be nominated)	

Sind.

Sind is one of the two provinces created in 1936, the other being Orissa. Unlike the latter which has been carved out on a linguistic basis from three older provinces, Sind was a compact unit and was considered a province within a province even before its separation. From the point of view of geography, ethnology and language, Sind has greater affinity to the Punjab than to Bombay. Nevertheless it has been attached to the Bombay Presidency administratively ever since its conquest by Sir Charles Napier in 1843.

The demand for its separation into a distinct political entity is of comparatively recent origin. It was only about a dozen years ago that Muslim leaders started the demand that Sind, where the Muslims are in an overwhelming majority, should have separate administrative machinery under the Westminster constitution so that it might be a counterblast to provinces where the Hindus are in a majority. What was started as a bargaining point in inter-communal negotiations has now become an accomplished fact.

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation suggested in expert inquiry to ascertain the financial aspect of the separation and throw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be summarised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage—the problem is whether the Barrage can stand surety for Sind."

Demand for Separation

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation. Wide divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs 80 lakhs, the revenue from the Barrage being eaten up by interest charges. Roughly from 1945 onwards there would be a surplus from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

With the stage set for the advent of the new province, an Order in Council was issued in January, 1936, announcing that the new province would start on its career on April 1, 1936, and creating transitional machinery for the conduct of government till provincial autonomy is inaugurated in accordance with the provisions of the Government of India Act, 1935.

Of a permanent character are those provisions of the Order in Council which sever Sind from Bombay and settle the liabilities of the parent and the infant in respect of development loans incurred during the joint family period. Lands, forests, buildings, property, etc., will pass to the province where they are situated. Arrangements of taxes will belong to the province where the taxed property is situated or the taxed transactions took place. Of the outstanding Bombay Irrigation Debt incurred before April 1, 1921, Rs 2,74,96,384 including Rs 73,687 of the debit on account of the Lloyd Barrage and Canals system will be borne by Sind and the rest by Bombay. Of the debt incurred on account of the Lloyd Barrage and Canals system, all except the portion relating to the Nasirabad section (which is chargeable neither to Bombay nor to Sind) will be borne by Sind. The outstanding Bombay debt on account of the Bombay Development Scheme will be the debt of Bombay alone. Other loan works will be chargeable to the province where the works are located.

The temporary provisions of the Order in Council relate to the period between April 1, 1936, and the inauguration of provincial autonomy. During this period the Governor will carry on the administration assisted by two Advisers and a Council which will be purely advisory in character and will comprise members nominated by the Governor. Such provisions of the Government of India Act of 1919 as relate to the composition and functions of the provincial legislative councils, the separation of provincial subjects into transferred and reserved subjects, the Ministers and Executive Councils will not apply to Sind during the transitional period.

It is also understood that the Central Government will have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry. He has completed his investigations and submitted his report according to which Sind will get a cash subvention of Rs 105 lakhs for a period of ten years, after which the aid will be progressively decreased. While on the subject of help from the Centre, it may be mentioned that according to the Niemeyer recommendations, Sind will get after the first five years of provincial autonomy 2 per cent of the distributable portion of the income tax revenue.

Population

Sind has an area of 46,378 square miles and a population of 3,887,000. Of this, the Hindus (including scheduled castes) number 1,015,000 and the Muslims 2,831,000. The rest of the population is made up of 1,930 Anglo Indians, 6,576 Europeans and 6,627 Indian Christians.

The language of the province, Sindhi, though it bears many marks of Arabic and Persian influence and is written in a form of Perso-Arabic script, is nearer the original Sanskrit than any other Indian language. Few, however, are capable of writing it for only 70 out of every 1,000 people in Sind are literate. The average for males is 106 per 1,000, that for females being as low as 21 per 1,000. The Hindus are far more advanced than the Muslims and enjoy a virtual monopoly of the trade of the province. Against 263 Hindu literate males per 1,000, only 44 Muslims per 1,000 are literate. 51 per 1,000 literate Hindu females compare against five literate Muslim females. The number of those literate in English are 119 per 10,000—186 per 10,000 males and 34 per 10,000 females.

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. Ten per cent are engaged in manufacturing industries, most of which are, however, of the cottage type, there being very few factories in Sind.

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees. The Sindhi agriculturist is gradually becoming alive to the perennial regulated supply of irrigation and his outlook is becoming brighter. The rapidity with which lands supplied by the Barrage system are being taken up augurs well for the success of the scheme and the prosperity of the province as a whole. Already there has been a growth in the production of long staple cotton all of which is easily absorbed by Indian textile mills.

Lloyd Barrage

The Barrage owes its existence largely to the zeal of Sir George (Now Lord) Lloyd, the then Governor of Bombay, whose name it bears. Started in July 1923, it was completed in January 1932. It was the completion of the dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi the Sindhi alone knows for the Barrage has converted—or hopes to convert—a waterless desert into a smiling garden flowing with milk and honey.

The magnificence of the achievement that is the Lloyd Barrage can be imagined when it is realised that it is a huge water regulator consisting of 66 spans, each sixty feet wide, the openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three feet in the case of water courses. The total length of Government channels which were excavated was over 6,000 miles and that of water courses over 31,000 miles. The total lengths is thus some 37,000 miles, which means about 1½ times the circumference of the earth.

The total quantity of earthwork involved, excluding that for the watercourses was 569 crores cubic feet of earthwork which means a solid column measuring 100 feet by 100 feet extending to a height of over 550 miles.

The function of the Barrage is to lead up the river and store the water at Sukkur and from that to distribute it all the year round according to requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river—four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder, East and the Khairpur Feeder West. Those on the right bank are the Fechnul, the Central Rice and the South Eastern Perennial or Didu.

The total number of openings in all the canal head regulators is 55, each being of 25 feet span and each opening being equipped with gates electrically operated. The total discharge of water into all the canals is approximately 45,750 cusecs or 457,500 gallons per second. The total length of the main and branch canals is about 4,700 miles. To accomplish this staggering feat excavation of earthwork to the extent of 4,000,000,000 cubic feet was involved, as much as would fill a dike 15 feet wide and four feet deep dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows:

Wheat 2,440,000 acres, cotton 790,000 acres, rice 625,000 acres, *jowari*, *bagri*, etc., 695,000 acres, pulses 53,000 acres and oil-seeds 410,000 acres.

This denoted in produce would mean the following approximate quantities:

Wheat 1,134,000 tons, cotton 592,500 bales, rice 447,000 tons, *jowari*, *bagri*, etc., 298,000 tons, pulses 15,000 tons and oil-seeds 117,000 tons.

Inter-communal Co-operation

Politically the province is backward. Only the Hindu minority is politically minded; the Muslims owning allegiance to personalties rather than to principles. The Hindus are openly afraid of Muslim dominance and of being ousted from public life. They have already communicated this fear to the new Governor Sir Lancelot Graham who has assured them of his sympathy and determination to safeguard their legitimate interests. On the other hand, there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights. Leaders of both communities are working for the creation of an understanding between the two which will bring about an era of inter-communal co-operation and goodwill so necessary for the successful working of the reformed constitution under unfavourable financial conditions.

Karachi

No account of Sind will be complete without a reference to its capital, Karachi. It is a comparatively new town, for according to known

fact it was as recently as 1729 that a few traders of the neighbouring State of Kalat migrated to the 'Kalachi' the land of the sand dunes. It was several years later that its potentialities as a harbour were realised by the British—Sir Charles Napier, the Conqueror of Sind, is said to have forecast that Karachi would some day become the Glory of the East. Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled, for with the growth of aviation, Karachi, which is on the main line of imperial aerial communication between London and Australia right across India, is bound to become a vital airport if it is not already one. In addition to being the capital of Sind, Karachi is the outlet for the products of the Punjab. If the Barrage becomes all that is expected of it, Karachi may have to handle in 1960 nearly 1,133,000 tons of wheat, 500,000 bales of cotton, 447,000 tons of rice, 298,000 tons of *jowar*, *bajra*, etc. 15,000 tons of pulses and 117,000 tons of oilseeds. That this is not altogether Utopian is evident from the fact that within four years of the commencement of Barrage operations, that is by the end of 1935 the following areas were under cultivation in Sind: 850,000 acres under wheat, 500,000 acres under cotton and 50,000 acres under rice.

The Madras Presidency.

The Madras Presidency occupies the whole southern portion of the Peninsula, and excluding the Indian States, all of which have now come under the direct control of the Government of India, has an area of 125,148 square miles. It lies on the east, on the Bay of Bengal a coast line of about 1,250 miles, on the South on the Arabian Sea a coast line of about 450 miles. In all this extent of coast however there is not a single natural harbour of any importance; the ports, with the exception of Madras, and perhaps of Cochin are merely open roadsteads. A plateau varying in height above sea level from about 1,000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency on either side are the Eastern and the Western Ghats which meet in the Nilgiris. The height of the western mountain chain has an important effect on the rainfall. Where the chain is high, the intercepted rain clouds give a heavy fall which may amount to 150 inches on the seaward side but comparatively little rain falls on the landward side for the range. Where the chain is low, rain clouds are not checked in their westward course. In the central table land on the east coast the rainfall is small and the heat in summer excessive. The rivers which flow from west to east in their earlier course drain rather than irrigate the country, but the deltas of the Godavari, Krishna and Cauvery are productive of fair crops even in time of drought and are the only portions of the east coast where agriculture is not dependent on a rainfall rarely exceeding 40 inches and apt to be untimely.

Population

The population of the Presidency was returned at the census of 1931 as 47,193,802 an increase of 10.4 per cent over the figure of 1921. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1931—Bellary and Agencies were marked illustrations. As a natural corollary to an increase in population the Presidency density has risen. Hindus account for 88 per cent of the Madras population, Muhammadans 7 per cent and Christians 3.8 per cent. The actual number in other communities is inconsiderable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively, 40 per cent of the population talk Tamil, 37 per cent Telugu, 7.9 per cent Malayalam, Oriya, Kanarese, Hindustani, Iulu follow in that order with percentages above 1.

Government

The Madras Presidency is governed on the system generally similar to that obtaining in Bombay and Bengal. There are associated with the Governor four members of the Executive Council in charge of the Reserved Sub-

jects and three Ministers in charge of the Transferred Subjects. Madras administration differs however, in some important respects from that of other major provinces. There is no intermediate local authority between the Collector of the District and the authorities at headquarters, Commissioners of Divisions being unknown in Madras. Another feature peculiar to the Southern Presidency is the manner of choice of the ministers. Following the practice of the Mother of Parliaments Madras Governors have ever since the inception of the Pethica called upon the leader of the dominant party to form a ministry giving him freedom to select his colleagues on the ministry. Consequently he enjoys the status of Chief Minister—unknown in other provinces in India.

Agriculture and Industries

The principal occupation of the province is agriculture engaging about 68 per cent of the population. The principal food crops are rice, cholam, ragi and kumbu. The industrial crops are cotton, sugarcane and groundnuts. The agricultural education is rapidly progressing in the Presidency. The activities of the Agricultural Department in matters educational consist in the running of a college at Combaratore affiliated to the University of Madras, three farm labourers' schools, numerous demonstration farms. As it was found that the present course of middle school education does not satisfy the needs of the ryots, the only school maintained by the department at Talpambudi was closed with effect from 1st April 1932. A Middle School is however now maintained by the District Board of Madras at Usilampatti. The institution of short practical courses in farm management and allied subjects in the Agricultural College at Combaratore have been sanctioned. While paddy which is the staple food of the population occupies the largest cultivable area, cotton and sugarcane are by no means inconsiderable crops of the province and are receiving close attention at the hands of the local agricultural authorities. The area under cotton irrigated and unirrigated is estimated at 2,18,380 acres and as in the case of paddy efforts are being made to produce better strains of cotton suited to different localities by means of both selection and hybridization. Side by side with an increase in the area under cotton, from existing good staple areas, improved varieties have been systematically introduced. A special feature of the agricultural activities in the Presidency is the large industry which the planting community have built up, contributing substantially to the economic development of the province. They have organised themselves as a registered body under the title of The United Planters Association of South India on which are represented coffee, tea, rubber and a few other minor planting products. The aggregate value of seaborne trade of the Presidency which was Rs 70,04,81,842 in 1933-34 and Rs 76,98,36,552 in 1934-25 decreased to Rs 76,09,69,526 in 1935-36. As in

other provinces, the forest resources are exploited by Government. There are close upon 19 000 square miles of reserved forests.

Thirty eight spinning and weaving mills were at work during the year and they employed 54,584 operatives. The number of jute mills at work was four. At the close of the year 1935 the number of the other factories in the Presidency was 1,560. These consisted of oil mills, rope works, tk works, etc. Tanning is one of the principal industries of the Presidency and there is considerable export trade in skins and hides. The manufacturing activities which are under the direction of the Department of Industries are mainly confined to the production of soap. There are a number of indigenous match factories run on cottage lines. It is expected that the levy of the excise duty on matches will drive off the market products of inferior quality and it is probable that only the very efficient units of the cottage industry will be able to continue the manufacture of matches once the full force of the excise duty is felt upon the industry. It is slowly becoming recognised that the Madras Presidency is one of the most suitable parts of India for sugarcane cultivation and that the several deep rooted varieties of cane which have been evolved at Coimbatore and require very little water are especially suited for the conditions which obtain in several areas of the Presidency where they grow better than in the north. The departments of Industries and Agriculture assist the development of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists by the award of scholarships and by investigating schemes for starting sugar factories.

The Victoria Technical Institute continued to receive annual subsidy of Rs 5,000 in connection with the appointment of an agent in London for the sale of products of Madras cottage industries in European markets.

Education

The Presidency's record in the sphere of education has been one of continuous progress. There are at present about 51 000 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 3 133 000. Special efforts are being made to provide education for boys belonging to the Depressed Classes. The Council passed a resolution in the year 1929 at the instance of a nominated member that poor girls reading in any educational institution in the province—Government, local fund, Municipal or aided—should be exempted from school fees in any Standard up to III Form. The total expenditure of the province on Education is in the neighbourhood of Rs 551 lakhs. The principal educational institutions in the province are the Madras Andhra and Annamalai Universities, the Presidency College, the Christian College, the Loyola College, the Pachaiyappa College, the Law College, and the Queen Mary's College for Women, Madras, the St. Joseph's College, Trichinopoly, the American College, Madura, the Government College, Kumbakonam, the Government College,

Rajahmundry, the Agricultural College, Coimbatore, the Medical Colleges at Madras and Vizagapatam and the Engineering College at Madras (Guindy).

Cochin Harbour Scheme

The importance of this project lies in the fact that a good harbour at Cochin would lead to the development of a valuable hinterland and provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well equipped harbour. The scheme involved cutting a passage through the bar which previously blocked the entrance from the sea to an extensive backwater, and then by dredging and reclamation forming a sheltered harbour giving full protection and facilities at all seasons of the year. An agreement was reached in 1925 between the Governments of India and Madras and the Barbars of Travancore and Cochin States indicating how the work was to be carried out and outlining the financial arrangements necessary. A trial cut was made in 1922-23 and the effects of the monsoon thereon was observed. The results recorded were examined by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 32½ feet deep was completed on 30th March 1928. The channel through the outer bar is now 3 miles long by 450 feet wide and a minimum depth of 30 feet at L.W.O.S. is maintained throughout the year. Since 1930 the Harbour has been in constant and regular use by all ships and regular passenger services have been inaugurated by the P & O Co., the Bibby Line and the B.I.S.N.Co. To facilitate night navigation the channels have been lighted. A powerful tug has been provided and ships can enter and leave the harbour at all states of the tide. A hotel on modern lines has been constructed to provide accommodation for passengers calling at the port. During the year 1936 the Bibby Line took more passengers from Cochin than from either Rangoon or Colombo.

Cochin was declared a major port under the control of the Government of India with effect from 1st August 1936, and the execution of the 4th stage works has been sanctioned and is now in rapid progress. These include the construction of deep water wharves with railway connections, construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities. These improvements are being made on the new reclamation (Willington Island) of which about 600 acres have been formed already by dredgings from the harbour. This Island will be connected to the mainland by a rail and road bridge across the backwater and by a road bridge to Mattancherry (Cochin). The Shoranur Ernakulam railway line has been converted from metre to broad gauge and opened for traffic. The line will be extended to the wharves at the Willington Island. These developments which are expected to be finished by the beginning of 1940 will greatly enhance the utility of the port to the planting and agricultural areas in that part of the Presidency.

Local Self Government.

Local bodies in the Madras Presidency are administered under the following Acts —

The Madras City Municipal Act, 1910, was amended by a comprehensive Amendment Act in 1936 and the main changes effected by the Amending Act which was brought into force on 21st April 1936 were as follows —

- (1) the redistribution of the existing thirty divisions into forty territorial ones,
- (2) the provision for a Deputy Mayor
- (3) the provision for aldermen
- (4) the increase in the maximum strength of the council from 50 to 63 members consisting of 60 elected councillors, five aldermen elected by the council and not more than three special councillors appointed by Government for special subjects,
- (5) the reservation of three special seats for Adi Dravidas and two for Labour,
- (6) the widening of the franchise,
- (7) the abolition of the system of representation of minority communities by nomination,
- (8) the provision for better control over churches and hunting grounds
- (9) the provision for the levy of a tax on advertisements
- (10) the fixing of the minimum and maximum rates of levy of the property tax at 15½ and 20 per cent respectively of the annual value of buildings and lands and

(11) the constitution of a new Taxation Appeals Standing Committee with a Chairman appointed by Government

The Madras District Municipalities Act, 1920 as amended by Madras Act X of 1930, and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930

The amending Acts of 1930 which came into force on the 26th August 1930, provide, *inter alia*, for the abolition of the system of nominations to local bodies, for the inclusion of village panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the cessation of office of the President or Chairman on a motion of non confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. Taluk Boards have been abolished with effect from the 1st April 1934

In the interests of administration, commissioners have been appointed to almost all the Municipalities in the presidency and these have replaced non official chairmen and executive authorities

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April 1934. This step was undertaken as these bodies became financially embarrassed. Their functions have been entrusted to district boards with a view to avoid extreme centralisation of administration of district boards it has been decided to bifurcate them. Up to the end of 1935, the number of district boards bifurcated was four. Eight district boards were bifurcated in 1936.

By an Act of 1935, the local boards in the presidency have been divided into three groups for the purpose of elections so that elections will be held to a third of the local boards every year. The object of this legislation was administrative convenience.

By an Act of 1936 ordinary courts of law have been debarred from issuing injunctions restraining proceedings which are being or about to be taken for the conduct of elections to local bodies and preparation of electoral rolls in connection therewith.

Local bodies are now enabled under the Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

Irrigation

In March 1925, the Secretary of State sanctioned the Cauvery Reservoir Project, the estimated cost of which amounted to about £ 4½ millions. The project has been framed with two main objects in view. The first is to improve the existing fluctuating water supplies for the Cauvery Delta irrigation of over a million acres. The second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, add 150,000 tons of rice to the food supply of the country. The scheme which was completed in 1934 provides for a large dam at Mettur on the Cauvery to store 93,500 million cubic feet of water and for a canal nearly 88 miles long with a connected distributary system. Owing to the necessity for providing a suitable surplus arrangements to dispose of floods similar to the phenomenal floods of 1924 and to other causes the estimate had to be revised and the revised estimate stands at about £ 5½ millions. A saving of nearly 1½ million is anticipated. Another important project is the Periyar project which is intended not only for irrigation purposes but also for providing water power for generating electricity. Taking its rise in the Western Ghats the river flows into the Arabian Sea through Travancore State territory. After prolonged negotiations the Travancore Durbar consented to the water being caught and stored in the Travancore hills for being diverted towards the East. Some three thousand feet above sea level a concrete and masonry dam has been constructed and nearly 50 feet below the crest level of the dam a channel through the summit of the range carries the waters into the eastern watershed where they are led into the river Vaigal. The total quantity of water impounded at crest level is 15,660 million cubic feet. By this work, a river ordained by Nature to flow into the Arabian Sea has been led across the Peninsula into the Bay of Bengal irrigating on its way well over 100,000 acres of land. The

irrigable area commanded by the Periyar system is 143,000 acres while the supply from the lake was sufficient only for 130,000 acres. To make up for this deficit, the effective capacity of the lake was increased in 1933 by lowering the watershed cutting. The area already under irrigation in the Madras Presidency total about 7.5 million acres. Of this over 3 million acres are served by petty irrigation works numbering about 38,000.

Electric Schemes

The first stage of the Pykara Hydro Electric project which was under construction by the Government of Madras has now been completed and is in operation from 1st April 1933. It consists in utilising a fall of over 3,000 ft. in the Pykara river as it descends the Nilgiri Plateau for the generation of electrical energy and its transmission for supply to the neighbouring districts, viz., the Nilgiris and Coimbatore and part of Malabar, Salem, Erichinopoly and Tanjore. The Glen Morgan scheme started in 1928 with the object of supplying power to the main construction works of the Pykara project has now been merged with it. In its present completed form the project consists of the main power house at Singara with an installed plant capacity of 33,000 B.T.P. and the transformer station the receiving station at Coimbatore. 10 other substations 189 miles of 60 K.V. line, 173 miles of 22 K.V. line and 135 miles of 11 K.V. line. The booked cost up to 31st March 1936 is Rs. 1,77,91,909. The total number of units generated during the year ending March 1936 was over 50,000,000 and it is expected to reach 70,000,000 units in 1936-37. Owing to the rapid increase in the demand for power steps have been taken to provide additional storage of water at Mukunti to supplement any shortage of water at the torbay during dry months. The revenue realised during 1935-36 is about Rs. 16,17 lakhs against Rs. 6,64 lakhs estimated at the time the scheme was submitted for sanction. The construction of the Mettur Hydro Electric scheme is in progress. It is expected to commence supply in 1937. The estimated capital investment on the scheme is about Rs. 81 lakhs, excluding the cost of the Hydro Electric pipes inserted in the Dam and the cost of the transmission lines and substations in the Erichinopoly and Tanjore districts which are now included in the Pykara System and which are proposed to be transferred to the Mettur System when it begins operation. The initial generation on a rough estimate is expected to be 23,000,000 units. Besides the Erichinopoly and Tanjore districts to be transferred from the Pykara system the area to be supplied by the Mettur scheme will cover the Salem, South Arcot, North Arcot and Chittoor districts.

Co operation

The slight improvement that there has been in the economic conditions of the people is reflected in the record of the progress of the co-operative movement during 1935-36. The appreciable increase in the loan transactions of Central Banks denotes the return of confidence in the credit worthiness of the ryot—a confidence fully justified by the progress in the repayments of loans by the agriculturists to the village societies and by the village societies

of Central Banks. There has been a noticeable decrease in the percentage of balance to demand under principal, arrears, interest and current interest both in Central Banks and agricultural societies. The policy of rectification and consolidation of existing societies was continued. As many as 212 societies were registered during the year as against 100 in the previous year, a good number being non credit societies. The registration of 334 societies was cancelled as compared with 281 in 1934-35. Liquidation was resorted to only when all attempts proved futile to revive societies either by supervision of committees under section 43 of the Madras Cooperative Societies Act 1932, or by application of bylaw 62 and appointment of agents. Under the scheme of subvention to Central Banks for carrying on consolidation and rectification work the Provincial Bank paid Rs. 1,34,70 to 19 central banks and the central banks in their turn spent Rs. 1,37,760 from their funds on this work. During the year the Registrar's scheme of rectification was pursued by all central banks and additional securities were obtained in respect of loans amounting to Rs. 16,21 lakhs which were ill secured. The adequacy of the security for loans aggregating Rs. 2,67,76 lakhs given by as many as 6,228 societies has so far been examined. The strong reserves built up by central banks will enable them without detriment to their financial stability to write off ultimately some bad and irrecoverable debts which have been brought to notice. The Central Land Mortgage Bank recorded another year of steady and sustained progress. Thanks to cheap money its conversion operations were successful and no debentures carry interest exceeding 4 per cent. As in the past the benefit of low interest was passed on to ultimate borrowers and no loan bears more than six per cent. Debentures of the value of Rs. 46,57,900 were issued as against Rs. 28,72,800 in the previous year. Primary Land mortgage banks which numbered 80 advanced loans to the extent of Rs. 31,41 lakhs during the year as against Rs. 20,57 lakhs in the previous year. Land Mortgage Banks have up to 30th June 1936 contributed a sum of Rs. 10,3,04 lakhs towards the redemption of debts by the ryots. The Provincial Handloom Weavers Society which started work in August 1935 made a net profit of Rs. 596.

The agricultural classes continued to suffer from the after effects of the general economic depression and this is reflected in the state of overdues in societies during the year 1934-35, though there was a noticeable fall in the percentage of balance to demand in the case of both principal and current interest in the dues of agricultural societies. A satisfactory feature of the year was that Central Banks increased their loan transactions from Rs. 84,77 lakhs to Rs. 1,02,07 lakhs. The surplus funds of Central Banks were still further reduced to Rs. 26,36 lakhs and the Government have since relaxed the restrictions on the deposits of funds of local bodies. The policy of cautious registration of societies was continued. Only 100 societies were registered during the year as against 140 in the previous year, while 28 societies were liquidated. Under the scheme of subvention by the Provincial Bank for the rectification of societies the non official staff was able to reduce

overdue in 1934 bad societies to below 10 per cent. Almost all the Central Banks have adopted the registrars scheme for the examination of individual loans in affiliated Societies with the result that, at the end of the year additional securities were obtained in respect of loans amounting to Rs. 14,08 lakhs which were all secured. The South India Co-operative Insurance Society started in March 1932 continued to do satisfactory work during the year. The Central Land Mortgage Bank which was started in 1929 for the purpose of financing primary land mortgage Banks by floating debentures had another successful year. It issued debentures to the extent of Rs. 28,72,800 against Rs. 24,79,500 in 1933-34. In accordance with its policy of converting of high interest bearing debentures into ones carrying a lower rate of interest, one Bank converted debentures of a total value of Rs. 10,82,200 and the benefit of the reduction in the rate was passed on to the ultimate borrowers in the primary funds. Funds are now made available to them at 6 per cent interest. The Government have guaranteed both the principal of and the interest on the debentures issued by the Bank. Satisfactory conditions and debentures so guaranteed have become trustee securities according to an amendment of the Indian Trusts Act.

Law and Order

The Superior Court for Civil and Criminal Judicial work in the Presidency is the High Court at Madras which consists of a Chief Justice and thirteen puisne Judges. The existing law provides for a maximum of 20 High Court Judges. For the administration of criminal justice there are 28 Sessions Judges in the Mufassal, (including three for agency tracts). Additional and Assistant Sessions Judges being provided to assist Courts in which the work is heavy. Then there are the District Magistrates, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on by 25 District Judges and 39 Subordinate Judges and 142 District Munsiffs. In the Presidency Town there are a City Civil Court consisting of two Judges and Small Causes Court consisting of a Chief Judge and two other Judges. Madras is a litigious province and the records show one suit for every 85 persons. The Police department is under an Inspector General who has six deputies, four in charge of ranges of the Presidency, one in charge of the Railway Police and the Criminal Investigation Department and one in charge of the Madras City Police as Commissioner of Police. A Superintendent is stationed at each district. The sanctioned strength of the Permanent police force is about 29,100 including the Malabar Special Police.

The Bengal Presidency.

The Presidency of Bengal, as constituted on the 1st April 1912, comprises the Burdwan and Presidency divisions and the district of Darjeeling which were formerly administered by the Lieutenant-Governor of Bengal, and the Rajshahi, Dacca and Chittagong divisions which by the partition of the old Province had been placed under the administration of the Lieutenant-Governor of Eastern Bengal and Assam. The area of the Presidency is 82,955 square miles and it possesses a population of 51,087,338 persons, included within this area are the two Indian States of Cooch Behar and Tripura, which are in direct political relations with the Government of India and are now in the political charge of the Agent to the Governor General Eastern States, Ranchi. The area of the British territory is 77,521 square miles. The general range of the country however is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans which lie between the area of cultivation and the Bay of Bengal.

The People

Of the inhabitants of the Presidency 27,810,100 or 54.44 per cent are Mahomedans and 22,212,069 Hindus. These two major religions embrace all but 2.09 per cent of the population, Christians, Buddhists and Animists combined, number 1,043,049.

Bengali is spoken by ninety-two per cent of the population of the Presidency and Hindi and Urdu by 3.7 per cent.

Industries

According to the returns of the census of 1931 5,593,384 persons or 20.7 per cent of the population derive their support from pasture and agriculture, and of these 6,041,495 are cultivators, and 2,718,939 are agricultural laborers. The area under jute in 1936 is estimated at 2,180,800 acres against 1,917,500 in 1935.

Bengal is the most important rice producing area in Northern India, and it is computed that 87 per cent of the cultivated area of the Presidency is devoted to its production. Other crops include barley, wheat, pulses and oil seeds. Sugar is produced both from the sugar cane and from the date palm, and tobacco is grown for local consumption in nearly every district of Bengal. The area under tea in 1933 was 209,688 acres. There were 184,762 permanent and 7,841 temporary hands.

Manufacture and Trade—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpaiguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the riparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency.

There was some improvement in the jute trade of Bengal (which began to decline since the year 1928-29) owing to a rise in the price of raw jute as a result of the policy of voluntary restriction of jute crop, undertaken by the Government of Bengal.

The trade of Bengal during 1934-35 showed an improvement over the previous year owing to the gradual lifting of the world wide depression. The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports increased from Rs. 1,11.58 crores in 1933-34 to Rs. 1,19.20 crores in 1934-35. Imports of private merchandise increased from Rs. 32.13 crores in 1933-34 to Rs. 35.32 crores in 1934-35, while exports of private merchandise decreased from Rs. 58.46 crores in 1933-34 to Rs. 57.30 crores in 1934-35.

*Statement showing the trade of Calcutta & Bengal separately during 1933-34,
1934-35 & 1935-36*

	1933-34		1934-35		1935-36

Exports—Private Merchandise—Foreign trade	58.46	63.69	57.30	62.72	61.22	66.40

Administration

The present form of administration in Bengal dates from January 1921. In 1912 the Government of the Province underwent an important change, when, in accordance with the Proclamation of His Majesty the King Emperor at Delhi, the Province was raised from the status of a Lieutenant Governor to that of a Governor in Council, thus bringing it into line with the Presidencies of Madras and Bombay. In 1921, under the Reform Scheme, the Local Government was reconstituted, certain of the departments being placed under the control of Ministers appointed from among elected members of the Legislative Council. There are normally four members of the Executive Council who are in charge of the reserved subjects, and three Ministers, who are in charge of the transferred subjects.

Bengal is administered by five Commissioners, the divisions being those of the Presidency, Burdwan Rajshahi, Dacca and Chittagong. The unit of administration is the District Magistrate and Collector. As Collector he supervises the ingathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district. The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Government. In certain revenue matters they are in their turn, subject to the Board of Revenue in Calcutta, in other matters they are under the direct control of Government.

Justice

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 18 Puisne Judges including three additional judges who are Barristers, Civilians or Vakils. Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs. Of these officers the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court while the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates. On its appellate side the High Court disposes of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presidency Magistrates is in charge of the Children's Court, is helped by Hony Women Magistrates. It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England.

In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government

By Bengal Act III of 1884, and its subsequent amendments, which hitherto regulated municipal bodies in the interior, the powers of Commissioner

of municipalities were increased and the elective franchise was extended. Bengal Act III of 1884 was repealed by Act XV of 1932 by which material changes have been introduced, e.g., the franchise of the electors have been further widened, women have been enfranchised, the proportion of elected commissioners has been increased and the term of office of the Commissioner has been extended from three to four years. Municipal expenditure now comprises a large number of objects, including veterinary institutions, employment of health officers, vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for the working classes, the holding of industrial, sanitary and health exhibitions and the improvement of breed of cattle. The Commissioners also have large powers in regard to the water supply and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1899, makes the Corporation paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and Executive Officer and Deputy Executive officers, all elected by the Corporation. The appointment of the Chief Executive Officer is subject to the approval of Government. The total number of councillors, after the enactment of the Calcutta Municipal (Second Amendment, Act 1932, is 91 with 5 Aldermen elected by the Councillors. Of the 91 seats, 81 are elected, of which 21 are reserved for Muhammadans. Ten of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insanitary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the mofussil, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduces the new system of self government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self taxation. The new village authority, called the union board, replaces gradually the old chaukidari panchayats and the union committees and deals with the village police, village roads, water supply, sanitation, primary schools and dispensaries. The Act also empowers Government to create out of the members of the union boards, village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Presidency and up to March 1934 over 4,737 Union Boards were actually constituted.

Public Works

The Public Works Department consists of Public Works and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries.

The Public Works Department deals with questions regarding the construction and maintenance of public buildings and also re-gardng roads bridges etc.

The Railway Department deals with questions regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects

There is a Chief Engineer who is the principal professional adviser of Government

N B—Under the New Constitution, the present organisation of Public Works (including Railways) together with Irrigation as well as Road Fund and Bengal Motor Vehicles Act transferred from the Local Self Government Department will form the Department of Communication and Works which will have a separate Secretary of its own

Marine

The Marine Department deals with questions connected with the administration of the port of Calcutta, and the Government Dockyard, Narayanganj, and inland navigation including the control and administration of Government launches except the police launches

Irrigation

The Irrigation Department deals with irrigation, navigation, flood protection by means of embankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available

Police

The Bengal Police force comprises the Military Police, the District Police, and the Railway Police. The Bengal Police are under the control of the Inspector General of Police, the present Inspector General being a member of the Imperial Police Service. Under him are Deputy Inspectors General for the Dacca range, the Rajshahi range, the Presidency range, the Burdwan range and the Bakarganj range and also one Deputy Inspector General in Charge of the C.I.D. and the Intelligence Branch. Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct charges, each under a Superintendent. The cadre comprises Assistant Superintendents, Deputy Superintendents, Inspectors, Sub Inspectors, Sergeants, Assistant Sub Inspectors, head constables and constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sarlahi in the district of Rajshahi where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub Inspectors, Sergeants, Assistant Sub Inspectors, head constables and constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. The annual cost of the Police is over 228 lakhs.

The head of the Medical Department is the Surgeon General with the Government of Bengal. In the districts the Civil Surgeons are responsible for medical work. There are 44 hospitals and dispensaries in Calcutta, 11 of which are supported by the Government and 860,540 persons were treated at these institutions of whom 57,177 were in patients. In the Mofussil districts there are 1,200 hospitals and dispensaries, the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 9,083,248.

Education

In the Presidency of Bengal education is imparted partly through Government agency and partly through private bodies assisted to some extent by Government grants in aid. Government maintains four Arts Colleges in Calcutta (of which one is a college for women, one is for Mahomedans and one the Sanskrit College), one at Hughli, one at Krishnagar, three, including the Islamic Inter College, at Dacca, one at Rajshahi and one at Chittagong. It also maintains two training colleges one at Calcutta and one at Dacca for teachers who teach in secondary schools through the medium of English, and 5 normal schools, one in each division, for the training of teachers in secondary schools who teach through the medium of the vernacular. It also an engineering college at Sibpur and an engineering school at Dacca, two medical colleges a veterinary college, a school of art and a commercial school in Calcutta and a weaving school at Serampore. It also provides at the headquarters of all districts except Burdwan and Midnapore, and also at certain other mofussil centres, English high schools for the education of boys while to some Government Arts Colleges high schools are attached. In Calcutta there are five Government high schools for boys, two of which are attached to the Presidency College and one to the Sanskrit College. Government high schools for girls exist only in the headquarters stations of Calcutta, Dacca, Mymensingh, Comilla and Chittagong. The other secondary schools, with the exception of a few middle schools managed either by Government or by municipal and district boards, are under private control. The administration of primary education in all areas which are not under municipal control rests with the district boards grants being given from provincial revenues to the boards, which contribute only slightly from their own funds. Only in backward localities are such schools either entirely managed, or directly aided, by Government. Apart from the institutions referred to above 80 institutions called Guru Training Schools are maintained by the Department for the training of primary school teachers. For the education of Mahomedans, there are senior Madrasahs at Calcutta, Dacca, Chittagong, Hughli and Rajshahi which are managed by Government. There are also certain Government institutions for technical and industrial education. All institutions for technical and industrial education (except B. E. College the Ahsanullah School of Engineering, Dacca, the Government Commercial Institute and the Government School of Art Calcutta) are now under the control of the Director of Industries. A large proportion of educational work of every grade is under the

control of various missionary bodies, which are assisted by Government grants in aid

The municipalities are required to expend a certain proportion of their ordinary income on education. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a high school at Burdwan, a high school at Santipur, a high school at Kustia and a high school at Chittagong

In 1935-36 there were in the Presidency —
RECOGNISED INSTITUTIONS FOR MALES

	Institutions	Scholars
Universities	2	1,832

Special Schools	47	3,468

UNRECOGNISED SCHOOLS

Males	1,069	49,974
Females	281	12,903

The Department is administered by a Director of Public Instruction assisted by an Assistant Director, a special officer appointed temporarily, an Assistant Director for Muhammadan Education and a Director of Physical Education. Each division is in charge of a

Divisional Inspector assisted by a certain number of Additional or Second Inspector and Assistant Inspectors for Muhammadan Education according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub Divisional Inspectors and Sub Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbler status called Assistant Sub Inspectors and Inspecting Pandits and Mulvis. High education is controlled by the Universities of Calcutta and Dacca established in 1857 and 1921, respectively administered by the Chancellor (the Governor of Bengal) the Vice Chancellor (appointed by Government) and a number of ex officio, elected and nominated fellows. The University of Calcutta maintains a Law College called University Law College Calcutta. Dacca University also has a Law Department attached to it. Calcutta University is mainly an examining body but it has now made itself responsible for advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges.

The University at Dacca is of the residential type. There is a Board for Secondary and Intermediate Education at Dacca. It conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca and also the Islamic Matriculations and Intermediate examinations.

The Education of Europeans is mainly conducted by private agency, assisted by Government grants. Government however maintain a special Inspector and also a school for boys, a school for girls (both residential) at Kurseong, and attached to the latter a Training College (for women only).

THE FINANCES OF BENGAL

After a sequence of deficit budgets for several years Bengal is now looking forward hopefully to an improvement in her financial position. This improvement is a direct result of the special steps taken by the Central Government and by Parliament through the India Act to alleviate Bengal's plight. Under Provincial Autonomy she is better off to the extent of Rs. 75 lakhs a year than before. In the last financial year, despite the grant from Central revenues of an amount equal to half the proceeds of the jute export duty, the budget showed a deficit of Rs. 51½ lakhs. The Nidmeyer report, however, is subsequently implemented, gave a further sum of Rs. 42 lakhs annually from an increased share in the jute export duty, and also an annual relief of Rs. 3½ lakhs by cancelling the province's accumulated debt to the Centre. Thus Bengal was to be able to face the future with more confidence.

The United Provinces.

The United Provinces of Agra and Oudh lie in practically the centre of Upper India. They are bounded on the north by Tibet, on the north east by Nepal, on the east and south east by Bihar on the south by two of the Chota Nagpur States of the Central India Agency and the Saugor district of the Central Provinces, and on the west by the States of Gwalior, Dholpur, Bharatpur, Sirmoor, and Jubbah, and by the provinces of Delhi and the Punjab. Their total area amounts to 106,248 square miles, to which may be added the area of the three Indian States of Rampur, Tehri Garhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49,614,833.

The Provinces, originally termed the North Western Provinces and so amalgamated in 1877, receiving their present designation in 1902, include four distinct tracts of country portions of the Himalayas, including the Kumaon division which consists of three hill districts two of which are entirely in the hills and one is half in the submontane belt, the sub Himalayan tract, the great Gangetic plain and portions of the hill systems of Central India including Bundelkhand. The Gangetic plain is protected by an extensive Canal system, which though somewhat liable to run short of water in extremely dry years, is of great benefit in all ordinary years and years of limited drought. The first two of these tracts are infertile and support a very sparse population and the Central Indian plateau is almost equally infertile, though better populated. The soil of the Gangetic plain, however, possesses an extreme fertility and here the density of population varies from 542 persons per square mile in the west to 555 in the centre and 753 in the east, which gives the Provinces as a whole a greater population pressure on the soil than any other Province in India save Delhi and Bengal. In the south there are low rocky hills broken spurs of the Vindhyan mountains covered with stunted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent big and small game shooting and rising beyond in a tangled mass of ridges, ever higher and higher, until is reached the line of the eternal snows, but the greater part of the provinces consists of level plain, teeming with highly cultivated fields and watered by three rivers—the Ganges, Jumna, and Gogra.

The People

The population is mainly Hindu, 84.4 per cent ranking as such whilst Mahomedans number 15 per cent, the total of all other religions being 0.6 per cent composed of Christians (Europeans and Indians), Jains, Sikhs, Parsis, Buddhists and Jews. Included among the Hindus are the Arya Samajists, followers of the Arya Samaj sect, which obtains widely in the Punjab and has extended its influence to the United Provinces. The three main physical types are Dravidian, Aryan and Mongoloid, the latter being confined to the Himalayan and sub-Himalayan districts and

the former to South Mirzapur and Bundelkhand, whilst the high-caste Aryans frequent the Western districts of the Provinces. Most of the people, however, show a mixed Arya-Dravidian origin. Two languages are spoken by the majority of people in the plains, Urdu, and Hindi, Urdu being more common in the urban areas and because of its close relationship with Persian and Arabic on the one hand and Hindi on the other, forming the *lingua franca* of the Province.

Agriculture

The chief industry is agriculture, which is the principal source of livelihood of 71.1 per cent of the population and a subsidiary source of income to a further 8.2 per cent. The soils of the Provinces fall into three groups: the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium, the chief characteristic soil of the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary with the nature of the rock from which they have been formed, whilst the main alluvium soils are sand, clay and loam, the loam being naturally the most productive. The soil generally yields excellent crops of rice, millet, maize, linseed, cotton, wheat, sugarcane, pulses and barley, rice being grown mostly in low lying, heavy clays. The greater part of the Provinces is highly cultivated the rainfall varies from 50 to 60 inches in the Hills to 40 inches in the Benares and Gorakhpur Divisions whilst the Agra Division receives only about 25 to 30 inches annually. Drought seriously affected Bundelkhand and the Agra Divisions in the past, improved drainage and irrigation facilities have effected considerable improvements. In the latter area however, shortage of water in the canals and the general lowering of the water table still continue to react against full agricultural returns. Steps are being taken to increase the amount of water passing down the canals. Commodity prices with the exception of sugar did show further improvement over those prevailing in 1935. The average outturn of important food grains declined but the yields of wheat and cotton were comparatively higher. The positions of the Agriculturist however, remains more or less the same. Land is held on *zemindari* tenure in Agra and *taluqdari* tenure in Oudh. The principal land owners in Oudh are the Taluqdars, some of whom own very large estates. The area held in *taluqdari* tenure amounts to 54 per cent of the total area in Oudh.

Manufactures

The provinces are not rich in minerals. Iron and copper are found in the Himalayan districts, and there were mines of importance there formerly, but owing to high cost of production and inaccessibility, most of them have been closed. Gold is found in minute quantities by washing the sands in some of the rivers in the hills. Limestone is found in the Himalayas and in the Etawah district, and stone is

largely quarried in the Mirzapur district. Cotton is ginned and spun throughout the Western districts of the provinces as a home industry, and weaving by means of handlooms is carried on in most districts. Cawnpore is the chief centre for cotton spinning and weaving mills. According to the census of 1931, 45,128 persons were employed on cotton spinning, cleaning and pressing and 408,033 on spinning and weaving. Silk weaving used to be confined to Benares (where the famous 'Kimkhab' brocade is made) but considerable work is now done at Etawah, Sandila and Mau and some at Agra and Shahjahanpur as well. Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslin is produced, and in Benares, where gold and silver work on silk, velvet, crepe and sarsenet obtains. Benares uses local gold thread for embroidery work and 'Kimkhab' weaving. The glass industry is important at Firozabad, Bahjoi, Balawali, Sasni, Hathras, Haranga, Shikohabad, Makhnapur and Naini (Allahabad). Moradabad is noted for its lacquered brass work, Benares for brassware engraving and repousse karukhabad and Pilkhawa (in Meerut district) for their calico prints and Agra for its carpets and marble and alabaster articles, glazed pottery is made at Chunar and Kurja and clay figures of men and fruits at Lucknow and carpets at Mirzapur.

The making of brass utensils at Mirzapur, Farrukhabad and Oel (District Kheri) the carving and inlay work of Nagina and Saharanpur, the silk industry of Naini Tal (Moradabad) and Mau, the lock and brass fittings industry of Aligarh, the copper utensil industry of Almorah, the durries of Agra and Bareilly, the pottery of Nizamabad (District Azamgarh) and the ivory work of Lucknow also deserve mention.

Cawnpore is the chief industrial centre. It has tanneries, soap factories, oil mills, cotton, woollen and other mills. The woollen mill is the largest in India. Lucknow possesses an important paper-mill and also a cotton mill. There are cotton spinning and pressing factories at Aligarh, Meerut, Saharanpur and Bareilly and cotton mills at Agra, Hathras, Lucknow, Benares and Moradabad. Many sugar mills have been recently started mainly in the Gorakhpur, Rohilkhand and Meerut divisions. Excellent furniture is made at Bareilly mostly on cottage lines.

There is a card board manufacturing factory and a cigarette factory at Saharanpur. Itrs and perfumes are made at Lucknow, Kanauj and Jaunpur. Dayalbagh (Agra) has a tannery, a dairy and a factory for making door bolts, lanterns, electrical goods, fountain pens, chemical balances, etc. Fountain pens are made in Cawnpore, Lucknow and Benares. Shoe laces, elastic, and electric fans are made in Cawnpore.

The largest trade centres are Cawnpore, Allahabad, Mirzapur, Benares, Lucknow, Meerut, Aligarh, Hathras, Muttra, Agra, Farrukhabad, Moradabad, Chandauli, Bareilly, Saharanpur, Muzaffarnagar, Ghazalabad, Khurja, Gorakhpur, Ghazipur, Pilibhit and Shahjahanpur.

Administration

The Province was until the close of 1920 administered by a Lieutenant Governor, chosen from the ranks of the Indian Civil Service. Under the Reform scheme the Province was raised to the status of a Governor in Council, the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers in charge of the Transferred Subjects. With effect from April 1, 1937, provincial autonomy was inaugurated in this Province and a Cabinet of 7 ministers to assist the Governor was formed, under the G. I. Act of 1935. The medium for the transaction of public business is the Secretariat, the staff of which consists of 7 Secretaries (including Chief Secretary), two joint Secretaries and 6 Deputy Secretaries including the Director of Public Instruction and the Deputy Legal Remembrancer who are *ex Officio* Deputy Secretaries in the Education and Judicial Departments respectively. There is also 1 Under-Secretary (the Deputy Director of Public Instruction who is *ex Officio* Under Secretary in the Education Department) and 4 Assistant Secretaries. The Chief Secretary is in charge of Appointment, General Administration, Executive, Political, Newspaper and Police Departments, the Finance Secretary deals mainly with the Finance Department, the Revenue Secretary is in charge of the Revenue, Scarcity, Ecclesiastical and Forest Departments and also the Buildings and Roads branch of the Public Works Department. The Education Secretary is in charge of the Education, Industries, Agriculture and Excise Departments, the I. S. G. Secretary is in charge of the local Self Government, Municipal, Medical and Public Health Departments and the Judicial Secretary is in charge of the Judicial and Legislative Departments. The seventh Secretary belongs to the Public Works Department (Irrigation Branch) and is also Chief Engineer for the Irrigation Branch of the P. W. D. Government spends the cold weather October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow. The Governor and the Secretaries spend the hot weather in Naini Tal, but during the monsoon the Governor tours the plains, as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases lying within its jurisdiction being the chief revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Magistrate and Collector in Agra and a Deputy Commissioner in Oudh and Kumaon. The districts are grouped together in divisions. Each division is under a Commissioner, except the Jhansi and Kumaon divisions the charge of which is held by the Collector of Jhansi and that of Kumaon by the Deputy Commissioner, Naini Tal, in addition to their duties. There are ten divisions, having an average area of nearly 10,000 square miles and an average population of nearly 5 millions. The districts are sub divided into *talukhs*,

with an average area of 500 square miles and an average population of 236,000. Each *Tahsil* is in charge of a *Tahsildar*, who is responsible for the collection of revenue, and also exercises judicial powers. *Tahsils* are divided into *parganas* which are units of importance in the settlement of land revenue. Subordinate to the *Tahsildars* are *naw tahsildars* and *kanungos*. Ordinarily there are three *kanungos* and one *naw tahsildar* to a *tahsil*. The *Kanungos* supervise the work of the *patwaris*, or village accountants, check their papers and form a link direct between the villagers and Government. For judicial purposes (revenue and criminal), the District Officer assigns a sub-division, consisting of one or more *tahsils*, as the case may be to each of his subordinates, who may be covenanted civilians (Joint and Assistant Magistrates and Collectors) or members of the Provincial Service (Deputy Collectors and Magistrates).

Justice

Justice is administered by the High Court of Judicature at Allahabad in the province of Agra and by the Chief Court of Oudh sitting at Lucknow which are the final appellate authorities in both criminal and civil cases. The former consists of a Chief Justice and eight permanent and two additional puisne judges six of whom including the Chief Justice are Indians, and the latter consists of a Chief Judge and four judges four of whom are Indians. There are thirty-two posts (twenty-four in Agra including two posts temporarily held in abeyance and eight in Oudh) of district and sessions judges of which nine are held by Indians not belonging to the Indian Civil Service as they have been listed to the provincial service and the bar. They have both original and appellate jurisdiction in civil and criminal cases and occasional appellate jurisdiction in rent cases. District Officers and their assistants, including *tahsildars*, preside in criminal courts as magistrates and as collectors and assistant collectors, in rent and revenue courts and dispose of a good deal of the work. Kumau has been brought under the Civil jurisdiction of the High Court from 1st April 1926. The deputy and assistant commissioners exercise inferior civil powers in this division which has no separate civil courts. In the rest of the provinces there are civil judges, judges of small cause courts and munsifs who dispose of a large number of civil suits. In Agra the jurisdiction of a civil judge extends to all original suits without pecuniary limit and a munsif can hear cases ordinarily of a value not exceeding Rs 2,000, and if specially empowered up to Rs 5,000. In Oudh the ordinary jurisdiction of a subordinate judge extends to suits valuing not more than Rs 20,000 and the ordinary jurisdiction of a munsif to suits of Rs 2,000 value, provided that in special cases the limit of pecuniary jurisdiction can be removed altogether in the case of a civil judge and that of the munsif raised up to Rs 5,000. Appeals from munsif always lie to the district judge while those from the civil judges go to the High Court or the Chief Court except in cases of a value of Rs 5,000 or less which are

heard by the district judge. Small cause court judges try suits to the value of Rs 500. There are also honorary munsifs limited to Rs 200 suits, and village munsifs whose jurisdiction is fixed at Rs 20.

Local Self-Government

The main units of local self-government are the district and municipal boards which, with the exception of one municipal board, have no official Chairmen. Most of the municipal boards having an annual income of Rs 50,000 or over have executive officers to whom certain administrative powers are reserved. The administrative functions of the municipal and district boards are performed by the Chairman and Executive Officer or the Secretary, but the boards themselves are directly responsible for most of the administration. The district boards obtain more than 42% of their income from Government grants. The other chief sources of income is the local rate levied from the landowners. Some of the boards have recently imposed a tax on circumstances and property. The United Provinces Motor Vehicles Taxation Act has come into force with effect from January 1st 1936. The tax realised under this Act will also be utilized in the payment of grants to local authorities for purposes of expenditure on the construction, maintenance and improvement of roads. The chief source of municipal income is the octroi or terminal tax and toll which is an octroi in modified form. Local opinion is strongly in favour of indirect as opposed to direct taxation for municipal purposes.

Public Works Department

The Buildings and Roads branch is administered by a Civilian Secretary and the principal administrative officer is a Chief Engineer. The Province is divided into circles and divisions. Each circle is in charge of a Deputy Chief Engineer and each division is in charge of an Executive Engineer. All metallic roads maintained from Provincial funds and construction of all buildings costing more than Rs 5,000 are in charge of the Buildings and Roads branch.

The Irrigation branch is administered by a Secretary and for the present, two Joint Secretaries, all of whom are also Chief Engineers. The third Chief Engineership is a temporary post to further the organisation of development schemes. The province is divided into circles and divisions.

2 The Irrigation branch administers the various irrigation works, the Ganges Canal Hydro electric Grid, the tube well scheme, and other development works such as the Daurala Sugarcane tramway Fyzabad Electricity and Gogra Pumping. The hydro electric works, tube wells and development schemes are in charge of the Chief Engineer (Development), the Sarda Canal and the Bundelkhand Canals in charge of the Chief Engineer (East), and the Ganges the Eastern Jumna and the Agra Canals are in that of the Chief Engineer (West).

3 The Sarda Canal—a work of the first magnitude—was opened in 1928 for introducing

irrigation into Oudh Its head works are situated at Banbassa on the border of Nepal The length of the main canal and branches including distributories, drainage cuts and escapes, is 5 929 miles, and the area irrigated is over 10 lakhs of acres annually including over 2 1/2 lakhs acres of sugarcane

The Ginges Canal—Upper and Lower The head works of the upper and lower Ginges canals are situated at the headward end of Sahasrabudhi district and of the upper and lower parts of the Alighar district. The upper Ginges canal came into operation in the year 1855-56 and its total mileage of channels is 5,807 miles. The area irrigated annually is nearly 12 lakhs of acres. The lower Ginges canal was opened in 1879-80 and the total mileage of its channels is 5,025 miles. This system also irrigates nearly 10 lakhs of acres.

4 The Ganges Canal Hydro electric Grid supplies power at cheap rates for domestic, industrial and agricultural purposes to ten districts in the west of province. Six of the ten falls available for electrification have been developed, and a seventh is in the course of development as well as a stand-by steam power station at Chandaud of 9,000 kilowatts. The cost of 1937 is less than 28,000 lacs which will be available. Besides supplying some 88 towns with cheap current for light and fans and minor industries, the grid provides energy for irrigation pumping from rivers and open tube wells. The Ganges Valley State Well Scheme will by the end of 1937 comprise 1,500 tube wells covering the districts of Moradabad, Bijnor, Budun, Muzaffarnagar, Meerut, Bulandshahr and Aligarh introducing irrigation on the volumetric system over approximately one million acres hitherto without any source of irrigation. This supply of cheap power from some 2,000 sub-stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres.

Four important experiments have also been carried out by which canal water is released or supplemented by means of electric tube wells pumping underground water into the canals of the Meenut district.

The Fyzabad electrification and Gogra pumping scheme, comprising a generating station at Sohwal of 2 500 kilowatts and pumping 180 cusecs of water from the Gogra river for canal irrigation in the Fyzabad district is nearing completion.

In view of the experience gained from the immense network of the Gangā Hydro Electric Grid on the western districts a thorough examination of the conditions in the towns in the eastern and central districts of the province is being made and it is hoped that as soon as the investigations are completed it will be possible to project an Eastern Grid, to develop water power at (1) Dunja in the Mirzapur hills, (2) water falls in the Rewa State and to provide a peak load station near Allahabad. The power on approximately 16,000 kilowatts is to be used for (1) pumping for irrigation purposes from the Ganges near Fatehpur and at Manik

pur the Town near Allahabad and the Gunt at Sultanpur (2) pumping from tube wells near Benares (3) electrifying small towns as Mirzapur, Sultanpur, Partabganj, Fitchpur, Mogul-sarai, Jaunpur, etc and (4) village electrification.

Police

The Police Force is administered by an Inspector General, with three Deputies and three Assistants, forty six Superintendents, forty six Assistant Superintendents and fifty six Deputy Superintendents including three temporary officers. There is a Police Training College at Moradabad under a Superintendent of Police as Principal. There is a C I D forming a separate department, under a Deputy Inspector General with three Assistants. The armed police of the three police rangs have recently been rearmed with the 410 musket, the 476 musket and the Martini Henri rifle having formed their previous armament. The administration of the Jail Department is in charge of an Inspector General of Prisons, who is a member of the Indian Medical Service.

Education

Education is maintained in part by the State and partly by means of grants in aid. There are five universities, the four residential universities of Allahabad, Lucknow, Aligarh (Muslim) and Benares (Hindu) and the affiliating University of Agra. The last named was established in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, viz., the Agra and St. John's Colleges at Agra, the Christ Church, U A V and Sanatan Dharma Colleges at Cawnpore, the Meerut College Meerut, the Barilly College, Bareilly and St. Andrew's College, Gorakhpur. There are intermediate colleges and unaided vernacular high and middle schools which prepare boys for the high school and intermediate examinations conducted by the Board of High School and Intermediate Education which prescribes courses for high school and intermediate education.

There are 48 Government High Schools and 8 Government Intermediate Colleges the remainder are under private management and are aided by Government

The Iswella Thoburn College at Lucknow and the Crosthwaite Girls' College at Allahabad impart university education to Indian girls and the Theosophical National Girls' School and Women's College at Benares the Muslim Girls' Intermediate College at Aligarh, the Mitha Vidyalaya Intermediate College at Lucknow and Bilika Vidyalaya Intermediate College at Cawnpore teach up to the intermediate stage. In addition to these there are A V High Schools, English Middle and vernacular Lower Middle schools and primary schools throughout the province for the education of Indian girls. They are controlled by Chief Inspectress of Girls' school under the Director of Public Instruction. The St. George's Intermediate College, Mussoorie, the Philander Smith College, Naini Tal, the St. Joseph's College, Naini Tal, and the La Martiniere College, Lucknow, are the well-known

institutions for European and Anglo Indian children in the province which teach up to the intermediate stage. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all over India. Government maintain Training Colleges for teachers in Lucknow, Allahabad and Agra, and a training department is attached to Christian Intermediate College, Lucknow. There are training departments attached to the Aligarh Muslim University and the Benares Hindu University. There is a College of Mining and Metallurgy in the Benares Hindu University where four year courses of training are provided, leading to degrees in the two subjects. This is the only University in India where training in these two industrial subjects is available. There is a Government Engineering College at Roorkee (Thomson College), a School of Art and Crafts in Lucknow and an Agricultural College, and a Technological Institute at Cawnpore, and an Agricultural School at Bulandshahr. There is also a non Government Agricultural Institute at Naini, Allahabad. Education in law is given at the four residential universities and at the Agra and Meerut colleges, and at the Dayanand Anglo-Vedic and Sanatan Dharma Colleges at Cawnpore and at the Bareilly College. Instruction in commerce for the B Com degree of the Agra University is given in the Sanatan Dharma and the D A V Colleges at Cawnpore and in the St John's College at Agra, a commerce department for B Com degree is also attached to Allahabad and Lucknow Universities. The King George's Medical College, Lucknow, now merged in the Lucknow University, prepares candidates for the M B B S degree of the Lucknow University. Besides this there are two medical schools at Agra for men and women and also a College of Ayurveda and Tibbīya is attached to the Benares Hindu and the Aligarh Muslim Universities respectively. Public schools for secondary and primary vernacular education are almost entirely maintained or aided by district and municipal boards and vernacular education is administered through them and the expenditure of grants for vernacular education is in their hands. Government maintains eight Normal Schools and seventeen Central Training Schools for the training of vernacular teachers. Each district has a deputy inspector of schools who is the Secretary of the Education Committee of the district board assisted by several sub deputy inspectors. There are seven inspectors who supervise both Anglo vernacular and vernacular education in their circles.

Medical

The Medical Department is in charge of an Inspector-General of Civil Hospitals, who is assisted by a lady Superintendent for Medical aid to women in the administration of the Dufferin fund affairs. A post of Personal Assistant to the I G of Civil Hospitals has also been created from December 8 1934, to relieve the I G of the routine duties in connexion with the control of his office. A Civil Surgeon is in charge and is responsible for the medical work of each district and in a few of the larger stations he has an assistant. In two stations (Raukhet and Roorkee) Medical Officers in military employ hold collateral civil charge. There are 103 Provincial Medical service officers in charge of important Mofussil dispensaries and on the reserve list and a large number of Provincial subordinate medical service officers. Lady doctors and women sub assistant surgeons visit *pardanashin* women in their own homes and much good work is done in this manner.

The best equipped hospitals for Indian patients are the Thomason Hospital at Agra, King George's Hospital and the Balrampur Hospital at Lucknow, the Prince of Wales Hospital, Cawnpore, King Edward VII Hospital, Benares, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living in European style) and Saint Mary's Cottage Hospital, Mussoorie. The Ramsay Hospital for Europeans at Naini Tal is a first class institution and there are also the Lady Dufferin Hospitals, King George's Medical College, Lucknow, is one of the best equipped colleges in the country, with a staff of highly efficient professors, and the hospital attached to it is the first in the Province. The Queen Mary's Hospital for women and children completed in 1932 is also attached to the King George's Medical College and provides clinical material for the instruction of students in midwifery and gynaecology. There are also male and female medical schools at Agra. The X-Ray Institute at Dehra Dun has been closed, but a scheme for the appointment of a Provincial Radiologist and the training of Medical Officers in X-Ray at the King George's Medical College, Lucknow, where every facility for such work would be forthcoming is under the consideration of the Government. There are sanatoria for British soldiers in the hills. The King Edward VII Sanatorium at Bhowali in the district of Naini Tal is an up to date and well equipped institution for the treatment of European and Indian consumptives. A new I B clinic has been opened at Allahabad.

THE FINANCES OF THE UNITED PROVINCES

As explained in the chapters on the new constitution of India, under the Reforms Act of 1919, the financial position of the Provinces underwent a remarkable change. The Provinces are, for all practical purposes financially independent of the Government of India. The contribution payable by the Local Government has been remitted entirely by the Government of India with effect from the year 1928-29. As the finances of the Provinces thus become of greater importance, the position is set out in some detail in the following pages —

ESTIMATED REVENUE FOR 1936-37

<i>Principal Heads of Revenue</i>		<i>Miscellaneous</i>	
	Rs		Rs
Taxes on Salt		Transfers from Famine Relief Fund	34,500
Taxes on Income		Receipts in aid of superannuation	2 04,300

The Punjab.

The Punjab or land of the five rivers, is so called from the five rivers by which it is enclosed, namely, the Jhelum, Chenab, Ravi, Beas and Sutlej. Together with the North-West Frontier Province and the Indian State of Jammu and Kashmir which lie to the north, the Punjab occupies the extreme north-western corner of the Indian Empire, and with the exception of the above mentioned province comprises all of British India north of Sind and Rajputana and west of the river Jumna. Previous to October 1912 the Punjab with its feudatories embraced an area of 136,310 square miles and a population at the Census of 1911 of 24,187,750 (inclusive of 23,587 trans-frontier Baluchis), that is to say, about one thirteenth of the area and population of the Indian Empire. But the formation of a separate province of Delhi reduced the area and population of the Punjab by about 450 square miles and 380,000 souls, respectively. The total population of the Province in 1931, including the Baluch tribes on the border of the Dehra Ghazi Khan District, was 23,490,857 of whom 4,910,005 were in the Indian States.

Physical Features

The greater part of the Punjab consists of one vast alluvial plain, stretching from the Jumna in the east to the Suleman Range in the west. The north-east is occupied by a section of the Himalayas and the Salt Range forms its north-western angle. A few small spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided into five natural divisions: the Himalayan tract includes an area of 22,000 square miles with a scanty population living scattered in tiny mountain hamlets. The Salt Range tract includes the districts of Attock, Rawalpindi and Jhelum and part of Shahpur district. Its physical configuration is broken and confused and the mountainous tracts of Murree and Kahuta approximate closely in characteristics to the Himalayan tract. Except in the hills, the rainfall leaves little margin for protection against distress in unfavourable seasons and irrigation is almost unknown. Skirting the base of the hills and including the low range of the Siwaliks, runs the narrow sub-montane tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, comprises some of the most fertile and thickly populated portions of the province. Its population of over four millions is almost agricultural and pastoral but it includes one large town in Sialkot. Of the plains of the Punjab, the eastern portion covers an area of some 36,000 square miles with a population of 10½ millions. East of Lahore, the rainfall is everywhere so far sufficient that cultivation is possible without irrigation in fairly favourable seasons, but over the greater part of the area the margin is so slight that, except where irrigation is employed, any material reduction in the rainfall involves distress, if not actual

famine. Within the eastern plains lie the large cities of Lahore and Amritsar, and the population in comparison with the western Punjab is largely urban. The western plains cover an area of 59,000 square miles with a population of a little over six millions. The rainfall in this area heaviest in the north and east and decreasing towards the west and south is everywhere so scanty that cultivation is only possible with the aid of artificial irrigation or upon the low-lying river banks left moist by the retreating floods. In this very circumstance, these tracts find their security against famine, for their cultivation is almost independent of rain: a failure of which means nothing worse than a scarcity of grass. So little rain is sufficient, and absolute drought occurs so seldom that the crops may be said never to fail from this cause. The western plains embrace the great colony areas on the Chenab and Jhelum Canals which now challenge the title of the eastern plains as the most fertile, wealthy and populous portions of the province. Multan and Lyallpur are the largest towns in the western area. Owing to its geographical position, its scanty rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of both heat and cold than any other portion of India. The summer, from April to September, is scorchingly hot, and in the winter, sharp frosts are common. But the bright sun and invigorating air make the climate of the Punjab in the cold weather almost ideal.

States

The Indian States of the Punjab were formerly in the Political charge of the Punjab Government. In 1921, however, the thirteen most important States including Patiala, Bahawalpur, Jind and Nalwa were formed into a separate Punjab States Agency under the control of the Agent to the Governor General, Punjab States. The only States remaining in the charge of the Punjab Government were the Simla Hill States, for which the Deputy Commissioner of Simla was Political Officer, and three small States in the Ambala Division, Kalsia, Patand and Dujana, which were supervised by the Commissioner of Ambala. From 1st October 1936 with the formation of a new Political Agency at Simla all these States have been transferred to the Punjab States Agency.

The People

Of the population roughly one half is Mahomedan, three eighths Hindu and one-eighth Sikh. Socially the landed classes stand high and of these the Jats, numbering nearly five millions, are the most important. Roughly speaking, one half the Jats are Mahomedan, one third Sikh and one sixth Hindu. In distribution they are ubiquitous and are equally divided between the five divisions of the province. Next in importance come the Rajputs, who number over a million and a half. The majority of them are Mahomedans by religion.

about a fourth are Hindus and a very few Sikhs. They are widely distributed over the province. Both Jats and Rajputs of the Punjab provide many of the best recruits for the Indian Army. In fact all the agricultural classes of the Punjab, except in the south western districts, made a magnificent response to the appeal for recruits in the great war and the province's contribution of upwards of 400,000 men to the man power of the Empire speaks for itself. The Gujars are an important agricultural and pastoral tribe, chiefly found in the eastern half of the province and in the extreme north-west. In organisation they closely resemble the Jats and are often absorbed into that tribe. There are many minor agricultural tribes, priestly and religious castes (Brahmans, Sayads and Kureshis), most of whom are landholders, the trading castes of the Hindus (Khatris, Aroras and Banias), the trading castes of the Mahomedans (Khojas, Parachas and Khakhais), and the numerous artisan and menial castes. There are also vagrant and criminal tribes and foreign elements in the population are represented by the Baluchis of Dera Ghazi Khan and neighbouring districts in the west, who number about half a million and maintain their tribal system, and the Pathans of the Attock and Mianwali districts. Pathans are also found scattered all over the province engaged in horse dealing, labour and trade. A small Tibetan element is found in the Himalayan districts.

Languages

The main language of the province is Punjabi, which is spoken by more than half the population. Western Punjabi may be classed as a separate language, sometimes called Lahndi, and is spoken in the north and west. The next most important languages are Western Hindi, which includes Hindustani and Urdu (the polished language of the towns), Western Pahari, which is spoken in the hill tracts, and Rajasthani, the language of Rajputana. Baluchi, Pushto, Sindhi and Tibeto-Burman languages are used by small sections of the population.

Agriculture

Agriculture is the staple industry of the province affording the main means of subsistence to 65.5 per cent of the population. It is essentially a country of peasant proprietors. About one sixth of the total area in British districts is Government property, the remaining five sixths belonging to private owners, and a large part of the Government land is so situated that it cannot be brought under cultivation without extensive irrigation. Thus the Lower Chenab Canal irrigates 1,939,000 acres of what was formerly waste land, the Lower Jhelum Canal, 4,18,000 acres, and the Lower Bari Doab Canal, adds 1,005,000 acres to this total. On account of the opening of the Sutlej Valley canals an area of about 1,322,000 acres more has been brought under cultivation. Large areas in the hills and elsewhere which are unsuited to cultivation are preserved as forest lands, the total extent of which is about 6,000 square miles. Of the crops grown, wheat is the most important and the development of irrigation has led to a great expansion of the wheat area. Next in importance to wheat

is gram. Other important staples are barley, rice, millets, maize, oilseeds (rape, toria and sesamum), cotton and sugarcane. In the canal colonies large areas of American cotton are grown but in the other cotton growing districts the short staple indigenous varieties are predominant. The country being preponderantly agricultural, a considerable proportion of the wealth of the people lies in live stock. Large profits are derived from the cattle and dairy trade and wool is a staple product in Kulu and Kangra and throughout the plains generally. The production of hides and skins is also an important industry.

Industries

The mineral wealth of the Punjab is small, rock salt, saltpetre and limestone for road building being the most important products. There are some small coal mines in the Jhelum, Shahpur and Mianwali districts. Gold washing is carried on in most of the rivers not without remunerative results. Iron and copper ores are plentiful but the difficulty of carriage and the absence of fuel have hitherto prevented smelting on a large scale. The Punjab is not a large manufacturing province, the total number of factories being only 754 the majority of which are cotton ginning and pressing factories. Blankets and woollen rugs are produced in considerable quantities and the carpets of Amritsar are famous. Silk weaving is also carried on and the workers in gold, silver, brass, copper and earthenware are fairly numerous. Ivory carving is carried on extensively at Amritsar and Lehah and also in the Patiala State. Mineral oil is being extracted and refined in the Attock and Rawalpindi Districts and a cement factory is established at Wah near Hassanabdal. There are three match factories in the Punjab, viz. one at Shahdara and two at Gujranwala and a factory for the hydrogenation and refining of oils at Lyallpur.

Administration

Prior to the amendment of the Government of India Act in 1919 the head of the administration was a Lieutenant Governor, drawn from the ranks of the Indian Civil Service. Under the Act of 1919 the province was raised to the status of a Governorship, with an Executive Council and Ministers, the Governor in Council being in charge of the Reserved Subjects and the Governor with his Ministers of the Transferred Subjects. With the introduction of part III of the Government of India Act, 1935 this Executive Council has been substituted by a Council of Ministers and the Legislative Council by an enlarged Legislative Assembly with wide powers of legislation and control. The business of Government is carried on through the usual Secretariat which consists of five Secretaries, designated (1) Chief, (2) Home, (3) Finance, and (4) Medical and Local Government Departments, (5) Electricity and Industries. There are also Deputy Secretaries, three Under-Secretaries, and two Assistant Secretaries. In the Public Works Department, there are five Chief Engineers (Secretaries except in the case of Electricity Branch) one in the Buildings and Roads Branch, one in the Electricity Branch and three in the Irrigation Branch, while

the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of Education Department an Under Secretary to Government. The Government winter in Lahore and the summer (from the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala, Jullundur, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners—29 in number—each of whom is in charge of a district.

The principal heads of Department in the province are the two Financial Commissioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector General of Police, the Director of Public Instruction, the Inspector General of Prisons, the Inspector General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil jurisdiction in special cases. The Court sits at Lahore and is composed of a Chief Justice and eight Puisne Judges (either civilians or barristers) and two temporary Additional Judges, Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercise civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in force the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Self Government

Local Self Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Panchayats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession taxes and miscellaneous fees and those of Municipal, Town and Notified Area Committees from octroi or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the traditional village community organisation the elected committee or Panchayat possessing certain powers in respect of taxation local

option, civil and criminal justice, the abatement of nuisances and other matters. Most of the members of practically all local bodies are now elected and elections are as a rule keenly contested. In the case of Notified Area Committees however all Members are appointed.

Police

The Police force is divided into District Police, Railway Police and Criminal Investigation Department. The combined force is under the control of the Inspector General, who is a member of the gazetted force and has under him three Deputy Inspectors General in charge of ranges comprising several districts and a fourth Deputy Inspector General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police are under an Assistant Inspector General. The District Police are controlled by Superintendents, each of whom is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

Education

The strides which have been made in the past decade especially in the concluding years of the period have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one form of education but is spread over all grades and varieties. In addition to institutions maintained in all parts of the province by private enterprise, Government itself maintains sixteen arts colleges (including one for Europeans and three for women), three normal schools for males, nineteen training classes and combined institutions for females, one hundred and twenty-four secondary schools for boys and girls and sixty-one centres for vocational training. Apart from these institutions for general education Government maintains eight higher grade professional institutions viz. the King Edward Medical College, de Montmorency College of Dentistry and Veterinary College at Lahore, the Agricultural College at Lyallpur, the Engineering College at Multan, the Central Training College at Lahore, the Lady Maclean Training College for women, Jhok and the Chhainsford Training College at Ghoragali, and two schools viz. the Medical School at Amritsar and the Engineering School at Rasul. In addition there are thirty-five technical and industrial schools (thirty-two for males and three for females) scattered over the province.

The Department of Education is in the charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

Medical

The Medical Department is controlled by the Inspector General of Civil Hospitals who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by an officer designated the Assistant Inspector General of Civil Hospitals who is at present an officer of the Indian Medical Department of the rank of a Civil Surgeon.

Public Health

The Department of Public Health is controlled by the Director of Public Health who has, working under him four Assistant Directors of Public Health, 37 District Medical Officers of Health and twenty eight District Sanitary Inspectors. In addition there is a permanent staff of 10 Sub Assistant Health Officers and 15 Sanitary Inspectors for assistance in combating epidemic diseases. The ancillary services comprise

(1) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Punjab (Technical) Vaccination assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab but of the Army in Northern India and of several provinces and Indian States in and beyond the confines of India

(2) An epidemiological bureau, which is in charge of the Epidemiologist to Government where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out

(3) An Education Bureau, to which is attached a photographer and a draftsman

(4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs

(5) A Public Health Equipment Depot which supplies Government Institutions, local bodies, etc., with reliable disinfectants, vaccine sera, etc.

(6) A Public Health School, the staff of which is responsible for the training of health visitors. The Principal, who is also Inspector of Health Centres, supervises the maternity and child welfare work throughout the province

In matters connected with sanitary works the Director of Public Health works in close touch with the Superintending Engineer, Public Health Circle, Punjab who acts as technical adviser of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical advisers of the Sanitary Board whose duty it is to examine and report upon sanitary schemes put forward by local bodies

THE FINANCES OF THE PUNJAB

A realised surplus of Rs. 23 lakhs as against a budgeted deficit of Rs. 16 lakhs in 1936-37 and also a small anticipated surplus of Rs. 1,72,000 for 1937-38 were announced by Mr. Manoharlal, the Finance Minister in his first Budget presented in June 1937 to the newly constituted Punjab Legislative Assembly. Income receipts for 1937-38 were expected to be Rs. 10,90,39,000 and the expenditure Rs. 10,88,67,000. The improvement during the past year amounted to more than Rs. 29 lakhs over the budget figures and covered several sources of provincial revenue. Unless certain items of income show marked improvement the small surplus is likely to be absorbed in certain additions to the budget directly consequent on the introduction of the reforms. Income under Land Revenue suffered to the extent of Rs. 25 lakhs owing to hailstorms, cyclones and unseasonal rains which had caused great damage to crops. Despite this the provision for nation building departments has been increased by Rs. 25 lakhs. A famine relief fund has been constituted and revised scales of pay have come into effect.

Burma.

The Province of Burma lies between Assam on the North-West and China on the North-East, and between the Bay of Bengal on the West and South West and Siam on the South-East. Its area is approximately 261,000 square miles, of which 192,000 are under direct British Administration, 7,000 are unadministered and 62,000 belong to semi-independent Native States. The main geographical feature of the country is the series of rivers and hills running from North to South with fertile valleys in between widening and flattening out as they approach the Delta. Differences of elevation and rainfall produce great variations in climate. The coastal tracts of Arakan and Tenasserim have a rainfall of about 200 inches, the Delta less than half that amount. The hot season is short and the monsoon breaks early. The maximum shade temperature is about 96° the minimum about 60°. North of the Delta the rainfall decreases rapidly to 30 inches in the central dry zone which lies in a rain shadow and has a climate resembling that of Bihar. The maximum temperature is twenty degrees higher than in the wet zone, but this is compensated by a bracing cold season. To the north and east of the dry zone lie the Kachin hills and the Shan plateau. The average elevation of this tableland is 3,000 feet with peaks rising to 9,000. Consequently it enjoys a temperate climate with a rainfall of about 70 inches on the average. Its area is over 50,000 square miles. There is no other region of similar area in the Indian Empire so well adapted for European colonization. The magnificent rivers, the number of hilly ranges (Yomas) and the abundance of forests, all combine to make the scenery of Burma exceedingly varied and picturesque.

The People

The total population of Burma at the census of 1931 was 14,667,146. There were 9,092,214 Burmans, 1,037,406 Shans, 1,367,673 Karens, 153,145 Kachins, 348,994 Chins, 534,985 Arakanese and Yawbys, 336,728 Talangs and 138,739 Palungs. There is also a large alien population of 193,944 Chinese and 1,017,825 Indians, while the European and Anglo-Indian population numbered 30,441, and Indo-Burmans, 182,166.

The Burmans who form the bulk of the population, belong to the Tibetan group and their language to the Tibeto-Chinese family. They are essentially an agricultural people, 80 per cent of the agriculture of the country being in their hands. The Burmese and most of the hill tribes also, profess Buddhism, but Animism, or the worship of nature spirits, is almost universal.

In appearance the Burman is usually somewhat short and thick set with Mongolian features. His dress is most distinctive and exceedingly comfortable. It consists of a silk handkerchief bound round his forehead, a loose jacket on his body and a long skirt or longyi tied

round his waist, reaching to his ankles. The Burmese women, perhaps the most pleasing type of womanhood in the East, lead a free and open life, playing a large part in the household economy and in petty trading. Their dress is somewhat similar to the men's minus the silk kerchief on the head and the longyi is tucked in at the side instead of being tied in front. A well-dressed and well-groomed Burmese lady would, for grace and neatness, challenge comparison with any woman in the world.

Communications

The Irrawaddy, and to a less extent the Chindwin, afford great natural thoroughfares to the country. At all seasons of the year these rivers, especially the Irrawaddy, are full of sailing and steam craft. In the Delta the net work of waterways is indeed practically the only means of communication. The Irrawaddy Flotilla Company, with a fine fleet of mail, cargo and ferry boats gives the Irrawaddy and the Delta rivers and creeks a splendid river service.

The Burma Railway has a length of 2,098.9 miles open line. The principal lines are from Rangoon to Mandalay from Mandalay to Myitkyna, the most northern point in the system, the Rangoon Promer line, and the Pegu Martaban line, which serves Moulmein on the further bank of the Salween River.

Industry

Agriculture is the chief industry of the province and supports nearly three-fourths of the population. The net total cropped area is a little more than 16½ million acres of which a little over 1 million acres are cropped more than once. Irrigation works supply water to nearly 1½ million acres. India is very largely dependent on Burma for her supplies of kerosene, benzine and petrol which rank second to rice in order of importance. Teak wood is exported in large quantities from Burma to India.

Forests play an important part in the industrial life of the Province. The forest reserves cover some 22,173,64 acres which unclassified forests are estimated at about 106,279,37 acres. Government extracts some 28,294 tons of teak annually private firms of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief, extract over 5,07,107 tons. Other timber extracted by licensees amounts to 4,07,147 tons and firewood 10,55,313 tons.

Tin and wolfram are found chiefly in the Lvooy and Mergu Districts. Wolfram and tin are found together in most mining areas in Lvooy, the proportion varying from almost pure tin to almost pure wolfram. There has been an improvement in the price of tin.

The improvement in the output of tin and wolfram continues. The output in 1935 was 4,268.16 tons as against 3,157.05 tons in 1934. Silver lead and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern

Shan states. Copper in small quantities is also found there. There are small deposits of Molybdenite in Tavoy and Mergul and of platinum in Myitkyina. Mining for precious stones in the Mogok Stone Tract of the Katha District continued to be carried out by native miners working under licenses. The output of rubies during 1935 was 107,915 carats as compared with 21,810 carats in 1934. The output of amber in 1935 was 18.57 cwt. The output of Burmese Jadeite during 1935 compared with that of the previous year showed a decrease of 829.22 cwt. The total output of petroleum in Burma during 1935 was 254½ million gallons against 254½ million gallons during 1934. The oldest and largest oilfield in the province is at Yenangyung in the Magway District where the Burmah Oil Company has its chief wells. There has been a gradual decrease in the output from the wells in this oilfield as evidenced by the output of nearly 184½ million gallons in 1921 and nearly 129 million gallons in 1935. The next largest oilfield is at Chauk in the same District. There has been a gradual decrease in the output here also but there was a slight recovery in 1935 with an output of 83½ million gallons. There has been a gradual increase in the output from the wells in the Tharyatung and Pukokku Districts due to greater activity on the part of the Oil Companies, the increase in the latter District being attributable to the development at Lanyaw by the Indo-Burma Petroleum Company. The output from the Pukokku District reached its maximum 304 million gallons in 1935. There was a decrease in the output from the wells in the Mabin and Upper Chindwin Districts. The Burmah Oil Company takes their oil to the refineries at Rangoon by pipe line from the Yenangyung and Chauk oilfields. Other Companies take it down by river flats. The area under rubber is 107,248 acres.

Manufactures

There are 1,013 factories, more than half of which are engaged in milling rice and nearly one seventh are saw mills. The remainder are, chiefly engineering works, cotton ginning mills, oil mills for the extraction of oil from groundnuts, printing presses, ice and aerated water factories and oil refineries connected with the petroleum industry. The total number of persons employed in establishments under the Indian Factories Act in 1934 was 89,596. Perennial factories employed 84,417 and seasonal factories 5,179. At the Census of 1931, 1,850,176 or 29.79 per cent of the total population were engaged outside agriculture and production.

As is the case in other parts of the Indian Empire, the imported and factory made article is rapidly ousting the home made and indigenous ones. But at Amarapura in the Mandalay District a revival has taken place of hand silk weaving. Burmese wood carving is still famous and many artists in silver still remain, the finish of whose work is sometimes very fine. Bassein and Mandalay parasols are well known and much admired in Burma. But perhaps the most famous of all hand made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow traced on a ground work of red lacquer over bamboo. A new art is the making of bronze figures. The artists have gone back to nature for their models, breaking away from the con-

ventionalized forms into which their silver work had crystallized and the new figures display a vigour and life that make them by far the finest examples of art the province can produce.

Administration

Burma, which was originally administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that the Province differed so markedly from the other Provinces in the Indian Empire that its requirements should be separately considered. After repeated discussions the question was referred to a special Burma Reforms Committee, which in 1922 recommended that all the essential provisions of the Reform Act should be applied to the Province. This recommendation was accepted and its proposals became law. Under this Act Burma became a Governor's Province, with an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q.v.). The main difference is in the size of the electorate. Under the franchise accepted the rural electorate is estimated at 1,979,450 and the urban electorate has been put as high as 99,882. The Legislative Council consists of 103 members, of which 80 are elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma is divided administratively into Upper Burma (including the Shan States, the Kachin and Chin Hills) and Lower Burma. The Shan States are administered by the Chiefs of the States subject to the supervision of the Commissioner, Federated Shan States who is also Superintendent for the Southern Shan States and the Superintendent of the Northern Shan States. The Northern and Southern Shan States were formed into a federation on the 1st October 1922, and are designated the F. S. States. The other Shan States in Burma are subject to the supervision of the Commissioner, Sagging Division. The Civil, Criminal and Revenue administration is vested in the Chief of the State, subject to the restrictions contained in the sanad. The law administered is the customary law of the State.

Under the Governor are eight Commissioners of divisions three in Upper, four in Lower Burma, and one in the Federated Shan States.

Justice

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and ten other permanent Judges. The Superior Judicial Service consists of District and Sessions Judges, there are also separate Provincial and Subordinate Judicial Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited extent.

In pursuance of the policy of decentralization steps were taken in 1917 to restore to the village headmen the power and influence which they possessed in Burmese times before the centralizing tendencies of British rule made them practically subordinate officers of the administration.

Public Works

The P W D comprises two Branches, viz, the Buildings and Roads Branch and the Irrigation Branch

The B & R Branch of this Department which is under the Ministry of Forests is administered by one Chief Engineer. There is also a Personal Assistant to the Chief Engineer. There are five permanent Superintending Engineers in charge of Circles, three of which are stationed at Rangoon and two at Maymyo. These are officers of the administrative rank.

Those of the executive rank are the Executive Engineers and Assistant Executive Engineers who number 24 (twenty four), including the Personal Assistant to the Chief Engineer, on the cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering Service (Class I) which has been constituted for the purpose of gradually replacing the Indian Service of Engineers in the B & R Branch so far 18 appointments have been made to the latter service. There are 16 officers in service at present.

The Irrigation Branch of the P W D, which is under the control of the Honble Finance Member is administered by the Chief Engineer, P W D, Burma Irrigation Branch who is assisted by a Personal Asstt. There are two permanent Superintending Engineers in charge of Circles, one of whom is stationed at Rangoon and the other at Maymyo. These are officers of the Administrative rank.

Those of the Executive rank are the Executive Engineers and Asst. Executive Engineers who number 17 on the cadre of the Indian Service of Engineers. Besides this there is also the Burma Engineering Service, which is a Provincial Service.

Further there is a River Training Expert. On account of reduction of works due to the financial stringency the number of temporary Engineers recruited to augment the permanent staff has been reduced to one.

Police

The Police Force is divided into Civil Military and Rangoon Town Police. The first two are under the control of the Inspector General of Police, the latter is under the orders of the Commissioner of Police, Rangoon, an officer of the rank of Deputy Inspector General. There are five other Deputy Inspectors General, one each for the Northern, Southern and Western Ranges, one for the Railway and Criminal Investigation Department, and one for the Military Police.

A special feature of Burma is the Military Police. Its officers are deputed from the Indian Army. The rank and file are recruited from natives of India with a few Kachins, Karens and Chins. The experiment of recruiting Burmese on a small scale has been successful. The organisation is military, the force being divided into battalions. The object of the force is to supplement the regular troops in Burma. Their duties, apart from their military work are to provide escorts for specie, prisoners, etc., and guards for Treasuries, Jails and Courts.

Education

Under the Minister for Education there is the Director of Public Instruction with an Assistant Director, both belonging to the Indian Educational Service and an Additional Assistant Director in the Burma Educational Service, (Class I (temporary) for the present). There are eight Inspectors of Schools drawn from the Indian Educational Service, and the Burma Educational Service (Class I) while the Burma Educational Service (Class I) provides eight Assistant Inspectors. There is one Asstt. Inspector of School Physical Training, appointed on a Temporary basis. There is also one Inspector of Schools. There is a Chief Education Officer for the Federated Shan States.

A centralized, teaching and residential University for Burma, has been established in Rangoon. It now provides courses in Arts, Science, Law, Education, Economics, Engineering, and Medicine.

English and A V Schools are controlled by the Education Dept. A remarkable feature of education in Burma is the system of elementary education evolved, generations ago, by the genius of the people. Nearly every village has a monastery (hpoongyi kyaung), every monastery is a village school and every Burman boy must, in accordance with his religion, attend that school, shaving his head and for the time wearing the yellow robe. At the hpoongyi kyaungs the boys are taught reading and writing and an elementary indigenous system of arithmetic. The result is that there are very few boys in Burma who are not able to read and write. Vernacular education is in the hands of Local Educational authorities.

Among special institutions, the Government Technical Institute, Incan, provides courses in Mechanical Civil and Electrical Engineering and the Agricultural College, Mandalay, courses in Agriculture. The Mary Chapman Training College for Teachers and School for the Deaf exists in Rangoon and schools for the blind, at Moulmein and Rangoon.

A liberal scheme of State Scholarships provides for the despatch of 6 to 12 scholars to Europe each year.

Medical

The control of the Medical Department is vested in an Inspector-General of Civil Hospitals. Under him are 37 Civil Surgeons. There are also a Director of Public Health, two Assistant Directors of Public Health, and a Director, Public Health Institute, at which there is now a Public Analyst (which post is at present held in abeyance for purposes of economy) and to which is also attached a Malaria Bureau. There are also an Inspector General of Prisons, three whole time Superintendents of Prisons, a Chemical Examiner and Bacteriologist and a Superintendent of the Mental Hospital. There is also a post of Hygiene Publicity Officer, which for the present is held in abeyance.

The Pasteur Institute was opened in Rangoon July 1915. The Director is a member of the Indian Medical Service.

THE FUTURE OF BURMA

Throughout the discussions on the Indian Reforms proposals the question of Burma's future occupied a secondary position, as nothing could be definitely settled until the Burmans themselves decided whether they would join the proposed all India Federation and share the lot of the Indian provinces, or become a separate unitary entity with constitutional advance analogous to that conferred on India, subject to similar safeguards. It was thought that a new election to the Burma Legislative Council would give the electorate an opportunity to express itself on this question. The election was held and resulted in a majority for the anti-separationists. When, however, the new Council was called upon to give a straight answer to the question Separation or Federation on the lines of His Majesty's Government's proposals it declined to do so. A large number of resolutions were tabled, but not one of them provided a clear indication of the people's mind. Even the anti-separationists did not vote for Federation, but expressed a desire to cast their lot with India as an experimental measure, reserving the right to withdraw from the Federation at a later date. Several adjournments were granted to enable the parties to arrive at a compromise resolution and, after the Governor had refused further to prolong the sittings which had lasted several days, the special session of the Council was prorogued.

If Burma herself gave an inconclusive verdict the British Government could not remain idle, that would have been unfair both to India and Burma. Therefore, a few months later (in August) Sir Samuel Hoare presented to the Joint Parliamentary Committee a memorandum embodying Government's proposals for the future constitution of Burma if it were decided to separate Burma from India. He, however, made it clear that if the Joint Committee decided that Burma should be included in the Indian Federation, the proposals of the White Paper (subject to consequential adjustments) would apply to Burma in the same way as they would apply to any other province of India. As the Burma Council had refused to choose separation on the basis of the constitution outlined by the Premier, he suggested that the Committee should invite some Burma representatives for consultation to assist in determining which of the two courses would be in the best interests of Burma. Assuming that Burma was to be separated, he outlined a scheme of constitutional advance under which executive authority in a unitary Burma would vest in the Governor, who would also be the Commander in Chief. He would himself direct and control the administration of finance, external affairs, ecclesiastical affairs, monetary policy, currency, coinage, and matters connected with scheduled areas. Other subjects would be administered by Ministers elected by, and responsible to, the Council. The Legislature would be bicameral.

Shortly after the submission of this memorandum Sir Samuel expressed the opinion that an overwhelming body of Burmans had

supported separation from India. He added that Burma could not be granted the right of secession, as it would be a bad precedent and would be fatal to Federation.

In pursuance of the policy of giving Burmans the fullest opportunity to determine the future form of their constitution, the Joint Parliamentary Committee decided in November to invite twelve representative Burmans for consultation. A prolonged discussion took place in December, in which both sides freely ventilated their respective points of view. The result of the elections to the special session of the Burma Council should be construed as a vote against separation. There are no two opinions in Burma, all are for separation, the so-called federationists are also for separation—but after a time. These were the conflicting views expressed in London. On behalf of His Majesty's Government, Sir Samuel made it plain that Britain had no axe to grind and that she was actuated solely by the desire to do the best for Burma. The controversy was set at rest by the publication of the report of the Joint Parliamentary Committee (see Joint Parliamentary Committee section) which provided for the separation of Burma and the establishment of a separate unitary constitution for Burma.

The Joint Parliamentary Committee's Report was discussed by the Burma Legislative Council, which rejected a motion opposing separation and rejecting the constitution proposed by the Committee. A proposal favourable to the immediate grant of Dominion Status to Burma was carried.

Shortly after the publication of the J. P. C. Report, which covered Burma also, representatives of the Burman and Indian Governments entered into negotiations to settle the future financial and commercial relations between the two countries. These negotiations resulted in an agreement maintaining the *status quo* for a period of three years. Commenting on this agreement in the House of Commons, Sir Samuel Hoare advised representatives of British trade not to ask for any special safeguards for British trade and industry at the present stage on the ground that any attempt to obtain concessions which the Indian and Burman Governments were unwilling to offer of their own accord would adversely affect British trade with India.

A tribunal was also appointed to advise the Secretary of State on the formulation of a just financial settlement between India and Burma. The tribunal's report was published in May, 1935. Taking the figures up to the year ending March 1933 the Tribunal declared, that on the basis of 31 per cent interest Burma would pay India over two crores of rupees annually for 45 years to redeem principal and interest.

THE FINANCES OF BURMA

In common with the other Provinces of India, the financial arrangement between the Government of India and the Government of Burma underwent a remodelling in consequence of the reconstitution of the Province on the lines of the other Indian Provinces. The Province obtained substantial financial independence. The present position is set out in the following statement—

ESTIMATED RECEIPTS FOR 1936-37

(A) REVENUE RECEIPTS—ORDINARY

	Rs
Salt	1 80,000
Land Revenue	4 91 90 000
Excise	89 08 000
Stamps	40 59 000
Forest	1,07,24 000
Registration	3,09,000
Scheduled Taxes	10,14,000
Irrigation etc Works with Capital Accounts	25,05,000
Irrigation etc Works (No Capital Accounts)	1,31,000
Interest	2 37,000
Administration of Justice	8 59,000
Jails and Convict Settlements	9,06 000
Police	9,70 000
Ports and Pilotage	1,85,000
Education	5,74 000
Medical	6,35 000
Public Health	2,17 000
Agriculture	1 53 000
Industries	31 000
Miscellaneous Departments	4 70 000
Civil Works	19 35 000
Receipts in aid of Superannuation	1 06 000
Stationery and Printing	1,53 000
Miscellaneous	2,02,000
Miscellaneous Adjustments between Central and Provincial Governments	18 00 000
Total (a)	8,65,19 000

(b) REVENUE RECEIPTS—EXTRAORDINARY

Extraordinary Receipts	6,000
Total (a) & (b)	8,65,19 000

(c) DEBT HEADS

Appropriation for reduction or avoidance of debt	18,36 000
Depreciation Fund—Government Presses	
Subvention from the Central Road Development Account	9 84,000
Loans and Advances by Provincial Government	13 14,000
Civil Deposits	70 000
Advances from Provincial Loans Fund	
Total (c)	42 34 000
Total (a) (b) & (c)	9,07 53 000
Opening Balance	44,02,000
Grand Total	9 51,55,000

ESTIMATED DISBURSEMENTS FOR 1936-37

(A) EXPENDITURE CHARGED TO REVENUE

	Rs
Land Revenue	55 56 000
Excise	18 61,000
Stamps	92 000
Forest	59 52 000
(a) Forest Capital Outlay	60,000
Registration	1 33 000
Scheduled Taxes	1 000
Int on wks with Cap Accounts	2 712 000
Other Revenue Expenditure	5 66 000
Interest on Ordinary Debt	62,000
Appropriation for reduction or avoidance of debt	18,36 000
General Administration	1,01 07,000
Administration of Justice	54,77,000
Jails and Convict Settlements	31,91,000
Police	1,49,98,000
Ports and Pilotage	3,53,000
Scientific Departments	54,000
Education	80,84,000
Medical	41,17,000
Public Health	10,17,000
Agriculture	18 09,000
Industries	1 64 000
Miscellaneous Departments	3,10,000
Civil Works	97,29,000
Finance	10 000
Super Allowances & Pensions	81,74,000
Stationery and Printing	9,69,000
Miscellaneous	12,39,000
Extraordinary Charges	1,000
Total (a)	8 86,31,000

(b) EXPENDITURE NOT CHARGED TO REVENUE

Capital Outlay on Forests	
Construction of Irrig., etc Works	3,82,000
Civil Works	
Payment of Commuted value of Pensions	2 17 000
Payments to Retrenched Personnel	1 74 000
Total (b)	4,25 000
Total (a) & (b)	8,90 59 000

(c) DEBT HEADS

Subvention from the Central Road Development Account	8,80 000
Depr Fund—Govt Presses	
Loans and Advances	5 52 000
Deposit Account of Grants for economic development and improvement of rural areas	1 63 000
Civil Deposits	70 000
Advances from Provincial Loans Fund	22 47 000
Total (c)	39 17,000
Total (a) (b) & (c)	9 20 76 000
Closing Balance	21 79,000
Grand Total	9,51,55,000

Bihar.

As in the case of Bombay Presidency the province known hitherto as Bihar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details therefore appertain to the new Bihar province after the separation of Orissa as from April 1, 1936

Bihar lies between 26° 30' and 27° 30' N latitude and between 82°-31' and 88°-26' E longitude and includes the provinces of Bihar and Chota Nagpur, and is bounded on the north by Nepal and the Darjeeling district of Bengal, on the east by Bengal and the Bay of Bengal, on the south by the new province of Orissa, and on the west by the United Provinces of Agra and Oudh and the Central Provinces

The area of the territories which constitute the Governorship of Bihar is 69,348 square miles. The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Agent to the Governor General Eastern States and no longer form part of the Province. Chota Nagpur is a mountainous region which separates them from the Central Indian Plateau. Bihar comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. South of Bihar lies Chota Nagpur. Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muzaffarpur (for Tirhut), Bhagalpur and Ranchi (for Chota Nagpur). The headquarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People

The Province has a population of 32,558,055 persons. Even so with 487 persons per square mile, Bihar is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshedpur and Bhagalpur. During the last ten years the population of Patna has been steadily increasing. Hindus form an overwhelming majority of the population. Though the Muhammadans form about one tenth of the total population they constitute more than one fifth of urban population of the province. Animists account for 5.9 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a north easterly direction.

Industries *

The principal industry is agriculture, Bihar, more especially North Bihar, being the "Garden of India." Rice is the staple crop but the spring crops, wheat, barley, and the like are of considerable importance. It is estimated that the normal area cultivated with rice is 15,094,000 acres or about 48 per cent of the cropped area of the Province. Wheat is grown on 1,221,800 acres, barley on 1,307,400 acres, maize or Indian-corn on 1,697,300 the latter being an autumn crop. Oil seeds are an important crop, the cultivation having been estimated by the demand for them in Europe. It is estimated that 1,820,800 acres of land are annually cropped with oil-seeds in the Province. There is irrigation in Shahabad, Gaya, Patna and Champaran districts. The Indigo industry is steadily on the decline, the total area sown having decreased from 342,000 acres in 1896 to 500 acres in 1933. The principal cause of this was the discovery of the possibilities of manufacturing synthetic or chemically prepared indigo on a commercial scale. Its place as a crop manufactured for export has been largely taken by sugarcane, the cultivation of which has been considerably extended owing to the high prices given by sugar factories. In the district of Purnea and parts of the Tirhut Division jute is grown but the acreage varies according to the price of jute. The last serious famine was in 1895-96, but there was a serious shortage of foodstuffs in the south of the Province in 1919. In any year in which monsoon currents from either the Bay of Bengal or the Arabian Sea are unduly late in their arrival or cease abruptly before the middle of September the agricultural situation is very grave. It may be said that for Bihar the most important rainfall is that known as the *hauza*, due towards the end of September or up to middle of October. Rain at this time not only contributes materially to an increased outturn of the rice crop, but also provides the moisture necessary for starting the spring or *rabi* crops.

Manufactures

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in consequence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedpur in Singhbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinsplate Company of India, Agricultural Implements, Ltd., Enfield

* The figures given in this paragraph relate to British territory only

Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The population of Jamsahdpur is rapidly approaching 100,000 and it consumes $\frac{1}{4}$ million tons of coal annually. This part of the province has also some of the richest and most extensive iron mines in the world and supplies the iron and steel works in both Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed at Ramgarh, Bokaro and Karanpura in Hazaribagh. This same district is the most important mica mining centre in the world both on account of the quality as well as the size of its output. Manbhum, Palamau Ranchi, the Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually.

Administration

The Province on first constitution was administered by a Lieutenant-Governor in Council, thus being unique in India as the only Lieutenant-Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained elsewhere. The Provincial Governorships, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred Subjects, in charge of the Governor and Ministers chosen from the Legislative Council, is set out in detail. In all these respects Bihar is on the same plane as the other Provinces in India.

Public Works

The Public Works Department in the Province of Bihar consists of two separate branches viz.—(1) the Buildings and Roads which includes Railways and the Public Health Engineering Branches and (2) Irrigation. There is only one Chief Engineer, in charge of both the branches, who is also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non professional Assistant Secretary and a Deputy Chief Engineer in the Irrigation branch under him. The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates.

Justice

The administration of justice is controlled by the High Court of Judicature at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsifs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not, however, include the powers of a Small Cause Court, unless these be specially conferred. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs 1,000

though the limit may be extended to Rs 4,000. On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class powers while the District Magistrate is the appellate authority for Magistrates exercising second and third class powers. The District Magistrate can also be, though in point of fact he very rarely is, a court of first instance. It is usual in most districts for a Joint Magistrate or a Deputy Magistrate to receive complaints and police reports, cases of difficulty or importance being referred to the District Magistrate who is responsible for the peace of the district. In the non regulation districts the Deputy Commissioner and his subordinates exercise civil powers and hear rent suits.

Land Tenures

Estates in the Province of Bihar are of three kinds, namely, those permanently settled from 1793 which are to be found in the Patna, Ferozepur and Bhagalpur divisions, those temporarily settled as in Chota Nagpur and estates held direct by Government as proprietor or managed by the Court of Wards. The passing of the Bengal Tenancy Act (VIII of 1885) safeguarded the rights of the cultivators under the Permanent Settlement Act. Further, the Settlement Department under the supervision of the Lord of Revenue makes periodical survey and settlement operations in the various districts both permanently and temporarily settled. In the former, the rights of the under tenants are recorded and attested, while in the latter there is the re-attestation of rents. In the re-settlement proceedings, rents are fixed not only for the landlords but also for all the tenants. A settlement can be ordered by Government on application made by land lords or tenants.

In Chota Nagpur and the Santal Parganas the rights of village headmen have been recognised. The headman collects the rents and is responsible for them minus a deduction as remuneration for his trouble.

Chota Nagpur has its own Tenancy Act. In the district of the Santal Parganas, the land tenures are governed by Regulations III of 1872 and II of 1886.

Police

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assistants. The Commissioner of Excise and Salt is also Inspector General of Registration.

Under the Inspector General of Police are three Deputy Inspectors-General and 24 Superintendents. There are also 25 Assistant Superintendents of Police and 28 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. A Criminal Investigation Department has also been formed for the collection and distribution of information relating to professional criminals and criminal tribes whose operations extend beyond a single district and to control, advise, and assist in investigations of crime of this class and other serious action which its assistance may be invoked.

There are three companies of Unmounted Military Police and one company of Mounted Military Police which are maintained as reserves to deal with serious and organised disturbances and perform no ordinary civil duties. There are also five platoons of armed police stationed at Patna to serve as a provincial reserve.

Education

The position of education in the Province, with the numbers attending schools, is set out in the section Education and the tables attached thereto (q v) showing in great detail the educational status of the administration.

There is a University at Patna, whose functions are described under the Indian Universities (q v).

Medical

The Medical Department is under the control of the Inspector-General of Civil Hospitals who is a Member of the Indian Medical Service. Under him there are 16 Civil Surgeons who are responsible for the medical work of the districts at the headquarters of which they are

The finances of the province have undergone a change owing to the separation of Orissa from Bihar, so that it is not possible to give correct budget figures for Bihar for the year 1936-37.

stationed. 59 Dispensaries are maintained by Government in addition to 631 Dispensaries maintained by Local bodies, Railways, private persons, etc. 7,191,877 patients including 82,680 in-patients were treated in all the dispensaries in 1935. The total income of the dispensaries maintained by Government and Local Bodies including that of the private aided institutions amounted to Rs 24,91,716.

A large mental hospital for Europeans has been opened at Ranchi which receives patients from Northern India. A similar institution for Indians has been opened at Ranchi since September 1925 for the treatment of patients from Bihar and Bengal. A sanatorium at Itki in the district of Ranchi has also been established for the treatment of tuberculosis. An Institute for radium treatment has also been established at Patna. Centres for anti-rabic treatment have been started at Patna.

A medical college has been opened at Patna and the Medical School which was in existence at Patna has been transferred to Darbhanga.

ADMINISTRATION

GOVERNOR

His Excellency Sir Maurice Gairner Hallett
KCSI, CIE, ICS

PERSONAL STAFF

Secretary to Governor Mr A J Mainwaring
CIE, ICS

Military Secretary to Governor, Lieut H J Kauter, The Royal Tank Corps (on leave).
Lieut D G Walker, 1st Battalion D (C) I (Acting).

Aide de Camp, 2nd Lieut A C MacC Savage, 1st Battalion, The Queen's Royal Regiment.
Lieut W O Pickwood (Offg).

Honorary A D C's: Major M I Bates, The Chota Nagpur Regiment, A I I; Lieut R P Yadava, 11/19th Hyderabad Regiment.
Risaldar Major A Hony, Capt Abdul Latif Khan Bahadur, I D S M, late 2nd Royal Lancers (Gardiner's Horse).

Council of Ministers.

The Honble Mr Muhammad Yunus Barak, Law, Chief Minister (Appointment, Political, Judicial, Public Education and Registration).
The Honble Kumar Ajit Prasad Singh, Deo Minister (Local Self Government, Police, Medical, Public Works and Public Health).
The Honble Nawab Abdul Wahab Khan, Minister (Finance, Irrigation and Commerce).
The Honble Babu Gur Sahay Lal, Minister (Revenue, Development and Legislative).

SECRETARIAT

Chief Secretary to Government, Political and Appointment Departments, W B Butt, CIE, ICS.

Secretary to Government, Finance Department, H C Prior, CIE, ICS.

Secretary to Government, Revenue Department, J W Houlton, ICS.

Secretary to Government, Judicial Department, J G Shriram, CIE, ICS.

Secretary to Government, P W D, Captain G F Hall, CIE, MC.

Secretary to Government, Education and Development Departments, S Lill, ICS.

Secretary, Local Self Government Department — V K R Munon, ICS.

Secretary, Legislative Council, Sayid Anwar Yusuf, B.A. LL.B.

Deputy Secretary, Legislative Dept — J A Samuel, B.A. LL.B.

MISCELLANEOUS APPOINTMENTS

Director of Public Instruction, F R Blain, M.A.

Inspector General of Police, Lt Col A E J C McDowell, CIE.

Conservator of Forests, J S Owden.

Inspector General of Civil Hospital, Lt Col I S Mills.

Director of Public Health, Lt Col S L Mitra, IMS.

Inspector General of Prisons, Lt Col O R Ungers.

Director of Agriculture, Daulat Ram Sethi.

Director of Industries, S M Dhar, ICS.

Commissioner of Excise & T G Registration, H O Lall, ICS.

Director of Veterinary Services, Major P B Rihay.

Registrar of Co-operative Societies, N Bikshi, ICS.

GOVERNORS OF BIHAR AND ORISSA

Lord Sinha of Raipur, P O, K O

1920

Sir Henry Wheeler

1921

Sir Hugh Lindsay Stephenson
KCSI, KCIE

1927

II E Sir James David Sifton

Orissa.

Like Sind Orissa was constituted a separate province on April 1, 1936. If Sind was a separate geographical, ethnological and linguistic unit inside the administrative boundary of Bombay Presidency the new province of Orissa is the result of the amalgamation of various Oriya speaking peoples who had till then belonged to three separate provinces viz., Bihar and Orissa, Madras and the Central Provinces.

The Oriyas are an intensely patriotic people who bear great love for their culture and language. They have always opposed any move to dismember the Oriya speaking tracts for political or administrative considerations. The Oriyas trace their traditions far back to the days of Mahabharata when there was the ancient kingdom of Utkal embracing a wide territory now known as Orissa. Through successive conquests and annexations in known history the Oriyas passed through varying fortunes until at the time of the Moghul conquest the Orissa country was broken up and the people gradually lost race consciousness although common language and literature continued to act as a link.

Race consciousness was revived with the spirit of education under the British regime and after the great famine of 1866 Sir Stafford Northcote suggested the separation of Orissa from Bengal. The proposal was turned down but the patriotic fervour underlying the new move persisted and gave rise to a series of demands.

History of Separation

The agitation for the unification of Oriya tracts first obtained official recognition in 1903 when the Government of India accepted the principle of bringing in the scattered sections of the Oriya speaking population under a single administration. About the same time there was brought into existence the Utkal Union Conference, which has since carried on a sustained agitation to unify the Oriyas.

The first stage of success was achieved in 1912 when an area of modern Orissa was separated from Bengal and amalgamated with Bihar to form what came to be known as the province of Bihar and Orissa. Although the status of Orissa in the province of Bihar and Orissa was much better than before, the advocates of Oriya unity continued to press their claim for the formation of Orissa into a distinct administrative unit. The late Mr. Montagu and Lord Chelmsford saw the justice of the Oriyas' claim and generally favoured the redistribution of provinces on a linguistic basis for the success of responsible government. They left it, however, to the provincial governments concerned to formulate opinions and make concrete proposals after the advent of the Montford constitution in 1920.

The Bihar and Orissa Legislative Council endorsed the idea of amalgamation but the Madras Council held an inconclusive debate. The Madras Government was against the surrender of any of its territory while the C. P. Government had an open mind.

The Government of India then appointed what is called the Philip Duff Committee to make local inquiries with a view to ascertaining the attitude of Oriya speaking people in the north of Madras Presidency on the question of their union with Orissa. Messrs C. L. Philip and A. C. Duff reported that there was "a genuine long standing and deep seated desire on the part of the educated Oriya classes of the Oriya speaking tracts for amalgamation of these tracts with Orissa under one administration."

The next stage came with the appointment of the Simon Commission in 1927. A sub-committee of the commission presided over by Major Atlee recommended the creation of a separate administrative unit for Orissa agreeing with the Oriyas' contention that under the autonomous conditions proposed by the Commission the Oriyas would be an ineffective minority in Madras, Bengal, Bihar and Orissa and the C. P.

Round Table Conference

When the idea of a federation of autonomous units dawned at the first Round Table Conference, the Oriyas' demand was presented in a crystallised form by the Maharaja (then Raja) of Parlakimedi, who asked for a separate province for Orissa. "We want a province of our own," he said, "on the basis of language and race so that we can be a homogenous unit with feelings of contentment and peace, to realise and be benefited by, the projected reforms and look forward to the day when the United States of India will consist of small federated States based on common language and race."

The Oriyas' demand derived adventitious support from the strength of the Muslim claim for the constitution of Sind as a separate province. Those who backed up the case of Sind could not oppose Oriyas' claim which therefore came to be recognised at the Round Table Conference.

In September 1931 the Government of India appointed the O'Donnell Committee to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee recommended the creation of a new province including the Orissa division, Angul, the Khulna Zamindari of the Raipur district and the greater part of the Ganjam district and the Vizagapatnam agency tract. According to the Committee the new Orissa province was to have an area of 32,681 square miles and a population of about 81,74,000 persons. On the question of financial and other consequences of separation the Committee made recommendations generally on the lines of the Sind Committee.

In January 1936, an Order in Council was issued by His Majesty's Government constituting Orissa as a separate province to be brought into line with other provincial units on the inauguration of Provincial Autonomy on April 1, 1937.

Extent of Province

The following are the areas comprised in the new province of Orissa —

1. That portion of the Province of Bihar and Orissa which was known as the Orissa Division thereof

2. Areas transferred from the Presidency of Madras —

(i) The Ganjam Agency Tracts

(ii) The following areas in the non Agency portion of the Ganjam district, viz. the taluks of Ghumsur, Aska, Suradi, Kodala and Chitrapur, so much of the taluks of Ichapur and Bichampur as lies to the north and west of the boundary line,

(iii) So much of the Parikimedi Estate as lies to the north and east of the said line and

(iv) The following areas in the Vizagapatam district that is to say the Jeyapore (Impartible) Estate and so much of the Pottrangi taluk as is not included in that estate

3. Areas transferred from the Central Provinces —

(i) The Kharlar Zamindari in the Raipur district and

(ii) The Padampur Tract in the Bilaspur district that is to say, the detached portion of that district consisting of 54 villages of Chandrapur Padampur estate and also of the following 7 villages viz., Kulyakunda, Badinal, Panchpudra (Soda), Balamapura (Malguzari) Panchpuraga (Palsidi), Jokni and Thakurpal (Jogni)

Agriculture

Agriculturally and industrially Orissa is a backward region. It has suffered as the result of being tacked to one or other of many provinces for administrative purposes. This explains why there are no big factories in Orissa, although there are a large number of indigenous cottage industries bespeaking the people's artismanship. Among the cottage industries may be mentioned handloom industries, brass, bell metal, silver filigree, cutlery, wood and paper pulp and horn articles. Sugarcane and jute are two important commercial crops in Orissa and areas under both these are already increasing. The Orissa forests can supply a large quantity of valuable timber and fuel. Fisheries too are an important industry of Orissa. The two valuable sources of supply are the extensive Chilka Lake and Puri where on an average 9,000 maunds of curried fish and 50,000 maunds of uncurried fish are respectively exported to Calcutta every year.

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica. Iron ore is mostly found in Mayurbhanj, Keonjhar and Bonai all States. The deposits in this area are remarkable for the enormous quantity of extremely rich ore they contain. More than 60 per cent of the ore extracted in India comes from the six areas of Orissa for which there is a ready demand from the Tata Iron and Steel Works in Jamshedpur and Messrs. Bird & Co. of Calcutta. Orissa cannot boast of such extensive coal mines as those of Bengal and

Bihar, but coal has been found in Angula, Sambalpur and in the states of Gangpur, Talcher and Athmalik. Talcher has the largest coalfields and they are being progressively exploited. The Agricultural and Industries Departments which remained under the control of the Revenue Commissioner till November 1936 was taken over by the Director of Development. A Deputy Director of Agriculture was appointed for Orissa. By the amalgamation of the ex Madras and ex Central Province areas 15 additional factories were added to those already in Orissa Division and four fish curing yards with their staff were transferred from the Madras Presidency.

Administration

Sir John Austin Hubback, K.C.S.I., who has been appointed to be the first Governor of the infant province of Orissa, has had wide experience in the province of Bihar and Orissa, and has been actively associated with the life of the people of Orissa. The appointment has proved very popular and the province is eagerly looking forward to an intensive period of all round development under his able and sympathetic guidance.

Justice

Under paragraph 19 of the Order in Council the Patna High Court is the High Court for the Province. To enable the High Court to hear on Circuit cases of the Ex Madras and ex Central Provinces areas, Clause 3 of the Letters Patent was amended by Regulation XII of 1936. A new Court of an Agency Sub Judge at Jeypur a Munsif's Court at Nawapara and three additional Criminal Courts, consisting of a District Magistrate's Court and two subdivisional Magistrate's Courts, were established in 1936.

Civil Service

The Cadre of the Indian Civil Service was provisionally fixed at 17 including 13 superior posts and 4 inferior posts. As it was considered undesirable to form a separate Cadre for such a small number the Cadre is joint with Bihar.

Elections

In the elections under the new Reforms the Congress secured complete majority of seats in the Assembly. On the refusal of the leader of the Congress party in the Orissa Assembly to form the Ministry in the absence of an assurance from the Governor that he would not use his special powers of interference or set aside the advice of Ministers regarding Constitutional activities the Governor invited the Maharaja of Paralakundi to form the Ministry. The latter accepted the offer and on April 1, 1937 took office as Prime Minister with Mr. M. G. Pattnaik and Maulvi Latifur Rahman as Ministers.

THE BUDGET FOR 1936-37.

The first budget of the new Orissa Province was presented before the Advisory Council in May and was authenticated after discussion by the Council and was based mainly on known sources of revenue and expenditure plus fresh heads necessitated by the creation of the new province. For purpose of the budget new schemes intended to develop the province were left out of account and deferred till Orissa was in a position to pay for them.

The budget estimated a revenue deficit of Rs 40 lakhs and in order to cover this difference to allow for certain items of non recurring expenditure and to provide for a road fund and a famine relief fund, the Government of India gave a grant of Rs 50 lakhs. This sum was in addition to Rs 1½ lakhs already granted to finance the purchase of furniture and other office equipment for the new administration.

That the administrators of the province were determined to balance its finances was obvious from the decision announced in the budget that the Governor would not appoint any Ministers for the transitional period but would instead appoint a committee of the Advisory Council. The saving effected by this self-denial amounted to a little over Rs 80,000. It was anticipated that some saving would also be effected by the postponement of appointments to the offices of the Deputy Director of Hospital and Assistant Director of Public Health.

Faced with the problem of providing Rs 55,000 under the head 'Medical' and Rs 35,000 under the head 'Public Health' the new administration managed to effect a saving of Rs 35,000 in spite of the necessity to provide for drainage in Koraput (a prospective district headquarters), so that they had still to find Rs 55,000.

The budget also provided for the building and equipment of the Bacteriological Laboratory in Orissa at a cost of Rs 71,000 which was reduced by Rs 68,000 in the Budget as unauthenticated by the Governor. It was expected that a saving of Rs 10,000 would be made under the head 'Civil Works'.

In the result, as the Chief Secretary pointed out, it is probable that in the budget, as finally

authenticated, the estimated closing balance of Rs 1½ lakhs will have disappeared and the province will be rather over one lakh in debt. Some supplementary estimates were placed before the Advisory Council in October 1936 and in the same session a Finance Committee was appointed by the Council at the invitation of the Governor to advise and report on new schemes for the year 1937-38. As with other provinces the Budget for the first half of the current financial year is based on a notification issued by the Governor.

Capital for Orissa

In pursuance of the Government of India's decision in 1932 to construct a new capital for Orissa the Chief Engineer to the Government of India and the Consulting Architect visited Orissa in September of that year. They reported that the site at Jalsipur in Cuttack was inadequate and unsuitable for building. The Technical Committee appointed to examine various sites suggested by the local Government met in July 1936 and reported strongly in favour of a site near Bahampur and on technical grounds preferred it to Cuttack as capital. The Advisory Council attacking the report is unfavourably resolved in favour of Cuttack as capital. Early in 1937 however the Government of India announced that with the approval of the Secretary of State it had been decided to leave the choice of the capital to the decision of the new Government to be taken after April 1, 1937. In May 1937 the Orissa Government appointed a Committee to examine four different sites including Cuttack. After the Committee's report it will be for the Government and the Assembly to determine the site.

ORISSA LEGISLATIVE ASSEMBLY

Elected Members

Body, Association or Constituency represented		Name

The Central Provinces and Berar.

The Central Provinces and Berar compose a great triangle of country midway between Bombay and Bengal. Their area is 131,557 sq miles, which excludes an area of 967,680 acres or 1,512 sq miles transferred to the newly formed province of Orissa from 1st April 1936, of which 80,637 are British territory proper, 17,808 (viz. Berar) held on perpetual lease from H. E. H. the Nizam and the remainder held by Feudatory Chiefs. The population (1931) is 15,323,058 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissionership of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H. E. H. the Nizam for the maintenance of the Hyderabad Contingent and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H. E. H. the Nizam.

The Country

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyān plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat-growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealthiest part of the C. P. proper. The eastern half of the plain lies in the valley of the Wainganga and is mainly a rice-growing country. Its numerous irrigation tanks have given it the name of the "lake country" or Nagpur Fur. Further east is the far-reaching rice country of Chhattisgarh, in the Mahanadi basin. The south-east of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kanku lie in this region. Berar lies to the south-west of the C. P. and its chief characteristic is its rich black cotton soil plains.

The People

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gond and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabitants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The main divisions of the newcomers are indicated by the language divisions of the province. Hindi

brought in by the Hindustani speaking peoples of the North, prevails in the North and East, Marathi in Berar and the West and Centre of the Central Provinces. Hindi is spoken by 56 per cent of the population and is the *lingua franca*. Marathi by 31 per cent and Gondion 7 per cent. The effects of invasion are curiously illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of former Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahminisation of the aboriginal tribes is going on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries

When Sir Richard Temple became first Chief Commissioner of the C. P. the province was landlocked. The only road was that leading in from Jabulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the *malguzari*, or landlord system, ranging with numerous variations, from the great Feudatory chief ships, which are on this basis, to holdings of small dimensions. A system of land legislation has gradually been built up to protect the individual cultivator. Berar is settled on the Bombay *raiayatwari* system. 16,090 square miles of the C. P. is Government Reserved forest, in Berar the forest area is about 3,339 square miles, the total forest area being one sixth of the whole Province. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste 87 per cent of the total land is occupied for cultivation, for the two most advanced districts in the Central Provinces, the proportion averages 83 per cent, while the average figure for the Berar Districts is as high as 93 per cent. The cultivated area has extended almost continuously except for the temporary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 30 per cent of the cropped area. Wheat comes next with over 15 per cent, then pulses and other cereals used for food and oil seeds with nearly 50 per cent and cotton nearly 6 per cent. In Berar cotton occupies 43 per cent. Next comes *juar* and then pulses and other cereals and oil seeds of the cropped area, *jowar* covers 43 per cent, then wheat and oilseeds. In agriculture more than half the working population is female.

Commerce and Manufactures

Industrial life is only in its earliest development except in one or two centres, where the introduction of modern enterprise along the railway routes has laid the foundations for great future developments of the natural wealth of the province. Nagpur is the chief centre of a busy cotton spinning and weaving industry. The Empress Mills, owned by Parsi manufacturers, were opened there in 1877 and the general prosperity of the cotton trade has led to the addition of many mills here and in other parts of the province. The total amount of Indian yarn exported from the Province during the years 1934-35 and 1935-36 was 1,82,358 and 1,63,349 maunds, respectively.

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1935 employed 9,969 persons and raised 3,85,179 tons. Then follow coal mining with an output of 1,526,690 tons and 13,105 persons employed, the Jabbul pore marble quarries and allied works, the lime stone quarries and the mines for pottery clay, soapstone, etc.

The total number of factories of all kinds legally so described was 1,017 in 1935, the latest period for which returns are available and the number of people employed in them 59,896. The same economic influences which are operative in every progressive country during its transition stage are at work in the C. P. and Berar, gradually sapping the strength of the old village industries, as communications improve, and concentrating industries in the towns. While the village industries are fading away, a large development of trade has taken place. The last pre-war reports showed an increase in volume by one third in eight years.

Administration

The administration of the Central Provinces and Berar is conducted by a Governor in Council, who is appointed by the Crown. He is assisted by eight Secretaries and four under secretaries. Under the reform scheme the administration is conducted by a Governor with an Executive Council of two members, one of whom is a non-official and two Ministers the latter being in charge of the transferred subjects.

The local legislature consists of 70 members distributed as follows—38 elected from the C. P., 17 elected from Berar, 2 members of the Executive Council, 8 nominated non-officials, 8 nominated officials. The Governor (who is not a member of the Council) has the right of nominating two additional members with special knowledge on any subject regarding which legislation is before the Council. The C. P. are divided for administrative purposes into three divisions and Berar constitutes a division. Each of these is controlled by a Commissioner. The divisions are subdivided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Provincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector General of Civil Hospitals, the Director of Public Health, the Inspector General of Police,

the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector General of Registration, and Registrar General of Births, Deaths and Marriages, the Director of Agriculture, the Registrar of Co-operative Societies, the Director of Industries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon, (except Mandla, Drug and Balughat where there are Assistant Surgeons) who is generally also Superintendent of the District Jail except at Central Jails at Nagpur and Jabbulpoore and District Jails at Raipur, Narsinghpur, Amraoti and Akola, where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service, (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tahsildars and Naib Tahsildars or members of the Subordinate service. The district is divided for administrative purposes into tahsils the average area of which is 1,500 square miles. In each village a landlord or representative of the proprietary body is executive headman.

Justice

The Court of the Judicial Commissioner was the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons jointly charged with European British subjects.

Quite recently the Secretary of State for India approved the proposal for the establishment of a High Court in the Central Provinces and Berar and Sind and a High Court has since January 1936 been established at Nagpur.

Subordinate to the High Court are the District and Sessions Judges (9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and second class.

Local Self Government

Municipal administration was first introduced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1864. Several revising Acts extend its scope and the C. P. Municipalities Act passed towards the end

of the year 1922 has considerably increased the power of the Municipal Committees. The C P Municipalities Act has also been extended to Berar. Viewed generally, municipal self government is considered to have taken root successfully. The larger towns have municipalities, there being 75 such bodies in the Province.

Under the Central Provinces Local Self-Government Act passed in 1920 as amended in 1931 there is a local Board for each tahsil and a district council for each district excepting Hoshangabad, Chhindwara and Saugor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government officials not exceeding in numbers one fourth of the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members selected by those representatives and of members other than Government servants, nominated by Government.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions of local boards also are non official.

Rural education sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a legitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1920. So far 930 Panchayats have been established. As the result of a recommendation of a Committee appointed in 1925 to look into the question of Panchayats, a Village Panchayat Officer was appointed to guide the developments of the Panchayat system. This post was kept vacant on account of financial stringency for more than two years. It has now been filled in with effect from the 24th May 1933.

Public Works

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer who is also Secretary to the Government. There are two Superintending Engineers who between them supervise the work of both branches. The Province is well served by a network of roads, but in a number of cases they are not fully bridged and are therefore impassable to traffic at times during the rains.

State irrigation was introduced early in the present century mainly as a result of the recommendations of the Irrigation Commission (1901-03). During the last thirty six years a sum of Rs 7.25 crores has been expended on the construction of irrigation works, of which the more important are the Wainganga, Tandula, Mahanadi, Kharung and Manlari canals.

Three works, viz., the Mahanadi and Wainganga Canals and the Asola Mendha tank, were sanctioned originally as productive works and the

remainder were all sanctioned as unproductive works. The three works sanctioned as productive have all failed to justify their classification in that category and have now been transferred to the unproductive list. The conditions in the province are such that irrigation works cannot be expected to be productive and their construction is justified only on account of their value as a protection against famine. The normal area of annual irrigation is at present about 323,000 acres, mainly rice and the income from these works more than covers the expenditure incurred on their maintenance and management.

Police

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector General, whose jurisdiction extends over Berar three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under the control of two Superintendents of Railway Police with headquarters at Raipur and Hoshangabad. A Special Armed Force of 924 men is distributed over the headquarters of eight districts, for use in dealing with armed disturbers of the peace in whatever quarter they may appear. There is a small force of Mounted Police. The Central Provinces has no rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

Education

The Education Department of the Central Provinces and Berar is administered by a Director of Public Instruction, a Registrar, Education Department and Secretary, High School Education Board, four Inspectors and two Inspectresses who in their turn are assisted by nine Assistant Inspectors and four Assistant Inspectresses. Schools are divided into (a) schools for general education and (b) schools for special education. The latter are schools in which instruction is given in a special branch of technical or professional education. The main division of schools for general education is into Primary and Secondary. In the Primary Schools the teaching is conducted wholly in the vernacular and these schools are known as Vernacular Schools. The Secondary Schools are divided into Middle and High Schools. The former may be either Vernacular Middle Schools in which instruction is given (a) wholly in the vernacular or (b) mainly in the vernacular with an option to take English as an additional language, or Anglo Vernacular Middle Schools in which instruction is given both in English and the Vernacular. In the High School classes instruction until recently was given in English but the vernacular was adopted as the medium of instruction

at the beginning of the school year 1922-23. For the convenience of pupils whose mother tongue is not a recognised vernacular of the locality a few English medium classes are still maintained. For administrative purposes schools are further divided according to their management into schools (under public management and schools controlled by private bodies). The former consist of (a) schools controlled by Government and (b) schools controlled by Local Bodies or Boards. The latter consist of (a) Schools which are aided by grant from Government or from Local Funds and Municipal Funds and (b) unaided schools. All schools under public management, all aided schools and all unaided recognized schools conform in their courses of study to the standards prescribed by the Education Department or by the High School Education Board. They are subject to inspection by the Department and to the general rules governing schools of this type. They are "recognised" by the Department and their pupils may appear as candidates for any prescribed examination for which they are otherwise eligible. Unrecognized schools do not follow the rules of the Department, nor are they subject to inspection by the Department. They are mostly indigenous schools which have been too recently opened to have acquired "recognition". Their pupils may not appear as candidates at any of the prescribed examinations without the previous sanction of the Department.

Primary Education is under the control of District Councils and Municipal Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Higher Education is under the control of Nagpur University of which the following are constituent colleges—at Nagpur, Morris College, the College of Science, Hislop College, City College, the Agriculture College, the University College of Law, Central College for women at Jubbulpore, Robertson College, Hitkarni City College Spence Training College (for teachers), Hitkarni Law College, at Amraoti, King Edward College, at Wardha, Wasudev Arts College and at Raipur Rajkumar College. There are also an Engineering School and a Medical School at Nagpur and a Technical Institute at Amraoti.

Secondary Education is under the control of the Board of High School Education on which the University is represented. The High School certificate awarded by the Board qualifies for entrance to the University.

Medical

The medical and public health services of the province are respectively controlled by an

Inspector General of Civil Hospitals and Director of Public Health. The medical department has made some progress since the year 1911. A striking advance has been made in recent years with urban sanitation, and the opening of a Medical School at Nagpur in 1914 supplied a long felt need. The principal medical institutions are the Mayo Hospital at Nagpur, opened in 1874 with accommodation for 213 in patients, the Victoria Hospital at Jubbulpore, opened in 1886 with accommodation for 177 in patients, the Daga Memorial (Dufferin) Hospital and the Mulr Memorial Hospital at Nagpur and the Lady Elgin Hospital and the Crump Children's Hospital at Jubbulpore, these last four being for women and children and can together accommodate for 270 in patients. Three important hospitals for women have been recently opened at Chhindwar and Khandwa and Murizapur and at all district headquarters where no separate women's hospitals exist sections have been opened at the Main Hospitals for the treatment of women by women. The Mayo Hospital, Nagpur was provincialised in 1923, the Irwin Hospital at Amraoti in 1925, the Victoria Hospital at Jubbulpore in 1926, and the Silver Jubilee Hospital at Raipur in 1928. In accordance with recent policy, 126 out of 186 local fund dispensaries have been transferred to the administrative and executive control of local bodies. The Province has one Mental Hospital at Nagpur. Vaccination is compulsory in nearly all Municipal towns in the Province. The Central Provinces Vaccine Institute at Nagpur was opened in 1913.

Finances

A combination of adverse circumstances has led to a substantial contraction of the resources of the province during the last six years. In spite of drastic retrenchment all round the year opened with an unproductive debt of Rs. 74 lakhs, representing loans taken in 1931-32, 1934-35 and 1935-36 to cover deficits. In the face of these circumstances the budget presented this year was intended to mark time and practically has reached the stage beyond which retrenchment is not possible. To replace partially the fall of revenue, principally from Excise, a bill to impose license fees on the vend of tobacco was presented to the Council but as the Council was opposed to this levy the measure was finally dropped. Certain other small measures of taxation have since been passed by the council, but in the main the problem of augmenting resources for financing development remains unsolved.

FINANCES OF THE CENTRAL PROVINCES

ESTIMATED REVENUE FOR 1936-37

<i>Principal Heads of Revenue</i>		Rs
Taxes on Income		
Salt		
Land Revenue	2,55,57,000	
Excise	61,54,000	
Stamps	56,00,000

North-West Frontier Province.

The North West Frontier Province, as its name denotes, is situated on the north west frontier of the Indian Empire. It is in form an irregular strip of country lying north by east and south by west and may generally be described as the tract of country, north of Baluchistan, lying between the Indus and the Durand boundary line with Afghanistan. To the north it extends to the mountains of the Hindu Kush. From this range a long broken line of mountains runs almost due south, dividing the province from Afghanistan, until the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest breadth 279 miles and its total area about 36,356 square miles. The territory falls into three main geographical divisions: the Cis Indus district of Hazara, the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Mardan, Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line of Afghanistan. Hazara and the four districts in the second division contain 13,518 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of the H. L. the Governor in his capacity as Agent to the Governor General. The area of this tract is roughly 22,828 square miles and in it are situated, from north to south the political agencies severally known as the Malakand, Khyber, Kurram, North Waziristan and South Waziristan Agencies. Each of the Deputy Commissioners of the six administered districts is responsible for the management of political relations with certain tribes or sections of the tribes across the frontier. A few hundred miles of the trans border Territory are internally administered by the Political Agents, but the bulk of the trans border population is free from any internal interference, so long as offences are not committed and so long as the tribes observe the conditions on which allowances are paid to many of them.

The area of the Province is a little more than half that of Bombay (excluding Sind and Aden) and amounts to more than three fifths of the size of England without Wales. The density of population throughout the Province equals 99 persons to a square mile, but in the more favoured portions the pressure of population is much greater. In the Hazara District there are 20 persons to a square mile and in the

trans Indus plains tract the number is 156. Density for the 6 rented Districts 5,179 persons per square mile. The key to the history of the people of the N-W F P lies in the recognition of the fact that the valley of Peshawar was always more closely connected politically with Eastern Iran than with India, though in pre Mahomedan times its population was mainly Indian by race. Early history finds the Iranians dominating the whole Indus valley. Then came the Greek invasion under Alexander the Great, in B.C. 327, then the invasions of the Sakas, and of the White Huns and later the two great waves of Muhammadan invasion. Last came the Sikh invasion beginning in 1818. The Frontier Territory was annexed by the British in 1849 and placed under the control of the Punjab Government. Frequent warfare occurred with the border tribes. The most serious phases of these disturbances were the war provoked by the aggression of Afghanistan in 1919 and the protracted punitive operations against the Waziris in 1919-1920. These have resulted in the establishment at Razmak, a position dominating the Mahsud Waziri country, of a permanent garrison of 10,000 troops drawn mostly from stations lying in the Plains immediately below the hills. A circular road from Bannu through Razmak to Sararogha, Jandola and back to the Derajat provides communications transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of the Tribal area.

The division of the Frontier Province from the Punjab was frequently discussed, with the double object, in the earlier stages of these debates of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties of frontier officials as would tend to the establishment of improved relations between the local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab administration in 1901. To it was added the political charge of Dir, Swat and Chitral, the Political Agent of which had never been subordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor General, with headquarters at Peshawar, in direct communication with the Government of India in the Foreign and Political Department. In April

1932 the Province was constituted a Governor's Province. In political questions there is no intermediary between the Governor and the local officer, an arrangement designed to secure both prompt disposal of references and the utilisation of the expert knowledge of frontier conditions for which the head of the administration is selected. The advisability of reuniting the Province with the Punjab was much discussed in certain Indian political circles and as a result

the views expressed upon the matter in the Legislative Assembly the Government of India in 1922 appointed a Committee of officials and unofficials to investigate it. The Committee, presided over by Mr. D. de S. Bray, M.L.A., Joint Foreign Secretary, toured the Frontier Province and the Punjab and heard numerous witnesses. Its members were Messrs. Raza Ali, M.C.S., T. Rangacharia, Chaudhri Shaha Buddin, N. M. Samarth and K. B. Abdur Rahim Khan, members of the Legislative Assembly, H. N. Bolton, I.C.S. (Foreign Dept.) and A. H. Parker, I.C.S. (Punjab) (members).

The inquiry developed practically into a contest between Mahomedans and Hindus on communal lines. The Hindus allied in sympathy with their co-religionists in the Punjab demanded the reunion of the administered districts of the Province with the Punjab or, if that were not attainable then the placing of the judicial administration of the Province under the Punjab High Court at Lahore. The Mahomedans on the other hand claimed the right of their Province to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pathan Province on the Frontier would cause a dangerous sentimental division from the rest of India, with leanings towards the allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu members writing each a separate report favourable to the Hindu viewpoint already explained, and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for—

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India,

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister,

Appointment of a second Judicial Commissioner which has since been sanctioned and reform of the judicial administration in various directions, including interchange of officers with the Punjab so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

'If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her.'

The People

The total population of the N.W.F.P. (1931) is 4,684,364, made up as follows—

Hazara	669,636
Trans Indus Districts	1,755,440
Trans-Border Area	2,259,288

This last figure is estimated. There are only 561.3 females per 1,000 males in the towns and 872.2 females per 1,000 males in rural areas.

This disproportion of the sexes cannot at present be explained in the N.W.F.P. any more than in other parts of Northern India where it also appears. The discrepancy is greater here than in any other Province of India. There is no ground for believing that the neglect of girls in infancy has any effect in causing the phenomenon. On the other hand, the female population has to face many trials which are unknown to men. The evils of unskilled midwifery and early marriage are among them. Both the birth and death-rates of the Province are abnormally low. The birth rate in the administered districts, according to the last available official reports, is 25.6 and the death-rate 21.9.

The dominant language of the Province is Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Rajput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent of the total and Sikhs to

a few thousands. The occupational cleavage of the population confuses ethnical divisions.

(Under the North West Frontier Province Law and Justice Regulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, dower, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience. In these matters the Mohammadan Law where the parties are Mohammadans, and Hindu Law, where the parties are Hindus, is applied in so far as that law has not been altered or abolished by any legislative enactment and is not opposed to the provisions of the Regulation and has moreover not been modified by any custom.

The climatic conditions of the N W F P which is mainly the mountainous region, but includes the Peshawar Valley and the river in tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The air is generally dry and hence the annual ranges of temperature are frequently very large. The Province has two wet seasons, one the S W Monsoon season, when moisture is brought up from the Arabian Sea and the Bay of Bengal the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widespread rain and snowfall. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall fails almost entirely.

Trade and Occupations

The population derives its subsistence almost wholly from agriculture. The Province is practically without manufactures. There is no considerable surplus of commercial products for export. Any commercial importance which the province possesses it owes to the fact that it lies across the great trade routes which connect the trans border tribal territories and the marts of Afghanistan and Central Asia with India, but the influence of railways is diminishing the importance of these trading interests. Special mention may be made of the railway comparatively recently opened linking Baluchistan, in the south west of the N W F P, via Nushki with south east Persia. The line connects with the north west railway

system of India and extends 343 miles to Duzdap, within the Persian border. Two weekly trains run each way and the freight carried largely consists of carpets, wool and dates, from Persia and of tea, sugar and piece goods from the Indian side. Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders (or Powindahs) from the trans frontier area have always pursued their wanderings into India and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India. The Railway line from Pir to Lankitshina which is complete and open to public traffic now will similarly, in course of time, develop both the manner and amount of transport communications and trade. The new roads in Waziristan are already largely utilised by the Tribal inhabitants for motor traffic. Prices of agricultural produce have in recent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the land amounts to 25 per cent and uncultivated to 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have improved, trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the British administered districts the total percentage of male Scholars to the total male population is 6.1 and that of female Scholars to the total female population is 1.52 for the year 1935-36 per cent males and 7 per cent females of the total population are returned as literates. The figures for males denote a very narrow diffusion of education even for India. Those for females are not notably low, but they are largely affected by the high literacy amongst Sikh women, of whom 13.3 per cent are returned as literate. The inauguration of a system of light railways throughout the Province, apart from all considerations of strategy, must materially im-

prove the condition of the people and also by that means strengthen the hold of the administration over them. The great engineering project of the Upper Swat River Canal, which was completed in 1914, and the lesser work of the Paharpur Canal, also completed a few years ago, will bring ease and prosperity to a number of peasant homes.

Administration

The administration of the North West Frontier Province is conducted by H. E. the Governor and Agent to the Governor General. His staff consist of—

- (1) The Pol. Resident on the N. W. Frontier
- (2) The Hon. ble Minister for Home Affairs
- (3) The Hon. ble Finance Minister
- (4) The Hon. ble Minister for Agriculture
- (5) The Hon. ble the Speaker, Legislative Assembly
- (6) Officers of the Political Department of the Government of India
- (7) Members of the Provincial Executive and Judicial Service
- (8) Members of the Subordinate Civil Service
- (9) Superintendents and Assistant Superintendents of Police
- (10) Officers recruited for the service of departments requiring special knowledge—Military, Engineering, Education, Medicine and Forestry

The cadre posts reserved for officers coming under the fourth head above are —

Administration,	{ The Pol. Resident on the N. W. Frontier	}	6
	{ Chief Secy., Revenue and Civil Commr.		
	{ Secretary, Development Departments		
	{ Home Secretary		
	{ Resident in Waziristan		
	{ Dy. Commissioners	}	12
	{ Political Agents		
	{ Senior Sub Judges		
	{ Asst. Commissioners and Asst. Political Agents		
	{ Asst. Commissioners and Asst. Political Agents		
Judicial Commrs. & District Judges	{ Judicial Commrs.	}	1
	{ Two District and Sessions Judges		
	{ One Additional ditto		
	{ One Additional ditto		

The districts under the Deputy Commissioners are divided into from two to three sub-collectorates in charge of tahsildars, who are invested with criminal and civil and revenue powers, and are assisted by naib tahsildars,

who exercise only criminal and revenue powers. Some sub divisions are in charge of Assistant or Extra Assistant Commissioners. The village community characteristic of some parts of India is not indigenous among the Pathans. Its place as a social unit is to some extent taken by the tribe, which is held together by ties of kinship and ancient ancestry, real or imaginary. Modern municipal local government has been introduced in the towns. There are also district boards. The district is the unit for police, medical and educational administration and the ordinary staff includes a District Superintendent of Police, a Civil Surgeon, the Superintendent of Jail and a District Inspector of Schools. The Province forms a single educational circle and only possesses one forest division, that of Hazara. The P. W. D. of the Province carries out duties connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P. W. D. who is also *ex officio* Secretary to H. E. the Governor. The administration of the civil police force of the districts is vested in an Inspector General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The revenue administration of all five administered districts is controlled by the Revenue and Divisional Commissioner. For the administration of civil and criminal justice there are two Civil and Sessions districts each presided over by a District and Sessions Judge. The two Judicial Commissioners are the controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this Province. The improvements needed to bring the judicial administration up-to-date in accord with the growth of the business of administration are dealt with in the Inquiry Committee's report to which reference was made above.

FINANCES

In order to meet the excess in expenditure over the income of the Province a subvention of Rs. one crore per annum is given by the Government of India out of Central Revenues.

The Administration

The principal officers in the present Administration are —

H. E. the Governor and Agent to the Governor General — H. E. Sir George Cunningham, K.C.S.I., K.C.I.E. O.B.E., (Assumed charge, 2nd March 1937)

Secretary to Governor—Captain A J Dring

Aide de Camp—Lieut J Grose

The Political Resident On the N W F—Mr J G Acheson, C I E, I C S

Resident, Waziristan—Major H H Johnson, C I E, M M

Judicial Commissioner—Mr J Almond, Bar at Law, I C S

District Judicial Commissioner—Khan Bahadur Kazi Mir Ahmad Khan, B A, LL B

Revenue and Divisional Commissioner—Mr C V Salusbury, I C S

Chief Secretary to Government, N W F P—Mr A J Hopkinson, I C S

Secretary to Government, Development Department—Major J R L Bradshaw

Home Secretary to Government—Mr A N Mitchell, I C S

Financial Secretary to Government, N W F P—R B Chuni Lal

Advocate General, Secretary to Government Legislative Department and Legal Remembrancer—S Rija Singh, M A, LL B

Assistant Secretary (General) to Government, N W F P—Mr R N McMorran, I C S

Asstt Financial Secy to Govt, N W F P—Sh Ata Elahi Siddiqi

Indian Personal Assistant, H E the Governor—Khan Bahadur Sultan Mahd Khan

Secretary, Public Works Department—Mr G M Ross, I S E

Inspector General of Civil Hospitals and Prisons—Lt Col K S Townsend, M C, M D, B S (London), M R C P (London), I M S

Assam.

The Province of Assam, omitting the partly administered and unadministered tracts on its northern and eastern borders, comprises an area of some 67 534 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur. It owes its importance to its situation on the north east frontier of India. It is surrounded by mountainous ranges on three sides while on the fourth (the west) lies the Province of Bengal on to the plains of which debouch the two valleys of the Brahmaputra and the Surma which form the plains of Assam. These two valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population

The total population of the Province in 1931 was 9,217,557, of whom 445,606 were in Manipur. Of the population in 1931 nearly 5½ millions were Hindus, over 2½ millions were Muslims a million belonged to tribal religions and a quarter of a million were Christians. 43 per cent of the population speak Bengali, 21 per cent speak Assamese, other languages spoken in the province are Hindi, Uriya, Mundari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Chinese languages. Owing to the great areas of waste and rivers the density of the province is only 137, which compared with that of most other parts of India is low.

Agricultural Products

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river systems all being alike favourable to cultivation. Rice is the staple food crop, nearly 5,201,825 acres being devoted to this crop. Except in the Himalayan Terai irrigation is unnecessary. Tea and jute are the most important crops grown for export. The area under tea consists of 435,661 acres. Wheat and tobacco are also grown and about 37,999 acres are devoted to sugarcane.

Meteorological Conditions

Rainfall is everywhere abundant, and ranges from 23.39 to 241.76 inches. The maximum is reached at Cherrapunji in the Khasi Hills, which is one of the wettest places in the world, having a rainfall of 520.09 inches. The temperature ranges from 59 at Sibsaigar in January to 84.8 in July. Earthquakes of considerable severity have taken place by far the worst being that which occurred in 1897.

Mines and Minerals

The only minerals in Assam worked on a commercial scale are coal, limestone and petroleum oil. The most extensive coal measures are in the Naga Hills and the Lakhimpur districts, where about 190,677 tons were raised in 1935. Limestone is quarried in the Khasi and Jaintia Hills, Petroleum is worked only in Lakhimpur and Cachar.

An account of the petroleum occurrences in Assam was recently published in the memoirs of the Geological Survey of India. It states that the petroleum localities in this province are confined to a curved belt of country along the basins of the Brahmaputra and

Surma. This belt is traceable over a distance of some 800 miles from N.E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S.E. trend.

Manufactures and Trade

Silk is manufactured in the Assam Valley, the weaving being done by the women. Cotton weaving is also largely practised by the women, and almost every house contains a loom, the cloth is being gradually displaced by imported goods of finer texture and colour. Tea manufacture is the most important industry of the province. Boat building, brass and metal and earthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent of the population. Assam carries on a considerable trade with the adjoining foreign tribes and countries.

Communications

Much of the trade of Assam is carried by river. The excellence of its water communications makes the province less dependent upon roads than other parts of India. A large fleet of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company plies on the rivers in both valleys. An alternate day service of passenger boats runs between Goalundo and Dibrugarh. In recent years the road system has developed. There are two trunk roads, one either bank of the Brahmaputra parts of which are metalled or gravelled and the rest unmetalled and excellent metalled roads from Shillong to Gauhati and to Cherrapunjee and also between Dimapur, on the Assam-Bengal Railway, and Imphal the capital of the Manipur State. A motor road connecting Shillong with the Surma Valley, has been completed and is greatly improved. Inter-valley communications. The Government of Assam had in 1928 carried out a considerable programme of road improvement and another programme which aims at the improvement of nearly 300 miles of road either by metalling or gravelling and the construction of 12 big bridges is nearing completion. *Kutchi* roads are being maintained by means of mechanical plant which has proved successful in maintaining thorough out the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads has been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Assam-Bengal Railway system have been added in recent years. The main Assam-Bengal Railway line runs from Chittagong Port in Bengal, through the North Cachar Hills to Pinsukia, a station on the Dibrugarh-Sadiya Railway and connects the Surma and Brahmaputra Valleys. A branch of the line runs from Badarpur to Silchar at the Eastern end of the Surma Valley and another runs through the west of the Assam Valley from Lumding to Gauhati where it effects a junction with the Eastern Bengal Railway. The Eastern Bengal Railway connects Assam with the Bengal system via the Valley of the Brahmaputra. An extension towards Rangapara from Tangla junction, along the North Bank of the Brahmaputra has been opened to traffic.

THE FINANCES OF ASSAM

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1919. The present financial position for 1936-37 is set out in the following table—

Principal Heads of Revenue—	Trs		Trs
Taxes on Income	3,25	Miscellaneous Railway expenditure	
Salt	15	Construction of Railways	
Land Revenue	1,23,13	Navigation, Embankments Drainage Works	66

State Railways	44		
Subsidised Companies			

Administration

The province of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the eastern portion of its unwieldy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912 the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was reconstituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked, with certain minor provinces, to suit its undeveloped character with the older major provinces of India.

The capital is Shillong, a town laid out with great taste and judgment among the pine woods on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

Baluchistan.

Baluchistan is an oblong stretch of country occupying the extreme western corner of the Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879, (2) Agency Territories with an area of 44,345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers, and (3) the Native States of Kalat and Las Bela with an area of 80,410 square miles. The Province embraces an area of 134,638 square miles and according to the census of 1931 it contains 868,617 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Persia. It thus forms a watershed the drainage of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central Asia. Rugged, barren, sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the prevailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich crops of all kinds to be raised.

The political connection of the British Government with Baluchistan commenced from the outbreak of the First Afghan War in 1839, it was traversed by the Army of the Indus and was afterwards occupied until 1842 to protect the British lines of communication. The districts of Kachi, Quetta and Mastung were handed over to the Amir of Afghanistan and Political Officers were appointed to administer the country. At the close of the First Afghan War, the British withdrew and these districts were assigned to the Khan of Kalat. The founder of the Baluchistan Province as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorapur, Sibi, Zawara Valley and Thal Chotiali were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

Industries

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrigh, which has the heaviest rainfall, records no more than 11½ inches in a year. In the highlands few places receive more than 10 inches and in the plains the average

rainfall is about 5 inches, decreasing in some cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

Education is imparted in 107 public schools of all kinds with 4,121 scholars. There is a distinct desire for education amongst the more enlightened headmen round about Quetta and other centres, but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind Pishin Railway and in the Bolan Pass. The output of coal in 1935-36 was 6,747 tons. Chromite is extracted in the Zhob District near Hindubagh. Lime stone is quarried in small quantities. The output of chromite during 1935-36 amounted to 21,090 tons.

Administration

The head of the local administration is the officer styled Agent to the Governor-General and Chief Commissioner. Next in rank comes the Revenue Commissioner who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retaliation on the aggressor or the vindictive punishment of a crime. The district levies play an unobtrusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three Irregular Corps in the Province: the Zhob Militia, the Mekran Levy Corps and the Chagal Levy Corps. Fundamentally the Province is not self-supporting, the deficit being met from Imperial Funds.

Agent to the Governor General and Chief Commissioner in Baluchistan, The Honble Lt Col A E B Parsons, CBE DSO

Revenue and Judicial Commissioner, R L L Wingate Esq, CIE, ICS

Secretary to the Agent to the Governor General and Chief Commissioner, Major J W Galbraith MC

Under Secretary and Personal Assistant to the Agent to the Governor General and Chief Commissioner, Lt D H Biscoe IA

Secretary to the Agent to the Governor General in the Public Works Department, Brigadier E F S Dawson MC

Assistant Secretary to the Agent to the Governor General and Chief Commissioner, Major J B Luderth, MBE (on leave)

Political Agent and Deputy Commissioner, Quetta, Major C J U Brimmer MC

Assistant Political Agent and Assistant Commissioner Quetta, Captain A S B Shih IA

Political Agent in Kalat and Political Agent in charge of the Bolan Pass and of Chagai District Major L H Gastrell, IA

Assistant to the Political Agent in Kalat and of Chagai, Captain G A Cole IA

Assistant Political Agent Mekran, Panjgur, Captain M O A Baig, IA

Political Agent, Sibi, Major R G L W Alban, IA

Assistant Political Agent, Sibi, K B Mohd Murtaza Khan

Assistant Political Agent and Colonisation Officer Nasirabad Sub Division, District Sibi, B M Bacon, Esq ICS

Political Agent Loralai, Lt Colonel R G Hinde Assistant Political Agent, Loralai Lt I S Chopra, IA

Political Agent, Zhob, Fort Sandeman, Major D G H de la Hargue, IA

Assistant Political Agent, Zhob, Capt V W D Willoughby

Residency Surgeon and Chief Medical Officer, Lt Col B H Kamalaka, MC, IMS

ANDAMAN AND NICOBAR ISLANDS

This is a group of islands lying in the Bay of Bengal Port Blair, the headquarters of the Administration, is 780 miles from Calcutta, 740 miles from Madras, and 360 miles from Rangoon, with which ports there is regular communication by Government chartered steamer.

The total area of the Andaman Islands is 2,508 square miles and that of the Nicobar Islands 635 square miles.

The total area under cultivation in March 1936 was 10,296 acres and the remaining area being dense forest.

The population enumerated at the Census of 1931 was 29,463 of whom 7,552 were convicts. The number of convicts on 1st April 1936 was 5,918.

PORTS—Port Blair and Boningto in the Andamans and Car Nicobar and Camorta in the Nicobars. Timber and coconuts are exported from the Andamans, and coconuts and their products from the Nicobars.

The Islands are administered by a Chief Commissioner. A penal settlement was established at Port Blair in 1858 and is the largest and most important in India.

Chief Commissioner, W A Cosgrave, CBE, ICS

COORG.

Coorg is a small petty Province in Southern India, west of the State of Mysore. Its area is 1,593 square miles and its population (163,327 according to the census of 1921). Coorg came under the direct protection of the British Government during the war with Sultan Tippu of Seringapatam. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with his headquarters at Bangalore. In him are combined all the functions of a local government and a High Court. The Secretariat is at Bangalore where the Assistant Resident is styled Secretary to the Chief Commissioner of Coorg. In Coorg the chief authority is the Commissioner whose headquarters are at Mercara and whose duties extend to every branch of the administration. A Legislative Council consisting of 15 elected members and five nominated members was created in 1924. The chief wealth of the country is agriculture and especially the growth of coffee. Although owing to over production and insect pests coffee no longer commands the profits it once enjoyed, the Indian output still holds its own against the severe competition of Brazil. The bulk of the output is exported to Europe.

Chief Commissioner, Coorg, The Hon Lt Col C I C Plowden CIE

AJMER-MERWARA

Ajmer Merwara is an isolated British Province in Rajputana. The Agent to the Governor General in Rajputana administers it as Chief Commissioner. The Province is divided into the Sub-divisions of Ajmer and Keki and the Tehsils of Beawar and Lodgathi, the two latter forming the Merwara Sub-division with a total area of 2,711 square miles and a population of 560,292. At the close of the Pindariwar Daulat Rao Scindia, by a treaty, dated June 25, 1818, ceded the district to the British. Sixty-two per cent of the population are supported by agriculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maize, millet, barley, cotton, oil seeds and wheat.

Chief Commissioner The Hon Lt Col Sir G D Ogilvie, KCI, ICS

Aden

Aden was the first new territory added to the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and crew of a British Indian bungalow wrecked in the neighbourhood. Negotiations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 10th, 1839.

Aden is an extinct volcano five miles long and three broad jutting out so much as Gibraltar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that surrounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shukh Othman, 39 square miles in extent, was subsequently purchased when, in 1882, it was found necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent in the Straits of Bab el Mandeb at the entrance to the Red Sea. The Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854 were attached to the Aden Residency until 1931, when they were transferred to the control of the British Resident in the Persian Gulf.

The whole extent of the Aden Settlement, including Aden, Little Aden, Shukh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden with Little Aden, Shukh Othman, and Perim to have a population of 48,308.

The language of the Settlement is Arabic, but several other Asiatic tongues are spoken. The population is chiefly Arab. The chief industries are salt and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are pomegranate, sesame, a little cotton, madder, a bastard saffron and a little indigo. In the hills, wheat, madder, fruit, coffee and a considerable quantity of wax and honey are obtained. The difficult problem of water supply has been solved. An artesian supply of fresh water has been obtained at Sheikh Othman. Early in 1924 a start was made with a deep bore and sweet water was found at a depth of 1,545 feet. The artesian flow of water now rises from this bore at 750 gallons per hour. A second bore was started in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water has practically replaced condensed water supply mains for distributing water by pipe connection to houses have been laid at Crater

and Tawahl and several of the private houses have been connected to the mains. Drainage systems at Liwih and Crater have been completed.

Climate—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulls between the monsoons in May and September are very oppressive. But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maladies common to tropical countries. The annual rainfall varies from $\frac{1}{2}$ inch to 8 $\frac{1}{2}$ inches, with an irregular average of 3 inches.

Aden Protectorate—The principal Chiefs of the Aden hinterland are in protection treaty relations with the British Government and their territories and dependencies comprise the Aden Protectorate. In April 1905 an Anglo-Turkish Boundary Commission signed a convention specifying a demarcated frontier between the Aden Protectorate and the (then) Turkish Yemen, stretching from Shaikh Murad opposite Perim, to the river Bana some 29 miles north east of Dhali, and thence north east to the Great Desert (Rub al Khali). With certain modifications this frontier has been accepted by the Treaty of San' signed on 11th February 1934 as the boundary between the Aden Protectorate and the territories of the King of the Yemen, who became ruler of the former Turkish possessions in S.W. Arabia after the conclusion of the Great War. The Aden Protectorate stretches eastwards as far as Ras Dhurrah Ah to include the Hadhramaut and the territories of the Sultan of Qishn, bordering upon Oman, and comprises in all about 42,000 square miles.

The Sultan of Qishn is also Sultan of Sokotra an island about 1,382 square miles in extent lying off Cape Guardafui on the African coast. Sokotra is included in the Aden Protectorate by virtue of a treaty between the Sultan and the British Government in 1886. Its population is said to be about 12,000, mainly pastoral inland, and fishing on the coast. The Aden Protectorate which is under the control of the Governor and Commander in Chief, Aden, is not directly administered and since the withdrawal of a small British Garrison from Dhala in 1906 no military posts have been maintained in tribal territory.

Administration—Aden was transferred from the administrative control of the Government of India to that of the Colonial Office with effect from 1st April 1937 from which date it assumed the status of a Crown Colony.

The Administration is vested in His Excellency the Governor and Commander in Chief who is assisted by an Executive Council.

In spite of the transfer in control it is intended that there should be as great a degree of continuity as possible in the machinery and methods of Government. This will involve the retention of the spirit and in most cases of the letter of existing laws and regulations, the preservation in judicial cases of the right of appeal to the High Court of Bombay, the continued use of Indian postage rates and currency and the maintenance of the port as a free port.

The management of the port is under the control of the Board of Trustees formed in 1888. The principal business of the Port Trust in recent years has been the deepening of the harbour so as to allow vessels of large size to enter and leave at all states of the tide.

The Police Force, consists of land, harbour and armed Police.

The Aden Settlement performs all the municipal functions in Aden.

Names and Designations of Officers

His Excellency the Governor and Commander in Chief of the Colony and Protectorate of Aden, Lieutenant Colonel Sir Bernard Rawdon Reilly, KCMG, CIE, OBE.

Air Officer Commanding, British Forces in Aden, Air Commodore W. A. McClughlin, DSO, MC, DFC.

His Honour the Chief Justice of the Supreme Court of Aden, The Hon. Mr. J. Taylor Lawrence.

Political Secretary, Lieutenant Colonel M. C. Lake, CMC.

Chairman of the Port Trust and Settlement, J. V. Alexander, M. Inst. C.E.

Civil Secretary, Major M. C. Sinclair.

Finance Officer, A. Muchmore.

Senior Medical Officer of the Colony of Aden, Lieutenant Colonel E. S. Phipson, CIE, DSO, IMS.

Commandant of Police, D. F. P. Reid, IP.

KAMARAN—The Island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India through a Civil Administrator under the control of the Government of the Colony of Aden. It has an area of 22 square miles and a population of about 2,200. A quarantine station for pilgrims travelling to Mecca from the East is maintained on the island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator, Captain D. Thompson.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the company were originally managed by the Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, the final precursor of the Secretary of State for India. With modifications this system lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the consolidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

The Secretary of State.

Until the Act of 1919 came into force the Secretary of State and the Secretary of State in Council had, and exercised the fullest powers of superintendence, direction and control over the government and revenues of India, subject, of course, to a large measure of delegation. The Secretary of State was the statutory heir of the East India Company and the Board of Control, and it was as such that the generality of his powers were exercised.

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Provincial Legislatures and Ministers, while it greatly increased the elected element in, and the influence of the Central Legislature at Delhi. In the sphere so affected the power and responsibilities of Parliament and its representative, the Secretary of State, were correspondingly curtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired. No statutory change in the relations between the Secretary of State and the Central Government was made, but there was

a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature. The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention should be allowed to grow up that only in exceptional circumstances should the Secretary of State be called upon to intervene in matters of purely Indian interest where the Government and the Legislature of India are in agreement.

The Council of India

The Act of 1858 established besides the Secretary of State the body known as the Council of India which was associated with the Secretary of State in the exercise of many of his powers and, in particular, held control of the revenues of India and was charged with the conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India. Members of the Council originally appointed for life, now hold office for five years and receive a statutory salary of £1,200 with an additional subsistence allowance of £800 per annum for those domiciled in India. The Act of 1919 established their members at a minimum of 8 and a maximum of 12 one half of whom were required to have served or resided in India for at least ten years. Lord Morley opened the door of the Council to Indians and since 1917 the usual number of Indian Members has been three.

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and servants known in this case as the India Office. Its staff appointed by the Secretary of State in Council are recruited through the same source and serve on the same conditions as Civil Servants in corresponding positions in the other Government Offices in London. Until 1919, the whole cost was borne by Indian revenues except that the Home Government made certain grants and remissions in lieu of a direct contribution amounting to £50,000 a year. The Act of 1919 transferred the salary of the Secretary of State to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £115,000 was made to the total cost, which now stands at about £230,000. The basis of the contribution was that Home estimates should bear the outlay needed for the controlling and political functions of the India Office, Agency functions being still an Indian charge.

The Government of India Act, 1935.

Substantial changes in the machinery described above result from the Government of India Act, 1935. The Secretary of State will be no longer the final Authority upon whose superintendence, direction and control depend the Acts of the Government of India and all grants, payments and charges out of the revenues of India. The powers of the Executive in India will run in the name of the Governor General and the Governor, to whom they will flow direct from the Crown, and there will be no delegation powers through the Secretary of State. In so far as the Executive Governments in India will function on the advice of Ministers responsible

to the new Legislatures, the responsibility of the Secretary of State to Parliament, and consequently his control will be at an end. Where, however, the Governor General or the Governors are empowered to act in their discretion or on their individual judgment, they will be subject to direction by the Secretary of State who will remain in these matters the channel of their responsibility to Parliament. During the interim period between the 1st April, 1937, and the establishment of the Federation, the Secretary of State will have power to issue directions to the Governor General in Council and such directions, if they are with respect to the revenues of the Governor General in Council, will require the concurrence of his Advisers. The Council of India ceased to exist from the 1st April 1937. Some of its functions particularly in relation to Service matters will pass however to a body of Advisers with the same numerical limits during the interim period, reduced after Federation to a minimum of 3 and a maximum of 6. The position of the India Office as the Department serving the Secretary of State will remain, but the change brought about by the Act is to be marked by the transfer of the whole cost to a Parliamentary vote with a contribution from Indian revenues, based on the cost of Agency functions still performed by the Secretary of State for the Government of India. There will be no constitutional change in the position of the High Commissioner.

To some extent the working of the Home Government will be affected by the separation of Burma, involving as it does the separate exercise in respect of Burma of the functions of the Secretary of State. The Government of Burma Act provides also for the appointment of not more than three Advisers to the Secretary of State in relation to Burma whose status and functions will be analogous to those of the Advisers established by the Government of India Act. Provision is also made for payment from the revenues of Burma in respect of the expenses attributable to the performance on behalf of the Government of Burma of such functions as the Secretary of State may agree that his Department is to perform.

INDIA OFFICE

Secretary of State

The Indian States.

The area enclosed within the boundaries of India is 1,808,679 square miles, with a population of 32,837,778 of people—nearly one fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 712,508 square miles with a population of 81,310,845. The Indian States embrace the widest variety of country and jurisdiction. They vary in size from petty states like Lawa in Rajputana, with an area of 13 square miles, and the Simla Hill States which are little more than small holdings, to States like Hyderabad, as large as Italy with a population of over fourteen millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India Mysore, rich in agricultural wealth and Kashmir one of the most favoured spots on the face of the globe.

Relations with the Paramount Power

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise them. But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their possessions. To this general policy however there was for a brief period, an important departure. During the regime of Lord Dalhousie the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernment of its rulers. Then came the Mutiny. It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions, and while we will permit no aggression on our dominions or our rights to be attempted with impunity, we shall allow no encroachments on those of others. We shall respect the rights, dignity and honour of the Native Princes as our own, and we desire that they, as well as our own subjects should enjoy that prosperity and that social advancement which can only be secured by internal peace and good government. Since the issue of that proclamation there has been no encroachment on the area under Indian rule by the Government of India. On the contrary the movement has been in the opposite direction. In 1881 the State of Mysore, which had been so long under British administration that the traditions of Native rule were almost forgotten, was restored to the old Hindu ruling house. In 1911 the Maharajah of Benares, the great taluqdar of Oudh, was granted ruling powers over his extensive possessions. On many occasions the Government of India has had to intervene, to prevent gross misgovernment, or to carry on the

administration during a long minority, but always with the undeviating intention of restoring the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The inhabitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities; they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British India. Except in rare cases, applied to maritime states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states, the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes British subjects. Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer to the British every question of dispute with other states. Inasmuch as the Indian States have no use for a military establishment other than for police, or display, or for co-operation with the Imperial Government, their military forces, their equipment and armament are prescribed by the Paramount Power. Although old and unaltered treaties declare that the British Government will have no manner of concern with any of a Maharajah's dependents or servants, with respect to whom the Maharajah is absolute, logic and public opinion have endorsed the principle which Lord Canning set forth in his minute of 1860, that the Government of India is not precluded from stepping in to set right such serious abuses in a Native Government as may threaten any part of the country with anarchy or disturb

ance, nor from assuming temporary charge of a Native State when there shall be sufficient reason to do so." Of this necessity the Governor-General in Council is the sole judge subject to the control of Parliament. Where the law of British India confers jurisdiction over British subjects or other specified persons in foreign territory, that power is exercised by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where can tonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

Political Officers

The powers of the British Government are exercised through Political Officers who, as a rule, reside in the states themselves. In the larger states the Government is represented

by a Resident, in groups of states by an Agent to the Governor General, assisted by local Residents or Political Agents. These Officers form the sole channel of communication between the Indian States and the Government of India and its Foreign Department, with the officials of British India and with other Indian States. They are expected to advise and assist the Ruling Chiefs in any administrative or other matters on which they may be consulted. Political Agents are similarly employed in the larger States under the Provincial Governments but in the petty states scattered over British India the duties of the Agent are usually entrusted to the Collector or Commissioner in whose district they lie. All questions relating to the Indian States are under the special supervision of the Supreme Government, and in the personal charge of the Governor General.

AIDES-DE-CAMP TO HIS MAJESTY.

His Majesty the King has approved the appointment of the following Indian Princes as Hon Aides de Camp to the King —

Hon Major Gen the Maharaja of Ratlam
Hon Col the Maharaja of Jodhpur
Hon Lt Col the Nawab of Palanpur
Hon Lt Col the Jam Sahib of Nawanagar

The following have been appointed Hon Aides de Camp to the King (extra) —

Hon Lt Gen the Maharaja of Bikaner
Hon Lt Gen the Maharaja of Patiala
Hon Major Gen Sir Umar Hayat Khan
Hon Major Gen the Maharaja of Jammu and Kashmir

These were all A D C s to King Edward VIII and have been reappointed collectively

HYDERABAD.

The Nizam exercises full sovereignty within his dominions grants titles and has the power of life and death over his subjects. Before 1919, the Government consisted of a Prime Minister responsible to the Nizam with Assistant Minister but an Executive Council was established which now consists of seven members. A Legislative Council consisting of 20 members of whom 12 are official, 6 non official, and 2 extraordinary, is responsible for making laws. The administration is carried on by a regular system of departments on lines similar to those followed in British India. The State is divided into two divisions—Telangana and Mahratwara—15 districts and 153 Talukas. Local Boards are constituted in each District and Talukas. The State maintains its own currency which consists of gold and silver coins and a large note issue. The rupee, known as the Osmania Sica, exchanges with the British Indian rupee at an average ratio of 116 10 8 to 100. There is a State postal Service and stamps for internal purposes. The Nizam maintains his own army consisting of 18,418 troops of all ranks of which 11,211 are Irregular and 7,207 are Regular troops, which includes 2 battalions for Imperial Service 1,052 strong.

Finance—Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 8½ crores which is approximately the same as that of the Central Provinces and Behar and Orissa and double that of any other State. After many vicissitudes, its finances are at present in a prosperous

condition and it enjoys a large annual surplus of revenue from which a reserve of 9½ crores has been built up. This is being used partly as a Sinking Fund for the redemption of debt and partly for the development of the resources of the State. The Budget estimates for the present year show a revenue of 873 90 lakhs under service heads and an expenditure of 857 44 lakhs inclusive of large sums set aside for development, famine insurance and debt redemption. The capital expenditure programme provides for an expenditure of 72 43 lakhs which includes 12 78 lakhs for completion of large irrigation projects and 43 08 lakhs for open line works and road motor transport. The year opened with a cash balance of 292 07 lakhs which is expected to be 267 12 lakhs by the end of the year. The Government loans stand at about 115 for long term issues.

Production and Industry—The principal industry of the State is agriculture, which maintains 67 per cent of the population. The common system of land tenure is ryotwari. About 55 per cent of the total area is directly administered by the State. The rest consists of private estates of His Exalted Highness the Nizam, which comprise about one tenth of the total area of the State, and the estates of the Jagirdars and Faigah nobles. The total land revenue is over 3 crores. The principal food crops are millet and rice, the staple money-crops are cotton, which is grown extensively on the black cotton soils, and oilseeds. Hyderabad is well known for its Gaorani cotton which is the

finest indigenous cotton in India. The total area under cotton exceeds $3\frac{1}{2}$ million acres. Hyderabad possesses the most southerly of the Indian coal mines and the whole of Southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singareni, which is not far from Bezawada junction on the Calcutta Madras line. The chief manufacturing industry is based on the cotton produced in the State. There are 4 large mills in existence and others are likely to be established, while about one third of the cloth worn in the Dominions is produced on local hand looms. There are about 391 ginning pressing decorticating factories in the cotton tracts and also a number of tanneries and flour mills (the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 419). The Shahabad Cement Co. which has been established at Shahabad on the Great Indian Peninsula Railway line, not far from Wadi, supplies the whole of Southern India with cement and has at present an annual output of 109,450 tons.

Taxation—Apart from the land revenue which as stated above, brings in about $\text{₹} 25$ crores, the main sources of taxation are excise and customs. The receipts from each are estimated for the present year at 180 lakhs and 95 lakhs respectively. After these come interest on investments (27 lakhs), railways (108 lakhs) and Berar rent (29 lakhs). The customs revenue is derived from an *ad valorem* duty of not more than 5 per cent on all imports and exports.

Communications—One hundred and thirty two miles of broad gauge line from Bombay to Madras traverse the State, also 30 miles of metre gauge line from Masulipatam to Marmagao. At Wadi, on this section, the broad gauge system of the Nizam's State Railway takes off and running east through Hyderabad City and Warangal reaches the Calcutta Madras line at Bezawada, a total length of 352 miles. From Karpipet, near Warangal on this line, a new link to Bellarshah strikes north thus providing the shortest route between Madras and Delhi. From Secunderabad the metre-gauge Godavari Valley railway runs north west for 386 miles to Mannad on the main line of the Great Indian Peninsula Railway to Calcutta. A metre-gauge line also runs south from Secunderabad through Mahbubnagar to the border and is now linked up with Dronachellam on the Madras and Southern Mahratta Railway. Branch lines exist from Purna to

Hingoli, Parbhani to Puri Vajjnath, Karipalli to Kothagudem and Vikharabad to Bidar which last was extended to Puri-Vajjnath. Thus with branch lines there are now 799 miles of broad-gauge and 621 of the metre-gauge in the State. The Barsi Light Railway owns a short extension from Kurdwadi on the Bombay Madras line to Latur in Osmanabad District. The Nizam's Guaranteed State Railway was worked by a company until April, 1930, when it was purchased by the Nizam's Government. The road system is being rapidly extended in accordance with a well-considered programme.

From June 1932 the Railway is running motor bus services in the city and suburbs of Hyderabad and on some district roads. At first the fleet consisted of 27 passenger vehicles operating a route mileage of 234 miles. New services have been opened from time to time and the present motor mileage operated is 1,274 miles with 92 passenger vehicles.

Education—The Osmania University Hyderabad which marks a new departure in Indian education, imparts instruction in all the faculties through the medium of Urdu, English being taught as a compulsory language. It has three first grade Colleges, a Medical College, an Engineering College and a Training College for teachers. The Nizam's College at Hyderabad (First Grade), is however, affiliated to the Madras University. In 1932-33 the total number of educational institutions were 4,542, the number of Primary schools in particular having been largely increased.

Executive Council

President His Excellency the Right Hon'ble Sir Akbar Hydari (Nawab Hydar Nawaz Jung Bahadur) P. C., Kt., B. A., LL. D., (with Railway Mines and Constitutional Affairs Portfolios).

Army and Medical Member Nawab Aqueel Jung Bahadur.

Public Works Member Raja Shamraj Rajwant Bahadur.

Political and Education Member Nawab Mithi Yar Jung Bahadur, M. A. (Oxon).

Finance Member Nawab Fakhr Yar Jung Bahadur.

Revenue and Police Member Mr. T. J. Tasker, C. I. E., O. B. F. I. C. S.

Judicial Member Nawab Mirza Yar Jung Bahadur.

British Resident—The Hon'ble Mr. D. G. Mackenzie, C. I. E.

MYSORE

The State of Mysore is surrounded on all sides by the Madras Presidency except on the north and the north west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south west by Coorg. It has two natural divisions each with a distinct character of its own—the hill country (or maldan) on the west and the wide spreading valleys and plains (the maldan) on the east. The State has an area of 129,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,557,302 of whom over 92 per cent are Hindus. Kannada is the language of the State.

History—The ancient history of the country is varied and interesting. Tradition connects the tableland of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historic times, the north-eastern portion of the country formed part of Asoka's Empire in the third century B. C. Mysore then came under the rule of the Andhra dynasty. From about the third to the eleventh century A. D., Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of

Chola dominion, but the Cholas were driven out early in the twelfth century by the Hoyasalas, an indigenous dynasty with its capital at Halebid. The Hoyasala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar Empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the dominant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth century, the real sovereignty passed into the hands of Hyder Ali and then his son, Tipu Sultan. In 1799, on the fall of Seringapatam the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wodeyar Bahadur III. Owing to the insurrections that broke out in some parts of the country the management was assumed by the British Government in 1831. In 1881, the State was restored to the dynasty in the person of Sri Chamarajendra Wodeyar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with the assistance of Mr (afterwards Sir) K. Seshadri Iyer, K.C.S.I., as Dewan, brought Mysore to a state of great prosperity. He died in 1894, at the early age of 31, and was succeeded by the present ruler His Highness Sri Krishnarajendra Wodeyar Bahadur, K.C.S.I., G.B.E., who was installed in 1902. In November 1913, the Instrument of Transfer was replaced by a Treaty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 10½ lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs.

Administration—The City of Mysore is the Capital of the State, but Bangalore is the Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by an Executive Council consisting of the Dewan and two Members of Council. The High Court consisting of the Chief Justice and three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State—the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time by similar orders of Government. Under the scheme of constitutional developments announced in October 1923, the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation, XVIII of 1923. The franchise has been extended and the disqualification of women on the ground of sex from exercising the right to vote and standing as candidates for election has been removed. The privilege of moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and

of interpellating Government. The Assembly is also to be consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for a special session of the Assembly to be summoned only for Government business.

The strength of the Legislative Council has been raised from 30 to 50, of whom 20 are official and 30 are non official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of resolutions on all matters of public administration is under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the ex officio President of both the Representative Assembly and the Legislative Council.

The Legislative Council has a Public Accounts Committee which examines the audit and appropriation reports and brings to the notice of the Council all deviations from the wishes of the Council as expressed in its Budget grant.

Standing Committees—With a view to enlarge the opportunities of non official representatives of the people to influence the everyday Administration of the State, three Standing Committees consisting of members of the Representative Assembly and the Legislative Council, have been formed, one in connection with Railway, Electric and P. W. Departments, the second in connection with Local Self Government and the Departments of Medicine, Sanitation and Public Health and the third in connection with Finance and Taxation.

State Troops—The combatant strength of the Military force at the end of 1934-35 was 1,481 of which 182 were in the Mysore Lancers, 126 in the Mysore Horse, and the remaining 873 in the Infantry. Besides, there is a Mechanical Transport Corps which consists of two lorries (six wheeler lorries) and 4 commercial lorries with the necessary staff. The total annual cost is about 16 lakhs of rupees. The cost of the Police Administration during 1934-35 was about 19 lakhs.

Agriculture—Nearly three fourths of the population are employed in agriculture and the general system of land tenure is ryotwari. The principal food crops are rice, paddy, millets, gram and sugarcane and the chief fibres are cotton and sun hemp. The Sericulture industry is the most important subsidiary industry practised by the agriculturists. As elsewhere in India the industry is passing through one of the gravest crises in the course of its history owing to the competition of cheap foreign silk. The area under mulberry during 1934-35 had shrunk to 39,000 acres. The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment. There are 7 Government Agricultural Farms at Hebbal, Babbur, Marthur Nagenahally, Hunsur, Mandya and the coffee experimental Station at Bale honnur. A live stock section has been organised which has been taking necessary steps for the improvement of live stock. A cattle breeding

station has been established at Parvatharayana, near Ajjampur in the Kadur District, with a substation at Basur. A Serum Institute has been opened at Bangalore for the manufacture of serum and virus for inoculation against rinderpest and other contagious diseases. There are 64 Veterinary Dispensaries and Hospitals in the State under the control of the Civil Veterinary Department.

Industries and Commerce—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State. Its main functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experimental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commercial matters. The department has under its control the following demonstration factories—the Government Soap Factory, Government Porcelain Factory, Government Silk Weaving Factory and the Central Industrial Workshop. The Department has a well equipped Government Industrial and Testing Laboratory with a section devoted to the manufacture of pharmaceutical drugs and preparations. The Well Boring Section which is engaged in the drilling of boreholes for meeting the requirements of drinking water in the rural areas is now under the control of the Bureau of Sanitary Engineering Department of Public Health. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Sericulture in charge of a Superintendent subject to the general control of the Director of

Industries and Commerce. Arrangements have been made for the supply of disease free seed and a central and five taluk popular schools have been doing good work.

With a view to demonstrate and impart instructions in the utilisation of the high grade silk produced in the State Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore. The Sandalwood Oil Factory started on an experimental basis is now working on a commercial scale. A factory is working at Mysore. A large plant at a cost of more than 170 lakhs of rupees has been constructed at Bhadravathi for purposes of manufacturing charcoal pig iron distilling wood alcohol, and developing subsidiary industries. A new Pipe Foundry was opened there for the manufacture of pipes which are in great demand in several towns in India. The installation of a steel plant is nearing completion and power lines have been already laid for supplying electric energy to Bhadravathi from Mysore. The Works are on the borders of an extensive forest area and practically at the foot of the hills containing rich deposits of iron, manganese and bauxite and are not far from the Gersoppa Water Fall estimated to be capable of producing 100,000 horse-power of electric energy. A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Finances—The actual total receipts and disbursements charged to Revenue for the past five years together with the revised budget estimate for 1934-35 and budget for 1935-36 were as below—

Year	Receipts	Disbursements	Surplus	Deficits
	Rs	Rs	Rs	Rs
1930-31	3 32 3, 293	3 94,29 342		61 94 049
1931-32	3 37 47,182	3 56 03 763		18 56 581
1932-33	3 38 27 524	3 56 15 671		17 88 148
1933-34	3 42 87 244	3 70 92 917		22 21 631
1934-35 (Revised)	3 65 81 000	3 79 05 000		5 62 000
1935-36 (Budget)	3 77,14 000	3 81 92 000	82 000	

Hydro-Electric and Irrigation Works—The river Cauvery in its course through the State possesses a natural fall of about 380 feet near the island of Sivasa mudram and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H. P. for supplying power mainly to the Kolar Gold Mining Companies and incidentally for lighting the cities of Mysore and Bangalore. In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the genera-

tion of additional power to meet the growing demands the Krishnaraja-sagara Reservoir called after the name of the present Maharaja was constructed. The storage from the reservoir besides enabling the generation of electric power up to 46,000 H. P. will also bring under irrigation about 1,20,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927 and the main canal is named the 'Irwin Canal' after Lord Irwin the then Viceroy. An area of about 9 thousand acres under this Canal

has been brought under sugarcane cultivation and a Sugar Factory with a crushing capacity of about 1 400 tons of cane per day has been established nearby at Mandya. An up to date Distillery has been erected as an adjunct to the Sugar Factory. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift irrigation.

Education—A separate University for Mysore was established on the 1st July 1916. It is of the teaching and residential type composed of the Central and Engineering Colleges at Bangalore and the Medical Maharaja's and Maharani's Colleges at Mysore and three Intermediate Colleges with headquarters at Mysore. The colleges are efficiently equipped and organised and there is a training college for men located at Mysore. The Maharani's College at Mysore is a College for Women.

There are 38 High Schools of which 6 are for girls, 325 Middle Schools of which 33 are for girls. Provision has been made for teaching several vocational subjects in general schools with a view to giving a bias towards the vocations and in order to enable the pupils to take to such vocations after their High School life. There are 12 Training Institutions for training teachers

in Middle and Primary Schools, 3 of them are for women. The control over Primary Education has been made over to the Local Bodies under the Elementary Educational Regulation of 1930, and the Local Bodies are responsible for making due provision for extension of Primary Education in accordance with a definite programme spread over 10 years. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There were altogether 7,692 schools on 31st March 1934 with a strength of 3,11,957 pupils. This gives one school to every 3·8 square miles of the area, and to every 835 persons of the population. The total expenditure on Education was Rs 69,24,529 yielding an average of Rs 1·13 per head of population.

Dewan—Amin-ul Mulk Sir Mirza M Ismail
K O I E, O B E

Members of the Executive Council—Raja mantrapravina S P Rajagopalachari, B A, B L, First Member of Council, and Rajamantrapravina N Madhava Rao, B A, B L, Second Member of Council.

Resident in Mysore and Chief Commissioner of Coorg—The Hon Lieut Col C T C Plowden,
O I E

BARODA.

The State of Baroda is situated partly in Gujarat and partly in Kathiawar. It is divided into four district blocks: (1) the southern district of Navsari near the mouth of the Tapi river, and mostly surrounded by British territory, (2) central district north of the Narbada, in which lies Baroda, the capital city, (3) to the north of Ahmedabad, the district of Mehsana, and (4) to the west, in the peninsula of Kathiawar the district of Amreli, formed of scattered tracts of land. The area of the State is 8,164 square miles; the population is 2,443,007 of whom over four fifths are Hindus.

History—The history of the Baroda State as such dates from the break up of the Mughal Empire. The first Maratha invasion of Gujarat took place in 1705. In later expeditions Pilaji Gaekwar, who may be considered as the founder of the ruling family, greatly distinguished himself. Songhad was the headquarters till d. 766. After 1723 Pilaji regularly levied tribute in Gujarat. His son Damaji finally captured Baroda in 1734, since then it has always been in the hands of the Gaikwars, but Mughal authority in Gujarat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa. In spite of the fact that Damaji was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Fattessing Rao, Mannaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao. A period of political instability ensued which was ended in 1802 by the help of the Bombay Government, who established the authority of Anand Rao at Baroda. By a treaty of 1805 between the British Government and Baroda it was arranged

inter alia that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged. Baroda was a staunch ally of the British during the wars with Bajji Rao Peshwa the Pandari hordes and Holkar. But from 1820 to 1841, when Sayaji Rao II was Gaikwar, differences arose between the two Governments which were settled by Sir James Carnac Governor of Bombay, in 1841. Ganpat Rao succeeded Sayaji Rao II in 1847. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor Khande Rao, who ascended the gadi in 1856 introduced many reforms. He stood by the British in the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for notorious misconduct and 'gross misgovernment, but the suggestion that he had instigated the attempt to poison Col Phayre, the Resident, was not proved. Sayaji Rao III, a boy of 13 years of age, who was descended from a distant branch of the family was adopted as heir of Khande Rao in 1875 and is the present Maharaja. He was invested with full powers in 1881.

Administration—An executive council consisting of the principal officers of the State carries on the administration, subject to the control of the Maharaja, who is assisted by a Dewan and other officers. A number of departments have been formed, which are presided over by officials corresponding to those in British India. The State is divided into *Prants* each of which is sub divided into *Mahals* and *Peta Mahals* of which there are in all 42. Attempts have for some years been made to restore village autonomy, and village panchayats have been formed which form part of a scheme for local self government. There is a Legislative De-

partment, under a Legal Remembrancer, which is responsible for making laws. There is also a Legislative Council, consisting of nominated and elected members. A High Court at Baroda possesses jurisdiction over the whole of the State and hears all final appeals. From the decisions of the High Court appeals lie in certain cases, to the Maharaja who decides them on the advice of the Huzur Nyaya Sabha. The State Army consists of 5,086 Regular forces and 3,806 Irregular forces.

Finance—In 1935-36, the total receipts of the State were Rs 2,80,46,000 and the disbursements Rs 2,17,39,000. The principal Revenue heads were—Land Revenue, Rs 1,38,39,000, Abkari, Rs 24,78,000, Opium Rs 3,08,000, Railways, Rs 17,79,000, Interest, Rs 17,36,000, Tribute from other States, Rs 5,23,000. British Currency was introduced in 1901.

Production and Industry—Agriculture and pasture support 63 per cent of the people. The principal crops are rice, wheat, gram, castor oil, rapeseed, poppy, cotton, san hemp, tobacco, sugarcane, maize and garden crops. The greater part of the State is held on *ryotwari* tenure. The State contains few minerals except sand and stone which is quarried at Songr, and a variety of other stones which are little worked. There are 118 industrial or commercial concerns in the State registered under the State Companies' Act. There are four Agricultural Banks and 1,111 Co-operative Societies in the Baroda State.

Communications—The B B & C I Railway crosses part of the Navsari and Baroda *prants* and the Rajputana Malwa Railway passes through the Mehsana *prant*. A system of branch lines has

been built by the Baroda Durbar in all the four *prants* in addition to which the Tapti Valley Railway and the Baroda Godhra Chord line (B & C I) pass through the State. The Railways owned by the State are about 706.70 miles in length. The total mileage of metalled and fair weather roads in the State is 532 and 932 respectively.

Education—The Education Department controls 2,534 institutions of different kinds in 109 of which English is taught. The Baroda College is affiliated to the Bombay University. There are a number of high schools, technical schools, and schools for special classes, such as the jungle tribes and unclean castes. The State is 'in a way pledged to the policy of free and compulsory primary education'. It maintains a system of rural and travelling libraries. Eighteen per cent of the population is returned in the census as literate. Total expense on Education is Rs 37.48 lakhs.

Capital City—Baroda City with the cantonment has a population of 112,860. It contains a public park, a number of fine public buildings, palaces and offices and it is crowded with Hindu temples. The Cantonment is to the north west of the city and is garrisoned by an infantry battalion of the Indian Army.

Ruler—His Highness Farzandi I Khasi Dowlat I Englishia, Maharaja Sir Sayaji Rao III Gaekwar, Sena Khas Khel, Samsher Bahadur, GCSI, GCIE, LLD, Maharaja of Baroda.

Resident—Lieut Col J I R Weir, CIE

Dewan—Sir V T Krishnamachari, KCSI

BALUCHISTAN AGENCY

In this Agency lies the State of Kalat with its feudatory State of Las Bela.

Kalat is bounded on the North by the Chaghal district, on the East by Sindh and the Marri Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The Kalat State unlike the other Indian States, is a confederacy of partially independent chiefs whose head is the Khan of Kalat. The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Mekran and Kharan. The inhabitants are, for the most part Muhammadans of the Sunni sect. The area is 73,278 square miles and the population 3,42,101 (1931).

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir Azam at present an Officer of the Imperial service. The Governor General's Agent in Baluchistan conducts the relations between the Government of India and the Khan, and exercises general political supervision over the State through the Political Agent in Kalat. The revenue of the State is about Rs 14.5 lakhs, out of which the Khan retains a civil list of Rs 3,00,000 per annum. The present Khan is His Highness Beglar Begi Lieut. Sir Mir Ahmad Yar Khan, GCSI, was born in 1904.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Puruli river. Area 7,132 square miles, population 63,008 (1931) chiefly Sunni Muhammadans. The estimated average revenue is about Rs 3.7 lakhs. The ruling chief of Las Bela known as the Jam is Mir Ghulam Muhammad Khan, CIE, who was born in 1895. The administrative control of the State is exercised by the Hon.ble Agent to the Governor General and Chief Commissioner in Baluchistan through the Political Agent, Kalat. The Jam also employs a Wazir to assist him in the administration of the State.

RAJPUTANA AGENCY

Rajputana is the name of a great territorial circle with a total area of about 1,35,091 square miles, which includes 21 Indian States, one Chiefship, one estate, and the small British district of Ajmer Merwara. It is bounded on the west by Sind, on the north west by the Punjab State of Bahawalpur, on the north and north east by the Punjab on the east by the United Provinces and Gwalior, while the southern boundary runs across the central region of India in an irregular zigzag line. Of the Indian States, Chiefship and estate 19 are Rajput, 2 (Bharatpur and Dholpur) are Jat, and two (Palanpur and Jonk) are Mahomedan. The chief administrative control of the British district is vested *ex officio* in the political officer, who holds the post of Resident for Rajputana for the supervision of the relations between the several Indian States of Rajputana and the Crown Department and has his headquarters at Mount Abu. For administrative purposes they are divided into the following groups—Bikaner and Sirohi in direct relations with the Resident for Rajputana; Eastern Rajputana States Agency 6 States (Bharatpur, Bundi, Dholpur, Jhalawar, Karauli and Kotah); Jaipur Residency 5 States (Alwar, Jaipur, Kishangarh, Jonk, Shahpura and Lawa) State; Mewar Residency and Southern Rajputana States Agency 4 States (Mewar, Dargapur, Banswara and Pratapgargh and the Kishalgargh Chiefship); Western Rajputana States Residency 4 States (Jodhpur, Jaisalmer, Palanpur and Danta).

The Aravalli Hills intersect the country almost from end to end. The tract to the north west of the hills is as a whole sandy, ill watered and unproductive but improves gradually from being a more desert in the far west to comparatively fertile lands to the north east. To the south east on the Aravalli Hills are higher and more fertile regions which contain extensive hill ranges and which are traversed by considerable rivers.

Communications—The total length of railways in Rajputana is 3,259 miles of which about 1,000 are the property of the British Government. The B. B. & I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi. Of the Indian State railways the most important are the Jodhpur and Bikaner lines from Mirwar Junction to Hyderabad (Sind) and to Bikaner.

Inhabitants—Over 50 per cent. of the population are engaged in some form of agriculture, about 20 per cent. of the total population are maintained by the preparation and supply of material substances, personal and domestic service provides employment for about 5 per cent. and commerce for 2½ per cent. of the population. The principal language is Rajasthani. Among castes and tribes, the most numerous are the Brahmins, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balaus. The Rajputs are, of course, the aristocracy of the country, and as such hold the land to a very large extent either as receivers of rent or as cultivators. By reason of their position as integral families of pure descent

as a landed nobility and as the kinsmen of ruling chiefs, they are also the aristocracy of India, and their social prestige may be measured by observing that there is hardly a tribe or clan (as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Rajput stocks.

The population and area of the States and the British District of Ajmer Merwara are as follows:—

Name	Area in square miles	Population in 1931
<i>In direct political relations with the Resident in Rajputana—</i>		
Bikaner	23,317	936,218
Sirohi	2,000	221,060
<i>Mewar Residency and S. R. S. Agency—</i>		
Udaipur	12,923	1,569,910
Banswara	1,599	225,106
Dungarpur	1,460	227,544
Partabgarh	889	76,539
Kishalgargh (Chiefship)	3'8	35,564
<i>Jaipur Residency—</i>		
Alwar	3,158	749,751
Jaipur	15,590	2,631,775
Kishangarh	849	85,744
Jonk	2,540	317,360
Shahpura	405	54,233
Lawa (1 State)	20	2,790
<i>Western Rajputana States Residency—</i>		
Jodhpur	36,021	2,125,982
Jaisalmer	16,007	76,255

Kotah	5,725	685,804
<i>British District—</i>		
Ajmer Merwara	2,713	560,292

Udaipur State (also called Mewar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by His Highness the Maharana's palace, and to the north and west, houses extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island palaces. It is situated near the terminus of the Udaipur (Chittorgarh) Railway, 697 miles north of Bombay. His Highness Maharajahiraj

Maharana Sir Bhupal Singhji Bahadur, GCSI, KCI, who succeeded his father the late Maharaja. His Highness Maharajadhiraj Maharana Sir Fateh Singhji Bahadur, GCSI, GIC, GICo, in 1930, is the Premier Ruling Prince of Rajputana. The revenue and expenditure of the State are now about 80 lakhs. Its archaeological remains are numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. The area of the State is 1,940 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana. Banswara with Dungarpur originally formed a country known as Bagar which was from the beginning of the thirteenth century until about the year 1529 held by certain Rajput Rulers of the Ghelot or Sishodiya clan who claimed descent from an elder branch of the family now ruling in Udaipur. After the death of Maha Rajwaj Udal Singhji, the Ruler of Bagar about 1529, his territory was divided between his two sons, Jagmal Singhji and Prithvi Rajji, and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively. Where the town of Banswara now stands, there was a large Bhupal or colony under a powerful Bhil Chieftain named Wasni, who was defeated and slain by Maharawal Jagmal Singhji about 1530. The name of Banswara is by tradition said to be a corruption of Wasniwa, or the country of Wasni. Others assert that the word means the country (wara) of bamboo (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhji, Maharawal Biju Singhji anxious to get rid of the supremacy of the Mughals, offered to become a tributary to the British Government. In 1818 a definite treaty was made with his successor, Maharawal Ummed Singhji. Banswara has been described as the most beautiful portion of Rajputana; it looks at its best just after the rains. The principal rivers are the Mahan, the Anas, the Eran, the Chap and the Huran.

The present Ruler is His Highness Rajwaj Rai Maharajadhiraj Maharawalji Sahib Shree Su. Prithi Singhji Bahadur, KCI, who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji. His Highness was educated in the Mayo College and succeeded his father in 1914. His Highness is entitled to a salute of 15 guns. The State is ruled by His Highness the Maharawalji Sahib Bahadur with the assistance of the Diwan and the Home Minister and the Judicial and the Legislative Councils of which the Diwan is the President and the Hon. Apparent Maharaj Raj Kumar Sahib Shri Chandra Ver Singhji Sahib is Senior Member. The revenue of the State is about 7 lakhs and the expenditure is about the same.

Diwan—Mr. Jitendra S. Mehta, B.A. LL.B.

Home Minister—Mr. Nand Lal Banerjee

Dungarpur State with Banswara, formerly comprised the country called the Bagar. It was invaded by the Marathas in 1818.

As in other States inhabited by hill tribes, it became necessary at an early period of British supremacy to employ a military force to coerce the Bhils. The State represents the *Gad* of the eldest branch of the Sisodias and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jalor, fled to Bagar and killed Chowasimal, Chief of Baroda, and founded the State of Dungarpur. The present Chakravarti His Highness Rajwaj Maharajadhiraj Maharawal Shri Sir Lakshman Singhji Bahadur, KCI, born on 7th March 1908, succeeded on 15th November 1918 and assumed charge of the administration on the 16th February 1928. No railway line crosses the territory, the nearest railway station, Udaipur, being 65 miles distant and laded on Ahmedabad side being about 70 miles distant. Revenue about 8 lakhs.

Partabgarh State, also called the Kanthal, was founded in the sixteenth century by a descendant of Rama Mokul of Mewar. The town of Partabgarh was founded in 1698 by Partab Singh. In the time of Jaswant Singh (1775-1844), the country was overrun by the Marathas, and the Maharawat only saved his State by agreeing to pay Holkar a tribute of *Salun Shahs* Rs. 72,700 (which then being coined in the State Mint was legal tender throughout the surrounding Native States), in lieu of Rs. 1,000 formerly paid to Delhi. The first connection of the State with the British Government was formed in 1804, but the treaty then entered into was subsequently cancelled by Lord Cornwallis and a fresh treaty by which the State was taken under protection was made in 1818. The tribute to Holkars paid through the British Government and in 1904 was converted to Rs. 36,150 British currency. The present ruler is His Highness Maharawat Ram Singhji Bahadur who was born in 1903 and succeeded in 1929. The State is governed by the Maharawat with the help of the Dewan, and in judicial matters of a Committee of members styled the Raj Sabha or State Council. Revenue about 5½ lakhs, expenditure nearly 5½ lakhs. The financial administration is under the direct supervision of the State.

Jodhpur State is the largest in Rajputana with an area of 36,021 square miles and a population of 2.4 millions, of which 83 per cent are Hindus, 8 per cent Muslims and the rest Jains and Animists. The greater part of the country is arid and region. It improves gradually from a more desert to comparatively fertile land as it proceeds from the West to the East. The rainfall is scanty and uncertain. There are no perennial rivers and the supply of sub-soil water is very limited. The only important river is Jami.

The Maharaja of Jodhpur is the head of the Rathor Clan of Rajputs and claims descent from Rama, the deified King of Ayodhya. The earliest known King of the Clan named Abhimanyu lived in the fifth century from which time their history is increasingly clear. After the breaking up of their Kingdom at Kanauj they founded this State about 1212, and the foundations of the Jodhpur City were laid by Rao Jodha in 1459. He abolished the tax

levied by Hussain Shah of Jaunpur from Hindu pilgrims at Gaya. His descendant was the famous Rao Maldeva, the most powerful ruler of his time having an army of 80,000 Rajputs, the Emperor Humayun when expelled by Sher Shah in 1542 A D had sought refuge with him. Raja Sur Singh son of Raja Udal Singh, in recognition of his deeds of valour was created a Sawai Raja with a mansab of 5,000 Zat and 3,300 Sowars by the Emperor Akbar.

The administration is carried on with the aid of a State Council composed of His Highness the Maharaja Sahib Bahadur as President, Lt Colonel Sir Donald M Field, C I E, I A, Chief Minister, Thakur Madho Singhji, Home Minister, The Honble Khan Bahadur Nawab Chowdhri Muhammad Din Ravnuc Minister, Mr L S Edgar I S F, P W Minister and Rai Bahadur Lal Kanwar Sun, M A, Bar-at-Law, Judicial Minister. There is also an Advisory Committee representing the great body of Sardars who hold as much as five-sixths of the total area, to aid the administration with opinion on matters affecting general customs and usage in the country.

The revenue of the State during the year 1933-34 was Rs 1,49,14,005 and the expenditure Rs 1,10,60,990. The Jodhpur Railway extending from Hyderabad (Sind) to Luni Junction and Marwar Junction to Kuchaman Road with its branches on all sides in the territories of the state is the principal railway while the B B & C I Railway runs across a portion of the south eastern border. The famous marble quarries of Makrana as well as the Salt Lake at Sambhar are situated in Jodhpur territory.

Jaisalmer State is one of the largest States in Rajputana and covers an area of 16,062 square miles. The Rulers of Jaisalmer belong to the Jadon clan and are the direct descendants of Sri Krishna. Jaisalmer City was founded in 1156, and the State entered into an alliance of perpetual friendship with the British Government in 1818. In 1844 after the British conquest of Sind the forts of Shahgarh, Garsia and Ghotaru which had formerly belonged to Jaisalmer were restored to the State. The population according to the census of 1931 is 67,652. The present Ruling Prince is His Highness Maharaja Dhiraj Raj Rajeshwar Maharawalji Sir Jawahir Singhji Sahab Bahadur, Yadukul, Chandrabhal Rukan ud Dowla, Muzaffer Jang Bijalmand, K C S I. Revenue about four Lakhs.

Sirohi State is much broken up by hills of which the main feature is Mount Abu, 5,650 feet. The Chiefs of Sirohi are Deora Rajputs, a branch of the famous Chauhan clan which furnished the last Hindu kings of Delhi. The present capital of Sirohi was built in 1425. The city suffered in the eighteenth century from the wars with Jodhpur and the depredations of wild Mina tribes. Jodhpur claimed suzerainty over Sirohi but this was disallowed and British protection was granted in 1823. The present ruler is His Highness Maharajadhiraj Maharao Shri Sir Sarup Ram Singh Bahadur, G C I E, K C S I. The State is ruled by the Maharao with the assistance of Ministers and other officials. Revenue about 10½ lakhs.

Jaipur is the fourth largest State in Rajputana. It consists for the most part of level and open country. It was known to the ancients as Matsya Desh, and was the kingdom of the King Virata mentioned in the Mahabharata, in whose court, the five Pandava brothers during their last period of exile resided. Barait in the Jaipur State has been identified.

The Maharaja of Jaipur is the head of the Kuchawa clan of Rajputs, which claims descent from Kush, son of Rama, King of Ayodhya, the famous hero of the famous epic poem, the Ramayana. This dynasty in Eastern Rajputana dates as far back as ninth century A D. Dulha Rai, one of its most early rulers, made Amber the capital of the State in 1037 A D. About the end of 12th century one of the rulers, Pajun at the head of the army of Prithvi Raj, Emperor of Delhi, defeated Shahabuddin Ghori in the Khyber Pass and pursued him as far as Ghazni. Prithvi Raj had given his sister in marriage to him.

His Highness the present Maharaja Sawai Man Singh II Bahadur was born on 21st August 1911. He was adopted by His late Highness on 24th March 1921. He is a scion of the Rajawat House of Isarda, and ascended the gaddi on the 7th September 1922, and was married to the sister of the present Maharaja of Jodhpur on the 30th January 1924, from whom he has a daughter and a son and heir (b 22nd October 1931). His second marriage with the daughter of his late Highness Maharaja Shri Sumer Singhji Bahadur of Jodhpur was celebrated on the 24th April 1932, from whom he has two sons, the first born in England on the 5th May 1933 and the second born on the 10th December 1935.

His Highness the Maharaja Sahib Bahadur was invested with full powers on 14th March, 1931. His Highness was appointed Honorary Lieutenant in the Indian Army on the 25th April, 1931 and was promoted to the rank of Honorary Captain on the 1st January, 1934. In 1933, His Highness took his Polo Team to England, where it achieved exceptional success, setting up a record by winning all open tournaments. His Highness again visited England in 1935 sailing from Bombay on the 9th May and returning to Jaipur on the 6th September. While in England His Highness was invested by His Majesty the King Emperor with the insignia of G C I E which distinction was conferred on him on the 3rd June 1935. A Chief Court of Judicature was established in 1921. The army consists of Cavalry, Infantry, Transport and Artillery. The normal revenue is about one crore and twenty five lakhs.

According to the Census of 1931 the population of the State is 26,31,775. In area it is 16,682 square miles.

Kishanghar State is in the centre of Rajputana and consists practically of two narrow strips of land separated from each other, with an area of 858 square miles (population 85,744), the northern mostly sandy, the southern generally flat and fertile. The Ruling Princes of Kishanghar belong to the Rathor clan of Rajputs and are descended from Maharaja Kishan Singh (second son of Maharaja Udal Singh of Jodhpur) who founded the town of Kishanghar in 1611. The present ruler is His Highness Umdae Rajhaji.

Baland Makan Maharajadhiraj Dikshit Yagnarain Singh Bahadur He was born on the 26th January, 1896, and was educated at the Mayo College, Ajmer, where he passed the Diploma Examination He was married to the sister of Raja Bahadur Maksudangarh in May, 1915 He went to England and travelled on the Continent with His late Highness in 1921 On the demise of His late Highness on 25th September 1926, he succeeded to the Gadi on the 24th November, 1926 He administers the State with the help of a Council Revenue about 7 5 lakhs and expenditure 6 5 lakhs

Lawa State, or Chief of Rajputana is a separate chieftship under the protection of the British Government and independent of any Native States It formerly belonged to Jaipur and then became part of the State of Tonk In 1807, the Nawab of Tonk murdered the Thakur's uncle and his followers, and Lawa was then raised to its present State The Thakurs of Lawa belonged to the Naruka sect of the Kachwaha Rajputs The present Thakur, Bansardeep Singh, was born on September 24, 1923 and succeeded to the chieftship on 31st December 1929 The chieftship is under minority Administration

Bundi State is a mountainous territory in the south east of Rajputana The Ruler of Bundi is the head of the Hara sect of the great clan of Chauhan Rajputs and the country occupied by this sect has for the last five or six centuries been known as Haraoti The State was founded in the early part of the thirteenth century and constant feuds with Mewar and Malwa followed It threw in its lot with the Mahomedan emperors in the sixteenth century In later times it was constantly ravaged by the Mahrattas and Pindaries and came under British protection in 1815 The present ruler of the State is His Highness Maharaja Raja Shri Ishwari Singhji Saheb Bahadur He was born on 8th March 1893 and succeeded to the Gadi on 8th August 1927 His Highness is entitled to a salute of 17 guns His apparent Maharaja Kumar Shri Bagadur Singhji Revenue about 13 lakhs Hali and 34 lakhs Kaldar

Tonk State—Partly in Rajputana and partly in central India consists of six Parganas separated from one another The ruling family belongs to the Balaraj clan of the Bunerwal Afghan tribe The founder of the State was Nawab Muhammad Amir Khan Bahadur, General of Holkar's Army from 1798-1806 Holkar bestowed grants of land on him in Rajputana and Central India and the land so granted to him was consolidated into the present State The present Ruler of the State is His Highness Saad ul Daula, Wazir ul Mulk Nawab Hafiz Sir Muhammad Saad ul Ali Khan Bahadur Saadat ul Jung, C.I.E. who succeeded the Mahomed in 1930 The administration is conducted by the Nawab in consultation with the Council of four members, viz. (1) Lt Col G.W. Anderson (1) Vice President State Council and Finance Member, (2) Khan Bahadur Saad Muhammad Abdul Tawwab Khan, Home Member (3) Khan Bahadur Sheikh Rahim Baksh, C.B.E., Judicial Member (4) Sheikh M. Mohd. Ghulam Bahu uddin Revenue Member

Revenue Rs 21,68,108 Expenditure 20 34 175

Secretary —M Hamid Husain, B.A.

Shahpura State—The ruling family belongs to the Seesodia clan of Rajputs The State came into existence about 1829 when the Parganah of Phulla was granted by the Mughal Emperor Shah-I Jehan to Maharaj Surjan Singh, son of Maharaj Surajmal, the second son of Maharana Amar Singh of Udaipur Later on Raja Ran Singhji received the parganah of Kachhola from the Maharana of Udaipur and was recognised as a great noble of the Mewar State

The present Ruler is Rajadhiraj Sri Umair Singhji Bahadur The State enjoys permanent honour of nine guns salute

Bharatpur State—Consists largely of an immense alluvial plain, about 2,000 Sq miles in size watered by the Banganga and other monsoon rivers

The present ruling family of Bharatpur are Jats, of the Sinsinwar clan who trace their pedigree to the eleventh century The family derives its name from its old village Sinsini Bharatpur was the first State in Rajputana that made alliance with the British Government in 1803 It helped Lord Lake with 5,000 horses in his conquest of Agra and the battle of Laswari wherein the Maratha power was entirely broken and received 5 districts as reward for the service In 1804, however, Bharatpur sided with Jaswant Rao Holkar against the British Government which resulted in a war Peace was established in 1805 under a treaty of alliance and it continues in force The Gadi being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Sahib Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir to the Throne came into his own Bharatpur also rendered valuable service to the British Government during the Mutiny During the Great War the Bharatpur Durbars gave valuable help to the Imperial Government The Bharatpur Imperial Service Infantry served in East Africa and the Mulk Transport Corps served in all theatres of war except Africa The present Ruler is His Highness Shri Maharaja Brijendra Sawal Brijendra Singh Bahadur, Bahadur Jung, who was born in 1918 and succeeded his father Maharaja Sir Kishen Singh who died on the 27th of March 1929

Revenue Rs 34,03,000

Dholpur State—The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors The family took the name of Bamroli about the year 1367 They next migrated to Gwalior, where they took the part of the Rajputs in their struggles against the Emperor's Officers Eventually the Bamroli Jats settled near Gohad and in 1505 Surjan Deo assumed the title of Rana of Gohad After the overthrow of the Mahrattas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost

It six years later. In order to bar the encroachments of the Marhattas, a treaty was made with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties took Gwalior. In the treaty of the 13th October, 1781 between the British Government and Scindia it was stipulated that so long as the Maharaj Rana observes his treaty with the English Scindia should not interfere with his territories. The possession of Gohad however led to disputes between the British and Scindia, and in 1805 the Governor General transferred Gwalior and Gohad to Scindia and that of Dholpur, Bari Basri, Sepru and Rajakhara to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grand-son, the late Chief Maharaj Rana Nehal Singh, succeeded to the Gadi. Major His Highness Rana Dulai Singhdarul Mulk Sir Umar Rajhai Hind Maharajadhiraj Sri Sawai Maharaj Rana Sir Udai Bhan Singh Tokindri Bahadur Diler Jang Jai Deo KCSI, KCVO the present ruler, is the second son of Maharaj Rana Nehal Singh and was born on the 12th February 1891. On the death of his brother Maharaj Rana Ram Singh His Highness succeeded to the gadi on March 1911.

Karauli State—A State in Rajputana under the political control of the Resident for Rajputana lying between 26° and 27° north latitude and 76° 30' and 77° 30' east longitude. Area 1,242 square miles. The river Chambal forms the south-eastern boundary of the State dividing it from Gwalior (Scindia's Territory) on the south-west it is bounded by Jajpur and on the north-east by the States of Bharatpur, Jajpur and Dholpur. The State pays no tribute to Government. Languages spoken Hindi and Urdu.

Ruler—His Highness Maharajadhiraj Maharaja Sir Bhom Pal Deo Bahadur Yadukul Chaudhri Bhal KCSI. His apparent Maharaj Kumar Ganesha Pal Dewin—Raj Bhushan Pandit Shiv Kumar Chiturvedi B A M R A S.

Kotah State belongs to the Hara Section of the clan of Chauhan Rajputs and the early history of their house is up to the 17th century identical with that of the Bundi family of which they are an offshoot. Its existence as a separate State dates from 1625. The present Ruler is H. H. Lieut. Colonel Maharaj Sri Umid Singhji Bahadur GCSI GCIE GBE I.D. who was born in 1873 and invested with full powers in 1896. In administration he is assisted by two members Major General Ap Onkar Singh CIE and Rai Bahadur Sardar Khan Chaudhri a retired officer of the Punjab Civil Service. The most important event of his rule has been the restoration in the year 1899 of 15 out of the 17 districts which had been ceded in 1828 to form the principality of Thilwar State.

The total area of the State is 5,684 square miles and its average annual income in round figures amounts to 50 lakhs. The population of the State according to the census of 1931 is 6,85,804 souls.

Jhalawar State consists of two separate tracts in the south-east of Rajputana with an area of 813 square miles, yielding a revenue of about Rs. 8 lakhs. The ruling family belongs to the Jhala clan of Rajputs. The present Ruler, Lieut. His Highness Maharaj Rana Rajendra Singh Ji succeeded to the Gadi on 13th April 1929. He was born in 1900 and educated at the Mayo College Ajmer and Oxford University. The heir apparent Maharaj Kumar Harishchandra Singh Ji was born in London on 27th September 1921. Rai Bahadur Sirdarvaker Bhaya Shadi Lal Ji B A J L B, is the Dewan of the State.

Bikaner State in point of area is the seventh largest of all the Indian States and the second largest in Rajputana. The population of the State is 9,36,218 of whom 77 per cent are Hindus, 15 per cent Mahomedans, 4 per cent Sikhs and 3 per cent Jains. The capital city of Bikaner, with its population including the suburbs of 85,927, is the third city in Rajputana.

The northern portion of the State consists of level low land whilst the remainder is for the most part sandy and undulating. The average rainfall is about 12 inches. The water level over most of the State is from 150 feet to 300 feet deep.

The Ruling Family of Bikaner is of the Rathor clan of Rajputs and the State was founded in 1463 A.D. by Rao Bikaji, son of Rao Jodhaji. Ruler of Mirwar (Jodhpur) and after him both the Capital and the State are named Rai Singhji the first to receive the title of Rajah was one of Akbar's most distinguished Generals and it was during his reign that the present Fort of Bikaner was built in 1593. The title of Maharajji was conferred on Rajah Anup Singhji by the Mughal Emperor in 1687 in recognition of his distinguished services in the capture of Golconda. The conspicuous services of Maharajji Sardar Singhji who in the Indian Mutiny of 1857 personally led his troops to cooperate with the British forces in the field on the outbreak of the Mutiny was acknowledged by the Government of India by the transfer of the Sub Tehsil of Tib consisting of 41 villages from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler Lieutenant General His Highness Maharajadhiraj Rai Rajeshwar Narendra Shromim Maharajah Sri Ganzi Singhji Bahadur GCSI, GCIE, GBE, KCVO GBE, KCVO, ADC, LL.D., is the 21st of a long line of distinguished rulers renowned for their bravery and statesmanship. He was born on the 13th October 1880 and assumed full ruling powers in December 1898. He was awarded the first class Kaisar-i-Hind Medal for the active part he took in relieving the famine of 1899-1900 and soon after he went on active service to China in connection with the China War of 1900-1901 in command of his famous Ganga Risala and was mentioned in despatches and received the China Medal and CIE. The State Forces consist of the Camel Corps, known as Ganga Risala, whose sanctioned strength is 460 strong, an Infantry Battalion known as Sadul Light Infantry 619 strong a Regiment of Cavalry known

as Dungar Lancers 342 strong, including His Highness' Body Guard, a Battery of Artillery (4 guns, 275⁶) 236 strong, two sections of Motor Machine Guns 100 strong and State Band 35 strong. The total strength of the Bikaner Army thus, excluding the Camel Battery 20 strong armed with Machine Loading Guns and a Militia regiment 600 strong the raising of which is under consideration, totals 1798. At outbreak of the Great War in 1914, His Highness immediately placed the services of himself and his State forces and all the resources of the State at the disposal of His Imperial Majesty the King Emperor and the Ganga Rival reinforced by the Infantry Regiment which became incorporated in the Camel Corps in the field rendered very valuable services in Egypt and Palestine. An extra force was also raised for internal security. His Highness personally went on active service in August 1914 and enjoys the honour of having fought both in France and Egypt, and thus has the distinction of having fought for the British Crown on three Continents, viz. Asia, Europe and Africa. He was mentioned in despatches both in Egypt and France. His Highness also played a very conspicuous political part during the period of the War when he went twice to Europe as the Representative of the Princes of India, once in 1917 to attend the meetings of the Imperial War Cabinet and Conference and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty of Versailles. His Highness led the Indian Delegation to the 11th Assembly of the League of Nations at Geneva and represented the Indian States at the Imperial Conference in 1930. His Highness also attended the Indian Round Table Conference and the Federal Structure Sub-Committee both in 1930 and 1931.

His Highness enjoys a salute of 19 guns (personal) whilst the permanent local salute of the State is also 19. His Highness has also had the honour of being elected the first Chairman of the Chamber of Princes, in office which he filled most creditably for 5 years till 1935.

His Highness Mahararajji Sir Bhitarajji received the Imperial Order of the Crown of India on New Year's Day, 1935.

His Highness is assisted in the administration by a Prime Minister and an Executive Council. The post of Prime Minister is held by Mr V. N. Mehta, B.A., B.L., J.L., I.C.S. A Legislative Assembly was inaugurated in 1913 and consists of 45 Members, 20 out of whom are elected Members. It meets twice a year.

The revenues of the State are over a crore of rupees and the State owns a large railway system the total mileage being 79.83. The Government have also under contemplation in extension of the Bikaner State Railway from Sadulpur to Bawari and from Bikaner to Sind *via* Jaisalmer which will have the effect of connecting Delhi with Sind.

Hitherto there was practically no irrigation in the State the crops depending only on the scanty rainfall, but the construction and open-

ing in 1927 of the Gang Canal taken out from the Sutlej River has helped to protect about 62,000 acres of land in the northern part of the State against famine from which it has suffered in the past. 334,977 bighas of the Canal land have already been sold and further sale is going on. Even larger expectations are held out from the Bhakra Dam Project from which it is hoped that the remaining level lands in the north of the State will be irrigated.

A coal mine is worked at Palana, 14 miles south from the Capital.

Alwar State is a lully tract of land in the East of Rajputana. The Alwar House is the head in India of the Nurukh clan who are descendants of Kush, the eldest son of Shri Ram in the Solar dynasty. Raja Udai Karnaji is the common ancestor of both the Alwar and Jaipur Houses. Bar Singh the eldest son of Udai Karnaji of Amber renounced his right of succession in favour of his younger brother Nar Singh. Nar Singh's line founded Jaipur while in Bar Singh's line Mahaji Pratap Singh established the Alwar State. Before his death in 1791 Mahaji Pratap Singh secured possession of large territories. His success or sent a force to co-operate with Lord Lake in the War of 1803. An alliance of mutual friendship was concluded with the British Government in that year. Normal revenues about 38 lakhs. Alwar State stood first in recruiting in Rajputana at the time of the Great War. Owing to agrarian trouble in the State, His Highness was asked by the Government of India to reside outside the State for an indefinite period in 1933, and the State is now being governed by his Prime Minister. The capital Alwar is on the B. B. & C. I. Rly. 95 miles west of Delhi.

Palampur—Palampur is a first class State with an area of 1,763,89 square miles and a population of 2,64,179. The net revenue of the State calculated on the average of the last five years is about Rs. 11,25,000.

Tenant Colonel His Highness Zubeidul Mulik Dewan Mirakhani Nawab Shri Jai Lal Muhomed Khan Pithapur (C.I.E., K.C.V.O., A.D.C.), Nawab Sahib of Palampur rules the State. The Ruhn Family is of Afghan origin belonging to the Iohani Stock and had established their principality in Rajputana in the 14th century. The connection with the British may be said to have definitely begun from 1817 A.D. when Dewan Fitch Khan II entered into relations with the East India Company. A considerable trade in cloth, wheat, ghee, wool, hides, castor and rapeseeds, sugar and rice is carried on in the State. The capital city of Palampur is situated on the P. B. & C. I. Railway and is the junction station of the Palampur State Railway. Palampur is a very old settlement of which mention was made in the 8th century.

RAJPUTANA

The Honble the Resident in Rajputana—The Hon. Lt.-Col. Sir G. D. Ogilvie K.C.I.F., C.S.I.

WESTERN RAJPUTANA STATES

Resident—Major G. V. B. Gullan, C.I.E.

CENTRAL INDIA AGENCY

Central India Agency is the name given to the country occupied by the Indian States grouped together under the supervision of the Political Officer who is designated the Agent to the Governor General in Central India with headquarters at Indore. As constituted in 1921—that is, after the separation of the Gwalior Residency—it is an irregularly formed tract lying in two sections, the Eastern comprising Bundelkhand Agency between 22°-38' and 26°-19' North and 78°-10' and 83°-0' East and the Western consisting of the Bhopal and Malwa Agencies between 21°-22' and 24°-47' North and 74°-0' and 78°-50' East. The British districts of Jhansi and Saugor and the Gwalior State divide the Agency into two sections. The total area covered is 51,651 11 square miles and the population (1931) amounts to 6,635,737. The great majority of the people are Hindus. There are 28 Salute States of which the following 10 have direct treaty engagements with the British Government—Indore, Bhopal, Rewa, Orchha, Datia, Dhar, Dewas Senior Branch, Dewas Junior Branch, Samthar and Jaora. All of these are Hindu except Bhopal, Jaora and Baoni which are Muhammadan. Besides these there are 61 Minor States and Guaranteed Estates. Excluding the Indore and Rewa States and the Hirasur and Lalgarh the Estates are divided into following groups for administrative purposes—Bhopal Agency, 12 States and Estates (Principal States Bhopal, Dewas Senior Branch, Dewas Junior Branch), Bundelkhand Agency, 33 States and Estates (Principal States Orchha and Datia), Malwa Agency, 40 States and Estates (Principal States Dhar, Jaora and Ratlam). The Agency may roughly be divided into two natural divisions, Central India West comprising the former Plateau division with such hilly land as lies on this side and Central India East comprising the former low lying area and the Eastern hilly tracts. The hilly tracts lie along the ranges of the Vindhya and Satpuras. They consist of forest areas and agriculture is little practised there, the inhabitants being mostly members of the wild tribes. The territories of the different States are much intermingled and their political relations with the Government of India and each other are very varied.

The following is the size, population and revenue of the ten treaty States mentioned above—

Name	Area in square miles	Population	Revenue
			Lakhs Rs
Indore	9,902	13,25,089	124½
Bhopal	6,924	7,29,955	80
Rewa	13,000	15,87,445	60
Orchha	2,080	3,14,661	10
Datia	912	1,58,834	13½
Dhar	1,800	2,43,430	17½
Dewas, Senior Branch	449	83,321	6½
Dewas, Junior Branch	419	70,513	6½
Samthar	178	33,307	¾
Jaora	602	1,00,166	13

Gwalior—The house of Scindia traces its descent to a family of which one branch held the hereditary post of *patel* in a village near Satara. The head of the family received a patent of rank from Aurangzebe. The founder of the Gwalior House was Ranoji Scindia who held a military rank under the Peshwa Baji Rao. In 1726 the Peshwa granted deeds to Puar, Holkar and Scindia, empowering them to levy "Chauth and Sardesमुखी and retain half the amount for payment to their troops. In 1736 Ranoji Scindia accompanied Baji Rao to Delhi where he and Mulhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain which for the time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Dowlat Rao Scindia Gwalior played an important part in shaping the history of India. Despite the partial reverse which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's power remained unbroken. For the first time he was now recognized by the British as an independent sovereign and not as a vassal of the Peshwa.

In 1790 his power was firmly established in Delhi. While he was indulging in ambitious hopes he fell a prey to fever which ended his remarkable career on 12th February, 1794. Himself a military genius, Mahadji Scindia's armies reached the zenith of their glory under the disciplined training of the celebrated French adventurer—De Bolgne. Mahadji was succeeded by his grand nephew Daulat Rao, in whose service Perron, a Military Commander of great renown, played a leading part. The strength of Scindia's Army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Assaye, Asargarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputed possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigue and party spirit were rampant and the Army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpore and Pannihar.

Jankoji Rao was succeeded by Jijaji Rao whose adherence to the British cause during the dark days of Mutiny, when his own troops deserted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and in 1877 was made a Councillor of the Empire. Subsequently he received other titles and entered into treaties of mutual exchange of territories with the British Government. He died on the 20th June 1886 and was succeeded by his son Lieutenant General H. H. Maharaja Sir Madho Rao Scindia, Alijah Bahadur, G. C. V. O., G. C. S. I., G. B. E., A. D. C., to the King. He succeeded in 1886 and obtained powers in 1894. In 1901 he went to China during the war, he held the rank of honorary Lieutenant General of the British Army and the honorary degrees of LL.D., Cambridge, and D.C.L., Oxon. He was also a Donat of the Order of St. John.

of Jerusalem in England. He died in June 1925 and was succeeded by his son H. H. Jiwaji Rao Scindia. During His Highness's minority the administration of the State had been conducted by a Council of Regency.

The Ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

The State has an area of 26,367 Sq. miles and population 35,23,070 according to the Census of 1931. Its average rainfall is from 25 to 36 inches. The average revenue is Rs. 2,41,79,000 and average expenditure Rs. 2,06,50,000.

The State has a Police force of 13,154 and Indian State Forces Cavalry 1,560 Infantry and Artillery, besides Regular and Irregular troops.

There is a well equipped State workshop in Lashkar, the capital of the State, there are electric Press, electric Power House, Leather factory, Lannery and Pottery Works. There are some good cotton mills in Lashkar and Ujjain. The State has its own Light Railway and its own Postal system according to Postal Convention. The G. I. P. Railway traverses through a major portion of the State territories.

On November 2, 1936 His Highness was invested with full ruling powers by His Excellency the Viceroy. His Highness is a keen sportsman and within the short period of his administration has given evidence of his qualities as a ruler.

Indore—The founder of the House of the Holkar of Indore was Malhar Rao Holkar born in 1693. His soldierly qualities brought him to the front under the Peshwa who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Holkar who had been associated with her to carry the Military Administration and had in course of it distinguished himself in various battles. Tukoji was succeeded by Kashirao, who was supplanted by Yeshwant Rao, his step brother, a person of remarkable daring strategy as exhibited in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined arms of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the independence of Holkar State. During 1804-5 he had a protracted war with the British closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights. Yeshwant Rao showed signs of insanity from 1808 onwards and succumbed to that malady in 1811, when he was succeeded by his minor son Mulhar Rao II. During the Regency which followed the power of the State was weakened by various causes, the most important of which was the refractory conduct of the Military Commanders.

On the outbreak of the war between the English and the Peshwa in 1817, some of these Commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Peshwa, while the regent mother and her ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar Army which culminated in the latter's defeat. Holkar had to come to terms and to cede extensive territories and rights over the Rajput Princes to the British, but the Internal sovereignty remained unaffected. The Treaty of 1818 which embodied these provisions still regulates the relations between the British Government and the State.

Malhar Rao died a premature death in 1833. Then followed the weak administration of Hari Rao and his son. In 1844 Tukoji Rao II ascended the Throne but as he was a minor the administration was carried on by a Regency under Sir Robert Hamilton, the Resident as its Adviser. The prosperity of the State revived a great deal during this administration and the progress was maintained after the Maharaja assumed powers in 1852. It was interrupted by the outbreak of the Mutiny in 1857 in British India. This wave of disaffection did not leave some of the State troops untouched. The Maharaja with his adherents and the remaining troops remained however, staunch to the British and gave every possible assistance to the British authorities at Indore, Mhow and other places which was recognised by the British Government. The Maharaja died in 1886 after having effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. He was succeeded by Shivaji Rao who reigned for 16 years and will be specially remembered for his beneficent measures in matters of education, sanitation, medical relief and abolition of transit duties. Tukoji Rao III succeeded in 1903 while yet a minor. The Regency Administration was continued till 1911 and it effected a number of reforms in all the branches of administration. The policy of the Regency was maintained by the Maharaja. With his assumption of powers the State advanced in education in general, including female education, commerce and industrial developments, municipal franchise and other representative institutions. This prosperity was specially reflected in the Indore City the population of which rose by 40 per cent.

During the war of 1914 the State placed all its resources at the disposal of the British Government. Its troops took part in the various theatres of war and the contribution of the State towards the war and charitable funds in money was 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while the contribution from the Indore people amounted to over one crore. This assistance received the recognition of the British Government.

His Highness Maharaja Tukoji Rao III abdicated in favour of his son, the present Maharaja, Yeshwant Rao Holkar, was born on 6th September 1908. He received his education in England during 1920-23 and again at Christ Church College, Oxford, from 1926 till his return in 1929. He married a daughter of the Junior

Chief of Kagal (Kolhapur) in February 1924. His educational career at Oxford in England having come to an end, he returned to India arriving at Indore on the 12th November 1929 and received administrative training with Mr C U Wills CIE, ICS. He assumed full ruling powers on the 9th May 1930.

The area of the State is 9,902 square miles with a revenue of about one crore and thirty eight lakhs. According to the Census of 1931 the population of the State is about 1,325,000, showing an increase of 14.5 per cent. over the Census figures of 1921.

There are two first grade Colleges in the City one is maintained by the State and teaches up to M.A. and B.A., the other is established by the Canadian Mission and teaches up to M.A. in Philosophy. The State has six High Schools 1 Sanskrit College and 520 other educational and 76 medical institutions. An Institute of Plant Industry for the improvement of cotton is located at Indore. It has also 9 spinning and weaving mills.

The strength of the State Army is about 3,000. The State is traversed by the Holkar State Railway the principal station of which is Indore. The B & C I Railway and the U B Section of the G I P Railway. Besides the trunk roads there are 691 miles of roads constructed and maintained by the State. The reforms introduced recently are the establishment of State Savings Banks, a scheme of Life Insurance of State officials, establishment of the Indore Legislative Council (formerly known as the Indore Legislative Committee) consisting of 30 members excluding the President and the Vice President of whom 15 shall be elected and 15 nominated. Introduction of a scheme of Compulsory Primary Education in the City of Indore, measures for the expansion of education in the mofussil, a scheme for the formation of the Holkar State Executive Service, a scheme of water supply and main drainage in the Indore City, raising of the marriageable age of boys and girls to 15 years and 14 years respectively and the passing of the Indore Nuptial Act and the Marriage Expenses Controlling Act for controlling expenditure on funeral ceremonies and marriages.

The chief imports are cloth, machinery, sugar, salt and kerosene oil. The total imports in 1932-33 amounted to Rs. 1,84,24,171.

The chief exports are cotton cloth, tobacco and cereals. The total exports in 1932-33 amounted to Rs. 64,74,400 exclusive of the exported produce of the Canning and Pressing factories.

Cloth manufactured at the local mills is valued at over two crores and the local trade in wheat is estimated at one crore.

Cotton excise duty at 3½ per cent. *ad valorem* has been abolished from 1st May 1926 and an industrial tax is levied on the cotton mills from the same date.

His Highness Government have sanctioned the construction of an Aerodrome.

Bhopal—The principal Mahomedan State in Central India ranks next in importance to Hyderabad among the Mahomedan States of India. The ruling family was founded by Sudar Bost Mohammad Khan Durrani a Persian Afghan, who, after having served with distinc-

tion in the army of the Emperor Aurangzeb obtained the pargana of Berar in 1709. With the disintegration of the Moghal Empire, Bhopal became an independent State. In the early part of the 19th Century the Nawab successfully withstood the invasions of Sindia and Bhonsla and by the agreement of 1817 Bhopal undertook to assist the British with a contingent force and to co-operate against the Pindari bands. In 1818, a permanent treaty succeeded the agreement of 1817.

The present Ruler of the State, His Highness Sikander Sultan Niswah Itakhani Mulk, Mohamud Humdullah Khan Bihadar G.C.S.I., G.C.I.E., C.V.O., B.A., succeeded his mother, Her Highness Niswah Sultan Jahan Begum on her abdication in May 1926. He had previously actively participated in the administration of the State for nearly ten years as Chief Secretary and afterwards as Member for Finance and Law and Justice.

His Highness is assisted in the work of administration by an Executive Council consisting of the following five Members and 1 Secretary—

Ali Mirtabat, Motamadul Sultan, Rai Bihadur Raju Oudh Narain Basu, B.A., President and Member State Council.

Members State Council—Ali Mirtabat, Ratanul Qadir, Azim Uloom, Mufti Mohammad Anwarul Haq M.A., M.F., Ali Mirtabat Niswah Sir Masood Jung Bahadur Kt. D.D., D.Litt., B.A., B.L., A.L.W., Ali Mirtabat, Mushinul Mulk, Ali Qadir Kazi, Ali Haidar Abbasi, Ali Mirtabat, Ali Qadir, Mohammad Shauib Qureshi M.A., I.I.B., B.A., B.L., A.L.W.

Secretary—Mir Dabir, Dabirul Inshi, Kazi Wali Mohammad (Offg.).

The work of legislation with the right of discussing the Budget, moving resolutions and interpellations rests with a representative Legislative Council inaugurated in 1927. The riyatwari system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are extensive and valuable and the arable area which comprises more than two thirds of the total area consists mostly of good soil producing cotton, wheat, other cereals, sugar cane and tobacco. The State contains many remains of great archaeological interest including the famous Sanchi Topes which date from the 2nd Century B.C. and which were restored under the direction of Sir John Marshall. Sanchi Station on the G. I. P. main line to Delhi adjoins the Topes.

Among other troops the State maintains one full strength Infantry Battalion. The Capital Bhopal City is beautifully situated on the northern bank of an extensive lake, is the junction for the Bhopal Ujain Section of the Great Indian Peninsula Railway.

Rewa—Is the largest State in Central India. Agency with an area of 13,000 square miles and a population of 1,587,445 (1931). The Rulers are Rajput Rājputs descended from the famous Solanki clan which ruled over Gujarat from the 10th to 13th Century. During the mutiny the Durbar rendered meritorious services to the Crown for which various parganas which had been seized by Marathas were restored to the Maharaja. The present ruler is His Highness

Bandhvesh Maharaja Sir Gulab Singhji Bahadur, G C S I, who was born in 1903. His Highness was married in 1919 to the sister of the Maharaja of Jodhpur. Upon the death of his father, Lt Col Sir Venkat Raman Singhji Bahadur G C S I on 30th October 1918, His Highness Bandhvesh Maharaja Sir Gulab Singh Bahadur succeeded to the Gadi on 31st October as a minor. During the period of minority the State was administered by a Council of Regency with His Highness Maharaja Col Sujan Singh Bahadur K C S I K C V O, A D C of Rutlam as Regent. His Highness Maharaja Sir Gulab Singh Bahadur attained majority in 1922 and was invested with full ruling powers by His Excellency the Viceroy. The Maharaja exercises full sovereignty within his State and the administration is now carried on by him with the help of a State Council of which His Highness himself is president. His Highness is very much interested in all round progress of the State. He takes a keen interest in administration and development of agriculture and mineral resources. He has opened extensive tracts by construction of roads and bridges throughout the State. A State Bank—Bank of Baghelkhand has recently been instituted which has its branches all over the State. His Highness is a keen sportsman and the number of tigers bagged by him totals about 500. His Highness is got a son and heir named Sri Yuvraj Maharaj Kumar Martand Singhji born on 15th March 1923.

His Highness second marriage with the daughter of H H the Maharaja of Kishenganih was performed on the 18th February 1925.

Dhar—This State, in the Agency for Southern States in Central India takes its name from the old city of Dhar, long famous as the capital of the Pannar Rajputs, who ruled over Malwa from ninth to the thirteenth century and from whom the present Rulers of Dhar—Puar Marathas—claim descent. In the middle of the 18th century the Ruler of Dhar, Anand Rao was one of the leading chiefs of Central India sharing with Holkar and Scindia the rule of Malwa. The State came into treaty relations with the British Government in virtue of the treaty of 1819. Lt Colonel H H the Maharaja Sir Udaji Rao Puar Sahib Bahadur K C S I, K C V O K B E, died on 30th July 1926. There are 13 feudatories and 9 Bhumas of whom 13 hold a guarantee from the British Government. The population of the State according to the latest Census figure is 243,521 and the average Income and Expenditure are about 17 and 16 lakhs respectively.

The present Ruler His Highness the Maharaja Anand Rao Puar Sahib Bahadur being minor, the Government of State is carried on by a Council. Dewan Bahadur K Nadda is Dewan and President of the Council of Administration.

The famous and the ancient hill fort of Mandu the capital of several ancient and medieval Kingdoms, with its beautiful mausoleums, tombs and palaces and high hills and deep dales is situated in the State at a distance of 24 miles from the city of Dhar.

Jaora State—This State is the only treaty State in the Malwa Political Agency covering an area of about 601 square miles with a total population of 1,00,204, and has its head-

quarters at Jaora town. The Chiefs of Jaora claim descent from Abdul Majid Khan an Afghan of the Turuk Khel from Swat. The first Nawab was Abdul Ghafur Khan who obtained the State about the year 1808. The present Chief is Lieutenant Colonel His Highness Fakhud Daulah Nawab Sahib Muhammad Iftikhar Ali Khan Sahib Bahadur Sanulat Jung G C B E, K C I I, who was born in 1883. His Highness is an Honorary Lieutenant Colonel in the Indian Army.

In the administration of the State His Highness is assisted by a Council is under—

President—His Highness the Nawab Sahib Bahadur.

Vice President and Chief Minister—Khan Sahib Mumtazuddin Ahmed B A.

MEMBERS—

Finance Member—Birjis Qaidi Niwabziddi Mohammad Nasir Ali Khan Sahib, Muzappint.

Military Secretary—Barrack Sayer Major Niwabziddi Mohammad Mumtaz Ali Khan Sahib.

Private Secretary—Muntazim Bahadur Sahibzadi Mir Nisauddin Ahmed Sahib.

Secretary and Member—Mir Nisat Mohammad Khan M A L I B (Aly.).

Judicial Secretary and Judge (Chief Court)—Mir Azim Beg Chughtai B A LL B.

Senior Member Revenue Board—Viceint A Chief Court with a Chief Justice and two Puisne Judges has also been established.

The soil of the State is among the richest in Malwa being mainly of the best black variety bearing excellent crops of wheat, cotton and poppy. The average annual revenue is Rs. 12,00,000.

Rutlam—Is the premier Rajput State in the Malwa Agency. It covers an area of 871 square miles, including that of the Jagn of Khich in the Kushalgarh Cheshmah which pays an annual tribute to the Rutlam Darbar. The State was founded by Raja Ratan Singhji great grandson of Raja Uday Singh of Jodhpur in 1632. The Ruler of Rutlam is the religious head of the Rajputs of Malwa and important estate questions are referred to him for decision. The State enjoys full and final civil and criminal powers. The present Ruler of Rutlam is Major General His Highness Maharaja Sir Sajjan Singh G C I E, K C S I K C V O A D C to His Majesty the King Emperor who was born in 1880 and educated at Daly College Indore, received military training in Imperial Cadet Corps and invested with full powers in 1898. His Highness served in the war in France and Egypt from 1915 to 1918 was mentioned in despatches and received the Croix d'Officiers de Legion d'Honneur Salute 13 guns local 15 guns.

Dewan—Rai Bahadur Chotulal Verma, I S O.

Datia State—The rulers of this State in the Bundelkhand Agency, are Bundla Rajputs of the Orchha house. The territory was granted by the chief of Orchha to his son Bhagwan Rao in 1626, this was extended by conquest and by grants from the Delhi emperors. The present Ruler, Lieut Colonel His Highness Maharaja Lokendra Sir Govind Singh Ji Deo Bahadur, G C B E (1932), K O S I, 1918 who was born in 1886 and succeeded in 1907, married 1902, enjoys a salute of 15 guns. He placed all his resources and his personal

services at the disposal of the Imperial Government during the Great War and established a War Hospital at Darjeeling. He is a progressive Ruler and has created a Legislative Council and introduced many useful and important reforms in his State. He is a Vice President of St. John Ambulance Association, a patron of Red Cross Society and has recently offered to the Imperial City of Delhi the life size marble statue of Lord Reading, the late Viceroy. He has built a hospital in the city named after Mrs. Heale and to advance female education he has built a girls school named after Lady Willingdon. His Highness is a famous big game shot and has shot more than 183 tigers.

Orchha State—The Rulers of this State are Bundela Rajputs claiming to be the descendants of the Gaharwars of Benares. It was founded as an independent State in 1048 A.D. It is the premier Treaty State of Bundelkhand—the other Bundela Princes being the scions of Orchha House. It entered into relations with the British by the Treaty made in 1812 A.D. His Highness Maharaja Sir Pratap Singh GCSI, GCIE died in March 1930 and has been succeeded by his grand-on His Highness Sir Sai Mahendra Maharaja Sir Virendra Bahadur, KCSI, the present Ruler.

The ruler of the State has the hereditary titles of His Highness Saramad I Rajah of Bundelkhand Maharaja Mahendra Sawai Bahadur and enjoys a permanent salute of 15 guns. The State has a population of 3,15,000 and an area of 2,080 square miles. The capital is Tikamgarh 36 miles from Lalitpur station on the G. I. P. Ry. Orcha, the old capital has fallen into decay but is a place of interest on account of its magnificent buildings which were erected by Maharaja Bir Singh Dev I the most famous ruler of the State (1605-1627). The present ruler has introduced many reforms in the state and has brought the administration to an up to date standard.

His Highness is assisted in the work of administration by a cabinet consisting of the following—

- 1 His Highness the Sawai Mahendra Maharaja Bahadur *President*
- 2 Rao Raja Rai Bahadur Pandit Shyam Bahari Misra M.A., *Vice President*
- 3 Major Sajjan Singh *Chief Secretary*
- 4 Captain Chandra Sen *Finance Secretary*
- 5 Mr M. N. Zutshi B.A. *Home Secretary*
- 6 Pandit R. S. Shukla M.A. L.B., *Political & Judicial Secretary*

SIKKIM.

Sikkim is bounded on the north and north east by Tibet, on the south east by Bhutan, on the south by the British district of Darjeeling and on the west by Nepal. The population consists of Bhutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas which runs east and west forms the boundary between Sikkim and Tibet. The Singalila and Chola ranges, which run southwards from the main chain, separate Sikkim from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of Kinchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much loftier than that of Singalila, leaves the main chain at the Dongkya La.

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814 the British formed an alliance with the Raja of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British

and received Rs. 12,000 annually in lieu of it. The State was previously under the Government of Bengal but was brought under the direct supervision of the Government of India in 1906. The State is thinly populated the area being 2,818 square miles, and the population 109,651, chiefly Buddhists and Hindus. The most important crops are maize and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet. In the convention of 1890 provision was made for the opening of a trade mart but the results were disappointing, and the failure of the Tibetans to fulfil their obligations resulted in 1904 in the despatch of a mission to Lhasa, where a new convention was signed. Trade with the British has increased in recent years, and is now between 40 and 50 lakhs yearly. A number of good roads have been constructed in recent years. The present ruler, His Highness Maharajah Sir Tashi Namgyal, K.C.I.E., was born in 1893 and succeeded in 1914. His Highness was invested with full ruling powers on the 5th April 1918. The title of a C.I.E. was conferred upon the Maharaja on the 1st January 1918 and K.C.I.E. on 1st January 1923. The average revenue is Rs. 5,20,422.

Political Officer in Sikkim—F. Williamson

BHUTAN

Bhutan extends for a distance of approximately 190 miles east and west along the southern slopes of the central axis of the Himalayas adjacent to the northern border of Eastern Bengal and Assam. Its area is 18,000 square miles and its population, consisting of Buddhists and Hindus, has been estimated at 300,000. The country formerly belonged to a tribe called 'Lek-pa', but was wrested from them by some Tibetan soldiers about the middle of the seventeenth century. British relations with Bhutan commenced in 1772 when the Bhutias invaded the principality of Cooch Behar and British aid was invoked by that State. After a number of

raids by the Bhutanese into Assam, an envoy (the Hon. A. B. D. N.) was sent to Bhutan, who was grossly insulted and compelled to sign a treaty surrendering the Duars to Bhutan. On his return the treaty was disallowed and the Duars annexed. This was followed by the treaty of 1865 by which the State's relations with the Government of India were satisfactorily regulated. The State formerly received an allowance of half a lakh a year from the British Government in consideration of the cession in 1865 of some areas on the southern borders. This allowance was doubled by a new treaty concluded in January 1910, by which the Bhutia

nese Government bound itself to be guided by the advice of the British Government in regard to its external relations, while the British Government undertook to exercise no interference in the internal administration of Bhutan. On the occasion of the Tibet Mission of 1904, the Bhotias gave strong proof of their friendly attitude. Not only did they consent to the survey of a road through their country to Chumbi, but their ruler, the Tongsa Penlop, accompanied the British troops to Lhasa, and assisted in the negotiations with the Tibetan authorities. For these services he was made a K C I E and he has since entertained the British Agent hospitably at his capital. The ruler is now known as H H the Maharaja of

Bhutan, Sir Uggan Wangchuk, K C I E. At the head of the Bhutan Government, there are nominally two supreme authorities, the Dharma Raja, known as Shaping Benipoché, the spiritual head, and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raja a year or two is allowed to elapse, and his reincarnation then takes place, always in the Choje, or royal family of Bhutan. Cultivation is backward and the chief crop is maize. The military force consists of local levies under the control of the different chiefs. They are of no military value.

NORTH-WEST FRONTIER STATES.

The Indian States of the North West Frontier Provinces are Amb, Dir, Swat and Chitral. The area of the latter three is 3,000, 1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively.

Amb—Is only a village on the western bank of the Indus in Independent Tanawala.

Chitral—Runs from Lowara top to the south of the Hindu Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889 on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler Amen ul Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nizam ul Mulk was recognised by Government, but he was murdered in 1895. A war was declared by Umra Khan of Jandul and Dir against the infidels and the Agent at Gilgit who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched (April 1, 1895) to their relief.

The valleys of which the State consist are extremely fertile and continuously cultivated. The internal administration of the country is conducted by His Highness Capt Mohd Nisr ul Mulk the Muhtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand.

Dir—The territories of this State, about 3,000 square miles in area, include the country drained by the Panjkora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Kohistan. A motor road has been constructed to Dir from Malakand.

Swat—The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, K B E, is a descendant of the famous Akhund Salub of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 4,800 square miles and population 300,000. The Headquarters of the State is at Saidu Sharif about 34 miles from Malakand and connected with Malakand by motor road.

Political Agent for Dir, Swat and Chitral
Major E. H. Cobb, C I E, I A.

STATES IN THE MADRAS PRESIDENCY

The Madras Presidency includes 5 Indian States covering an area of 10,644 square miles. Of these, the States of Travancore and Cochin represent ancient Hindu dynasties. Pudukottai is the inheritance of the chieftain called the Tondiman. Banganapalle and Sandur two petty States, of which the first is ruled by a Nawab. He in the centre of two British districts.

Name	Area sq miles	Population	Estimated Gross Revenue in lakhs of rupees
Travancore	7,625	5,095,973	241.36
Cochin	1,417	1,205,016	88.37
Pudukottai	1,179	400,694	23.11
Banganapalle	275	39,230	4.58
Sandur	167	19,583	2.21

These States were brought into direct relation with the Government of India on October 1st, 1923.

Travancore—This State which has an area of 7,624.84 square miles and a population of 5,095,973 with a revenue of Rs 232.93 lakhs occupies the south west portion of the Indian Peninsula forming an irregular triangle with its apex at Cape Comorin. The early history of Travancore is in great part traditional, but there is little doubt that H H the Maharaja is the representative of the Chera dynasty, one of the three great Hindu dynasties which exercised sovereignty at one time in Southern India. The petty chiefs, who had subsequently set up as independent rulers within the State, were all subdued and the whole country, included within its present boundaries, was consolidated and brought under one rule by Maharaja Marthanda Varma (1729-58). The English

first settled at Anjengo a few miles to the north of Irivandrum, and built a factory there in 1684. In the wars in which the East India Company were engaged in Madura and Tinnevely, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. To protect the State from possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded by which the Company agreed to protect Travancore from all foreign enemies. In 1805 the annual subsidy to be paid by Travancore was fixed at 8 lakhs of rupees.

His Highness the Maharaja (b. 7th November 1912) ascended the throne on the 1st September 1932. During the minority the State was ruled by His Highness Maharaja Sethu Lakshmi Bayi, a aunt of the Maharaja as Regent on his behalf. His Highness was invested with ruling powers on the 6th November 1931. The work of legislation was entrusted to a Legislative Council established as early as 1885. The Legislature was first re-constituted in January 1933 when a bicameral body was instituted, the new Chambers, viz. the Sri Mahan Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers will be settled by a Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature.

Local Self Government on a small scale exists in the more important towns. The State supports a military force of 1,471 men. Education has advanced considerably in recent years and the State takes a leading place in that respect. In the matter of female education the State has a leading place among Indian States and the British Indian Provinces. The principal food grain grown is rice, but the main source of agricultural wealth is the coconut. Other crops are pepper, areca nut, jack fruit, sugarcane and tobacco. Rubber and tea are among other important products. Cotton weaving and the making of matting from the coir are among the chief industries within recent years a filip has been given to the development of industries as well as the arts and crafts of the State. The Pillyasid Hydro electric works, the Rubber factory in Irivandrum, the contemplated Chintal and Porcelain factory and the addition of an Art Gallery named Chithirayam at Irivandrum are the results of the new policy initiated by His Highness the Maharaja. The State is well provided with roads and with a natural system of back waters besides canals and rivers, navigable for country crafts. One line of railway about one hundred miles in length cuts across the State from east to west and

then runs along the Coast to the Capital. More Railway lines are in contemplation. The capital is Trivandrum.

Agent to the Governor-General—C. P. Skrine
O B F I C S

Deewan—Sir C. P. Ramaswamy Iyer K C I E

Cochin—This State on the south west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal who governed the whole country of Kerala including Travancore and Malabar, as Viceroy of the Chola Kings about the beginning of the ninth century, and afterwards established himself as an independent Ruler. In 1502 the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the earlier wars with the Zamorin of Calicut they assisted the Rajas of Cochin. The influence of the Portuguese on the west coast began to decline about the latter part of the seventeenth century, and in 1661 they were ousted from the town of Cochin by the Dutch with whom the Raja entered into friendly relations. About a century later in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut who was expelled with the assistance of the Raja of Travancore. In 1776 the State was conquered by Hyder Ali to whom it remained tributary and subordinate and subsequently to his son Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu, and to pay a subsidy.

His Highness Sri Sri Rama Varma, G C I E, who ascended the throne in January 1915 having demitted on 25th March 1932. His Highness Sri Sri Rama Varma K C I E who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932. The administration is conducted under the control of the Maharaja whose chief Minister and Executive officer is the Deewan, Sir K. K. Shrinimukham Chetty K C I E. The forests of Cochin form one of its most valuable assets. They abound in teak, ebony, blackwood, and other valuable trees. Rice forms the staple of cultivation. Coconuts are largely raised in the sandy tracts and their products form the chief exports of the State. Communications by road and by rail are good and the State owns a line of railways from Shornore to Pankulam, the capital of the State, and a Forest Station Railway used in developing the forests. The State supports a force of 113 officers and 573 men.

Resident for Madras States—C. P. Skrine
O B F I C S

Pudukkottai—This State is bounded on the north and west by Trichmopoly, on the south by Ramanad and on the east by Tanjore. In early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. Relations with the

English began during the Carnatic wars. During the siege of Srirangapatna by the French in 1752, the Tondanin of the time did good service to the Company's cause by sending them provisions although his own country was on at last on occasion ravaged as a consequence of his fidelity to the English. In 1756 he sent some of his troops to assist Muhammed Yusuf the Company's sepoy commander, in settling the Madurai and Ponnai countries. Subsequently he was of much service in the wars with Haider Ali. His services were rewarded by a grant of territory subject to the conditions that the district should not be alienated (1806). Apart from that there is no treaty or arrangement with the Raja. His Highness Sri Irudumbi Das Raja Rajagopala Tondimur Bahadur the present ruler, is a minor. He was installed as Rajaw 1911-28. The administration of the State is carried on by an Administrator. The various departments are constituted on the British India model. The principal food crop is rice. The forests which cover about one seventh of the State contain only small timber. There are no large industries. The State is well provided with roads but Pudukkottai is the only municipal town in the State.

Agent to the Governor General—Lt Col W A M Gustin C B E

Banganapalle—This is a small State in two detached portions which in the eighteenth century passed from Hyderabad to Mysore and back again to Hyderabad. The control over it was ceded to the Madras Government by the Nizam in 1800. The present ruler is Nawab Meer Fazeel Ali Khan Bahadur. The chief food grain is cholam. The Nawab pays no tribute and maintains no military force. The revenue of the State is over 3 lakhs. The Nawab enjoys a salute of 9 guns.

Agent to the Governor General—Lt Col W A M Gustin C B E

Sandur—Sandur is the only Mahratta State in South India and in political relations with the Government of India through the Agent to the Governor General at Trivandrum. The State was conquered in early eighteenth century by Siddoji Rao, ancestor of the present Ruler from a poligar of the Bedar tribe. During the time of his son and successor Morar Rao the State reached the zenith of its territorial expansion. In the Carnatic and Mysore wars Morar Rao was the staunchest ally of the British. The State came into political relations with the British in 1818. The Ruler exercises powers of life and death. In 1876 the proper style of address of the Ruler was acknowledged by the Government of India. This is one of the 146 important States which received Canning's Sanad of Adoption in 1862. The Ruler also has vested interests in Ganjam and a jaghir in Bombay Presidency held on his behalf by certain junior members of his family. The State pays no tribute to the Crown. The Ruler is the fountain head of all authority—judicial, legislative and executive. He has established an independent Chief Court presided over by the senior most member of the Madras judicial service whose services have been lent to the State under a special arrangement with the Madras Government. There is a State Council to initiate all legislative measures and an Executive Council in charge of the administration.

The State has mineral deposits of the first quality, especially manganese. The forests abound in sandalwood which is rich in oil content as that of Mysore.

The present Ruler is Raja Shrimant Yeshwant Rao Hindimrao Ghorpade Mumukshu Maharaj Sahasraji.

President of the Executive Council—Shrimant Sridhar B. Y. Raja Ghorpade.

State Officer—R. M. Deshmukh B.A. LL.B., Bar at Law (S. Minister C. P. Govt.)

Agent to the Governor General—C. P. Skrine, O.B.E., I.C.S.

STATES OF WESTERN INDIA

Western India States Agency—Kathiwars in which the majority of the States in this Agency are situated is the peninsula lying immediately to the north of Gujarat in the Bombay Presidency. Its extreme length is about 220 miles and its greatest breadth about 165 miles while the total area is about 23,440 sq. miles. It is for the most part flat except for the Gir forest where there exist the only lions still surviving in India.

The political organisation of the Agency is unusual in that besides the normal system of Sultan States in political relations with the Resident and non-Sultan States in political relations with the Political Agents of the subordinate agencies there are administered areas which include the Civil Stations of Rajkot, Wadhwan and Sidra and groups of numerous petty estates known as Thanas. The latter are under the direct supervision of the Political Agents. These Thanas were originally offshoots of larger States but owing to the system of successive holders dividing their heritage amongst all their heirs a custom prevalent amongst the Khatias, who give their name to the

province, they have become so subdivided as to render impracticable the normal administration and the exercise of any jurisdictional powers by each individual holder. The Agency has, therefore, assumed their powers and carries out the administration on their behalf.

The history of the British connection with Kathiawar commences with Colonel Walker's settlement of 1807. In 1863 the States were divided into seven classes and although these have since been abolished the jurisdictions fixed in that year still remain graded.

Formerly the Political Administration of the Western India States was the responsibility of the Government of Bombay. The transfer of States to direct political relations with the Government of India a change which was advocated in the Montagu-Chelmsford Report on Constitutional Reforms was not carried out until 1924. The first stage in the process was the creation of a new Agency in direct relation with the Government of India known as the Western India States Agency. This Agency comprised the whole of the area containing the old Kathiawar, Cutch and Palanpur Agencies.

The other States in the Bombay Presidency which for the time being remained in political relations with the Government of Bombay, were transferred to the control of the Government of India with effect from the 1st April 1933. This transfer necessitated the regrouping not only of the remaining Bombay States but also of some of the States of the Western India States Agency. The States of Danta and Palanpur were included in the Rajputana Agency, the former having being part of the old Mithi Kantha Agency and the latter part of the Western India States Agency. The States and estates of the Mahi Kantha and Banas Kantha Agencies were united in the present Sabar Kantha Agency, the third subordinate Agency of the Western India States Agency.

The headquarters of the Western India States Agency are situated at Rajkot which has been the seat of the Representative of the Government for over 100 years in the Rajkot Civil Station which was first leased from the Rajkot State in 1863. The personnel of the Headquarters is as follows—

Resident for the States of Western India The Hon.ble Sir Courtenay Latimer, K C I E, C S I

Judicial Commissioner in the States of Western India D R Norman, I C S

Secretary to the Hon.ble the Resident Major C W L Hurvy, M C

The Salute States in this Agency are 17 in number, namely—

1. Cutch State 2. Idar State 3. Junagadh State 4. Nawangur State 5. Bhavnagar State 6. Porbander State 7. Dhrangadhra State 8. Radhanpur State 9. Morvi State 10. Gondal State 11. Jirbhud State 12. Wankaner State 13. Paitana State 14. Dhol State 15. Limbdi State 16. Rajkot State, and 17. Wadhwan State

The subordinate agencies are three in number, namely—

Western Kathiawar Agency,
Eastern Kathiawar Agency, and
Sabar Kantha Agency

Western Kathiawar Agency—The Western Kathiawar Agency with Headquarters at Rajkot Civil Station was constituted by the amalgamation in 1923 of two (Sorath and Halar) out of the four Prants or Districts into which the province of Kathiawar was formerly divided. The combined district which was at first named The Western Kathiawar States was given its present designation in 1927.

The Agency contains 41 non salute jurisdictional States and Talukas and four Thana circles. Among jurisdictional States in direct political relations with the Political Agent, the following are prominent—

Jasdan, Manavadar, Thana Devli, Vidhi, Jipur, Mula, Kotda Sangani, Jetpur, Pithidia, Vetspur, Bilkha and Khirsara

Political Agent T B Crough, C O C, I C S

Eastern Kathiawar Agency—The Eastern Kathiawar Agency, with Headquarters at Wadhwan Civil Station was constituted in 1923

by combining the two Prants of Thaliwad and Gohelwad. The combined District was first styled The Eastern Kathiawar States and was given its present designation in 1927. The administration and constitution are similar to those prevailing in the Western Kathiawar Agency.

The Agency contains 15 non salute jurisdictional States and Talukas and 7 Thana Circles.

Among jurisdictional States in direct political relations with the Political Agent, Eastern Kathiawar Agency, the following are prominent—

Lakhtar Sayla, Chuda, Yala, Lathi, Muli, Bajana and Patdi

Political Agent Major H M Poulton

Sabar Kantha Agency—The Sabar Kantha Agency with Headquarters at Sadri Civil Station was constituted by the amalgamation of the Mithi Kantha and Banas Kantha Agencies. Previous to 1933 the administration of these two agencies was on the usual lines with a Political Agent in charge of each while after that date the organisation was assimilated to that of the other two agencies.

The Agency contains 46 jurisdictional non salute States and nine Thana Circles.

Among Chiefs in direct relations with the Political Agent, the States of Ihard and Wiro are prominent.

Political Agent E B Wakfield, I C S

Bhavnagar—This State lies at the head and west side of the Gulf of Cambay. The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1260 under Sajakji from whose three sons—Ranoji, Sarangji and Shahji—are descended respectively the rulers of Bhavnagar, Lathi and Paitana. An intimate connexion was formed between the Bombay Government and Bhavnagar in the eighteenth century when the ruler of that State took pains to destroy the pirates which infested the neighbouring seas. The State was split up when Gujarat and Kathiawar were divided between the Peshwa and the Gaekwar, but the various claims over Bhavnagar were consolidated in the hands of the British Government in 1807. The State pays an annual tribute of Rs 1,28,060 to the British Government, Rs 3,581 8 0 as Peshkashi to Baroda, and Rs 22,858 as Zortalbi to Junagadh. His Highness Maharaja Krishna Kumar-sinhji succeeded to the *gadi* on the death of his father, Maharaja Sir Bhavsinhji, K C S I, on 17th July 1919, and was invested with full powers on 18th April 1931. The State Council consists of Sir Prabhashankar D. Pattani, K C I E, as President. The other members of the Council are Dewan Bahadur T K Trivedi, Khan Bahadur S A Goghawala, M A, LL B, Bar at Law and Mr A P Pattani, M A (Cantab). One noteworthy feature of the administration is the complete separation of judicial from executive functions and the decentralisation of authority is another. The authority and powers of all the Heads of Departments have been clearly defined, and each within his own sphere is independent of the others, being directly responsible to the Council.

The chief products of the State are grain, cotton, sugar cane and salt. The chief manufactures are oil, copper and brass vessels and cloth. The Bhavnagar State Railway is 307 miles in length. The capital of the State is the town and port of Bhavnagar, which has a good and safe harbour for shipping and carried on an extensive trade as one of the principal markets and harbours of export for cotton in Kathiawar. Bhavnagar supports 270 State Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whom 86 per cent were Hindus and 8 per cent Mahomedans. The average income for the last five years was Rs 1,58,07,052 and the average expenditure Rs 1,17,60,182.

Dhrangadhra State is a State of the First Class in Kathiawar with a population of nearly one lakh and an area of 1,167 square miles exclusive of the Dhrangadhra portion of the Runn of Cutch. The ruler of Dhrangadhra is the head of the Jhala family of Rajputs, originally called the Makvanas. This Rajput clan is of great antiquity having migrated to Kathiawar from the North, establishing itself first at Patri in the Ahmedabad District, thence moving to Halvad and finally settling in its present seat. Being the guardians of the North Eastern marches of Kathiawar they had to suffer repeatedly from the successive inroads of the Mahomedans into that Peninsula, but after suffering the various vicissitudes of war they were confirmed in their possession of Halvad, its surrounding territories and the salt pans attached thereto by an Imperial Firman issued by Emperor Aurangzeb. The States of Wankaner, Limbdi, Wadhwan, Chuda, Sayla and Than Lakhtar are offshoots from Dhrangadhra. His Highness Maharaja Maharana Shri Sir Ghanshyamsinhji, G.C.I.E., G.C.S.I., Maharaja Raj Sahab, is the ruler of the State and the titular head of all the Jhalas. The administration is conducted under the Maharaja's directions by a Council consisting of a Viceroy, President and two members, Political and Military. The soil being eminently fit for cotton cultivation the principal crops are long stapled cotton and cereals of various kinds. Excellent building and ornamental stone is quarried from the hills situated within the State. Wadagara Salt of an excellent quality with Magnesium Chloride and other by-products of salt are also manufactured in the State. Salt Works at Kuda which offer practically inexhaustible supplies for their manufacture. To utilize these valuable resources, the State built a huge factory in Dhrangadhra, known as the Shri Shakti Alkali Works for the manufacture on a large scale of Soda Ash, Caustic Soda and Soda Bicarb as bye products of salt. The capital town is Dhrangadhra, a fortified town 75 miles west of Ahmedabad.

Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the B. B. & C. I. Railway. An extension of this line to Maliya is under contemplation. A railway siding has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the salt traffic.

Gondal State—The Ruling Prince of Gondal is a Rajput of the Jadva stock with the title of H. H. Maharaja Thakore Sahab, the present Ruler being H. H. Shri Bhagwat Singh,

G.C.I.E., G.C.S.I. The early founder of the State Kumbhoji I, had a modest estate of 20 villages. Kumbhoji II, the most powerful Chief of the House, widened the territories to almost their present limits by conquest but it was left to the present ruler to develop its resources to the utmost, and in the words of Lord Reay, Governor of Bombay, by its "importance and advanced administration to get it recognised as a First Class State." The State pays a tribute of Rs 1,10,721. The chief products are cotton, groundnuts and grain and the chief manufactures are cotton and woollen fabrics and gold embroidery. Gondal has always been pre-eminent amongst the States of its class for the vigour with which public works have been prosecuted, and was one of the earliest pioneers of railway enterprise in Kathiawar, having initiated the Dhasa Dhoraji line. It owns the Dhasa Jim Jodhpur section called the Gondal Railway with its Kunkavay Bagasra Extension and manages it along with the Porbandar State Railway and the Jetalpur Rajkot Railway subsequently built in partnership with other Native States in Kathiawar. There are no export and import duties, the people being free from taxes and dues. Comparatively speaking Gondal stands first in Kathiawar in respect of the spread of education, female education in the State being compulsory. Rs 32.25 lakhs have been spent on irrigation tanks and canals, water supply and electricity to the towns of Gondal, Dhoraji and Upleta. The capital is Gondal, a fortified town on the line between Rajkot and Jetalpur.

Junagadh State—A first class State under the Western Indian States Agency and lies in the South Western portion of the Kathiawar Peninsula between 24°-44' and 21° 53' North latitude 70° and 72° East longitude with the Halar division of the province as its northern boundary and Gohilwad Prant to its east. It is bounded on the south and west by the Arabian Sea. The State is divided into 12 Mahals. It has 16 ports of which the principal are Veraval Mangrol and Nawabandar. The principal rivers in the State are the Bhadar Uben, Ozat, Hiran, Saraswati, Machhundri, Singaoda, Meghal, Vrajmi, Raval and Sabli. The principal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and the Datar Hills, yields in antiquity and historical interest to none. The Upperkot or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honey combed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka inscription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill which is sacred to the Jains, the Shivalites, the Vaishnavites and other Hindus. To the south east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 guntas. It supplies timber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian lion. The area of the State is 3,337 square miles and the average revenue amounts to about Rs 90,00,000. The total population

according to the census of 1931 is 545 152. Until 1472 when it was conquered by Sultan Mahmud Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chhida Sama tribe. During the reign of the Emperor Akbar it became a dependency of Delhi under the immediate authority of the Moghal Viceroy of Gujarat. About 1735 when the representative of the Moghals had lost his authority in Gujarat, Sherkhan Babi, the ancestor of the present Babi Ruler expelled the Moghal governor and established his own rule. The ruler of Junagadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, jawar, sesamum, wheat, rice, sugar cane, cereals, grass, timber, stone, castor seed, fish, country tobacco, groundnuts, coconuts, bamboos, etc. while those of manufacture are ghee, molasses, sugar, candy, copper, and brassware, dyed cloth, gold and silver embroidery, pottery, hardware, leather, bamboo furniture, etc. The State pays a tribute of Rs 28 394 annually to the Paramount Power and Peshkashi of Rs 37 210 to His Highness the Gaekwar. On the other hand, the State of Junagadh receives a tribute styled Zorabli amounting to Rs 92 421 from not less than 134 States and Talukas, a relic of the days of Mahmud in supremacy. The State maintains State forces consisting of Janagers and the Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 219 inclusive of Bag pipe Band.

The present Nawab is His Highness Sir Mahabat Khan III, G C I E K C S I who is the ninth in succession and seventh in descent from His Highness Bahadurkhanji I the founder of the Babi family of Junagadh in 1735 A D. His Highness the Nawab Sahib was born on 22nd August 1900 and succeeded to the *gadi* in 1911.

Ruler—His Highness Sir Mahabat Khanji Rasulkhanji G C I E K C S I.

Her Apparent—Shahzada Mahomed Dilwarkhanji, 2nd Shahzada Mahomed Himatkhanji.

President of the Council—J. Monteth, Esq. C I I I C S.

Nawanagar State on the southern shore of the Gulf of Cutch, has an area of 1 791 square miles. The Maharaja of Nawanagar is a Jadeja Rajput by caste and belongs to the same family as the Rao of Cutch. The Jadejas originally entered Kathiawar from Cutch and dispossessed the ancient family of Jethwas then established at Ghumli. The town of Jamnagar was founded in 1540. The present Jam Sahib is Lieut. Colonel His Highness Maharaja Jam Shri Digvijayasinhji Sahib, K C S I who succeeded in April 1933. The principal products are grain, cotton and oil seeds shipped from the ports of the State. A small pearl fishery lies off the coast. The State pays a tribute of Rs 1 20 093 per annum jointly to the British Government the Gaekwar of Baroda and Zorabli to the Nawab of Junagadh. The State maintains two squadrons of Nawanagar State Janagers and 1½ company of the State Infantry. The capital is Jamnagar, a flourishing place nearly 4 miles in circuit situated 5 miles east of the port of Bodi a modern

port affording all facilities. The State owns a Railway which traverses through its entire territory and is part of the Railway system connecting the Peninsula with the mainland. Population 4,09,192. Revenue nearly Rs 94 lakhs.

Deewan—Khan Bahadur Merwanji Pestonji, B A I I I.

Revenue Secretary—Gokulbhai B. Desai, Bar at-Law.

Military Secretary and Home Member—Lt Col R. K. Himmatsinhji.

Cutch—The State is bounded on the north and north west by Sind, on the east by the Palanpur Agency on the south by the Peninsula of Kathiawar and the Gulf of Cutch and the south west by the Indian Ocean. Its area exclusive of the great salt marsh called the Rann of Cutch is 8 249 square miles. The capital is Bhuj, where the ruling Chief (the Maharao) His Highness Maha Rao Sri Kheunzarji Savai Bahadur G C S I, G C I F, resides. From its isolated position, the special characteristic of its people their peculiar dialect and their strong feeling of personal loyalty to their ruler the peninsula of Cutch has more of the elements of a distinct nationality than any other of the dependencies of Bombay. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Sind tribe of Samma Rajputs in the fourteenth century. The section of the Sammas forming the ruling family in Cutch were known as the Jadejas or 'children of Jada'. The British made a treaty with the State in 1815. There is a fair proportion of good arable soil in Cutch and wheat, barley and cotton are cultivated. Both iron and coal are found but are not worked. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea. The ruling chief is the supreme authority. A few of the Bhayats are invested with jurisdictional powers in varying degrees in their own estates and over their own ryot. A notable fact in connection with the administration of the Cutch State is the number and position of the Bhayats. These are Rajput nobles forming the brotherhood of the Rao. They were granted a share in the territories of the ruling chief as provision for their maintenance and are bound to furnish troops on an emergency. The number of these chiefs is 137 and the total number of the Jadeja tribe in Cutch is about 16 000. The British military force having been withdrawn from Bhuj the State now pays Rs 82 257 annually as an Anjar equivalent to the British Government. The military force consists of about 1,000 in addition to which, there are some irregular infantry, and the Bhayats could furnish on requisition a mixed force of four thousand.

Porbandar—The Porbandar State on the Western Coast of the province of Kathiawar comprises an area of 642½ square miles and has a population of 1 15,741 souls according to the Census of 1931. The capital of the State is Porbandar, a flourishing port having trade connections with Java,

Burma Persian Gulf, Africa and the Important Continental Ports. The State has its own Railway. The well known Porbandar stone is quarried in the Barda Hills near Adityana and is largely exported to important places in as well as outside India. Porbandar Ghee (butter) has also a reputation of its own and is largely exported to Africa. The Indian Cement Factory of Messrs Tata & Sons was established at Porbandar in 1912. It manufactures Ganaputi Brand Portland cement which has stood keen competition. Among more recent industries may be mentioned the establishment of the Nadir Sult Works and the Maharani Spinning and Weaving Mill. The State maintains a Military Force.

His Highness Maharaja Rana Sahib Shri Sitawatsinghji Bahadur, K.C.S.I., is the present Ruler of the State. Born on the 30th June 1901, His Highness ascended the *gadi* on the 26th January 1920 and married Princess Rupahiba Sahib, M.B.I., of Limbdi.

Radhanpur is a first class State with an area of 1,150 square miles which is held by a branch of the illustrious Lohi family who since the reign of Humayun have always been prominent in the annals of Gujarat. The present Ruler is His Highness Nawab Murtuzakhanji Joravarkhanji Nawab Sahib of Radhanpur. The State maintains a Police force of 209. The principal products are cotton wheat and grain. The capital is Radhanpur town, a considerable trade centre for Northern Gujarat, and Cutch Sami has a cotton press and 3 ginning factories. There is one ginning factory at Munjpur and one at Sankeshwar which is a great centre of Jain pilgrimage. All the year round Gotarka Dev and Irakod Jodi are also the principal places of pilgrimage for Mohammedans, Vaishnavas and Brahmins respectively.

There are several ancient monuments in the State viz., Pithkot at Radhanpur, Jhalore Saba at Subapur, Lotshvara Mahadev at Loti Sankheshvara temple at Sankheshvara, Waghlunk at Waghl Varanatha place at Waghl Lotshvara Mahadev at Jatehpur Rajayapura Bhotava Old Masjid at Munjpur Place of Ashan at Gotarka Mahabali Pir's Dargah at Gotarka and Nikuntia Mahadev at Kunwar.

There is also an Anath Ashram for the poor known as The Hussambakht Sahiba Mohobat Vilas.

His Highness the Nawab Sahib Bahadur has established a Bank named Vadhmar Bank to lend money to cultivators and others on easy terms and thus save them from the clutches of the money lenders.

Idar—Idar is a First Class State with an area of 1,669 square miles and an average revenue of about 20 lakhs. The present Ruler of Idar is His Maharaja Shri Himmat Singhji is a Rajput of the Rathod clan. He was born in 1899 A.D. and ascended the *gadi* in 1931 on the demise of His late Highness Maharaja Shri Dowlat Singhji. His Highness accompanied His late Highness Lt Col. Sir Dowlat Singhji to Europe when the latter went to attend the Coronation of His Majesty the King Emperor in London and acted as Page to his Imperial Majesty at the Coronation. Darbhah held at Delhi in 1911. The subordinate feudatory Jagirdars are divided into three classes. The Jagirdars comprised in the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pittawats are descendants of the military leaders who accompanied Anand Singhji and Rai Singhji, the founder of the present Marwar dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Shiv Singhji in 1741 A.D. on condition of military service. In the case of the Bhoomias are included all subordinate feudatories who were in possession of their Pittas prior to the advent of the present Marwar dynasty. The Pittas they hold were acquired by their ancestors by grant from the former Rao Rulers of the State. The Maharaja receives Rs 52,427 annually on account of Khudhi and other Raj Haks from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others and pays Rs 30,340 as Ghadana to Gackwar of Laroia through the British Government.

Vijaynagar—The State has an area of 135 square miles with a population of 8,491 and an annual revenue of about Rs 93,859. The Ruler is Rathod Rajput. His ancestors were the Rulers of Idar but on being driven from that place established their rule in Lolo. The present Chief is Rao Shri Hamir Singhji Hindusinhji. He was born on 3rd January 1904 and succeeded to the *gadi* in 1916. The Ruler has no salute but on account of the historic importance of the family he enjoyed rank above the Ruler of the salute State of Danta in the old Malu Kantha Agency.

BARODA RESIDENCY AND GUJARAT STATES AGENCY

Consequent upon the establishment of direct relations between the Government of India and the Bombay States since April 1933 many States and Estates which were previously included in the various Political Agencies of the Bombay Government have now been included in a newly formed Political Agency of the Government of India designated the Gujarat States Agency. The charge of this new Agency has been added to the charge of the Resident at Baroda, who is now known as the Resident for Baroda and the Gujarat States. The Political Agencies thus amalgamated were the Rewa Kantha Agency, the Kaira Agency, the Surat Agency, the Narsik Agency and the Thana Agency.

The following are the full powered salute States now in direct political relations with the Government of India through the Resident for Baroda and the Gujarat States—

- | | |
|---------------|--------------------------|
| (1) Bilasmar | (Old Rewa Kantha Agency) |
| (2) Brnsda | (Old Surat Agency) |
| (3) Bara | (Old Rewa Kantha Agency) |
| (4) Baroda | |
| (5) Cambay | (Old Kaira Agency) |
| (6) Chhotota | (Old Rewa Kantha Agency) |
| Udepur | (Old Surat Agency) |
| (7) Dhuranpur | (Old Surat Agency) |
| (8) Jawhar | (Old Thana Agency) |

- (9) Lunawada (Old Rewa Kantha Agency)
 (10) Rajpipla (Old Rewa Kantha Agency)
 (11) Sachin (Old Surat Agency)
 (12) Sant (Old Rewa Kantha Agency)

The Headquarters of the Agency are at Baroda and consist of—

Resident for Baroda and the Gujarat States—Lieutenant Colonel J. L. R. Weir, C.I.E.

Secretary to the Resident for Baroda and the Gujarat States—A. P. Low Esq. I.C.S.

Under Secretary to the Resident for Baroda and the Gujarat States—Lt. R. A. McConaghey

Assistant Secretary to the Agent for Baroda and Gujarat States—Mr. A. W. McCruz

Balasinoor—This State has an area of 189 square miles, a population of 52,525 and an annual revenue of about Rs. 2½ lakhs. The Ruling Prince belongs to the Babi family. The State pays a tribute of Rs. 9,766 9 8 to the British Government and Rs. 3,077 11 1 to the Baroda Government. The name of the present Ruler is Babi Shri Jamlatkhanji Manvar Khanji, Nawab of Balasinoor. He was born on the 10th November 1894 and succeeded to the *gadi* in 1899. The Ruler of the State received in 1890 a Sanad guaranteeing succession according to Muhammadan Law in the event of failure of direct heirs. The Nawab is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Bansda—This State has an area of 215 square miles, a population of 48,807 and an annual revenue of about Rs. 7½ lakhs. The Ruler of Bansda are Solanki Rajputs of the Lunar Race and descendants of the Great Sidhraj Jaysinh. The present Ruler Maharaja Shri Indrasinhji was born on 16th February 1888, and succeeded to the *gadi* in September 1911. The Ruler of the State has received a Sanad guaranteeing succession to an adopted heir in the event of failure of direct heirs. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Baria—The State has an area of 813 square miles with a population of 159,429 and is situated in the heart of the Panchmahals District. The capital Devgad Baria is reached by the Baria State Railway from Piprod Station on the B. B. & C. I. Railway at a distance of 10 miles. The average revenue of the State is about 12 lakhs. The Ruler, Lieut. Colonel His Highness Maharaja Shri Ranjitsinhji, K.C.S.I., is the direct descendant of the Great House of Khichi Chowhan Rajputs who ruled over Gujarat for 244 years with their capital at Champaner, enjoying the proud title of *Yuvraj*. The State pays no tribute either to the British Government or to any other Indian State. His Highness served in France and Flanders in the Great European War and in the Afghan War, 1919. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of eleven guns.

Cambay—This State has an area of 392 square miles, a population of 87,761 and an annual revenue of about Rs. 1½ lakhs. The founder of the Ruling family was Najm uddin Munkhanji, the last but one of the Muhammadan Governors of Gujarat. The present Ruler is Najm ud Daulat Muntaz ul Mulk Munkhanji Bahadur Dabir Jung Nawab Mirza Hussain Yawar

Khan Sahib Bahadur. He was born on the 16th May 1911, succeeded to the *gadi* on the 21st January 1915 and was invested with ruling powers on the 13th December 1930. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 11 guns.

Chhota Udepur—This State has an area of 890 square miles, a population of 1,44,040 and an annual revenue of about Rs. 14½ lakhs. The Ruling family belongs to the Khichi Chavan Rajput clan and claims descent from the last Patal Raja of Pawagadh or Champaner, the State being founded shortly after the fall of that fortress in 1484. The name of the present Ruler is Maharaja Shri Natwarisinhji. He was born on the 16th November 1906 and succeeded to the *gadi* on the 29th August 1923 on the death of his father. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Dharampur—This State has an area of 704 square miles, a population of 1,12,051 and an annual revenue of about Rs. 12 lakhs. The Rulers of Dharampur trace their descent from Ramchandraj of Hindu Mythology. They belong to the Solar Sisodia Rajputs dynasty. The present Raja, His Highness Maharaja Shri Vijaydevji Mohandevji, was born on the 3rd December 1884 and succeeded to the *gadi* on the 26th March 1921. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns and a personal salute of 11 guns.

Jawhar—This State is situated to the North of the Thana District of the Bombay Presidency on a plateau above the Konkan plain. It has an area of 310 square miles, a population of 57,288 and an average annual revenue of about Rs. 5½ lakhs. Up to the period of the first Mahomedan invasion of the Deccan Jawhar was held by a Varli, not a Koli Chief. The first Koli Chief obtained his footing in Jawhar by a device similar to that of Dido when he asked for and received as much land as the hide of a bull would cover. The Koli Chief cut a hide into strips, and thus enclosed the territory of the State. The present Chief, Raja Patangshri alias Yeshwantrao Vikramsha is a minor and the State is at present under minority administration. The Raja is entitled to become a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Lunawada—The State has an area of 388 square miles, a population of 95,162 and an annual revenue of about Rs. 5½ lakhs. The Rulers of Lunawada belong to the historic Solanki clan of Rajputs claiming their descent from the famous Sidhraj Jaysinh of Anhilwad (Gujarat). Besides having fine patches of good agricultural land, the State contains a considerable forest area yielding rich timber. The present Ruler, Lieut. Maharaja Shri Virbhadrasinghji, was invested with full powers on 2nd October 1930. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Rajpipla—This important State lies to the south of the Narmada. It has an area of 1,517½ square miles, a population of 2,06,085 and an average annual revenue of about Rs. 24½ lakhs. The lands are rich and very fertile and except for a few forest clad hills, are suitable and available for cultivation in large quantities in

the south-east talukas. The family of the Maharaja of Rajppla, Major H. H. Maharana Shri Sir Vijaysinhji K. C. S. I., is said to derive its origin from a Rajput of the Gohel clan. Cotton is the most important crop in the State. In the hills there are valuable teak forests. The capital is Rajppla which is connected with Ankleshwar by railway built by the State. His Highness is a member of the Chamber of Princes and enjoys a dynastic salute of 13 guns.

Sachin—Sachin is the senior of the only two Abyssinian States in India. The ancestors of the Nawab of Sachin were the Rulers of Janjira. The founder of the Ruling House of Sachin was Nawab Sidi Abdul Karim Mohammed Yakut Khan. In 1784, on the death of his father Nawab Sidi Abdul Karim Mohammed Yakut Khan became Nawab of Janjira but the Throne was seized by Sidi Jahwir in favour of Nawab Sidi Mohammed Abdul Karim Mohammed Yakut Khan's younger brother. This led to several complications which Nawab Sidi Abdul Karim Mohammed Yakut Khan decided to avoid and made the great sacrifice of leaving Janjira with his younger brother. Nawab Sidi Mohammed Abdul Karim Yakut Khan intended to go to Tippu Sultan and gain his support but as this was considered impolitic the Honorable the East India Company intervened as mediators and through the good offices of Mr. Mallet (afterwards Sir Charles) and Nizam Feroz became Prime Minister of His Highness the Peshwa. A Triple Alliance was signed on the 6th June 1791 by which Nawab Sidi Abdul Karim Mohammed Yakut Khan took the State of Sachin. Nawab Sidi Abdul Karim Mohammed Yakut Khan was granted the hereditary title of Nawab by the Emperor of Delhi. His Imperial Majesty Shah Alam II and was also granted a *Hafiz Haziri* and the *Mihri Miratib*. The Rulers of Sachin are known as amongst the first powerful Princes in India to have cemented an alliance of perpetual friendship with the British. The present Ruler is His Highness Nawab Sidi Mohammed Haidar Mohammed Yakut Khan who was born on the 11th of September 1909 and succeeded to the Throne on 19th November 1930. His Highness is a member of the Chamber of Princes in his own right.

Sant—This State has an area of 394 square miles a population of 83,538 and an annual revenue of about Rs. 54 lakhs. The Ruling family belongs to the Mahapatra branch of the Puvur or Parmar Rajputs. The Rulers used to pay a tribute of 5,384.910 to Scindia. This tribute is now paid by the State to the British

Government. The present Ruler Maharana Shri Jorawarsinhji Pratapsinhji was born on 24th March 1881 and succeeded to the *gadi* in 1896. He is a member of the Chamber of Princes and enjoys a dynastic salute of 9 guns.

Rewa Kantha Agency—Including the Surgana State and the Dangs

This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non salute States and Estates of the Old Rewa Kantha Agency, the State of Surgana, previously in the Nasik Agency, and the petty states known as the Dangs, previously in the Surat Agency.

Rewa Kantha means the district or province situated on the banks of the river Rewa or Narmada or Nariada. This river is held in high veneration among the Hindus especially in the Bombay Presidency.

All the States comprised in the Province of Rewa Kantha are not on the banks of Nariada, for some of the Northern States, i.e., Kadana and the States in Pandu Mewar are on the banks of the Mahi river. In fact the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers.

The population consists of the following main classes: Hindus, Jains, Musalmans, Animistic Bhils, Dhinkas, Kolis and Naikdas.

Surgana—Is situated on the borders of the Nasik District.

The **Dangs** consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty Chiefs. Of these 13 are Bhils and 1 a Kokani.

The headquarters of the Agency which is situated at the Baroda Residency in view of the fact that the Secretary to the Resident at Baroda and the Gujarat States is also *officio* Political Agent of this Agency, consist of—

Political Agent—A. P. Low Esq. I.C.S.

Deputy Political Agent—Rao Saheb M. B. Mehta.

Assistant Political Agent for the Dangs—Mr. L. G. Sampson, M.B.E.

Many of the States and Estates are small and only a few enjoy restricted jurisdictional powers. The four Chiefs of Kadana, Bhaderwa, Surgana and Jambughoda are however larger and more important, the first three named being included in the list of electorates for representative members of the Chamber of Princes.

KOLHAPUR AND THE DECCAN STATES AGENCY

This Residency which was formed in consequence of the transfer of the Bombay States to the direct control of the Government of India includes the following States—

Kolhapur	Miraj (Senior)
Janjira	Miraj (Junior)
Savantvadi	Kurandwad (Senior)
Mudhol	Kurandwad (Junior)
Sangli	Ramdurg
Bhor	Aundh
Jamkhadi	Akalot
Phaltan	Savanur
Jath	Wadi Estate

These States are in political relations with the Government of India through the Resident for Kolhapur and the Deccan States, whose headquarters are at Kolhapur.

Resident for Kolhapur and the Deccan States—Lieutenant Colonel K. A. C. Evans Gordon.

Secretary to the Resident for Kolhapur and the Deccan States—Major R. I. Bazalgette.

Under Secretary to the Resident for Kolhapur and the Deccan States—(in office) Major J. W. Rundall.

Kolhapur—Kolhapur is a State with an area of 3,217 square miles and population of 9,57,137. Subordinate to Kolhapur are nine feudatories, of which the following four are important: Vishalgirh Bavda, Kagal (senior), and Ichalkaranji. The ruling house traces its descent from a younger son of Shivaji founder of the Maratha power. The prevalence of piracy from the Kolhapur port of Malvan compelled the Bombay Government to send expeditions against Kolhapur in 1765 and again in 1792, when the Raja agreed to give compensation for the losses which British merchants had sustained since 1785, and to permit the establishment of factories at Malvan and Kolhapur. Internal dissensions and wars with neighbouring States gradually weakened the power of Kolhapur. In 1812 a treaty was concluded with the British Government, by which, in return for the cession of certain ports, the Kolhapur Raja was guaranteed against the attacks of foreign powers, while on his part he engaged to abstain from hostilities with other States, and to refer all disputes to the arbitration of the British Government. The principal articles of production are rice, jowar and sugarcane and the manufactures are coarse cotton and woollen cloths, pottery and hard ware. The State pays no tribute and supports a military force of 692. The nine feudatory estates are administered by their holders except in the case of two whose holders are minors. Kolhapur proper is divided into seven *petas* or taluks and three *mahals* and is managed by the Maharaja who has full powers of life and death. The Madras and Southern Mahratta Railway passes through the State and is connected with Kolhapur City by a line which is the property of the State. The present Ruler is Lt. Col. His Highness Maharaja Sir Shri Rajaram Shahu (Chhatrapati) GCSI, GCIE. He has a dynastic salute of 19 guns.

Janjira—This State is situated to the South of the Kolaba District of the Bombay Presidency. The most noticeable point in its history is the successful resistance that it alone of all the States of Western India made against the determined attacks of the Marathas. The British on succeeding the Marathas as masters of the Konkani coast and dominating in the administration of the State, the Chief is a Sunni Mohammedan with a title of Nawab. He has a Sind guaranteeing succession according to Mohammedan law and pays no tribute. The last ruler, Jilal Nawab Sidi Saif Ahmad Khan GCSI, died on 2nd May 1922 and was succeeded by his son His Highness Sidi Mohammed Khan born on the 7th March 1914. The State was under a minority administration until 9th November 1933 when His Highness the present Nawab was invested with ruling powers. The area of the State is 379 square miles and the population 110,666. The average revenue is about 11 lakhs including that derived from a small dependency named Jambud in the south of Kathiawar under the Western India States Agency. The Capital is Mund on the mainland the name of Janjira being retained by the island

fort opposite. The Nawab is entitled to a dynastic salute of 11 guns. In recognition of services rendered in connection with the Great War the last ruler's salute was raised on the 1st January 1918 to 13 guns personal and 13 guns local on the 1st January 1921.

Sawantwadi—This State has an area of 930 square miles and population of 2,30,589. The average revenue is Rs. 6,33,000. It lies to the north of the Portuguese territory of Goa, the general aspect of the country being extremely picturesque. Early inscriptions take the history of the State back to the sixth century. So late as the nineteenth century the ports on this coast swarmed with pirates and the country was very much disturbed. The present Ruler is Major His Highness Raja Badur Shrimant Sir Khem Sawant Bhonsle, KCSI Raja of Sawantwadi. He was invested with the powers of his State on 29th October 1924. This is the principal port of the State and it is rich in valuable work. The sturdy Marathas of the State are favourite troops for the Indian Army and supply much of the immigrant labour in the adjacent British districts. The Capital is Sawantwadi also called Sundar Wadi or simply Wadi. The Raja enjoys a dynastic salute of 9 guns and a permanent local salute of 11 guns.

Mudhol—The State has an area of 368 square miles, a population of 62,860 and an annual revenue of about Rs. 3,80,000. The present Ruler is Lieutenant Raja Shrimant Sir Mulojirao Venkatrao Raje Ghorpude *alias* Nana Sahib (Ghorpude), KCIFF. He was born in 1884 and succeeded to the *gadi* in 1900 when he was a minor. He was invested with Ruling powers in 1904. He enjoys a dynastic salute of 9 guns and is a Member of the Chamber of Princes. He is Appointed and only surviving on Prince Jinnay-mah 6 15th Oct 1923.

Sangli—The State has an area of 1,136 square miles, a population of 2,58,442 and an annual revenue of Rs. 15,41,000. The founder of the family was Harbhat who rose to distinction during the rule of the Peshwas. The present Ruler Lieutenant (Honorary) His Highness Raja Shrimant Sa Chintamunrav Patwardhan *alias* Appasheb Patwardhan GCSI, was born on the 14th February 1890 and succeeded to the *gadi* in 1901 on the death of his adoptive father Dhundraj Chintamunrav Patwardhan. He was invested with ruling powers on 2nd June 1910 on attaining his majority. His Highness has been granted the hereditary title of Raja. He enjoys a dynastic salute of 9 guns and a personal salute of 11 guns. His Highness exercises full judicial jurisdiction.

Bhor—The State lies in the Western Ghats in wild and mountainous country. It has an area of 910 square miles, a population of 1,41,546 and an annual revenue of about Rs. 6½ lakhs. The present Ruler Raja Shrimant Rajkumhar Rao Shankarrao *alias* Babasheb Pant Sahib, was born on 20th September 1878. He succeeded to the *gadi* in 1922. The honour of receiving a dynastic salute of 9 guns was conferred on him in 1927.

The following are the particulars of the remaining States grouped in this Residency —

State	Name of Chief	Area	Population	Revenue	Tribute to British Government
Akalkot	Raja Shrimant Vajaysinh Fatesinh Bhonsle Raja of	498	92,605	Rs 6,40,000	Rs 14,592
Aundh	Raja Shrimant Phavanrao Shrivastava <i>alias</i> Bilasaheb Punt Pratindhi Raja of	501	76,507	4,03,000	No tribute
Jamkhadi	Raja Shrimant Shankarrao Parshuramrao <i>alias</i> Appasaheb Patwardhan Raja of	524	1,14,282	9,16,000	20,841
Jath	Sub-It Raja Shrimant Vajaysinhrao Ramrao <i>alias</i> Bilasaheb Punt Raja of	980.8	91,102	3,49,000	11,247
Kurundwad (Senior)	Shrimant Chhitumirrao Bilasahab Patwardhan <i>alias</i>	182.5	44,254	2,60,000	9,619
Kurundwad (Junior)	(1) Shrimant Ganpatrao Madhavrao <i>alias</i> Bapusaheb Patwardhan (2) Shrimant Ganpatrao Jimbakrao <i>alias</i> Jitasaheb Patwardhan	116.02	39,583	1,97,000	No tribute
Miraj (Senior)	Raja Shrimant Sir Gangaadharrao Ganesh <i>alias</i> Balasaheb Patwardhan, K.C.I.F. Raja of	342	93,957	6,25,000	12,558
Miraj (Junior)	Shrimant Sir Madhavrao Harhar <i>alias</i> Babasaheb Patwardhan K.C.I.F.	196.1	40,686	2,86,000	7,319
Phultin	Major Raja Shrimant Major Mudhopiro Naik Nimbalkar, Raja of	397	58,761	5,17,000	9,600
Rundurg	Shrimant Ramrao Venkatrao <i>alias</i> Raoasahab Bhive	169	35,401	1,82,000	No tribute
Savanur	Major Nawab Abdul Mujid Khan Sahab Dilur Jung Bahadur Nawab of	73	20,320	2,15,000	Do
Wadi Estate	Major Ganpatrao Gangaadharrao <i>alias</i> Dajasaheb Patwardhan Jahagirdar	12	1,704	12,807	Do

EASTERN STATES AGENCY

On April 1st, 1933 the Eastern States Agency was created and an Agent to the Governor General was appointed at Ranchi. The Agency embraced 26 Orissa States formerly included in the Province of Bihar and Orissa and 14 Central Provinces States. Subsequently on December 1st, 1936 the two Bengal States of Cooch Bihar and Tripura were transferred to the Agency, and there are now three Political Agencies under the Agent to the Governor General, viz—

(1) The Orissa States Agency with its headquarters at Sambalpur and with which the following States are in Political relations —

Athgarh Athmullik Bamra Baramba, Boudh, Bonu Daspalla, Dhankul Gangpur Hindol, Keonjhar Khandpara Kharawan, Narsinghpur Nayagarh, Nilgiri Pal Lahara Rairakhol, Ranpur Sakaikola Sonapur, Ialcherand Iigiria.

(2) The Chhattisgarh States Agency with its headquarters at Raipur and with which the following States are in Political relations —

Bastar Changuikhat Chikhaludin Jashpur, Kulahandi Kanker Kawardha Khairagarh Koraput Nandgaon Patna Raigarh Sakti Saran Surguja and Udupur.

(3) The Bengal States Agency with its headquarters at Ranchi and with which the following States are in Political relations —

Cooch Bihar Mayurbhanj and Tripura.

Of all these States the Rulers of six enjoy the distinction of a salute viz Cooch Bihar and Tripura of 13 guns, and Mayurbhanj Patna Kulshundhi and Sonpur of 9 guns.

The total area is 65,114 square miles and the total population 80,82,052. Real income 2,18,93,724. These States pay a tribute amounting to Rs. 4,03,250.

Cooch Behar—This State is situated in North Bengal bounded by the districts of Jalpaiguri Goalpara and Rangpur. It has an area of 1,316 square miles and a population of 590,866, the revenue being Rs. 25,84,897.

The town of Cooch Behar is connected by the Cooch Behar State Railway with the Eastern Bengal Railway system. The late Ruler Maharaja Jitendra Narayan Bhup Bahadur attended His late Majesty King George V's Coronation in England as an Honorary A.D.C. to his father Maharaja Nripendra Narayan Bhup Bahadur and was made a K.C.S.I. in the year 1917. The present Ruler is His Highness Maharaja Jagaddipendra Narayan Bhup Bahadur who was born on the 15th December 1915 and succeeded his father Maharaja Jitendra Narayan on the 20th December 1922.

Tripura.—This State lies to the east of the district of Tippera in Bengal and consists largely of hills covered with dense jungle. It has an area of 4,116 square miles and a population of 382,450. The revenue from the State is about 20 lakhs and from the zamindaris in British India about 10 lakhs. The present Ruler is His Highness Maharaja Manikya Bir Bikram Kishore Deb Barman Bahadur who was born on 19th August 1908 and succeeded the late Maharaja Manikya Birendra Kishore Deb Barman Bahadur on 13th August 1923. Besides being the Ruler of Tripura the Maharaja holds a large landed property situated in the plains of the districts of Tippera, Noakhali and Sylhet.

Mayurbhanj.—The Ruler is a permanent member of the Chamber of Princes. Archaeological finds and copper plate grants that have come to light within the State area is also outside go to show that the ancient Bhunga Kingdom covered a considerable part of Orissa. Though the origin of the kingdom is lost in hoary antiquity tradition records by Hindu records more than two thousand years ago. Bhunga Kings ruled over an extensive territory from Khinniga Kotta modern Khiching whose ancient remains bear testimony to the customs and culture of the Rulers which found expression in diverse forms of art of a very high order. The Mayurbhanj School by R. N. Grouse and its critics of a acknowledged authority. During the Moghul period Mayurbhanj was recognised by the Emperors as an autonomous principality and in the days of Marhatta supremacy in Orissa, the Rulers of Mayurbhanj were often at war with the Marhattas who attempted to levy a precarious tribute by force of arms. In 1761 the East India Company took possession of Midnapore and almost immediately afterwards the Ruler of Mayurbhanj opened friendly negotiations with the British authorities. During half a century preceding the British conquest of Orissa the British authorities maintained their friendship with Mayurbhanj and a treaty was concluded between the East India Company and Mayurbhanj State in 1829.

Koijhar is an offshoot of Mayurbhanj being held by a junior branch of the Ruling family which separated from the parent State.

Kharsawan and Serakela.—The Rulers of these States belong to the family of the Rajas of Pothohar whose States were confiscated by the British Government. These States first came under the notice of the British in 1793 when in consequence of disturbances on the frontier of the old Jung Bahadur the Thakur of Kharsawan and the Kunwar of Serakela were compelled

to enter into certain agreements relating to the treatment of fugitive rebels. The Chiefs were bound when called upon to render service to the British Government, but not required to pay tribute. Nagpur Railway runs through a part of the State.

Athgarh, Athmallik, Bamra, Baramba, Baudh, Bonas, Daspalla, Dhenkanal, Gangpur, Hindol, Kalahandi, Keonjhar, Khandpara, Narsinghpur, Nayagarh, Nilgiri, Pal-Lahara, Patna, Rairakhol, Ranpur, Sonapur, Talcher, Tigmra.—These States have no connection or authentic history. They were first inhabited by aboriginal races who were divided into innumerable communal or tribal groups each under its own Chief or headman. These carried on incessant warfare with their neighbours on the one hand and with the wild beasts of the forests on the other. In course of time their hill forts were penetrated by Aryan adventurers who gradually overthrew the tribal Chiefs and established themselves in their place. Tradition relates how these during interlopers most of whom were Rajputs from the north came to Push on a pilgrimage and remained behind to found kingdoms. It was thus that Jal Singh is said to have become ruler of Mayurbhanj over 1,800 years ago he being succeeded by his eldest son while his second son called Keonjhar. The Chiefs of Baudh and Daspalla are said to be descended from the same stock, and a Rajput origin is also claimed by the Rajas of Athmallik, Narsinghpur, Pal Lahara, Talcher and Tigmra. Nayagarh, its alleged founder was a Rajput from Rewari and a son of the same family was the ancestor of the present house of Khandpara. The ruling family of Ranpur is of Khond origin and furnishes the only known instance in which and many vicissitudes the supremacy of the original settlers has remained intact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders but in other respects neither the ancient kings of Orissa nor their successors the Moghuls and Marhattas ever interfered with their internal administration. All the States have records of the dynasties that have ruled over them but they are made up for the most part of legend and fiction and long genealogical tables of doubtful accuracy and contain very few features of general interest. The British conquest of Orissa from the Marhattas which took place in 1803 was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

Bastar, Chhambhakar, Chhambhakaran, Jashpur, Kanker, Kawardha, Khairagarh, Koresa, Nandgaon, Raigarh Sakti, Sarangarh, Surguja, Udaipur.—These States are scattered round the Chhatargarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

Bastar.—This State is situated in the south-east corner of the Central Provinces. In area (13,602 square miles) it is the twelfth largest State in India. The late Chief of Bastar was Hindu Raju. He was the last direct descendant on the male line of an ancient family of Lunar Rajputs which ruled over Warangal until the

Mahomedan conquest of the Deccan in the 14th century A D when the brother of the last Raja of Warangal fled into Bastar and established a kingdom there. From then till the days of the **Mahrattas** the State was virtually independent its invincibility securing it from all but occasional raids of Mahomedan freebooters. The Bhonslas of Nagpur imposed a small tribute on Bastar in the 18th century which is now paid to the British Government. Nearly 11,000 square miles are covered by forest of which about 3,000 square miles are reserved and cultivation is sparse. The capital Jagdalpur on the **Indravati River** is 184 miles by motorable road from Raipur in the Central Provinces.

Surguja—Until 1905 this was included in the **Chota Nagpur States of Bengal**. The early history of Surguja is obscure but according to local tradition the present Ruling family is said to be descended from an **Arksel Raja** of Palamu.

In 1758 a **Mahratta** army overran the State and compelled its Chief to acknowledge himself a tributary of the **Bhonsla Raja**.

Agent to the Governor General—Lt Colonel A S Meek, C M G, I A

Secretary (Ranchi)—Mr G H Emerson, I O S

Forest Adviser Eastern States Sambalpur—Mr H F Mooney, I F S

Education

Educational Adviser—Mr S D Bahugunar, M A, I L B, Dip Ed (Lacds), M R S T (England)

UNDER THE GOVERNOR OF ASSAM

Manipur—The only State of importance, under the Government of Assam, is Manipur which has an area of 8,620 square miles and population of 4,45,606 (1931 Census) of which about 58 per cent are Hindus and 35 per cent animistic hill tribes. Manipur consists of a great tract of mountainous country, and a valley about 50 miles long and 20 miles wide which is shut in on every side. The State adopted Hinduism in the early eighteenth century, in the reign of Pamhe bar Gharib Nawaz, who subsequently made several invasions into Burma. On the Burmese retreating, Manipur negotiated a treaty of alliance with the British in 1762. The Burmese again invaded Manipur during the first Burmese war, and on the conclusion of peace in 1826 Manipur was declared independent. The chief event in its subsequent history was the intervention of the British in 1891 to establish the claim of Kula Chandra Singh as Maharaja followed by the treacherous murder of the Chief Commissioner, Mr Quinton, and the officers with him, and the withdrawal of the escort which accompanied him. From 1891 to 1907 the State was administered by the Political Agent, during the minority of H H Sir Chura Chand Singh. The Raja was invested with ruling powers in 1907 and formally installed on the gadi in 1908. For his services during the War the hereditary title of Maharaja was conferred on him. He was made a CBE in

Dec 1917, and KCSI in Jan 1934. He is entitled to a salute of 11 guns.

The administration of the State is now conducted by H H the Maharaja assisted by a Durbar, which consists of a President who is usually a member of the Indian Civil Service, his services being lent to the State by the Assam Government, three ordinary and three additional members, who are all Manipuris. The staple crop of the country is rice. Forests of various kinds cover the great part of the mountain ranges.

Khasi States—These petty chieftships, 25 in number, with a total area of about 3,600 square miles and a population of 1,80,000, are included under the Governor of Assam. Most of the State have treaties or engagement with the British Government. The two largest are Khyrim and Myllem and the smallest is Nongliwal, which has a population of only 213. Most of them are ruled by a Chief or Siem. The Siemship usually remains in one family. The succession was originally controlled by a small electoral body constituted from the heads of certain clans but in recent years there has been a tendency to broaden the elective basis. The constitution of a Khasi State has always been of a very democratic character, a Siem exercising but little control over his people.

UNDER THE GOVERNMENT OF THE UNITED PROVINCES

Three States Rampur, Tehri and Benares are included under this Government—

State	Area Sq Miles	Population	Revenue in lakhs of Rupees approximate
Rampur	893	4,64,919	49
Tehri (Garhwal)	4,500	4,70,109	19
Benares	875	3,91,16	18

Rampur State—The State of Rampur was founded by Nawab Syed Ali Mohammad Khan Bahadur in the middle of the 18th century and his dominions included a considerable portion of what is now known as Rohilkhand. The founder belonged to the famous Sayid clan of Barha in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered valuable services to the Moghul Emperor who recognised him as Ruler of Rohilkhand and bestowed on him the **Mah Maratib** i.e., the insignia of the Royal Fish.

Upon his death his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Syed Fazullah Khan Bahadur. The Province of Rohilkhand had now passed into the hands of the East India Company. Nawab Syed Fazullah Khan Bahadur was very loyal to the British Government to whom he always looked for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry 2,000 strong to the British Government in 1778 and received the following message of thank from the then Governor General—

That in his own name as well as that of the Board he returned him the warmest thanks for this instance of his faithful attachment to the Company and the English Nation

Another opportunity arose for the ruler of Rampur to evince his steadfast loyalty and devotion to the Imperial Cause on the outbreak of the Mutiny of 1857. His Highness Nawab Sir Sayid Yusuf Ali Khan Bahadur occupied the Musnad of Rampur in these days. From the very start of the Mutiny full peace was re-established in the country. He spared neither men nor money in the help of the British Government. He saved the lives of many Europeans whom he provided with money and other means of comfort. He established his reputation as a good administrator to such an extent that he was placed in charge of the administration of Moradabad and the other neighbouring districts on behalf of the British Government. These signal services were recognised by the British Government by the grant of an Illaq besides other marks of distinction.

During the reign of Nawab Sir Kalb Ali Khan Bahadur who was an Oriental scholar of repute the Court of Rampur came to be surrounded by artists, poets, and musicians, who were left without any patronage on the break up of the Moghul and Oudh Courts. This Prince collected all those rare and most precious Persian manuscripts and Mughal Miniatures now preserved at the Rampur Oriental Library. Indeed the years of his rule meant for Rampur the splendour of a rich renaissance. In 1887, Nawab Sir Kalb Ali Khan Bahadur died and was succeeded by his invalid son Nawab Mushtak Ali Khan Bahadur who after a brief reign passed away in 1889.

During the reign of His Highness Nawab Sir Syed Mohammad Humid Ali Khan Bahadur Rampur made great strides in trade and commerce and in fact in every walk of life. He maintained the traditions of his House for devotion to the British Crown. The Great War of 1914 found him for most in offering his personal services and all the resources of the State to the British Government. The 1st Rampur Infantry was sent to East Africa and returned home after nearly four years service and won favourable remarks from high British officers. He contributed one lakh of rupees towards the cost and upkeep of the hospitalship. Royalty. At the time of the Afghan War of 1919 the 1st Tankers and the Imperial Service Infantry were sent on garrison duty in British India.

The present Ruler, Captain His Highness Nawab Sir Syed Razi Ali Khan Bahadur KCSI, succeeded his father on 20th June 1930. His Highness was born on 17th November 1906 and was educated at the Rajkumar College, Rajkot.

During the short period that the reins of the State have been in his hands the administration of the State has been overhauled and reorganised. A State Council consisting of six members is responsible for the administration of the State on the principle of the joint and several responsibility of every member.

Since 1935 His Highness has completely separated his Civil List from the State Budget.

The Rampur Municipality has a representative character and has a non-official and elected Chairman. Two third of its members are elected and the remainder nominated. Town Areas in two mofussil towns of the State have also been established.

The Legislative Committee consisting of experts who drafted enactments for the State has recently been remodelled and a representative element has been introduced into it to afford opportunities to the subjects to ventilate their views and take part in the framing of laws for the State as well as to discuss and offer their advice on matters in which their opinion may be invited.

The State employees have recently been given the benefit of pension rules and time scale rates have been fixed for them.

A Development Board has been instituted to encourage and foster the growth of industries and improve agriculture in the State. Two Sugar factories have been established in the State under the management of Messrs Govin Brothers of Delhi.

His Highness has two sons and four daughters. The eldest son Sirghazi Syed Murtaza Ali Khan Ba is the Heir Apparent.

The permanent salute of the State is 15 guns and the annual income about 50 lakhs of rupees.

Tehri State (or Tehri Garhwal).—This State lies entirely in the Himalayas and contains a tangled series of ridges and spurs radiating from a lofty series of peaks on the border of Tibet. The sources of the Ganges and the Jumna are in it. The early history of the State is that of Garhwal District, the two tracts having formerly been ruled by the same dynasty. Since 688 A.D. Pradyumna Shah, the last Raja of the whole territory, was killed in battle fighting against the Gurkhas, but at the close of the Nepalese War in 1815 his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuable assistance to Government. He died in 1859. The present Raja is Major H. H. Sh. Narendra Shah Bahadur, KCSI, who is 50th direct male lineal descendant from the original founder of the dynasty, Raja Kanak Pal. The principal products are rice and wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Raja has full

powers within the State. The strength of the State forces is 330. Tehri is the capital but His Highness and the Secretariat Office are at Narendranagar for the greater part of the year. The summer capital being Pratapnagar 8 000 feet above the sea level.

Agent to the Governor General The Governor of the U. P. of Agra and Oudh

Benares—The kingdom of Benares under its Hindu Rulers existed from time immemorial and finds mention in Hindu and Buddhist literature. In the 12th century it was conquered by Shahab ud-din Ghori and formed a separate province of the Mohammadan Empire. In the 18th century when the powers of Moghul Emperors declined after the death of Aurangzeb Raja Mansa Ram an enterprising zamindar of Gangapur (Benares district) founded the State of Benares and obtained a Sanad from the Emperor Mohammad Shah of Delhi in the name of his son Raja Balwant Singh in 1738. Raja Mansa Ram died in 1740 and his son Balwant Singh became the virtual ruler. During the next 30 years attempts were unsuccessfully made by Sirdar Jang and after him by Shuja ud-daula of Oudh to destroy the independence of the Raja and the Post of Ramnagar was built on the bank of the Ganges opposite the Benares City. Raja Balwant Singh died in 1770 and was succeeded by his son Chhet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was placed on the *gaddi*. His letter proved an imbroglio and there was misadministration which led to an agreement in 1794 by which

the lands, held by the Raja in his own right which was granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the Domains. Within the Domains the Raja had revenue powers similar to those of a collector in a British district. There was thus constituted what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April 1911, the major portion of these Domains became a State consisting of the parganas of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British Government to the Maharaja in 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief subject to certain conditions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Lexise.

The present ruler is Captain H. H. Maharaja Sir Aditya Narain Singh Bahadur, K. C. S. I., who was born in 1874 and succeeded to the State in 1931 and the heir apparent Maharaj Kumar Bibhut Narain Singh born on November 5, 1921, adopted by His Highness the Maharaja Bahadur as his son and successor on the 24th June 1934.

PUNJAB STATES

There are 14 States of the Punjab which since 1921, have been in direct political relation with the Government of India through the Hon. ble

the Agent to the Governor General Punjab. States who reside at Lahore. The following are details—

Name	Permanent salute in guns	Area (sq. miles)	Population (1931)	Approximate revenue in lakhs of rupees
Patiala	17	5 942	1 625 520	145.0
Jalandhar	17	16 434	944 612	45.5
Khairpur	15	6 050	227 143	15.0
Jind	13	1 299	321 676	21.0
Nabha*	13	947	247 574	25.5

Loharu	9	226	23 338	1.1

* Under administration

† Personal salute raised to 13 guns

‡ Brought under the Political control of the A. G. G. Punjab States in April 1903

Bahawalpur—Bounded on the North East by the District of Ferozepur, on the East and South by the Rajputana States of Bikaner and Jaisalmer, on the South West by Sind, on the North West by the Indus and Sutlej rivers. Area, 15 000 square miles.

This State is about 300 miles in length and about 50 miles wide, is divided lengthwise into three great strips. Of these the first is a part of the Great Indian Desert, the central track which is as barren as uplands of the Western Punjab, has however been partly rendered cap-

able of cultivation by the network of Sutlej Valley Canals constructed recently, and the third a fertile alluvial tract in the river valley is called the Sind. The State is a partner in the great Sutlej Valley Project.

The ruling family is descended from the Abbasside Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durrani Empire in the Treaty of Lahore in 1809. Ranjit Singh was confined to the right bank of the Sutlej.

The first treaty with Bahawalpur was negotiated in 1833, the year after the treaty with Ranjit Singh for regulating traffic on the Indus. It secured the independence of the Nawab within his own territories and opened up the traffic on the Indus and Sutlej. During the first Afghan War the Nawab rendered assistance to the British and was rewarded by a grant of territory and life pension. On his death his heir being minor for a time the administration of the State was in the hands of the British authorities. The present ruler is Major Dr His Highness Rukmdaula Nusratji Jang Saifuddaula Hafizul Mulk Mukhlisudaula Munnuddaula Nawab Sir Saadiq Muhammad Khan Sahib Bahadur Abbasi V, I.L.D., G.O.I.F., K.C.S.I., K.C.V.O., who was born in 1904 and succeeded in 1907. During his minority the State was managed by a Council of Regency which ceased to exist in March 1924, when His Highness the Nawab was invested with full power. His Highness is now assisted in the administration of his State by a Prime Minister, Izzat Nishan, Imam ul Mulk Rai Rais ul Woza, Khan Bahadur, Mr Nabi Bukh Mahomed Husain, M.A., LL.B., C.I.E., K.C.A.O., P.O.C.S., a Public Works and Revenue Minister, Mr C. A. H. Townsend, C.I.E., a Minister for Law and Justice, Raft ul Shan, Iftikhar ul Mulk, Lt Col Maqbool Hasan Kureishy, M.A., LL.B., C.A.O., C.H.O., a Home Minister, Amin ul Mulk, Umdat ul Umra, Sardar Mohammad Amir Khan, C.H.O., an Army Minister, Major General Sahibzada Haji Mohammad Dilawar Khan Abbasi, M.B.F., C.H.O., C.A.O., and a Minister for Commerce, Mchti Udho Dusbai, LL.B.

The chief crops are wheat, rice and millet. The Lahore Karachi branch of the North Western State Railway passes through the State. The State supports an Imperial Service combined infantry, in addition to other troops. The capital is Bahawalpur, a walled town built in 1718.

Income from all sources over 90 lakhs. Languages spoken: Multani or Western Punjabi (Jatki), and Marwari.

Agent to the Governor-General, Punjab States—The Hon. Lt Col H. Wilberforce Bell, C.I.E., K.C.I.E., C.B.E., I.C.S.

Chamba—This State is enclosed on the west and north by Kashmir on the east and south by the British districts of Kangra and Gurdaspur and it is shut in on almost every side by lofty hill ranges. The whole country is mountainous and is a favourite resort of sportsmen. It possesses a remarkable series of copper plate inscriptions from which its chronicle have been compiled.

Founded probably in the sixth century by Marut, a Surajbansi Rajput, who built Brahmapura the modern Burmaur. Chamba was founded by Meru Varma (680) and the town of Chamba built by Sahil Varma about 920. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost unscathed from Sikh aggression. The State first came under British influence in 1846. The part west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand and it was declared independent of Kashmir. The present Chief is H. H. Raja Lakshman Singh who was born in 1924 and succeeded in 1935. As he is a minor the Administration of the State is being conducted by a Council, consisting of a President (Colonel H. S. Strong, C.I.E.), Vice President and Chief Secretary (Diwan Bahadur L. Madho Ram) and a Judicial Member (Lala Ratu Ram). The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but the management of them has now been retroceded to the Chamba Durbar. The mountain ranges are rich in minerals which are little worked. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North Western Railway. Chamba town, on the right bank of the Ravi, contains a number of interesting temples, of which that of Lakshmi Naryan, dating possibly from the tenth century, is the most famous.

Faridkot—The Faridkot Rajas are sprung from the same stock as the Phulkian Chiefs having a common ancestor in Brar more remote by twelve generations than the celebrated Phul. The Faridkot House was founded in the middle of the seventeenth century. The present ruler Farzand, Saadat Nishan Hazrat, K. A. I. S. A. R. I. Hind, Lt. His Highness Raja Harindar Singh Brar Bahadur was born on the 29th January 1915, succeeded to the Gaddi in 1918 and was invested with full Ruling Powers in October 1934. His Highness personally administers the State assisted by his younger brother Kanwar Manjit Indar Singh Bahadur, Military Secretary, and an efficient Cabinet of three other Secretaries headed by Sardar Bahadur Sardar Indar Singh, B.A., Chief Secretary. The State comprises an area of 643 square miles with a population of 1,09,364 souls and has an annual income of 18 lakhs. The Ruler is entitled to a salute of 11 guns and a visit to and return visit from the Viceroy. The State Forces consist of the State Sappers and Household Troops (Cavalry and Infantry). Faridkot the Capital town, lies on the main Delhi Bhatinda Lahore Section of the North Western Railway.

Jind—Jind is one of the three Phulkian States (the other two being Patiala and Nabha). Its area is 1,268 square miles, with a population of 324,676 souls and an income of 26 lakhs.

The history of Jind as a separate State dates from 1763 when Raja Gajpat Singh, the maternal grandfather of Maharaja Ranjit Singh, and great grandson of the famous Phul, established his

principality. He was succeeded by Raja Bhag Singh, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Singh was succeeded by the nearest male collateral Raja Sarup Singh in 1837. In the crisis of 1857 Raja Sarup Singh rendered valuable services to the British and was rewarded with a grant of nearly 600 square miles of land, known as Dadri territory. He was succeeded by his son Maharaja Raghubir Singh, who gave help to the British Government on the occasion of Kuka outbreak (1872) and the 2nd Afghan War (1878). The present ruler Maharaja Ranbir Singh was born in 1879, succeeded in 1887, and invested with full powers in 1899. The State rendered exemplary services in the Great European War. It supplied 8,873 men to the Indian Army and Imperial Service Troops and doubled the strength of its Imperial Service Infantry. The total contribution mounted to nearly 35 lakhs, in gifts of cash, materials, animals and loan.

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North Western Railway. The principal executive Officer of the State is called Chief Minister.

Ruler—Colonel His Highness Farzand I Dillband Rasikh ul Tilak, Daulat I-Inghishia Raja I Rajgan Maharaja Sir Ranbir Singh Bahendra Bahadur, GCSI GCIE.

Kapurthala—This State consists of three detached pieces of territory in the great plain of the Jullundur Doab. The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans Sutlej and also in the Bari Doab. In the latter lies the village of Ahlu whence the family springs, and from which it takes the name of Ahluwalia. When the Jullundur Doab came under the dominion of the British Government in 1846, the estates north of the Sutlej were maintained in the independent possession of the Kapurthala Ruler, conditional on his paying a commutation in cash for military service engagements by which he had previously been bound to Maharaja Ranjit Singh, of Lahore. This annual tribute of Rs 1,31,000 a year was remitted by the Government of India in perpetuity in (1924) in recognition of the splendid war record and uniformly efficient administration of the State. The Bari Doab estates are held by the head of the House as a jaghir in perpetuity, the civil and police jurisdiction remaining in the hands of the British authorities. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh, which yield a large annual income equal to those of Kapurthala State. The present Ruler's titles are Col H. H. Farzand I Dillband Rasikhul-Tilak Daulat I Inghishia Raja I Rajgan Maharaja Jagatjit Singh Bahadur Maharaja of Kapurthala, GCSI (1911) GCIE (1918), GBE (1927) who was born on 24th November 1872 and succeeded his father His Highness the late Raja I Rajgan Kharak Singh of Kapurthala in 1877. He was granted the title of Maharaja as an hereditary distinction in 1911. His salute was raised to 15 guns and he was made Honorary Colonel of the 45th Rattays Sikhs. The Maharaja received the Grand Cross of the Legion d'Honneur from the French Government in 1924, and possesses also the Grand Cross of the

Order of Carlos 3rd, of Spain, Grand Cross of the Order of the Star of Roumania, Grand Cross of the Order Menelek of Abyssinia, Grand Cordon of the Order of the Nile of Egypt, Grand Cordon of the Order of Morocco, Grand Cordon of the Order of Tunis, Grand Cross of the Order of Chili, Grand Cross of the Order of the Sun of Peru, Grand Cross of the Order of Cuba, represented Indian Princes and India on the League of Nations in 1926, 1927 and 1929, celebrated the Golden Jubilee of his reign in December 1927.

The rulers of Kapurthala are Rajput Sikh, and claim descent from Rana Kapur, a distinguished member of the Rajput House of Jaisalmer. Only a small proportion of the population however are Sikhs, the majority being Mahomedans. The chief crops are wheat, gram, maize, cotton and sugarcane. The town of Sultanpur in this State is famous for hand printed cloths. Phagwar is another important town in the State and is very prosperous on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it. A branch railway from Jullundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been reorganized and are now designated as Kapurthala State Forces. The State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. Primary education is free throughout the State, and it spends a large proportion of its revenues on its Education Department. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver Jubilee of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various buildings of public utility. The town boasts modern amenities such as electric light, water-works, etc.

Political Officer The Hon'ble Agent to the Governor-General, Punjab States, Lahore.

Malerkotla—This State consists of a level sandy plain unbroken by a hill or stream, bounded by the district of Ludhiana on the north, by Patiala territory on the east and south and by the Ludhiana District, Patiala and Nabha territories on the west. The Rulers (Nawabs) of Malerkotla are of Kurd descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at Maler, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors. As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created

adjacent Sikh States. After the victory of Laswari, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Malerkotla joined the British Army, the British Government succeeded to the power of the Maharrattas in the districts between the Sutlej and the Jumna. The State entered into political relations with the British Government in 1809. The present Ruler is Lt Col. His Highness Nawab Sir Ahmad Ali Khan Bahadur, KCSI, KCIE, who was born in 1881 and succeeded in 1908. He was created Hon'y Major in the Indian Army in June 1916 and promoted to the rank of Lt Col in December 1919.

The chief products are cotton, sugar, poppy, aniseed, mustard, ajwain, mothi, tobacco, garlic, onions and all sorts of grains.

The State maintains Sappers, Infantry, Cavalry and Artillery. The capital is Malerkotla. The population of the town is 30,000. Annual revenue of the State is about 16 lakhs.

Mandi is an Indian State in the Punjab Political Agency, lying in the upper reaches of Bias river which drains nearly all its area. Its area is 1,200 square miles and it lies between 31° 23' North Lat and 76° 22' East Long, and is bounded on the east by Kulu, on the south by Suket and on the north and west by Kangra. It has an interesting history of considerable length which finally resulted in its entering into a treaty with the British in 1846.

The present Ruler, Captain His Highness Raja Sir Jogindra Sen Bahadur, KCSI, assumed full powers in February, 1925. His Highness married for the first time the only daughter of His Highness the Maharaja of Kapurthala. His Highness married again in 1920 the younger daughter of K. Jit Singh of Rajpura. A son and heir was born on 7th December 1923.

The Mandi Hydro Electric Scheme was formally opened by His Excellency the Viceroy in March 1932. The principal crops are rice, maize, wheat and millet. About three fifths of the State is occupied by forests and grazing lands. It is rich in minerals. The capital is Mandi founded in 15-7 which contains several temples and places of interest and is one of the chief marts for commerce with Ladakh and Yarkand.

Nabha—Nabha which became a separate State in 1763 is one of the 3 Phulkian States—Nabha, Patiala and Hind—and though second in point of population and revenue of the 3 sister States it claims seniority being descended from the eldest branch. It consists of two distinct parts: the main portion comprising 12 separate pieces of territory scattered among the other Punjab States and Districts forms the City of Nabha and the Nizamat of Phul and Amloh, the second portion forms the Nizamat of Bawal in the extreme south east of the Punjab on the border of Rajputana; this Nizamat of Bawal was subsequently added to its territory as a reward from the British Government for the loyalty of the Rulers of Nabha. The State now covers an area of about 1,000 square miles and has a population of about 3 lakhs. The State maintains one battalion of Infantry known as the Nabha Akal

Infantry under the Indian States Forces Scheme consisting of 496 men. For the preservation of the peace there is also a Police force consisting of about 400 men.

The State is traversed by the main and 3 branch lines of the N.W. Railway and the B.B. & C.I. crosses the Nizamat of Bawal. A portion of the State is irrigated by the Sirhind Canal. The crops of the State are gram, pulses, bajra, sugarcane, cotton, wheat and barley, to facilitate trade the Durbar has opened grain markets and Banks near the principal railway stations within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils and cotton carpets, lace and gots etc. There are some ginning factories and 5 cotton Steam Presses in the State which are working successfully. In 1923 an inquiry was held into certain matters in dispute between the Patiala and the Nabha Durbars which showed that the Nabha Police had fabricated cases against persons connected with the Patiala State with the object of injuring them through the Patiala Durbar. As a result, the Maharaja Jipudaman Singh, who was born in 1883 and succeeded his father in 1911 entered into an agreement with the Government of India whereby he voluntarily separated himself from the administration and the control of the State was accordingly assumed by the Government of India. In consequence of repeated breaches of the agreement by the Maharaja, he was in February 1928 deprived of the title of Maharaja. His Highness and of all rights and privileges pertaining to the Ruler of the State and his eldest son Partap Singh was recognized as Maharaja in his stead. His Highness Maharaja Pratap Singh is a minor and during his minority the State is being administered by a Council of Regency consisting of a President and three Members. His Highness is at present receiving his education in Badingham College, Leathhead.

Patiala—This is the largest of the Phulkian States and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jampur and Alwar States. Area of 5,932 square miles. Population 1,62,520. Gross income Rs. one crore and forty lakhs. Its history as separate State begins in 1762. The present Ruler, Lieutenant General His Highness Harzandji Khas Daulati, English name Mansur ul Zaman Amir ul Umra, Maharaja Dhiraj Raj Rajeshwar Sri Maharaja i Rajji Sir Bhupindra Singh Mohinder Bahadur, Yadu Vanshavatsi Bhatti Kul Bhushan, GCSI, GCIE, GCMG, GBE, ADC, I.D., was born in 1891 succeeded in 1900 and assumed the reins of government in 1909 on attaining majority. His Highness the Maharaja Dhiraj enjoys at present personal salute of 19 guns and he and his successors have been exempted from presenting Nazar to the Viceroy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugarcane, rapeseed, cotton and tobacco. A great part of the State is irrigated by the Sirhind and Western Jumna canal distributaries. It possesses valuable forests

The State is rich in antiquities, especially at Pinjaur, Sunam, Sirhind, Bhatinda, Narnaul etc. One hundred and thirty eight miles of broad gauge railway line comprising two Sections—from Rajpura to Bhatinda and from Sirhind to Rupar—have been constructed by the State at its own cost. The North-Western Railway, the E. I. Railway, the B. B. & C. I. Railway and the J. B. Railway traverse the State. His Highness maintains a contingent of two regiments of Cavalry and four battalions of Infantry—one battery of Horse Artillery.

The State maintains a first grade college which imparts free education to state subjects. Primary education is also free throughout the State. The Durbar sanctioned a scheme of compulsory education in 1928.

Since the State entered into alliance with the British Government in 1804 and 1809 A. D. it has rendered help to the British Government on all critical occasions such as the Gurkha War of 1814-15, the Sikh War of 1845, the Mutiny of 1857, the Afghan War of 1878-79, and the Feroz and N. W. F. campaign of 1897. On the outbreak of the European War His Highness placed the entire resources of his State at the disposal of His Majesty the King Emperor and offered his personal services. The entire Imperial Service Contingent was on active service throughout the period of the War and served on various fronts in Egypt, Gallipoli, Mesopotamia and Palestine, winning numerous distinctions. Two mule and one camel corps were raised and placed at the service of the British Government for the period of the War, and in addition to furnishing nearly 28,000 recruits for the British Indian Army and maintaining the State Imperial Service Contingent at full strength, contributed substantially in money and material. Again in 1919 on the outbreak of hostilities with Afghanistan His Highness served personally on the Frontier on the Staff of the General Officer Commanding and the Imperial Service Contingent saw active service towards Kohat and Quetta fronts. For his services on the N. W. Frontier His Highness was mentioned in despatches.

His Highness was selected by His Excellency the Viceroy to represent the Ruling Princes of India at the Imperial War Conference and Imperial War Cabinet in June 1918 and during his stay in Europe His Highness paid visits to all the different and principal Princes in Belgium, France, Italy and Egypt (Palestine) and received the following decorations from the allied Sovereigns and Governments—(a) Grand Cordon of the Order de Leopold, (b) Grand Cross of the Legion of Honour, France, (c) Grand Cross of the Order of the Crown of Italy, (d) Grand Cordon of the Order of the Nile, (e) Grand Cross of the Order of the Crown of Roumania and (f) Grand Cross of the Order of St. Saviour of Greece (1926).

His Highness represented the Indian Princes at the League of Nations in 1925. In 1926, he was elected Chancellor of the Chamber of Princes (Narendra Mandal). He was re-elected Chancellor of the Chamber in 1927-28-29-30. In 1930, His Highness led the Princes' delegation to the Round Table Conference. He was again elected Chancellor of the Chamber of Princes in 1933.

Sirmur (Nahan)—This is a hilly State in the Himalayas under the Political control of the Political Agent Punjab Hill States, Lahore. Its history is said to date from the 11th century. In the eighteenth century the State was able to repulse the Gurkha invasion but the Gurkhas were invited to aid in the suppression of an internal revolt in the State and they in turn had to be evicted by the British. In 1857 the Raja rendered valuable services to the British, and during the second Afghan War he sent a contingent to the North West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1933. The main agricultural feature of the State is the recent development of the Kiarda Dun, a fertile level plain which produces wheat, gram, rice, maize and other crops. The State forests are valuable and there is an iron foundry at Nahan which was started in 1867 but being unable to compete with the imported iron, is now used for the manufacture of sugar cane crushing mills. The State supports a Corps of Sappers and Miners which served in the Great War. It was captured with General Townshend's force at Kut al Amara but the Corps was reconstituted and sent to service.

Khairpur—The state of Khairpur lies in Upper Sind between 26°-10' and 27°-46' North latitude and 68°-20' and 70°-14' East longitude. It is bounded on the East by Lodhran and Jessolmere territories and on the North West and South by British Districts of Sind. The climate is similar to the rest of Sind. The maximum temperature in summer is 117° in the shade and the minimum in winter 30°. The nearest hill station is Quetta 5,500 feet above sea level. Rainfall is scarce, the last 13 years average being 32-59. The area of the State is about 6,050 square miles. The population of the State according to the census of 1931 is 2,27,183 souls. The majority of them are cultivators. Others are engaged in trade, State services and labour. By religion they are mainly Sunni Muslims, but the Ruler and his family and some others are Shias. Hindus form the minority community. The State's revenue from all sources calculated on the average of the past five years amounts to Rs. 18,12,118. The relations of the State with the British Government are those of subordinate alliance. The State pays no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdu and English are also spoken. The chief product of the State is grain which is cultivated on irrigation canals taking off from the Indus river at the Lloyd Barrage and to a small extent on wells. Cotton, oil seeds, ghee, indies, tobacco, bullock's earth (met.), carbonate of soda (Khara chaniho) and wool are also produced. The manufactures comprise cotton, silk and woollen fabrics, lacquer work, carpets and pottery.

The Rulers are Muslim Talpur Balochs and belong to the Shiekh clan. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history of the State belongs to the general history of Sind. In that year Mir Fatehali Khan Talpur established himself as Ruler of Sind and subse-

quently his nephew, Mir Sohrab Khan Talpur, founded the Khaipur Branch of the Talpur family. In 1882 the individuality of the Khaipur State was recognized by the British Government. The ruler is a first class prince and is entitled to a permanent salute of 15 guns outside and 17 guns inside the State limits.

The last ruler, His Highness Mir Ali Nawaz Khan Talpur, died on 25th December, 1935.

His only son Mir Faiz Mahomed Khan Talpur is the Walaiah.

Present Mir His Highness Mir Faiz Mahomed Khan Talpur of Khaipur State. Born on 4th January 1913. Ascended the Gadi on 30th April 1936.

He is identical for Punjab States Lt Col H Wilberforce Bull (C.I.F.)

Minister S. Ijaz Ali Esquire, M.B.E., Khan Bahadur.

UNDER THE GOVERNMENT OF BURMA

The States under this Government comprise the Shan States which are included in British India though they do not form part of Burma proper and are not comprised in the regularly administered area of the Province and the Karenn States which are not part of British India and are not subject to any of the laws in force in the Shan States or other parts of Burma.

The Shan States comprise the two isolated States of Hsawngshup and Singkaling Hkamti in the Upper Chindwin District under the supervision of the Commissioner, Sagaing Division, the eight petty village communities under separate hereditary chiefs known as Hkamti Long in the Myitkyna District and the two main divisions of the Shan States known as the Northern and Southern Shan States numbering six and thirty States respectively which are under the Commissioner Federated Shan States.

Hsawngshup with an area of 529 square miles and a population of 7,289 lies between the 24th and 26th parallels of latitude and on the 95th parallel of longitude between the Chindwin river and the State of Manipur.

Singkaling Hkamti has an area of 983 square miles and a population of 2,157 and lies on the 96th and 98th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 5,349 and lie between the 27th and 28th parallels of latitude on the Upper Waters of the Nmai branch of the Irrawaddy.

The Northern Shan State (area 20,156 square miles and population 636,107) and the Southern Shan States (area 36,157 square miles and population 870,230), form with the unadministered Wa States (area about 2,000 square miles) and the Karenn States, a huge triangle lying roughly between the 19th and 24th parallels of latitude and the 96th and 102nd parallels of longitude with its base on the plains of Burma and its apex on the Mekong river.

The population consists chiefly of Shan who belong to the Shan group of the Tai Chinese family, the remainder belong chiefly to the Wa palauing and Mon Khmer groups of races of the Austro Asiatic branch of the Austric family, or to the Karen family which Sir George Grierson now proposes to separate from the Tai Chinese family. There are also a number of Kachins and others of the Tibeto Burman family. The Shans themselves shade off imperceptibly into a markedly Chinese race on the frontier. Buddhism and Animism are the principal religions.

The climate over so large an area varies greatly. In the narrow lowlying valleys the heat in summer is excessive. Elsewhere the summer shade temperature is usually 80 to

95° Fahr. In winter frost is severe on the paddy plains and open downs but the temperature on the hills is more equable. The rainfall varies from 50 to 100 inches in different localities.

The agricultural products of the States are rice, pulses, maize, buckwheat, cotton, sesamum, groundnuts, oranges and pineapples.

Land is held chiefly on communal tenure but unoccupied land is easily obtainable on lease from the Chiefs in accordance with special rules for non natives of the States. Great spaces of the States are suitable for cattle, pony and mule breeding and in the Northern State Chinese settlers appear to have found the latter a very paying proposition.

The mineral resources of the States are still unexplored. The Burma Corporation have a concession for silver, copper, lead and zinc in the Northern States which they claim to be the richest in the world. The Mawson area in the Southern States is also rich in lead. Lignite and iron ore of a low grade are found in many places.

Lashio, the headquarters of the Northern Shan States, is the terminus of the Myohauing Lashio Branch of the Burma Railways (178 miles) and is also connected with Mandalay by a cart road.

The Burma Corporation's narrow gauge private railway track 44.49 miles long connects their Bawdwin mine with the Burma Railways system at Nanyao.

The Southern Shan States are served by the Burma Railways branch line Thazi to Heho (87 miles) which has been extended to Shwenyaung, 98 miles from Thazi.

Launggyi, the headquarters of the Southern Shan States is connected with Thazi by a well graded motor road. The States vary much in size and importance. The largest State is Kengtung with an area of 12,400 square miles and population 225,894.

Hsipaw with an area of 4,400 square miles and population 148,731 is the richest State with a gross revenue of Rs 10,62,418.

The Sawbwas of Kengtung, Hsipaw, Yawnghwe and Mongnai have salutes of nine guns while the Mong Mit Sawbwa has a personal salute of the same number.

Administration

Under the Burma Laws Act, 1898 the Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the sanction of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British India. The

customary law may be modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and proceedings of such officers. The chiefs are bound by their sanads to follow the advice of the Superintendents appointed but subject to certain modifications which have been made in the customary law relating to criminal and civil justice have more or less maintained the semi-independent status which was found existing at the annexation of Upper Burma.

In 1920, Sir Reginald Craddock, Lieutenant Governor of Burma, proposed a scheme for the sanction of the Secretary of State under which the Chiefs of the Northern and Southern Shan States have agreed to federalise the departments of Government in which they had been previously largely dependent on contributions from the Provincial Funds. Under this scheme no interference is contemplated in the internal management of the States and the Chiefs continue to collect their taxes and be responsible for law and order, maintain Courts for the disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superintendents. But the Federation is responsible for the centralised Departments of Public Works, Medical, Forests, Education, Agriculture and to a small extent Police. In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Provincial Government surrenders to the Federation all provincial revenue previously derived from the States to enable it to maintain its services at the same degree of efficiency formerly enjoyed. The Federation on the other hand makes a payment of a fixed proportion of its revenue to the Provincial Treasury in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub entity of the Burma Government, is self contained and responsible for its own progress. The Chiefs express their views on Federal and

general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawbwa and four elected representatives of the lesser Chiefs. The Superintendents, Northern Shan States and the Commissioner of the Federated Shan States to whom the supervision of the Federation has been entrusted are *ex-officio* members of the Council. The scheme was sanctioned and brought into force with effect from October 1922. The first meeting of the Council of Chiefs was formally opened by His Excellency the Governor Sir Spencer Harcourt Butler G C I F, K C S I, I C S, in March 1923.

Karenni

This district which formerly consisted of five States now consists of three as two have been amalgamated with others. It has a total area of 3,015 square miles and a population of 58,761. It lies on the south of the Southern Shan States between Siam and the British district of Toungoo. The largest State is Kantawadi with an area of 3,000 square miles and a population of 30,677 and a revenue of nearly 14 lakhs of rupees. More than half of the inhabitants are Red Karens. An Assistant Political Officer is posted at Loikaw subject to the supervision of the Superintendent, Southern Shan States, who exercises in practice much the same control over the Chiefs as is exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contributions from Provincial revenues have been made to the Karenni Chiefs for education and medical service. The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing so.

The principal wealth of the country used to be in its teak timber and a large alien population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

JAMMU AND KASHMIR STATE.

The territory known generally as the Jammu and Kashmir State, lies between 32° and 37° N and 73° and 80° E. It is an almost entirely mountainous region with a strip of level land along the Punjab border, and its mountains, valleys and lakes comprise some of the grandest scenery in the world. The State may be divided physically into three areas, the upper, comprising the area drained by the River Indus and its tributaries, the middle, drained by the Jhelum and Kishtenganga Rivers, and the lower area consisting of the level strip along the southern border, and its adjacent ranges of hills. The dividing lines between the three areas are the snow bound inner and outer Himalayan ranges known as the Zojila and the Panchal. The area of the State is 84,258 square miles. Beginning in the south where the great plain of the Punjab ends, it extends northwards to the high Karakoram mountains. Where three Empires Meet.

Briefly described, the State comprises the valleys of the three great rivers of Northern India viz the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 36,45,000 souls.

History—Various historians and poets have left more or less trustworthy records of the history of the valley of Kashmir and the adjacent regions. In 1586 it was annexed to the Moghul Empire by Akbar. Srinagar, the capital, originally known as Pravarapura, had by then been long established, though many of the fine buildings said to have been erected by early Hindu rulers had been destroyed in the fourteenth century. In the reign of Sikandar, who was a contemporary of Pamerlane, a large number of Hindus was converted to Islam. Jahangir did much to beautify the Valley, but after Aurangzeb there was a period of disorder and decay and by the middle of the eighteenth

century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country experienced the oppression of Afghan rule until it was rescued in 1819 by an army sent by Maharaja Ranjit Singh. The Sikh rule was not more beneficial to the people than that of the Afghans. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singhji, a son of the old Ruling Family of Jammu who rose to prominence in the service of Maharaja Ranjit Singh of Lahore and was in recognition of his distinguished services made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikhs only appearing as mediator after the battle of Sobran (1846) when the British made over to him the Valley of Kashmir and certain other areas in return for his services in re-establishing peace. His son His Highness Maharaja Ranbir Singhji a model Hindu and one of the staunchest allies of the British Government ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontier districts. He was succeeded by his eldest son, His Highness Maharaja Sir Pratap Singhji, who died on 23rd December 1925 and was succeeded by His Highness the present Shri Maharaja Hari Singhji Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the Land Revenue Settlement originally carried out under Sir Henry Lawrence and revised from time to time.

Administration—For some years after the accession to the rule of the late Maharaja the administration of the State was conducted by a Council over which the Maharaja presided. In 1905 this Council was abolished and the administration of the State was thenceforward carried on by His Highness the Maharaja with the help of a Chief Minister and a number of Ministers in charge of different portfolios. This system continued until the 24th January 1922, when an Executive Council was inaugurated. Very recently certain modifications have been introduced in the constitution.

The British Resident has his headquarters at Srinagar and Sukkot and there is also a Political Agent at Gilgit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India, which passes through Kashmir.

In the Dogras (Hindus and Muslims) the State has splendid material for the Army which consists of 8,600 troops. Besides these thousands of Dogras serve in the Indian Army.

Finance—The financial position of the State is strong. The total revenue including Jagers is about 2,70,00,000. The chief sources being land forests, customs and excise and Agriculture. There is a reserve and no debt.

Production and Industry—The population is pre-eminently agricultural and pastoral. The principal food crops are rice, maize and wheat. Oilseed is also an important crop. Barley, cotton, saffron, tobacco, beans, walnuts, almonds and hops are also grown. Pears and apples the principal fruits of the Valley are exported in large quantities. The State forests are extensive

and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests occur in Kishtwar, Karnah and Kamraj Illaqs. A survey of the mineral resources of the State is being conducted. The most noteworthy of the minerals expected to be found in the State are bauxite, coal, fuller's earth, kaoline, slate, zinc, copper and tile. Gold is found in Baltistan and Gilgit, sapphires in Paddar, aquamarines in Skardu and lead in Uri. The silk culture in Srinagar is the largest of its kind in the world. Manufacture of silk is a very ancient industry in Kashmir. Zain ul Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan and settled them here. Woollen cloth, shawls, carpets, paper machine and wood carving of the State are world famous. The State participated in the British Empire Exhibition of 1924. The Kashmir Court was styled The Gem of The Smaller Courts and attracted many visitors. An Industrial and Agricultural Exhibition is held in the State annually, where the products of indigenous arts and craftsmanship for which Kashmir is famous are displayed. His Highness Government are maintaining a Visitors Bureau at Srinagar for the convenience of visitors, who are attracted by the scenery and charm of the beauty spots of Kashmir.

Communications—Great efforts have been made and are being made towards the improvement of roads for wheeled traffic in the State. The Jhelum Valley road (190 miles) which links the Kashmir Valley with the Punjab and the North Western Frontier Province is considered to be one of the finest motorable mountain roads in the world.

The Banihal Cart Road, 205 miles long, joins Kashmir with the North Western Railway system at Jammu Tawi and is also a fine motorable road.

Roads for pack animals lead from Srinagar, the summer capital of Kashmir to the frontier districts of Gilgit and Ladakh. Internal village communications have also been much improved.

The Jammu Srinagar Railway, a section of the Wazirabad Sukkot branch line of the North Western Railway system is the only Railway in the State. The mountainous nature of the country has so far prevented the extension of the line into the heart of the State.

Public Works—In 1904 a flood spill channel above Srinagar was constructed to minimise the constant danger of floods in the River Jhelum. A number of canals have been constructed at considerable expense both in Jammu and Kashmir. The State has been recently connected with the telephone system of British India. An aerodrome has been constructed five miles from Srinagar and it is hoped that in a few years a service between Lahore and Delhi and Kashmir will be established. Good progress has been made with irrigation but the most important scheme of recent years has been the installation of a large Electric Power Station on the Jhelum River and Mahora which was completed in 1907. The bridge over the Chenab at Aknur which was completed in 1935 at a cost of Rs. 4 lakhs, has the longest unsupported span in India.

Education—According to the last census of the State, there were 1,23,800 persons able to read and write of whom 9,000 only were females. In other words, four per cent of all persons aged 5 or more could read and write. Among males 60 in every 1,000 persons could read and write. The number of educational institutions including two Arts colleges is 1,336. The number of scholars in 1933-34 was 85,616. Nearly 28 per cent boys and 6 per cent girls of the school going age were at school. In Municipal areas education for boys has been made compulsory since 1929.

Reforms—One of the important reforms connected with the present Maharaja's reign

has been the establishment of an independent High Court of Judicature modelled on British High Courts. Important legislative measures passed by His Highness's Government in recent years include the raising of the age of marriage to 14 for girls and 18 for boys and the Agricultural Labour Regulation meant to cope with the problem of rural indebtedness.

As sign of constitutional progress of the State may be mentioned the freedom granted to the press and the introduction of the State Assembly. Over 30 newspapers are in existence in the State and the Assembly which has a non-official majority has already held three sessions during a year and a half of its existence.

THE CHAMBER OF PRINCES

The Narendra Mandal, or Chamber of Princes came into existence, with the earnest co-operation of a number of leading Princes themselves as one of the results of the Report on Indian constitutional reform presented to Parliament by Mr Montague, Secretary of State for India and H. E. Lord Chelmsford, Viceroy and Governor General of India, in 1919. The proposal was that the Chamber should exist as a permanent consultative body, with the Viceroy as President and the members composing the Chamber consisting mainly of the Princes and Chiefs having salutes, or whose membership might otherwise be considered desirable by the Viceroy. Certain smaller Chiefs were grouped and were given the privilege of nominating a member to represent them from year to year. The Chamber is a recommendatory body, which performs its functions under a constitution approved by the Secretary of State and it deals with questions submitted to it concerning the Princes and their rights and privileges generally and their position in Imperial affairs.

The Chamber was formally inaugurated by H. R. H. the Duke of Connaught on 8th February 1921. It meets regularly once a year and the agenda of subjects for discussion is framed and proposed by the Chancellor of the Chamber who at present is His Highness the Maharaja of Patiala. The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of India and a Standing Committee of the Chamber. This Committee considers before the annual meetings the subjects to be discussed at them.

Until 1929, the proceedings of the Chamber were considered as confidential and there was no admittance of the general public to its meetings. At the annual session in February 1929, the Princes passed a resolution by which all meetings were ordinarily made open to the public. The Chamber contains very restricted accommodation and admission has to be regulated according to the number of seats available.

The most important question which the Chamber has ever discussed is Federation. This subject came before it on various occasions after the Princes' representatives at the first Round Table Conference, in connection with the latest Constitutional Reforms scheme made a pronouncement in favour of Federation which

led to the incorporation in the new Reforms Legislation of provisions for its establishment. The consideration of this great issue though sometimes taking place in open debate has for the most part been conducted at meetings of the Standing Committee of the Chamber which always meets in private at informal meetings of the Princes with or without their Ministers and in an important Committee of Ministers. This latter body has been representative of all the States including those whose Rulers have never exercised the privilege of sitting in the Chamber.

Federation caused sharp divisions of opinion among the Princes. Meanwhile as the constitution of the Chamber provided for each State Member exercising one vote on any question coming before the Chamber, power in the Chamber gradually fell into the hands of a majority representing the smaller States because these States were naturally the readiest to exercise their membership privileges. This development caused serious dissatisfaction among the Greater States and out of that sprang a movement for the reorganization of the Chamber.

The differences between the Greater States and the Lesser States were much sharpened by the different viewpoints which they occupied in regard to Federation. His Highness of Patiala early in 1936 resigned the Chancellorship on this account. Thereafter His Highness of Bikaner resigned from one Standing Committee of the Chamber. Only one Indian Prince with a salute as big as 17 guns was then left inactive participant in the Chamber's affairs. His Highness of Patiala was succeeded in the Chancellorship by His Highness of Dholpur, who automatically proceeded to the appointment from that of pro-Chancellor. There was no meeting of the Chamber in 1936. His Excellency the Viceroy in consultation with the Princes, convened a meeting commencing on 2nd February, 1937.

This meeting was preceded by intensive discussions in the Informal Conferences of Princes. Then His Highnesses at discussions which they held in Bombay in October 1936 appointed a Constitution Committee under the Chairmanship of His Highness the Maharaja of Patiala and including the Chancellor to examine the Government of India Act of 1935 from the point of view of the States' entry into Federation.

This Committee produced its report in the first week of February, 1937, and in the course of it said that upon careful consideration of the Act they had come to the conclusion that the safeguards have been substantially met and that certain further recommendations now newly made by themselves would, if adopted, completely fulfil them. These recommendations, the Committee said, had been drafted in consideration of the fact that the Act had already been passed. They comprised, therefore, four proposed changes in the States Draft Instrument of Accession.

This report was taken into consideration by the general body of Princes in their Informal Conference. At the same time as His Highness the Chancellor brought it before that body, he also laid before it an Opinion upon the same subject by Counsel whom the Standing Committee of the Chamber had recently engaged from London. This Opinion was a lengthy document and in effect amounted to a warning to the Princes against the risks in which entry into Federation would involve them. Its receipt led to its urgent examination by other expert advisers to the general body of Princes. Their criticisms of it were destructive. A

further Opinion in favour of Federation was at the same time independently given to the Princes, at the request of His Highness of Patiala, by the Right Hon. ble Sir Tej Bahadur Sapru.

The upshot of all this was that under the leadership of the Maharaja of Patiala the Informal Conference adopted the report of the Constitutional Committee in favour of the entry into Federation on the basis of the Government of India Act 1935 and subject to the satisfactory conclusion of negotiations with the Crown on the subject of the Constitutional Committee's newly made recommendations. This decision was endorsed in a formal meeting of the Chamber of Princes on 24th February by the re-election of His Highness of Patiala to the Chancellorship by an overwhelming majority, and by the election of a pro-Chancellor and Standing Committee in sympathy with the same decision.

This brought the Princes of the Chamber into line with the recommendations already made by the Committee. States Ministers and left final negotiations on the Accession issue to be completed in London during the summer of 1937.

Indian States' Tribute.

Many of the States pay tribute, varying in amount according to the circumstances of each case, to the British Government. This tribute is frequently due to exchanges of territory or settlement of claims between the Governments, but is chiefly in lieu of former obligations to supply or maintain troops. The actual annual receipts in the form of tribute and contributions from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States of Kathiawar and Gujarat pay tribute of some kind to Baroda, and that Gwalior claims tribute from some of the smaller States of Central India:—

States paying tribute directly to the Government of India

	£		£
Tribute from Jaipur	26,667	Assam	
" " Kotah	15,648	Tribute from Manipur	30
" " Udaipur	13,333	" " Rambrai	7
" " Jodhpur	6,533	" " Benqal	
" " Bundi	8,000	Tribute from Cooch Behar	4,514
" " Other States	15,170	United Provinces	
Contribution of Jodhpur toward cost of Erinpora Irregular Force	7,667	Tribute from Benares	14,600
" of Kotah towards cost of Deohi Irregular Force	13,333	Punjab	
" of Bhopal towards cost of Bhopal Levy	10,753	Tribute from Mandi	6,667
" of Jaora towards cost of United Malwa Contingents	9,142	" " other States	3,086
Contributions towards cost of Malwa Bhil Corps	2,280	Madras	
		Tribute from Travancore	53,333
		Peshkash and subsidy from Mysore	235,333
		" " " " Cochin	13,333
		" " " " Travancore	888
		Bombay	
Central Provinces and Berar		Tribute from Kathiawar	31,126
Tribute from various States	15,096	" " various petty States	2,825
Burma		Contribution from Baroda States	25,000
Tributes from Shan States	28,524	" " Jagirdars, South	
" " other States	1,367	ern Mahratta Country	5,765
		Tribute from Cutch	5,484

It was announced at the Coronation Durbar of 1911 that there would in future be no Nazarana payments on successions.

Foreign Possessions in India.

Portugal and France both hold small territorial possessions in the Indian Peninsula.

The Portuguese possessions in India, all of which are situated within the limits of Bombay Presidency, consist of the Province of Goa on the Arabian Sea Coast, the territory of Daman with the small territory called Pragana Nagar

Avely on the Gujarat Coast at the entrance to the Gulf of Cambay, and the little island of Diu with two places called Gogla and Simbor, on the southern extremity of the Kathiawar Peninsula. All these three territories constitute what is called the State of India.

GOA

Goa forms a compact block of territory surrounded by British districts. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats which separates it from the British districts of Belgaum and North Kanara. The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 square miles and consists of the *Velhas Conquistas*, or Old Conquistas comprising the island of Goa acquired by the Portuguese in 1510 and the neighbouring municipalities of Salsette, Bardez and Mormugao acquired in 1543, and of the *Novas Conquistas* or New Conquistas, comprising the municipalities of Pernem, Sanguelim, Ponda, Quepem, Canacona, Satari and Sanguem acquired in the latter half of the 18th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion the predominating physical feature being the Western Ghats which bounds the country along the north-east and south-east just off westward and spread across the country in a succession of spurs and ridges. There are several conspicuous isolated peaks of which the highest, Sonsagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats and the principal light, which are all navigable, are in size of some importance. Goa possesses a fine harbour, formed by the promontories of Bardez and Salsette. Half way between these extremities lies the *cabo* or cape which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and sea and to the formation of sand bars across the estuary of the Mandovi river, which opens into Aguada. Mormugao is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines. A breakwater and port have been built there and the trade is considerable being chiefly transit trade from British territory.

The People

The total population of Goa was 531,952 at the census of 1921. This gives a density of 408 persons to the square mile and the popula-

tion showed an increase of 9 per cent since the census ten years previously. In the Velhas Conquistas the majority of the population is Christian. In the Novas Conquistas Hindus are more numerous than Christians. The Moslems in the territory are numbered in a few thousands. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chudros and low castes which do not intermarry. The Hindus who form about one half of the total population are largely Maratha and do not differ from those of the adjacent Konkan districts of Bombay. All classes of the people with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words. The official language is Portuguese which is commonly spoken in the capital and the principal towns as well as by all educated people. Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the title of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India and the provinces of Macau (China) and Timor (Oceania) with missions in foreign countries and Mozambique (Portuguese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed in 1923 to Portugal and the Holy See to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the religious orders in Portuguese territory. The churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The Country

A little over one third of the entire territory of Goa is stated to be under cultivation. The fertility of the soil varies considerably according to quality of situation and water supply. The Velhas Conquistas are as a rule better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two thirds of the year. Next to rice, the culture of coconut palms is deemed most important, from the variety of uses to which the products are applied. Hilly places and inferior

oils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen. Statly forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory, but has not been seriously worked. Manganese also exists and some mines are being worked at present, the ore being exported to the Continent.

Commerce

In the days of its glory Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs. 160 lakhs and exports to about Rs. 40 lakhs. The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports chiefly consist of coconuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway. Its length from Mormugao to Castle Rock above the Ghats where it joins the British system is 51 miles of which 49 are in Portuguese territory. The railway is under the management of the Madras and Southern Mahratta Railway administration and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The telegraphs in Portuguese territories are worked as a separate system from the British. The latter however had an office at Nova Goa maintained jointly by the two Governments but since 1925 the Nova Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories.

Taxes and Tariffs

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the Governor General Jaime de Morais who is popularly known as the Governor of Taxes. Only in 1927 the country experienced the joys of a balanced budget and the public servants whose salaries had always remained in arrears are now being paid regularly. There is an estimated surplus of about a lakh and a half which has been earmarked for promoting the indus-

trial progress of the country. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 8.8 per capita. There is no income tax, except for government servants but there is a special ten per cent tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, excise, and the customs. There is a special tax on emigrants which yields to the State about Rs. 60,000. The country being economically backward the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential. There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent according to the nature of the commodities, but the duties in several cases are specific not *ad valorem*. This causes considerable hardship to trade and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portuguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent on their basic price.

The Capital

Nova Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar. Old Goa is some six miles distant from the new city. Panjim occupies a narrow strip of land leading up to the Cabo da Cape dividing the Aguada bay from that of Mormugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Viceroy in 1759, and in 1843 it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Government Press. Other noticeable buildings are the Cathedral and various churches, the viceregal palace and the High Court. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

History

Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510. Albuquerque promptly fortified the place and established Portuguese rule on a firm basis. From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bijapur kingdom but the Portuguese held their own and gained the surrounding territory now known as the Velhas Conquistas.

The subsequent history of the town is one of ostentation and decay. Goa reached its summit of prosperity at the end of the sixteenth century. The accounts of travellers show that the Goa of those days presented a scene of military, ecclesiastical and commercial magnificence which has had no parallel in the British capitals of India. Portugal, however, with its three millions of population, was too small to defend itself against Spain and maintain at the same time its immense empire in the four Continents. Albuquerque tried to consolidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties. His contemporaries however could not understand his far seeing statesmanship and after his death they undid all his work basing their dominion on conquest by the sword and military force and they laboured to consolidate it by a proselytising organisation which throws all the missionary efforts of every other European power in India into the shade. Old Goa, as the ruins of the old capital are called to day, had a hundred churches many of them of magnificent proportions and the Inquisition which was a power in the land. The sixty years subjection to Spain in the 17th century completed the ruin of the Portuguese Empire in the East and though the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the colonials began to enjoy full Portuguese citizenship and sent their representatives to the Parliament in Lisbon.

Modern Times

There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay. In 1852 the Ranes of Safari in the Novas Conquistas revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the trouble and having done so disbanded the native army, which has never been reconstituted. But another outbreak among the troops took place in 1895 and the Ranes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912 troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1913. There has been no outbreak after that date.

The people on the whole appear to be quite satisfied with the Portuguese connection. There is no agitation for further reforms as in British India and not a sign of disaffection against Portuguese rule. This is chiefly due to the fact that under the present regime the natives of Goa enjoy complete equality with the natives of Portugal, many of the sons of Goa occupying high

and responsible positions in Portugal. Thus Elvino de Brito who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Bittencourt Rodrigues, Minister for Foreign Affairs in General Carmona's dictatorial Government. Natives of Goa are also Dr. Almeida Azes, the President of the Supreme Court in Lisbon, Dr. Caetano Gonsalves, Judge of the same Court and Mr. Alberto Xavier, Secretary General of the Ministry of Finance.

Administration

The Lisbon Government by Decree No. 3260, dated 27th July 1917, enacted new rules regarding the administration of Portuguese India under an Organic Charter (*Carta Organica*) in force since 1st July 1919. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920, and decrees Nos. 7008 and 7030 dated 9th and 16th October. A new Organic Charter modifying in certain parts the earlier one was granted by Decree No. 12499 of 4th October 1926 and is now in force.

The territory of Portuguese India is ruled by one Governor General, residing in the Capital of the State at Panjim *alias* Nova Goa and is divided into three districts: Goa, Daman and Diu. The last two are each under a Lieutenant Governor. The district of Goa is under the direct superintendency of the Governor General.

Subordinate to the Governor General the following Secretariats are working: Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works. There are also three special and autonomous Departments which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the V. I. P. Railway.

As the principal organ of administration next to the Governor General and in collaboration with him works a Governor's Council (*Conselho do Governo*) with Legislative and advisory powers. The Council is constituted in addition to the Governor General *ex officio* President of four officials (Attorney General, the Director of Finances, the Director of Civil Administration and the Director of Public Works) five elected members (three representing *Vilhas Conquistas* one the *Novas Conquistas* and one the Districts of Daman and Diu) and five members nominated by the Governor General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Diu there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goa is composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova Goa Civil Court, the Deputy Chief Health Officer, the Engineer next to the Director of Public Works, the Deputy Director of Finances, the Chairman of the Municipal Corporation of the Islands, one member elected by the Commercial and Industrial Associations of the district, one member elected by the 60 highest tax payers of Goa, one member elected by the Associations of Land owners and Farmers of the District, and one

member advocates elected by the Legislative Council among the legally qualified.

There is one High Court in the State of India with five Judges and one Attorney General, and

Courts of Justice at Panjim, Margao, Mapuca, Bicholim, Quepem e Damão, and Municipal Courts of Justice at Mormugão (Vasco da Gama), Pondi, Diu and Nagar Aveli

PORT OF MORMUGAO

Mormugao is situated towards the south of Aguada Bar, on the left Bar, on the left bank of Zuari River in Lat. 15° 25' N and Long 73° 47' E, about 225 miles south of Bombay and 6½ miles south of Panjim, the Capital of Portuguese India. The Port of Mormugao is the natural outlet to the sea for the whole area served by the M & S M Ry (metre gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormugao is about the same as from Aden to Bombay. The Port is provided with light houses, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compulsory, but when usual pilot flag is hoisted, a qualified officer will board the vessel and render

such assistance.

Mormugao Harbour is the terminal station of the West of India Portuguese Railway which is controlled by the Madras and Southern Mharatta Railway Company, with headquarters at Madras.

With a view to promoting the economical, commercial and industrial development of Mormugao, a special Department under the designation of the 'Mormugao Improvement Trust' with its head office at Vasco da Gama, 2 miles from Mormugao Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour.

DAMAN

The settlement of Damam lies at the entrance to the Gulf of Cambay about 100 miles north of Bombay. It is composed of two portions, namely, Damam proper, lying on the coast, and the detached pargana of Nagar Aveli separated from it by a narrow strip of British territory and bisected by the B B & C I Railway. Damam proper contains an area of 22 square miles and 26 villages and has a population (1921) of 17,566 of whom 1,480 are Christians. The number of houses is according to the same census 4,095. Nagar Aveli has an area of 60 square miles and a population (1921) of 31,043, of whom only 271 are Christians. The number of houses is 6,069. The town of Damam was sacked by the Portuguese in 1531 rebuilt by the natives and retaken by the Portuguese in 1558 when they made it one of their permanent establishments in India. They converted the mosque into a church and have since built eight other places of worship. The native Christians adopt the European costume, some of the women dressing themselves after the present European fashion, and others following the old style of petticoat and mantle once prevalent in Spain and Portugal.

The soil of the settlement is moist and fertile, especially in Nagar Aveli but despite the ease of cultivation only one twentieth part of the

territory is under tillage. The principal crops are rice, wheat, the inferior cereals of Gujarat and tobacco. The settlement contains no minerals. There are strictly forests in Nagar Aveli, and about two thirds of them consist of teak, but the forests are not conserved and the extent of land covered by each kind of timber has not been determined. Before the decline of Portuguese power in the East, Damam carried on an extensive commerce especially with the east coast of Africa. In those days it was noted for its dyeing and weaving.

The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor General of Goa. The judicial department is administered by a judge, with an establishment composed of a delegate of the Attorney General and two clerks. In Nagar Aveli the greater part of the soil is the property of the Government, from whom the cultivators hold their tenures direct. A tax is levied on all lands, whether alienated or the property of the State. The chief sources of revenue are land tax, forests, excise and customs duties.

DIU

Diu is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Diu proper (island), the village of Gogla, on the Peninsula separated by the channel, and the fortress of Simbor, about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely ride at anchor in two fathoms of water and owing to the great advantages which its position offers for trade with Arabia and the Persian Gulf, the Portuguese were fired at an early period with a desire to obtain possession

of it. This they gained, first by treaty with the Sultan of Gujarat and then by force of arms. Diu became opulent and famous for its commerce. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name, is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the census of 1921, is 13,844, of whom 228 were Christians.

FRENCH POSSESSIONS

The French possessions in India comprise five Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 26th Feb 1931 of 286,410. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first Compagnie d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Compagnie, or agency, at Surat. But on finding that city unsuited for a head establishment, he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee, and Caron, passing over to the Coromandel coast in 1672, seized St. Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was, however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomalee and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and a trade began to spring up, but he was unable to hold the town against the Dutch, who wrested it from him in 1693 and held it until it was restored to the French by the Peace of Ryswick, in 1697. Pondicherry became in this year and has ever since remained the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was purchased by a European Company from a native prince, and what Job Charnock was to Calcutta, Francois Martin proved to Pondicherry. On its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688 by grant from the Delhi Emperor, Mahé, on the Malabar Coast was obtained in 1725, under the government of M. Lenoir, Karikal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars was taken possession of in 1750, and formally ceded to the French two years later.

Administration.

The military command and administration in chief of the French possessions in India are vested in a Governor, whose residence is at Pondicherry. The office is of present held by

Monsieur Solomiac (Léoz). He is assisted by a Chief Justice, and by several Chefs de Service in the different administrative departments. In 1879 local councils and a council general were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities, or Communal Boards, were created in 1907, namely, Pondicherry, Ariancoupan, Modchareth, Oulgaret, Villenour, Irourbouane Bahour and Nettapacam, for the establishment of Pondicherry, Karikal, Neravy, Nidoundadon, Tirunalar Grande Aldée, Cotchery for the establishment of Karikal, and also Chandernagore, Mahé and Yanaon. On municipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry and those of administrators at Chandernagore, Yanaon, Mahé and Karikal together with other headquarters charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four dependent ones have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthily maintained in the East. Pondicherry is also the scene of considerable religious pomp and missionary activity. It forms the seat of an Archbishop with a body of priests for all French India, and of the Missions Étrangères, the successors of the Mission de Carnatic founded by the Juits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of railway running via Villenour from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karika is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914. The capital Pondicherry, is a very handsome town, and presents, especially from the sea a striking appearance of French civilisation.

People and Trade

The Settlements are represented in Parliament at Paris by one senator and one deputy. The Senator is Mons. Lemoigne. The Deputy is Mons. Pierre Dupuy. There were in 1932 59 primary schools and 3 colleges all maintained by the Government, with 308 teachers and 9,263 pupils. Local revenue and expenditure (Budget of 1934) Rs. 3,284,873. The principal crops are paddy, groundnut, and ragi. There are at Pondicherry 3 cotton mills, and at Chandernagore 1 jute mill. The cotton mills have, in all 1,661 looms and 71,744 spindles, employing 7,450 persons. There are also at work one oil factory and a few oil presses for groundnuts, and one ice factory. The chief exports from Pondicherry are oil seeds

At the ports of Pondicherry and Karikal in 1934 the imports amounted to frs 104 282,000 and the exports to frs 119 331 000. At these two ports in 1934 11,290 vessels entered and cleared, tonnage 144,100 T. Pondicherry is

visited by French steamers, sailing monthly between Colombo and Calcutta in connection with the Messageries Maritimes. The figures contained in this paragraph are the latest available and are corrected up to December 1934.

PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its capital is the head quarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram Pondicherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in the 26th Feb 1931 was 183 555. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under Francois Martin. In 1693, it was captured by the Dutch, but was restored in 1699. It was besieged four times by the English. The first siege under Admiral Boscawen in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea. The Collector of

South Arcot is empowered to deal with ordinary correspondence with the French authorities on these and kindred matters, and in this capacity is styled the Special Agent. At Pondicherry itself is a British Consular Agent accredited to the French Government, who is usually an officer of the Indian Army. The town is compact, neat and clean, and is divided by a canal into two parts, the Ville blanche and the Ville noire. The Ville blanche has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visitor of continental boulevards, and the houses being constructed with courtyards and embellished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw pile pier which serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondicherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual *masula* boats of this coast. Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

CHANDERNAGORE.

Chandernagore is situated on the bank of the Hooghly, a short distance below Chinsura. Population (in the 26th Feb 1931) 27,262. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1676. It did not, however, rise to any importance till the time of Dupleix. It changed hands between British and French various times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has

disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Railway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator who is subordinate to the Governor of the French Possessions. The chief public institution is the College Dupleix, formerly called St. Mary's Institution, founded in 1882 and under the direct control of the French Government.

KARIKAL.

Karikal lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate to the Governor at Pondicherry. The population has in recent years rapidly decreased. In 1883 it was 93,055, in 1891, 75,529, in 1901, 54,003, in 1923, 57,023. In 1924, 56,922, and in 1931, 57,914, but the density is still very high, being 1,063 persons per square mile. Kumbakonam is the only taluk in Tanjore District which has a higher density. Each of the six communes—namely, Karikal, La Grande Allee, Nedungadu, Cokeri, Neravy and Tirunelveli—possesses a mayor and council. The members are all elected by

universal suffrage but in the municipality Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on the north bank of the river Arasalar, about 1½ miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open roadstead, provided with a light-house 142 feet high, the light in which has a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralar on the Tanjore District Board Railway. Karikal finally came into French possession in the settlement after 1815.

The Frontiers.

By those who take a long view of politics in the wide sense of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a two fold character—the local issue and the international issue. For almost a century the international issue was the greater of the two, and the most serious question which the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times was for the international aspect to recede and for the local aspect to grow in importance, until it might be said with as much truth as characterises all generalisations, that the local issue dominated, if it did not absorb the situation.

The Local Problem—The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Nepal is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are poorly populated by hardy, brave, militant mountaineers, rendered the fiercer and the more difficult by professing the martial Moslem faith, accentuated by the most bitter fanaticism. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world these brave and fearless men have sought to eke out their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Nell Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations, and the Gomal Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan

in 1919. But speaking broadly, Sandeman brought peace to Baluchistan, and to the large frontier area which is embraced in that generic term. So far as this section of the frontier is concerned it may be said that no frontier problem exists, save the need for an economical and constructive policy.

Towards Afghanistan—Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That was, for three quarters of a century, the scene of almost ceaseless military operations, which constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan frontier would only shift the frontier problem farther north. Instead of the differing tribes, we should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwalis, and the Amir had to make peace with his troublesome vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Afghanistan instead of a tribe or two, and with the irreconcilable tribesmen along our difficult line of communications. The Kabul Government now have greater control over their tribes near the frontier than formerly but the old argument still applies. There was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover on this section of the frontier, the position was complicated by the

expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great invaders have swept from Persia and Central Asia to foot the fat plains of Hindustan, traverse this region. Therefore it was deemed essential to control, if not to occupy them, in the interests of the Imperial situation. In this zone therefore policy ebbed and flowed between the Forward School, which would have occupied, or dominated, the whole Frontier up to the Durand Line, that is to say up to the Afghan frontier, and the Close Border School, which would have us remain out of the difficult mountainous zone and meet the tribesmen on the plains if they sallied forth. The extreme advocates of this school would even have had us return to the line of the Indus.

The Two Policies — The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly unsatisfactory. We pushed forward posts here and there, which irritated the tribesmen, and made them fearful of their prized independence without controlling them. These advanced posts were in many cases inadequately held and rarely were they linked with their supporting posts by adequate means of communication. We preserved between our administrative frontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Independent Territory, in which neither we nor the Afghan Government exercised jurisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the perennial topics of Frontier discussions. But stress was laid upon the essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefs. There is no such tribal organisation in the Independent Territory. The tribal Chiefs, or *Mulliks*, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief but the *jirga* or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser greybeard. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the *Tochi* Valley the general uneasiness flamed into a rising which involved the whole of the North West Frontier, from the Gomal to the borders of Nepal. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation was unable effectively to deal with the situation, though peace was made. The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in masterful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the *Alcoran* of Lord Lytton, though no other

Viceroy had been able to carry it through, in the face of the strong opposition of successive Punjab Governments. The area so separated was constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commissioner. Then Lord Curzon withdrew the advanced military posts and concentrated the Regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the *Tochi*, the *Kurram* and the *Khyber*, were entrusted to the defence of local militia, recruited from the tribesmen themselves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, afterwards developed into the Swat Canal (*q v* Irrigation) led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole border line.

Lord Curzon's Success — Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace. There were occasional punitive expeditions demanded, such as for instance the *Zakka Khel* and *Mohmand* expeditions, and the *Waziris*, and in particular the truculent *Mahsud Waziris*, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the *Waziris* built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir *Habibullah Khan* was assassinated in his sleep near *Jelalabad*. Although he does not figure so prominently in frontier history as his iron father *Abdurrahman Khan*, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to *Abdurrahman Khan* could hold in the least of a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. Yet this *Habibullah* did. On occasions his attitude seemed to be equivocal, as when armed gatherings of the tribes called *lashkars* were permitted to assemble in Afghan territory and to invade the Independent Territory, causing the *Zakka Khel* and *Mohmand* expeditions. But we must not judge a State like Afghanistan by European standards, the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered on the war, and called Moslems everywhere to arms on the side of Germany was extraordinarily difficult, he received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed

his success was the cause of his assassination. The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove to avert the settlement of their account by the murder. When he was done to death, his brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the arch fanatic of the ruling House of Kabul, ascending the throne over the blood stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a *jehad* promised his soldiery the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dacca was seized, Jelalabad and Kabul were frequently bombed from the air and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overthrow a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, the Tribal Militia, left without the support of the regular troops, who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the failure of the Curzon policy, which was based on the tribal militia. But there is another aspect to this question. The Militia numbered only some 3,000 men. They were distributed in a number of isolated and semi isolated posts. There was no possibility of their withstanding the onslaught of an Afghan invading force. They were not intended for such a purpose. If they had, when the invasion began, been supported by regular troops their loyalty might have remained sound. But other counsels prevailed. It was at the outset decided in high military quarters that in the face of the Afghan invasion it was inadvisable to send regular troops to support the Waziristan militia posts as it was concluded that the Mohsud and Wazir tribes of Waziristan would join the enemy. Orders were therefore issued that the posts should be abandoned. The British officers in them withdrawing with such men as remained loyal. The officer commanding the Bannu brigade immediately despatched a movable column for the succour and reassurance of the militia garrisons in his area but superior orders followed directing the return of the column forthwith. The militia were thereupon ordered to withdraw and their commencement to do so, accompanied by the burning of such stores as they could not carry, quite naturally produced the instant uprising of the tribes-

men, who began to attack and loot the retreating convoys and to loot the abandoned posts. To expect the militia to remain firm in retreat in such circumstances was to refuse reasonable consideration of the facts of the situation.

Russia and the Frontier—The Curzon policy was up to this inevitable collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly three quarters of a century a valed warfare for predominance in Asia was waged between Great Britain and Russia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation, and with neighbours who would not let her alone, Russia had to advance. True, the adventurous spirits in her armies and some of the great administrators in the Tsarist capital were not adverse to paying off on the Indian Borderland the score against Great Britain for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilla enterprise between the hardest spirits on both sides accompanied by periodic panics in the British Press each time the Russians moved forward which induced the ceding, after the Russian occupation of Merv of the garric term *Mervousness*. This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retreating Indian force between Kabul and Jelalabad slightly relieved by the heroic defence of Jelalabad and the firmness of General Pollock in refusing to withdraw the punitive army until he had set his mark on Kabul by the razing of the famous Bab-i-Hisar fortress. It involved us in the second Afghan War of 1878, which left the baffling problem of no stable government in Afghanistan. There was a gleam of light when Abdurrahman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, it once ruthless in his methods. But in the early eighties the two States were on the verge of war over a squabble for the possession of Peshawar and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation without however finally settling it. The old controversy broke out in another form when intrigues with a Burjat monk, Dorjief, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. An expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Anglo Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked beyond their noses. The actual authors of the Agreement were Lord Grey, the Foreign Secre-

tary, and Lord Hardinge, formerly British Ambassador in Petrograd, but it had been desired by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a sea power in the decisive battle of Tsushima, that an atmosphere was created favourable to the conclusion of an Agreement. This embraced the whole frontier zone. There were many unsatisfactory features in the Agreement, especially in regard to Persia, for which we had to pay a considerable price in the attitude of Persians in the War. But again taking long views, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War. Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Oligarchy in Moscow, uneasiness has returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor, and the Soviet have a troublesome motive which the Tsars had not: their aim to produce world revolution is avowed and Britain and the Constitutionalism for which she stands are the greatest obstacles in their path.

German Influence—As nature abhors a vacuum so in the case of States bordered by other civilisations no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-Russian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manchuria, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul Hamid, at a time when that sovereign was ostracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His historical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructified more effectively in the Baghdad Railway concession, under which German interests secured the right of extending the Anatolian lines from the port of Haider Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties had declared that the acquisition of a territorial foothold in the Persian Gulf by any power—Russia and the port of Bander Abbas being then in view—would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured our relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise failed, and when the Revolution in Turkey which set the Committee

of Union and Progress in power entailed a temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourghaz, and constructed a line northwards from Baghdad to Samarra. They sent a mission to explore the possibilities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subordinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Basra to Koweit, or the vicinity of Koweit at the deep water inlet behind Bubiyan Island. They commenced the most difficult part of the work in piercing the Amanus and Taurus ranges by a series of tunnels, and laid the rails on the other side of the mountains across the Euphrates to Ras al Ain. Behind this railway activity stood a grandiose policy, which is indicated in what became known in Germany as "B B B"—Berlin, Byzantium, Baghdad. Through the progress of these schemes, which did not stop short of Baghdad, but were directed through a port in the Persian Gulf, at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German. But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

The Significance of the Baghdad Railway—The real significance of the Baghdad Railway was little appreciated in Great Britain. It was constantly pictured as a great trunk line, which would short circuit the traditional British dominance by sea, and absorb the passenger and goods traffic from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of passenger traffic from India is from April to June, in order to escape the hot weather in India, and the return traffic is spread over the period of from October to January. From April to June the heat in Mesopotamia is appalling. To imagine that the passenger traffic from India would turn from the easy and comfortable, as well as fairly expeditious sea route from Bombay to Marseilles and thence by the easiest railway travelling outside the British Isles to Calais and London, for such a land route was an amazing chimera. The Baghdad route would have involved a sea voyage from Bombay or Karachi to Koweit or Basra, then a journey across the burning plains of Mesopotamia and Asia Minor to Haider Pasha, then across the Straits to Constantinople, and finally right across Europe to a North Sea port. This would in any circumstances have been a costly freak journey in

comparison with the sea route. Then as for the commercial aspect of the line, the natural port of the Middle East is Basra. The sea freight from England or Germany to Basra was often less than half the freight from Basra to Baghdad. To imagine again that merchandise would desert this route for a land and sea route, which would have involved a double break of bulk at Constantinople and Haidar Pasha, was again a chimera.

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constantinople—and that Power the Teutons were resolved should be Germany—complete master of Asia Minor and The Middle East, and the route selected, often criticised, was the best for the rapid movement of troops to the strategic centres. As a commercial line the Railway, if completed, would have served three zones. The western area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. The eastern zone at Basra. The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg America corporation. They strove to obtain an actual footing in the Gulf through the German house of Woukhaus. The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg, that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East. These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of rebuilding their bankrupt State, deprived of the most intelligent section of the old population—the Greeks and the Armenians, by massacre and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction of the through line is only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion when the project of the through route is revived, as it must be.

Turkey and the Frontier—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the *avant courier* of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the administration, it is understood, never paid

its way. For a brief period Midhat Pasha raised the status of Mesopotamia and after the Revolution that fine soldier Nazim Pasha became a power in the land. But speaking broadly Turkey remained in Mesopotamia because it was no one's interest even that of the Arab, to turn her out. When however Germany developed her 'B B B' policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al Katrin in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a *de facto* suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al Katrin was always very precarious. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by *coup de main*, with very inadequate forces and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Russian *debacle* we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaff. But the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite frontiers. This enabled the Turks if they were so disposed, to be troublesome through guerrilla warfare in the Mosul zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue the frontier between Turkey and Irak. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to The League of Nations. Negotiations were promptly opened at Constantinople but it was immediately found that there could be no mutual agreement. The Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak. The issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot. This commission reported that the best settlement would be for the Mosul vilayet to be incorporated in Irak, if the British Government were prepared to prolong its mandate over that State for a period of twenty five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of the League unanimously allotted the Mosul vilayet to Irak. The Turkish delegates, who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions. So the matter rested at the end of the year, with Irak in occupation of the disputed up to the temporary frontier,

which was known as The Brussels Line. After at first breathing nothing but armed resistance to acceptance of the award, the Turks afterwards assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression accepted the frontier line demarcated by the League.

France and the Frontier—If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling station at Maskat in the Persian Gulf, and her long opposition to the steps necessary to extirpate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite purpose in it than a general pin pricking policy, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments were slowly removed one by one after the conclusion of the Anglo French Entente. Far otherwise was it in the past. The consolidation of French authority in French Indo China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burma. We were established in Lower Burma in the thirties and in the eighties the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule. Far other wise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma, then a regular Province of the Indian Empire and French Indo China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between the two States. But as in the case of Pendjeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the two Powers, which secured the independence and integrity of Siam. That agreement has been consolidated by wise and progressive rule in Siam itself, under its own independent sovereign, who is imbued with a strong friendship for Great Britain, whilst at the same time maintaining good relations with French neighbours.

The New Frontier Problem—The whole purpose of this brief sketch has been to show that for three generations—most assuredly since

the events leading to the Afghan War of 1838—the Indian frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route and to a much lesser extent by the ambitions of France and Turkey. The circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. And, generally, conditions have become more like those normal to critical land frontiers anywhere in the world in this present time of swift communications, aerial operations and easy propaganda. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman was always an opponent to be respected. Brave, hardy, fanatical he has always been a first class fighting man. Knowing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearguards and given them an infinite of trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagonist. Now the tribesmen are everywhere armed with magazine rifles, either imported through the Persian Gulf when gunrunning was a thriving occupation stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The Afghan regular army was of little account. The tribesmen who rose at the call of the jihad, especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier, their marksmanship and fire discipline were described by experienced soldiers as admirable. The tribal militia for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in Waziristan. This sector of the Frontier has always been the most difficult of the whole, because of the intractable character of the people and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completely independent State, there were many who urged the desirability of complete withdrawal, even to the line of the Indus. This extreme school gained little support. Our position in Quetta on the one side and Peshawar on the other is fully consolidated, and no good case could be made out for withdrawing from it. On the other hand,

there was a strong case made out for leaving the tribesmen severely alone from the Gomal to the Kurram, and dealing with them if they emerged from their fastnesses. The military standpoint was that the Waziristan tribes are intractable, that it was unfair to impose on troops the frequent necessity of punitive operations in most arduous conditions, and that the only solution of the question was the occupation of dominant points in Waziristan as far north as Ladhia, and linking these posts with our military bases, and particularly with the termini of the Indian frontier railways, by good motor roads.

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922 when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppression of the tribal outbreak which the Afghans stirred up in support of their invasion of India in 1919. The ensuing policy has been aptly described as the half-forward policy. It is in truth a repetition of the Bandman policy adapted to local conditions. There has been no withdrawal in the ordinary sense of the term, but the limit of the North Waziristan occupation was temporarily fixed at Ramrak, not at Ladhia. A network of consequential roads was pushed forward; its elaboration continues. In South Waziristan,

Wana has been re-occupied, partly in response to a pressing invitation from the Wana Wazirs, because they wanted to share the benefits which they saw British occupation to be bringing to their cousins northward of them. In February, 1933, control over tribal territory was pushed forward beyond Razmak towards the Afghan border because of a rebellion on the Afghan side and of the need to assist the King of Kabul by preventing excursions by bodies of Wazirs into His Majesty's disturbed territory. The work of control and of civilization rapidly progressed in the whole territory. Of this particulars are given on 23 and following pages. One of its recent fruits was a request by the Afghans for roads in their country of Tirah. A beginning with construction was made, but dissensions within the tribe in regard to it caused the work to be suspended. The desirability of better controlling the Afghans was demonstrated in 1930 when, incited by Congress party agents from India, the young Afghans invaded the Peshawar Plain and the need for the adoption of a more active policy in Waziristan was shown by arising of the Loni Khel Wazirs in 1936. A trouble which has not yet been flattened out.

The main Indian rail head, which for many years terminated at Jamrud at the easterly entrance to the Khyber Pass, was in the autumn of 1925 extended to Landi Khana, at the opposite end of the Pass and within a mile of the frontier between India and Afghanistan.

I.—THE PERSIAN GULF.

From what has gone before it will be seen that the keynote of this discussion of Indian frontier policy is that the external menace has largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the super-session of the land by the sea route, and the appearance of anarchy in the interior, the importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work is quietly and efficiently performed. Piracy was stamped out by the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward and our consuls regulated the external affairs of the Arab rulers on the Arab coast. In return for these services Great Britain claimed no selfish advantages. The waters of the Gulf were kept free to the navigation of the ships of all nations, and though Great Britain could have made any territorial acquisitions she pleased she retained possession of only the tiny station of Bassidu. Left to herself Great Britain desired no other policy, but for a quarter of a century the Gulf was involved in European affairs. France sought to acquire a coaling station at Jissa, near Maskat, and obstructed the efforts of the British Government to stamp out the slave

trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to 'show the flag' in the Gulf, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abbas. This menace declined after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Russian power following the Revolution. Then Turkey, either acting for herself, or as the *avant courier* of Germany, under whose domination she had passed, began to stir. She threatened the Sheikh of Bahrain by the armed occupation of the peninsula of Al-Katir, and moved troops to enforce her suzerainty over Koweit, the best port in the Persian Gulf and a possible terminus of the Baghdad Railway. Further to consolidate her interests, or to stake out a claim, Germany sent the heavily subsidized ships of the Hamburg-America line to the Gulf, where they comported themselves as the instruments of Imperial policy rather than as inoffensive merchantmen. She also strove, through the agency of the firm of Wunkhaus, to acquire a territorial footing on the island of Shargah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures

The first effective steps to counter these influences were taken during the vigorous vice-royalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumental work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that 'Concession in the Persian Gulf, whether by formal arrangement (with other Powers) or by neglect of the local commercial interests which now underlie political and military control, will imperil Great Britain's naval position in the Farther East, her political position in India, her commercial interests in both, and the Imperial tie between herself and Australasia. The Imperial standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowne in words of great import—'We (i.e., His Majesty's Government) should regard the establishment of a naval base or of a fortified port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal. The negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake. But with the disappearance of these external forces on Gulf policy, as set out in the Introduction to this section, the politics of the Persian Gulf receded in importance, until they are now more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1923, pp. 178-183. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932. It is at the outset officered by Italians. The immediate reason for the new fleet is that an increase in the Persian Customs tariff for revenue purposes led to extensive smuggling. The fleet is required to check it. The British Government in 1935 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm island off the Persian shore at the entrance of the Gulf, which they held on lease from the Persian Gulf, to Bahrain, on the Western, Arabian, coast of the Gulf. This move is calculated to remove causes of friction.

Maskat.

Maskat, which is reached in about forty-eight hours from Karachi, is outside the Persian Gulf proper. It lies three hundred miles south of Cape Musandim, which is the real entrance

to the Gulf, but its natural strength and its torical prestige combine to make it inseparable from the politics of the Gulf, with which it has always been intimately associated.

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separation between Zanzibar and Maskat was effected, the Sheikh accepted a British subsidy in return for the suppression of the slave trade and in 1892 sealed his dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent.

The Pirate Coast

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs. The ill name of this territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions. The pirates were the boldest of their kind, and they did not hesitate to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all hostilities at sea, and the subsequent treaty of 1873 by which they undertook to prohibit altogether the traffic in slaves. The relations of the Trucial Chiefs are controlled by the British Resident at Bushire, who visits the Pirate Coast every year on a tour of inspection.

The commercial importance of the Pirate Coast is increasing through the rise of Debal. Formerly Lingah was the entrepot for this trade, but the exactions of the Belgian Customs officials in the employ of Persia drove this traffic from Lingah to Debal. The Trucial Chiefs are—Debal, Abu Thabeeb, Sharqab, Ajman, Um al Gawnal and Ras el Kheyma.

Bahrain.

North of the Pirate Coast lies the little Archipelago which forms the chiefship of the Sheikh of Bahrain. Of this group of islands only those of Bahrain and Maharak are of any size, but their importance is out of all proportion to their extent. This is the great centre of the Gulf pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be handed on the donkeys for which Bahrain is famous. But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds, makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrain is the vast burying ground which has hitherto baffled archaeologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

The British Government as was mentioned earlier in this review announced in 1935 that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water to Bahrein. The same place has since been utilised for the provision of a large aerodrome for the service of the British Imperial air line between London and Australia which is thus enabled to take a route down the Western side of the Persian Gulf and thus avoid difficulties in Persia.

Koweit

In the north west corner of the Gulf lies the port which has made more stir than any place of similar size in the world. The importance of Koweit lies solely in the fact that it is a possible Gulf terminus of the Baghdad Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane—so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line. Nowhere else would Koweit be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean going steamers. It is sheltered from all but the westerly winds and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the mariners of Koweit are noted for their boldness and hardihood.

Muhammerah

On the opposite side of the entrance to the Shatt el Arab lie the territories of Sheikh Khazzal of Muhammerah. The town, favourably situated near the mouth of the Karun River, has grown in importance since the opening of the Karun River route to trade through the enterprise of Messrs Lynch Brothers. This route provides the shortest passage to Ispahan and the central tableland, and already competes with the older route by way of Bushire and Shiraz. This importance has grown since the Anglo Persian Oil Company—now called the Anglo Iran Oil Company—established refineries at Muhammerah for the oil which they win in the rich fields which they have tapped near Ahwaz. Its importance will be still further accentuated, by the opening of the railway to Khorremabad by way of Dizful.

Basra

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the frontiers of India, yet they are so indissolubly associated with the politics of the Gulf that they must be considered in relation thereto. Basra is the present sea terminus of the Baghdad Railway. It stands on the Shatt-el Arab, sixty miles from its mouth, favourably situated to receive the whole water borne trade of the Tigris and Euphrates Rivers. The local traffic is valuable, for the richness

of the date groves on either side of the Shatt el Arab is indescribable, there is a considerable entrepot traffic, whilst Basra is the port of entry for Baghdad and for the trade with Persia, which follows the caravan route via Kerman-shah and Hamadan.

The political destinies of Basra are at present wrapped up with the destinies of the new Arab State which set up in Mesopotamia under King Faisal and is now under the sovereignty of his son. When the war was over we found ourselves committed to immense, undefined and burdensome responsibilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad, then the great military enterprises necessitated by the fall of Kut al Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary and west to the confines of Trans Jordan. Amongst ardent Imperialists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodigious. In these circumstances King Faisal was imported from the Hedjaz and installed on the throne under the aegis of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition arose—responsibility without any real power unless King Faisal was to be a mere puppet, immense expenditure and indefinite military commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he said—

Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad the terms of which I propose to read out to Your Lordships. This announcement was drawn up in consultation with King Faisal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows —

"It will be remembered that in the autumn of last year, after a lengthy exchange of views, it was decided between the Governments of His Britannic Majesty and His Majesty King Faisal that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty which was signed on the 10th October, 1922, and the term of which was to be twenty years (subject to periodical revision at the desire of either party) provided for the establishment of an independent Constitutional Government in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the nature

and extent indicated in the text of the Treaty itself and of subsidiary Agreements which were to be made thereunder.

Since then the Iraq Government has made great strides along the path of independence and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that the commitments and responsibilities of His Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already signed, it has been decided to bring about the necessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent Assembly.

Accordingly a protocol has now been signed by the parties in the following terms—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty is all terminative upon Iraq becoming member of the League of Nations and in any case not later than four years from the ratification of peace with Turkey. Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between the High Contracting Parties and negotiations for that object shall be entered into between them before the expiration of the above period.

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations as soon as possible. His Majesty's Government would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq, and the establishment of a stable government in accordance with the Organic Law.

The Council of the League of Nations in January, 1932, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to treatment of minorities and the administration of justice. This meant the termination of the mandate when the next Assembly of the League voted for the admission of Iraq to League membership.

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between King Faisal's State and Turkey, the important frontier because the future of Mosul was in dispute, should be settled by the League of Nations, should Great Britain and Turkey be unable to come to agreement by direct negotiation. These direct negotiations were opened at Constantinople, but no agreement was reached, so the question was opened before the Council

of the League in September 1924. Whilst the matter was under discussion complaint was made by Great Britain that Turkey had violated the provisional frontier drawn in the Treaty of Lausanne, and certain irregular hostilities were carried on in the disputed zone. This matter too was remitted to the League, and a further provisional boundary was drawn, which was accepted by both parties.

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a common sense recommendation. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefore the British Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government—then Mosul should be incorporated in Iraq. If Britain was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great Britain gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remitted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. About this time there was published the report of a distinguished Estonian General, General Laidoner, who had been despatched by the League to investigate allegations of brutality by the Turks in deporting Christians from their own zone, and this report was of the most damning character. Great Britain having given the necessary assurance, that she was prepared to extend her mandate over Iraq for a further twenty-five years, thereupon the Council of the League allocated the whole of the area in dispute, right up to the temporary frontier—commonly called The Brussels Line—to Iraq. The Turks refused to accept the award and withdrew from Geneva threatening force. Later wiser counsels prevailed and in 1926 Turkey accepted a frontier substantially as drawn by the League.

A New Treaty—A new Treaty regulating the relation of Iraq with Great Britain, the Mandatory Power, was negotiated in 1927, and signed towards the end of the year.

The Treaty declares that there shall be peace and friendship between His Britannic Majesty and His Majesty the King of Iraq. It states that 'Provided the present rate of progress in Iraq is maintained and all goes well in the interval, His Britannic Majesty will support the candidature of Iraq for admission to the League of Nations in 1932. It stipulated that separate agreements superseding those of March 25, 1924, shall regulate the financial and military relations.

The King of Iraq undertook to secure the execution of all international obligations which His Britannic Majesty had undertaken to see carried out in respect of Iraq. He also under

Railway Position in the Middle East

took not to modify the existing provisions of Iraq's organic law so as adversely to affect the rights and interests of foreigners, and to constitute any difference in the rights before the law among Iraqis on the grounds of differences of race, religion, or language.

There was provision for full consultation between the high contracting parties in all matters of foreign policy which may affect their common interests. The King of Iraq undertook so soon as local conditions permit to accede to all general international agreements already existing, or which might be concluded thereafter with the approval of the League of Nations in respect of the slave trade, the traffic in drugs, arms and munitions, the traffic in women and children, transit navigation, aviation and communications, and also to execute the provisions of the Covenant of the League of Nations, the Treaty of Lausanne, the Anglo-French Boundary Convention, and the San Remo Oil Agreement in so far as they apply to Iraq.

There was provision against discrimination in matters concerning taxation, commerce, or navigation against nationals or companies of any State which is a member of the League of Nations or of any State to which the King of Iraq had agreed by Treaty that the same rights should be ensured as if it were a member of the League.

Any difference that might arise between the high contracting parties was to be referred to the Permanent Court of International Justice provided for by Article Fourteen of the Covenant of the League. The Treaty was made subject to revision with the object of making all the modifications required by the circumstances when Iraq entered the League of Nations.

It is important to remember that there is a considerable difference between the vilayet of Basra and the other portions of the Iraq State. Basra has for long been in the closest commercial contact with India, and is in many respects a commercial appanage of Bombay. Its people have not much in common with those of the North. They took no part in the Arab rising which followed the war, and they ask nothing better than to remain in close touch with India and through India with the British Government. If we are correct in the supposition that Basra is destined to be the great port of the Middle East, then its future under an Arab State, with no experience of

administration in such conditions, is one of the greatest interest, which can hardly be regarded as settled by the policy underlying the declaration which is set out above.

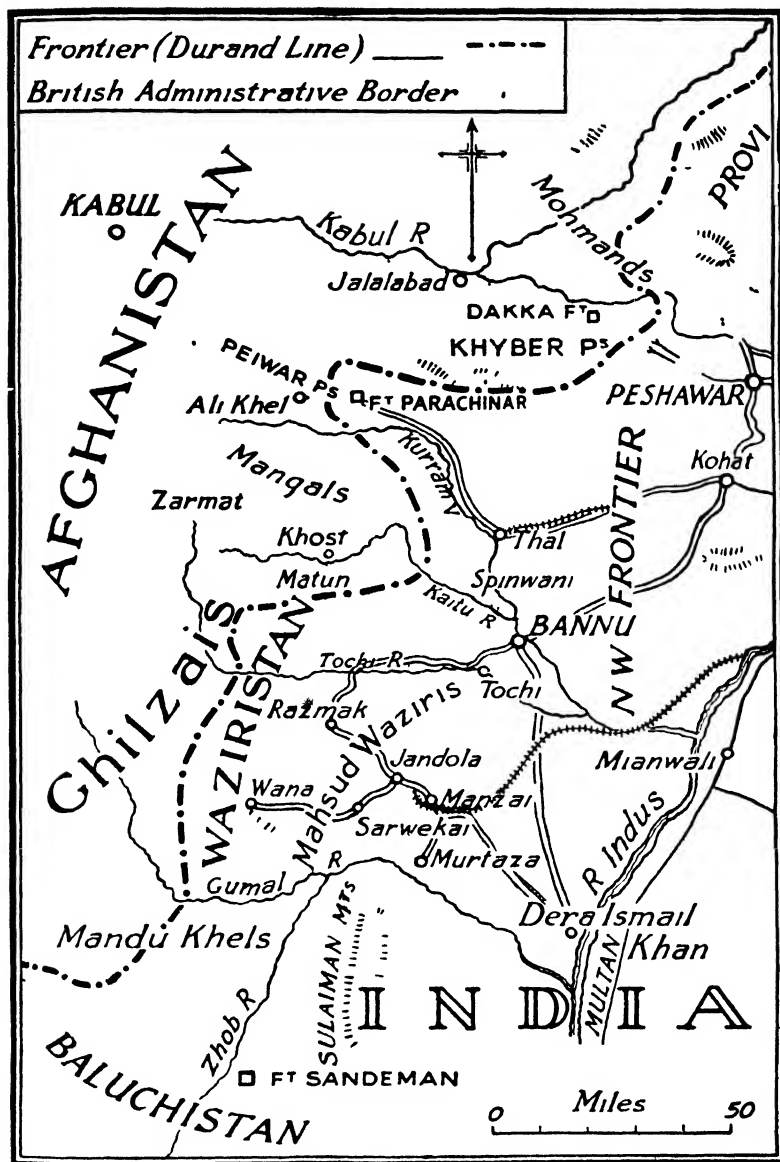

The Persian Shore

The Persian shore presents fewer points of permanent interest. The importance of Bushire is administrative rather than commercial. It is the headquarters of Persian authority, the residence of the British Resident, and the centre of many foreign consuls. It is also the main entrepot for the trade of Shiraz, and competes for that of Isfahan. But the anchorage is wretched and dangerous, the road to Shiraz passes over the notorious kotals which preclude the idea of rail connection, and if ever a railway to the central tableland is opened, the commercial value of Bushire will dwindle to insignificance. Further south lies Lingah, reputed to be the prettiest port on the Persian coast, but its trade is being diverted to Debal on the Pirate Coast. In the narrow channel which forms the entrance to the Gulf from the Arabian Sea is Bunder Abbas. Here we are at the key of the Gulf. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yazd. It is of still more importance as a possible naval base. To the west of the town, between the Island of Kishm and the mainland, lie the Clarence Straits which narrow until they are less than three miles in width, and yet contain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, lies another sheltered deep water anchorage, Elphinstone's Inlet, where the climate conditions are equally vile. But between these two points there is the possibility of controlling the Gulf just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the possible warm water port for which Russia was seeking. There was established a British Naval station at Hengam, a small island close to Kishm, where the station was constructed under agreement with the Persian authorities. Its evacuation by Great Britain in favour of Bahrain was decided upon by the British Government in 1935. On the Makran coast there is the cable station of Jask, and the possible port of Chahbar. An interesting development, in the Gulf in the past two or three years has been the institution of a Persian Navy.

II—SEISTAN

The concentration of public attention on the Persian Gulf was allowed to obscure the frontier importance of Seistan. Yet it was for many years a serious preoccupation with the Government of India. Seistan lies midway north and south between the point where the frontiers of Russia, Persia and Afghanistan meet at Zulfiqar and that where the frontiers of Persia and of our Indian Empire meet on the open sea at Gwattar. It marches on its eastern border with Afghanistan and with Baluchistan, it commands the valley of the Helmand, and with it the road from Herat to Kandahar, and

its immense resources as a wheat-producing region have been only partly developed under Persian misrule. It offers to an aggressive rival, an admirable strategic base for future military operations, it is also midway athwart the track of the shortest line which could be built to connect the Trans Caspian Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North West Frontier, and to possible lines of advance through Kandahar

to Quetta, and through Kabul to Peshawar, there can be little doubt that Russian attention was directed to a more leisurely movement through Selistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Selistan in the early years of the century. Having Russia fled Khorassan, her agents moved into Selistan and through the agency of the Belgian Customs officials "scientific missions" and an irritating plague cordon, sought to establish influence, and to stifle the British trade which was gradually being built up by way of Nushki. These efforts died down before the presence of the McMahon mission, which, in pursuance of Treaty rights, was demarcating the boundary between Persia and Afghanistan, with special reference to the distribution of the waters of the Helmand. They finally ceased with the conclusion of the Anglo-Russian Agreement. Since then the international importance of Selistan has waned.

The natural conditions which give to Selistan this strategic importance persist. For a time British influence increased in substance through the Selistan trade route. The distance from

Quetta to the Selistan border at Killa Robat is 465 miles, most of it dead level, and it was provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezzand, on the Bolan Railway, to Nushki, so as to provide a better starting point for the caravans than Quetta. This line was extended to Duzdab, 54 miles on the Persian side of the Indo-Persian Frontier during the war as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier. Negotiations for years dragged on to bring about a reasonable settlement in regard to the situation. The Persian Foreign Minister, Mons. B. Kazimi, paid a visit to New Delhi in November 1915, and travelled eastward from Persia by the Baluchistan route. He was interested, as his Government's representative, in the development of railways in Selistan and in securing British Indian assistance in that enterprise. Only informal conversations on the subject took place.

III—IRAN

From causes which only need to be very briefly set out, the Iran question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut al Amara when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were—

- To respect Persian integrity,
- To supply experts for Persian administration,
- To supply officers and equipment for a Persian force for the maintenance of order,
- To provide a loan for these purposes,
- To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent redeemable in 20 years. It was secured on the revenues and Customs receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position—We have given the main points in the Anglo-Iran agreement, because few documents have been more misunderstood. Those who desire to study it in greater detail will find it set out in the Indian Year Book for 1921, page 138 *et seq*. It has been explained that most Iranians construed it into a guarantee of protection against all external enemies. When the British troops in the north-west retired before the Bolsheviks, the Iranians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the War was that Great Britain must take an active hand in Iran because she could not be a passive witness to chaos in that country. The view always taken in the Indian Year Book was that the internal affairs of Iran were her own concern, if she preferred chaos to order that was her own look out, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander in chief, a rough but energetic soldier, gradually took charge of Iranian affairs and established a thinly veiled military dictatorship which made

the Government feared and respected through out the country for the first time since the assassination of Shah Nasir ed-din. A body of capable Americans under Dr. Millsapaugh restored order to the chaotic finances. These two forces operating in unison gave Iran the best government she had known for a generation. But the Sirdar Sipah chafed under the irregularities of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position regularised by the deposition of the absentee Shah and his own ascent of the throne. At first he was defeated by the opposition of the Mullahs, but in 1925 prevailed, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place under the title of Reza Shah Pahlavi. The change was made without disturbance, and Iran entered on a period of peace and consolidation which has removed it from the disturbing forces in the post war world. Since then considerable progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications, which is the greatest need of the land, such as an air service to Teheran and railway construc-

tion. The least reassuring episode was the departure of the American financial mission, which had done admirable work in the restoration of the finances. When their contract expired Dr. Millsapaugh and his colleagues were offered a renewal of it on terms which they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdrew from the country and have been replaced by other foreign advisers. The general situation was gravely disturbed in 1932 by the sudden termination by the Iran Government of the Anglo Iran Oil Co's concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Government. While these were being settled some progress was also made with general negotiations between the British and Iran Governments for an agreement covering all outstanding points of difficulty between them.

Mr. Kirtchbull Hugson is British Minister at Tcheran.

IV—THE PRESENT FRONTIER PROBLEM

There yet remains a small part of British India where the King's writ does not run. Under what is called the Durand Agreement with the Amir of Afghanistan, the boundary between Indian and Afghanistan influence was settled, and it was delimited in 1903 except for a small section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Kashmir in the north, this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions of frontier policy for nearly half a century.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost inaccessible mountains. It is peopled with wild tribes of mysterious origin, in whom Afghan, Tartar, Turkoman, Persian, Indian Arab and Jewish intermingle. They had lived their own lives for centuries, with little intercourse even amongst themselves, and as Sir Valentine Chirol truly said "the only bond that ever could unite them in common action was the bond of Islam." It is impossible to understand the Frontier problem unless two facts are steadily borne in mind. The strongest sentiment amongst these strange people is—or was until comparatively recently—the desire to be left alone. They value their independence much more than their lives. The other factor is that the country does not suffice even in good years to maintain the population. They must find the means of subsistence outside, either in trade, by service in the Indian Army or in the Khassadars, or else in the outlet which hill men all the world over have utilised from time immemorial, the raiding of the wealthier and more peaceful

population of the Plains. The internal peace enforced amongst them by British control has in late years led to an increase in their numbers and this has aggravated their economic problem.

Frontier Policy

The policy of the Government of India toward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmen entirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of a Russian invasion, and that coloured our frontier policy until the Anglo Russian Agreement. This induced what was called Hit and Retire tactics. In the half century which ended in 1897 there were nearly a score of punitive expeditions, each one of which left behind a legacy of distrust, and which brought no permanent improvement in its train. The fruit of the suspicion thus engendered was seen in 1897. Then the whole Frontier, from the Malakand to the Gomal, was ablaze. The extent of this rising and the magnitude of the military measures which were taken to meet it compelled a consideration of the whole position. The broad outlines of the new policy were laid down in a despatch from the Secretary of State for India, which prescribed for the Government the "limitation of your interference with the tribes, so as to avoid the extension of administrative control over tribal territory." It fell to Lord Curzon to give effect to this policy. The main foundations of his action were to exercise over the tribes the political influence requisite to secure our imperial interests, to pay them subsidies for

the performance of specific duties, but to respect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or hindrance

New Province

As a first step Lord Curzon took the control of the tribes under the direct supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate frontier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which had slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops so far as possible from the advanced posts, and placed these fortalices in charge of tribal levies offered by a handful of British officers. The most successful of these was the Khyber Rifles, which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system. In pursuance of this policy frontier railways were run out to Dargal, and a narrow gauge line, since converted to the broad gauge, was constructed from Kushalgarh to Kohat, at the entrance of the Kohat Pass, and to Thal in the midst of the Kurram Valley. These railways were completed by lines to Tank and Bannu. By this means the striking power of the regular forces was greatly increased. Nor was the policy of economic development neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted fractious tribesmen into successful agriculturists. This policy of economic development is receiving a great development through the completion of the Upper Swat Canal (q v Irrigation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

A New Policy

It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole border line, with a bolt hole into Afghanistan when pressed from the British side. It endured through the Great War and did not break down until the Amir of Afghanistan sought refuge from his internal troubles in a jihad against India. In this insane enterprise the Afghans placed less reliance in their regular troops which have never offered more than a contemptible resistance to the British forces than in the armed tribesmen. In this they were justified, for the Indian Military authorities failed to give timely support to the advanced militia posts, some of these posts were ordered to withdraw, the militia collapsed and the most serious fighting was with

the tribesmen. The Southern Waziristan Militia inevitably broke and there was serious trouble throughout the Zhob district. The Afridis, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort at Chora. The Mahsuds and the Waziris broke into open hostilities. Their country lies within the belt bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dera Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent armed with modern weapons of precision they constituted formidable adversaries. They refused to make peace even when the Afghans caved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good, their tactics were admirable, for amongst their ranks were many men trained either in the Militia or in the Indian Army, and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing, their losses were the heaviest in the long history of the Borderland and when the Mahsuds made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which the financial authorities regarded as of paramount importance was not attained. When the accounts were examined, it was seen that the heaviest charges on the exchequer were those under Military Expenses, and that there was an indefinitely large, and seemingly unending expenditure on Waziristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual practice the discussion was really focused on Waziristan. In essentials it was the aged controversy—shall we deal with this part of the Frontier on what is known as the Sandeman system, namely, by occupying commanding posts within the country itself, dominating the tribesmen but interfering little in their own affairs, or shall we revert to what was known as the close border system, as modified by Lord Curzon, of withdrawing our regular troops

WAZIRISTAN

to strategic positions outside the tribal area, leaving the tribesmen, organised into militia to keep the passes open, and punishing the tribesmen by expeditions when their raiding propensities become unbearable.

The Curzon Policy—The Curzon policy, adopted in 1899, to clear up the aftermath of the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupation" and the "close border policies." It was based on the withdrawal of the regular troops so far as possible to cantonments in rear whilst the frontier posts such as those in the Tochi at Wana and in the Khyber and Kurram were held by militia, recruited from amongst the tribesmen themselves. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the final policy. He wrote in the Memorandum formulating his ideas "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control gave us moderate—or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away, the Waziri militia either mutinied, as at Wana, or deserted. The pillar of the Curzon system fell.

The Policy—The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waziristan, to open up the country by roads, to extend the main Indian railway system from its then terminus, Jamrud, through the Khyber to the frontier of Afghanistan and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on the frontier, and as they had disappeared with the Militia it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts. The Khassadar is an irregular in the extreme. He has no British officers and no uniform, except a distinguishing kind of *pagri*. In contradistinction to the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars, under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble they lose their pay but the Government loses no rifles nor does it risk mutiny or the loss of British and Indian officers. But the application of this policy produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained, it was another to decide what these posts should be. We must therefore consider the special problem of Waziristan. The Scouts are a mobile, mounted, irregular force not territorially recruited, officered by British officers.

V—WAZIRISTAN

We can now approach the real frontier question of the day, the future of Waziristan.

Geographically Waziristan is a rough parallelogram averaging 60 miles from East to West and 160 from North to South. The western half consists of the Suleman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the watershed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. On the east is the Indus. North is the watershed of the Kurram River running East and West about 30 miles north of Bannu separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sandeman in Baluchistan with a turn southwards to the Indus.

The western half is a rugged and inhospitable medley of ridges and ravines straggled and confused in hopeless disarray. The more inhabited portions lie well up the slope at heights of four to six thousand feet. Here are our outposts of Wana and Ladha some 15 and 20 miles respect-

ively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin.

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Pezu.

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants—The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of their richer and more peaceful neighbours. The name originates according to tradition from one Wazir, two of whose grandsons were the actual founders of the race. Of the four main tribes Darweshkhai, Mahsuds, Dawars and Batanni, only the first two are true Wazirs. Their villages are separate though dotted about more or less indiscriminately, and inter-marriage

is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however these wild people acknowledge little allegiance to malks or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could speak of any portion of them as his following.

Policy—The policy of the British was at first one of non interference with the tribes. Even now only part of the country is administered. Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3 000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required, also for tribal escorts as necessary. Gradually as occasion required, posts were occupied. Wana was occupied in 1895 at the request of the Wana Wazirs. Similarly the Tochi in 1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds. It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Compromise—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Secretary explained that the ingredients of the frontier problem at the present day are essentially three, namely, the frontier districts, the neighbouring friendly State of Afghanistan, and the so called Independent Territory, this last being the belt of unsettled mountain country which lies between the borders of British India and India. He proceeded specially to show that this belt is, in fact, within India. "It is boundary pillars that mark off Waziristan from Afghanistan, it is boundary pillars that include Waziristan in India. We are apt to call Waziristan independent territory, and it is only from the point of view of our British districts that these tribes are trans frontier tribes. From the

point of view of India, from the international point of view that is they are cis frontier tribesmen of India. If Waziristan and her tribes are India's scourge they are also India's responsibility—and India's alone. That is an international fact that we must never forget.

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed that the same policy would prove effective in Waziristan. But what was a practical proposition 20 or 30 years ago is not necessarily so now. The task is infinitely more difficult to day, chiefly because the tribesmen are infinitely better armed, their arms having increased at least tenfold during the last 20 years. Dealing with the Close Border prescription he showed that if one erected a Chinese wall of barbed wire fence along the plain some distance below the hills all the time the problem in front of us would be going from bad to worse with the inevitable increase of arms in the trans border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribes men more and more desperate, more and more thrown back on barbarism. A rigid Close Border policy is really a policy of negation and nothing more. We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants.

The settled policy of Government in Waziristan Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Derajat and the maintenance of some 4,600 khassadars and of some 5 000 irregulars while at Razmak 7 000 feet high and overlooking northern Waziristan there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old established posts in the Tochi. In the geographical sense, therefore the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. Come what may civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our hands while it grows inevitably worse.

The policy thus initiated proceeded with results according to the highest reasonable expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

The roads now policed by the Khassadars who in the main until the Fort Khel rebellion of 1936-37 upset some of them, proved faithful to their trust. The open hostility of the Waziri tribesmen to the presence of troops and other agents of Government in their midst which at the outset they showed by shooting up individuals

and small bodies of troops at every opportunity, faded away, and the people showed an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization caught the imagination of the people and won their approval. Thus, the safety of the roads was encouraged, and became buttressed by a considerable development of motor bus traffic. The roads as the King's Highway, are officially held to be sacrosanct that is no shooting up or other pursuit of personal or tribal feuds is permitted upon them. This permits villagers to proceed to and from the plains towns in safety. Under the influence of their women, the tribesmen applied that the ban against shooting upon the highway would be extended to all the country for three miles on either side of the highway. Tentative efforts to introduce primary education proved possible and achieved as much success as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scouts, employed about the country, attend to the wants of the tribes people who come to them. So much has this arrangement been appreciated that the Mahsuds formally applied for the establishment of a hospital of their own. With grim humour, they offered to provide such an institution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

A remarkable illustration of the acceptance by the people of the new conditions was provided a year or two ago by the Wana Wazirs when they partitioned the Political Authorities for the occupation of south Waziristan corresponding with that already established in northern Waziristan. A motor road had already been run out from Jhandola through Chagmalai and the Shahur Langi to Sarwekal. A brigade of troops, hitherto stationed at Manzai, whereabouts the Tak Zam, after flowing down its deep valley from northern Waziristan, debouches on to the Deraajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp not far from the fort which was the earlier centre of British occupation. There it remains.

The reoccupation of Wana and the circumstances in which it took place illustrate that a policy is a live thing. In other words, it is not a programme which can reach fulfilment or completion. It lives and always waits upon some new action to give it further expression. In this respect the new policy, though it has only demonstrably been applied in Waziristan, must be regarded as that which governs the actions of the authorities in regard, at least to the whole Frontier region lying between Baluchistan and the Khyber Pass, except, possibly, the Kurram Valley.

The area cultivated by the villagers of Wana plain doubled by the end of 1931 and the people declared their readiness to surrender their

firearms if their neighbours also gave up theirs or were deprived of them. A road has been built commencing at Fort Sandeman via Gulkach, on the Gomal river, with Tanal, on the Sarwekal Wana road. A motor road has also been constructed from Razmak through Kaniguram in the heart of the Mahsud country to Wana. It was completed in 1933 and the only disputes connected with its construction arose from the rivalry of the tribesmen whose villages lie along the route and who some times fought one another to secure road making contracts.

A startling new development upon the North West Frontier during 1930 was the spread thereto of agitation carried on by the Indian National Congress in the interior of India in pursuit of its efforts to bring political pressure to bear upon the Government of India, and above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. In particular, it avowedly set out 'to make Government impossible. Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a standstill commenced all over India immediately after the Congress meetings. The settled districts of the N.W.F.P. were the scene of this in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated minimum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them because its provisions in no way over rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed in spite of their dissent, in a Legislature in which Muslims are by themselves, a hopeless minority. They regarded its enactment as a grave illustration of their fears that under any scheme of democratic self government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930 — This Muslim apprehension after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which misrepresentation of the Act provided for stirring up anti Government agitation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue propaganda was carried on, it was, for instance, alleged that under the Act all girls must be medically examined before marriage. An elaboration of this untruth was that the Government were recruiting a large body of

Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. F. P. into the tribal areas. Waziristan was amongst the first of them to be inundated with the propaganda. This was in March-April 1929. The poison spread outwards from Peshawar into Tirah about the same time. The agitation was sedulously carried on in the district northward of Peshawar city and from thence was pushed into Mohmand country. The first point of violent combustion was Peshawar city, where the mob murderously broke out on 23rd April 1930. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Mohmands became greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi Wazirs simultaneously took to arms and shortly afterwards the Mahsuds Wazirs, about Jadha, did the same. At this stage, the development of the Air arm in India proved of incalculable value. Aero planes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in force. The Afridis twice endeavoured to raid Peshawar in force but by combined air and land action were both times driven back to their hills with no achievement to report. The Orakzais of southern Tirah threatened to descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar. Helped by the machinations of Congress agents, they succeeded in drawing two or three clans of Afghan tribesmen across the border into the fray. Combined air and ground action crushed these efforts. The Tochi Wazirs heavily attacked Datta Khel, but were speedily brought to order by force. The Mahsuds were similarly repulsed and punished when they assaulted Scharogha, in the valley of the Tak-i-Zam.

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of Tirah, and the construction of roads for their service, now indicate the application of the new frontier policy in that region. The Afridis long refused to assent to these, but being there by deprived of access to their normal winter grazing grounds on the Khajuri and Aka Khul plain, and prevented from visiting Peshawar their marketing centre, they came in an accepted peace under the new conditions before the opening of the winter of 1931-32. The Afridis later asked for roads into Tirah but are not yet sufficiently agreed among themselves about the point for construction successfully to proceed.

It will be seen that the events of the summer of 1930 put the policy to a severe test, and

that its successful operation in the emergency was specially assisted by the Royal Air Force. The resultant position appears, then, to be that the control of the tribes, where the policy has already been expressed in road building and in the establishment of suitable garrisons, is effective, that the political and military ground organization with which the policy is supported brings about the introduction of the ameliorative influence of civilization, and that the rapidity and success with which the Royal Air Force can operate over the hills, tends to diminish the amount of ground force necessary. On the other hand, the two deserts of the Afridis upon the plain and their return to their homes without great loss, despite all that the Royal Air Force and large bodies of troops could do, indicate the capacity for mischief which lies in the hands of the Tirah tribes, and must remain there so long as the policy is not extended over their highlands.

Mohmand Outbreak in 1933—Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern frontier policy and the need to keep it a live policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories, namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the frontier by what is described as the Presumptive Frontier. The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1932, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands decided to join in the disturbances and raids in the administered territory immediately northward of Peshawar. The Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are bound by promises of good behaviour. The Assured Tribes in 1932 interfered with the programme of the Upper Mohmands for raiding the plain and the Upper Mohmands in 1933, when spring and early summer once more facilitated their methods of campaigning, commenced retributory raids upon the Halimzai and other Assured clans. The attacked clans appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajaur, a country immediately to the north of that in which the events just described developed, a Pretender to the Afghan throne. He was accompanied by two companions and started a campaign

in Bajaur for a revolution or such other trouble as might be possible in Afghanistan. This compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshwar Shahkadr road northwards through Ghilzai into the Halimzai country, and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops with other details were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkai in Upper Bajaur which had given shelter to the Pretender; further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1897. It seemed likely that the Ghilzai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed up the Bajaur valley itself so that by the meeting of the two roads in Upper Bajaur there would become established a circular road through this part of the tribal territory resembling that running through North Waziristan.

In the end the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brought to be upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace, and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless expelled that person from their territory, probably into Afghanistan. Here, then, the trouble ceased. The net result of it was the construction of the road through Ghilzai and the rapid development of bus services and other activities of civilization which speedily took place along it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the upper Mohmands decided to fish in the troubled waters. Successful military operations ended in the Upper Mohmands suing for peace—and

in the Ghilzai road being carried forward over the Nahrakki Pass and down beyond it on to the Main which extends to the natural road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

Tori Khel Rebellion—The Wazirs and Mishkis in 1930 showed signs of rebelling against Government in parallel with the Afghids. Congress party agents endeavoured to persuade them to do so. They were at the outset fairly dealt with and peace was thus resumed almost without its having been broken. All went peacefully until the autumn of 1936 and then trouble was produced in North Waziristan by the figure of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name. A Mashhad was held in 1936 of kidnapping a Hindu girl of Pinnah. Apparently she eloped with him. She was restored to her parents by order of the Civil Court on the ground that he was a minor. There was a good deal of communal excitement about the matter and the high started in agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was in interference with Islam. There was also in 1936 a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque. This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Muslims accepted the decision. The figure of Ipi hurried together the Tori Khel Case and the Lahore (Shahjading) Mosque Case and upon them based among the Waziristan Tribes the slogan "Islam in Danger". His demand for a holy war was only taken up by a sub-section of the Tori Khel section of the Wazirs of Northern Waziristan. These elders begged Government to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did. The troops were heavily fired upon and had to fight their way out. Efforts to round off the matter before it developed into a major affair failed and there followed a war in which the Tori Khel were the only tribal section who won it. It was with Government but all the other tribesmen of the country were hardly more than nominally friendly. Some joined in gangs fighting the authorities and others connived at such acts. At the time of writing this chapter the Tori Khel have by extensive military operations been beaten into asking for peace but the figure has not been caught and the general clearing up of the turmoil throughout Waziristan has yet to be done.

VI—AFGHANISTAN

The relations of Afghanistan with the Indian Empire were for long dominated by one main consideration—the relation of Afghanistan to a Russian invasion of India. All other considerations were of secondary importance. For nearly three-quarters of a century the attitude of Great Britain toward successive Amirs has been dictated by this one factor. It was in order to prevent Afghanistan from coming under the influence of Russia that the first Afghan

War of 1838 was fought—the most melancholy episode in Indian frontier history. It was because a Russian envoy was received at Kabul whilst the British representative was turned back at All Masjid that the Afghan War of 1878 was waged. After that the whole end of British policy toward Afghanistan was to build up a strong independent State, friendly to Britain, which would act as a buffer against Russia, and so to order our frontier policy that

we should be in a position to move large forces up, if necessary, to support the Afghans in resisting aggression

Gates to India

A knowledge of the trans frontier geography of India brought home to her administrators the conviction that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan. It was the purpose of British policy to close them and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans Persian railway to Simar kand, Russia thrust a military line from Merv to the Kushkinsky Post where railway material is collected for its immediate prolongation to Herat. Later, she connected the trans Siberian railway with the trans Caucasian system, by the Orenburg Tashkent line thus bringing Central Asia into direct touch with her European magazines. Nor has Great Britain been idle. A great military station has been created at Quetta. This is connected with the Indian railway system by lines of railway which climb to the Quetta Plateau by the Bolan Pass and through the Chapparr Rift, lines which rank amongst the most picturesque and daring in the world. From Quetta the line has been carried by the Khojak tunnel through the Khowja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly loses the western gate to India, either by way of Kandahar or by the direct route through Seistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1921 up the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana. A first class military road sometimes double, sometimes treble, also threads the Pass to our advanced post at Landi Kotal, and then descends until it meets the Afghan frontier at Landi Khana. Later, a commencement was made with the Lori Shikhar Railway which starting from Peshawar was designed to penetrate the Mullagori country and provide an alternative advance to the Khyber for the movement of British troops for the defence of Kabul. For unexplained reasons this line was suddenly stopped and is now thrust in the air. In this was the two Powers prepared for the great conflict which was to be fought on the Kandahar Ghazni Kabul line.

Relations with India

Between the advanced posts on either side stands the Kingdom of Afghanistan. The end of British policy has been to make it strong and friendly. In the first particular it has

early and largely succeeded. The second aim may now also be said to have been attained. When the late Abdurrahman was invited to ascend the throne, as the only means of escape from the tangle of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahman made himself master in his own kingdom. By means into which it is not well closely to enter, he beat down opposition until none dared lift a hand against him. Aided by a British subsidy of twelve lakhs of rupees a year increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he established a strong standing army and set up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Pendik episode in 1885—determined the northern boundaries. The Pamirs Agreement delimited the borders and those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war. That section was finally surveyed and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters of the Helmand in Seistan. It was estimated by competent authorities that about the time of Abdurrahman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well armed regular and irregular troops, to gather with two hundred thousand tribal levies and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces. But if Afghanistan were made strong, it was not made friendly. Abdurrahman Khan distrusted British policy up to the day of his death. All that can be said is that he distrusted it less than he distrusted Russia, and if the occasion had arisen for him to make a choice, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident on the ground that he could not protect him, and British affairs were entrusted to an Indian agent, who was in a most equivocal position. At the same time he repeatedly pressed for the right to pass by the Government of India and to establish his own representative at the Court of St James.

Afghanistan and the War—These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrahman Khan had built up would perish with him, for none was capable of maintaining it. Habibullah Khan more than maintained it. He visited India soon after his accession and ac-

quired a vivid knowledge of the power and resources of the Empire. He strengthened and consolidated his authority in Afghanistan itself. At the outset of the war he made a declaration of his complete neutrality. It is believed—a considerable reticence is preserved over our relations with Afghanistan—that he warned the Government of India that he might be forced into many equivocal acts but that they must trust him, certainly his reception of Turkish, Austrian and German missions at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanatical and anti-British elements amongst his own people, inflamed by the Turkish preaching of a Jihad, or holy Islamic war. But he committed no act of hostility as soon as it was safe to do so he turned the members of these missions out of the kingdom. At the end of the war his policy was completely justified, he had kept Afghanistan out of the war, he had adhered to the winning side, his authority in the kingdom and in Central Asia was at its zenith.

Murder of the Amir—It is believed that if he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying centre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been fully explained, but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come, they anticipated it by suborning one of his aides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead but public opinion in Afghanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Nasrullah found it impossible to make head against him and withdrew. The new Amir, Amanullah at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced, he had to deal with the war party in Afghanistan, he was confronted with the dissatisfaction arising from the manner in which the murderers of Habibullah had been dealt with, the fanatical element was exasperated by the imprisonment of Nasrullah, and the Army was so incensed that it had to be removed from Kabul and given occupation to divert its thoughts. A further element of complexity was introduced by the political situation in India. The agitation against the Rowlatt Act was at its height. The disturbances in the Punjab and Gujarat had taken

place. Afghan agents in India, of whom the most prominent was Ghulam Hyder Khan, the Afghan postmaster at Peshawar, flooded Afghanistan with exaggerated accounts of the Indian unrest. The result of all this was to convince the Amir that the real solution of his difficulties was to unite all the disturbing elements in a war with India. On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open intrigue was started with the Frontier tribes on whom the Afghans placed their chief reliance.

Speedy Defeat—The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalabad. In ten days the Afghans were severely defeated. On the 14th May they asked for an armistice. With the usual Afghan spirit of haggling they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book 1923 pp 196-197.

Post War Relations—It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Muzoonie between Afghan Representatives and British officials under Sir Henry Dobbs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp 197, 198-199.

Afghanistan after the War—Since the War the relations between Afghanistan and Great Britain have been good and improving. There were painful episodes in 1923 when a murder gang from the tribal territory in the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge in Afghanistan. In course of time this gang was broken up. His Majesty the King of Afghanistan had troubles within his own borders which have made him glad of British help. The main object of his government was to strengthen the resources of the country and to bring it into closer relation with modern methods of administration. But Afghanistan is an intensely conservative country and no

changes are popular, especially violent was the opposition to a secular form of administration and education. The direct result was a formidable rebellion of Mangals and Zadrans in the Southern Provinces, and serious reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of aeroplanes and other assistance afforded by the Government of India the insurrection was broken. Whilst this assistance was appreciated, the whole business gave a serious set back to the reforms initiated by His Majesty, he had to withdraw almost the whole of his administrative code and to revert to the Mahomedan Law which was previously in force.

Bolshevik Penetration—Taking a long view, a much more serious development of the policies of Afghanistan at the period to which the foregoing notes apply was the penetration of the Bolsheviks. These astute propagandists have converted the former Trans Caspian States of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is much more drastic and disruptive than was that of what was called the despotism of the Romanoffs. The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In Persia this policy was foiled by the vigour of the Sipar Salah, Reza Khan, since declared Shah. In Chinese Turkestan it is pursued with qualified success. In Afghanistan it also made certain progress. The first step of the Bolsheviks was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later apparently abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Afghanistan. Telegraph lines were erected all over the country, roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers were deceived by these practices and whether they did not pursue the simple plan of taking all they could get without the slightest intention of handing themselves over to the Bolsheviks. But it is easier to let the Bolshevik in than to get him out. Friends of the Afghans were asking themselves whether the Amir was not nourishing vipers in his bosom. Towards the end of 1925 and in the early part of 1926 there was a rude awakening. The Northern Frontier of the country has always been unsettled because of the shifting courses of the Oxus. In December Bolshevik forces captured with violence the Afghan post of Darakand, killing one soldier. These events aroused great indignation at Kabul and were denounced by the Amir *coram publico*. There is no little evidence to show that though the form of government has changed in Russia the aims of Russian policy are the same. It used to be said that the test of Russian

good faith under the Anglo Russian Agreement would be the attitude of Petrograd towards the extension of the Orenberg Tashkent railway to Termez. That line has been constructed by the Bolsheviks. The Afghans have had their eyes opened.

Russo Afghan Treaty—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia which was signed on August 31st, but it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers, are as follows—

Clause 1—In the event of war or hostile action between one of the contracting parties and a third power or powers the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2—Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organized against the other party. Besides this in case the attitude of a third power or powers is hostile towards one of the contracting parties the other contracting party will not help such hostile policy and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3—The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Government. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object it is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly neither of the contracting parties will allow armed forces, arms, ammunition or other war material meant to be used against the other contracting party to pass through its dominions.

Clause 6—This treaty will take effect from the date of its ratification, which should take place within three months of its signature. It will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time.

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan which amounted to no more than the establishment of diplomatic relations.

A British Minister is established in Kabul as well as the representatives of other European States. The representatives of Afghanistan are established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour—In the closing months of 1927 His Majesty King Amanullah, accompanied by the Queen and a staff of officials, commenced a long tour to India and Europe. It is understood that this was one of the cherished ambitions of his father King Habibullah, who was assassinated in 1919. King Amanullah, when he set out, was warmly welcomed in India and received a great popular greeting in Bombay both from his co-religionists and from members of other communities, who forgot the invasion of India in 1919. He then took ship to Europe. He was the guest of His Majesty King George V in London and visited the principal European capitals. He made a State visit to Turkey and returned to Afghanistan by way of Soviet Russia and Persia. A series of treaties with the governments of the countries visited was announced and the King returned to Kabul in the late summer of 1928, the tour having been unclouded by untoward incident. Afghanistan was peaceful during his long absence.

Reforming Zeal—King Amanullah returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and in particular by the dramatic forcefulness with which Mustafa Kemal Pasha had driven Turkey along the path of reform, or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was desirous of seeing the women of Afghanistan enjoy some of the freedom and opportunity won by and for the women of the West. A diet after edict was issued changing the whole structure of Afghan society. New codes and taxes were imposed. It was proposed that women should emerge from their seclusion and doff the veil, the co-education of boys and girls was prescribed. In September Government officials were forbidden to practise polygamy, in October European dress was ordered for the people of Kabul. At the same time the pay of the regular troops fell into arrears.

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that in 1924 far less drastic changes had brought serious trouble in their train. In May of that year the Lame Mullahs raised the standard of rebellion amongst the Gilezai and Mangal clansmen of Khost. The Mullahs were openly at variance against the King and His Majesty was equally frank in his hostility to them. Possibly also well-wishers suggested that what was possible in Turkey after centuries of close contact with the West and where the ground had been prepared by missionary effort and a long struggle for the emancipation of women might be less easy in Afghanistan, where there had been no contact with the western world.

A change of Kings—Events moved rapidly in 1929. A notorious north Afghan *badmash*, Bacha I Saqqao, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontented as they were by arrears of pay. Day by day the Afghan representatives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken. King Amanullah and his family fled from Kabul to Kandahar, and then from Kandahar via Quetta to Bombay where they took ship to Europe. King Amanullah on his arrival at Rome entered into possession of the Afghan Legation where he remained. Bacha I Saqqao declared himself King of Afghanistan and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following his throne was a thorny one and he was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan almost gave up his chances as finally lost. But a band of Wazirs from the British side of the border attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards at the wish of the Afghans, Bacha I Saqqao was executed with other rebels and when the year closed Nadir Khan was to all seeming in firm possession of the kingdom. He despatched members of his family to the principal Afghan Legations in Europe. A Shinwari rising near the exit from the Khyber Pass took place in February 1930, and was repressed with unexpected success and vigour. There followed a serious rebellion in Kohistan. Bacha I Saqqao's country. This also was promptly quelled. And thereafter Nadir Shah ruled without challenge. He devoted himself to the reorganisation of his Army. England was strictly neutral during the successive stages of the revolution, but promised support to Afghanistan to help her maintain internal peace when she had restored it and this promise was fulfilled by the provision of an interest-free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He co-operated effectively to prevent tribes on his side of the Frontier joining those on the British side against the Government of India in response to the Congress agitation in the summer of 1930. The trade routes were reopened and the new King again took up Amanullah's mantle of reform but in a statesmanlike manner which carried the Mullahs along with him.

Murder of Nadir Shah—This ordered march of progress was tragically interrupted by the murder of His Majesty Nadir Shah on the after

noon of 8 November 1933. His Majesty was attending a football tournament prize giving, when a young man among the gathering stepped forward and fired several revolver shots into him at close range, killing him instantly. It later appeared that the assassin committed the crime in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this young servant. The murder was not followed by general or widespread disorder. The members of Nidru Shah's family and his prominent officers of State stood loyally by him and his son, Muhammad Zahir. The

latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new king started his reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the years that have since passed and during them the new young king, by his staid and good government gradually strengthened his position on the throne.

British Representative—Lt Col. Sir FRASER LATHKESLEY CBE.

VII - TIBET

Recent British policy in Tibet is really another phase in the long drawn out duel between Great Britain and Russia in Central Asia. The earliest efforts to establish communication with that country were, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogle on a mission to the Tashi Lama of Shigatse,—the spiritual equal if not superior, of the Dalai Lama of Lhasa—his desire was to establish facilities for trade, to open up friendly relations with a Power which was giving us trouble on the frontier, and gradually to pave the way to a good understanding between the two countries. After Warren Hastings' departure from India the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1885, under the inspiration of Colman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibetans, but it was abandoned in deference to the opposition of the Chinese whose suzerainty over Tibet was recognised and to whose view until the war with Japan, British statesmen were inclined to pay excessive deference. But the position on the Tibetan frontier continued to be most unsatisfactory. The Tibetans were aggressive and obstructive and with a view to putting an end to an intolerable situation a Convention was negotiated between Great Britain and China in 1890. This laid down the boundary between Sikkim and Tibet, it admitted a British protectorate over Sikkim and paved the way for arrangements for the conduct of trade across the Sikkim Tibet frontiers. These supplementary arrangements provided for the opening of a trade mart at Yatung, on the Tibetan side of the frontier, to which British subjects should have the right of free access, and where there should be no restrictions on trade. The agreement proved useless in practice, because the Tibetans refused to recognise it, and despite their established suzerainty, the Chinese Government were unable to secure respect for it.

Russian Intervention

This was the position when in 1899 Lord Curzon, Viceroy of India, endeavoured to get into direct touch with the Tibetan authorities. Three letters which he addressed to the Dalai Lama were returned unopened, at a time when the Dalai Lama was in direct intercourse

with the Tsar of Russia. His emissary was a Siberian Dorjjeff, who had established a remarkable ascendancy in the councils of the Dalai Lama. After a few years residence at Lhasa Dorjjeff went to Russia on a confidential mission in 1899. At the end of 1900 he returned to Russia at the head of a Tibetan mission of which the head was officially described in Russia as "the senior Tsanite Khoinba attached to the Dalai Lama of Tibet." This mission arrived at Odessa in October 1900, and was received in audience by the Tsar at Livadia. Dorjjeff returned to Lhasa to report progress, and in 1901 was at St. Petersburg with a Tibetan mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence Officers were attached. At the time it was rumoured that Dorjjeff had, on behalf of the Dalai Lama, concluded a treaty with Russia, which virtually placed Tibet under the protectorate of Russia. This rumour was afterwards officially contradicted by the Russian Government.

The Expedition of 1904

In view of these conditions the Government of India, treating the idea of Chinese suzerainty over Tibet as a constitutional fiction, proposed in 1903 to despatch a mission, with an armed escort, to Lhasa to discuss the outstanding questions with the Tibetan authorities on the spot. To this the Home Government could not assent but agreed, in conjunction with the Chinese Government, to a joint meeting at Khamba Jong, on the Tibetan side of the frontier. Sir Francis Younghusband was the British representative, but after months of delay it was ascertained that the Tibetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Tibetans developed marked hostility, and there was fighting at Lhuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should advance to Lhasa, and on August 3rd, 1904, Lhasa was reached. There Sir Francis Younghusband negotiated a convention by which the Tibetans agreed to respect the Chinese Convention of 1890, to open trade marts at Gyantse, Gartok and Yatung, to pay an indemnity of £500,000 (seventy five lakhs of

rupees), the British to remain in occupation of the Chumbi Valley until this indemnity was paid off at the rate of a lakh of rupees a year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary.

Home Government intervenes

For reasons which were not apparent at the time, but which have since been made clearer the Home Government were unable to accept the full terms of this agreement. The indemnity was reduced from seventy five lakhs of rupees to twenty five lakhs, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Lhasa was withdrawn. Two years later (June 1906) a Convention was concluded between Great Britain and China regulating the position in Tibet. Under this Convention Great Britain agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Tibet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet. Great Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the Convention of 1890 and the Trade Regulation of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Valley was evacuated. The only direct result of the Mission was the opening of the three trade routes and the establishment of a British Trade Agent at Gyantse.

Chinese Action

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fled to Urga, the sacred city of the Buddhists in Mongolia. He left the internal government of Tibet in confusion and one of Sir Francis Younghusband's great difficulties was to find Tibetan officials who would undertake the responsibility of signing the Treaty. Now the suzerainty of China over Tibet had been explicitly reaffirmed. It was asserted that she would be held responsible for the foreign relations of Tibet. In the past this suzerainty having been a "constitutional action," it was inevitable that China should take steps to see that she had the power to make her well respected at Lhasa. To this end she proceeded to convert Tibet from a vassal state into a province of China. In 1908 Chao Erh feng, Acting Viceroy in the neighbouring province of Szechuen, was appointed Resident in Tibet. He proceeded gradually to establish his authority, marching through eastern Tibet and treating the people with great severity. Meantime the Dalai Lama finding his presence at Urga, the seat of another Buddhist Pontiff, irksome, had taken refuge in Sining. Thence he proceeded to Peking where he arrived in 1908, was received by the Court, and despatched to resume his duties at Lhasa. Moving by leisurely stages, he arrived there at Christmas, 1909. But it was soon apparent that the ideas

of the Dalai Lama and of the Chinese Government had little in common. The Dalai Lama expected to resume the temporal and spiritual despotism which he had exercised prior to 1904. The Chinese intended to deprive him of all temporal power and preserve him as a spiritual pope. The Tibetans had already been exasperated by the pressure of the Chinese soldiery. The report that a strong Chinese force was moving on Lhasa so alarmed the Dalai Lama that he fled from Lhasa, and by the irony of fate sought a refuge in India. He was chased up the frontier by Chinese troops, and took up his abode in Darjeeling, whilst Chinese troops overran Tibet.

Later Stages

The British Government, acting on the representations of the Government of India made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a country which was a neighbour on intimate terms with other neighbouring States on our frontier, especially with Nepal, and pressed that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Tibet than were necessary for the preservation of order, that China had no intention of converting Tibet into a province, but that being responsible for the good conduct of Tibet, she must be in a position to see that her wishes were respected by the Tibetans. Finally, the Chinese remarked that the Dalai Lama was such an impossible person that they had been compelled again to depose him. Here the matter might have rested, but for the revolution in China. That revolution broke out in Szechuen, and one of the first victims was Chao Erh feng. Cut off from all support from China surrounded by a hostile and infuriated populace, the Chinese troops in Tibet were in a hopeless case, they surrendered and sought escape not through China but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in 1913 in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese Republic saying that Tibet came within the sphere of Chinese internal administration, and that Tibet was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government. The Chinese Government subsequently accepted the principle that China is to have no right of active intervention in the internal administration of Tibet, and agreed to the constitution of a conference to discuss the relation of the three countries. This Convention met at Simla when Sir Henry McMahon, Foreign Secretary to the Government of India, Mr Ivan Chen representing China and Mr Long Chen Shatra, Prime Minister to the Dalai Lama, thrashed out these issues. Whilst no official pronouncement has been made on the subject it is understood that a Convention was initiated in June which recognised the complete autonomy of Tibet.

proper, with the right of China to maintain a Resident at Lhasa with a suitable guard. A semi-autonomous zone was to be constituted in Eastern Tibet, in which the Chinese position was to be relatively much stronger. But this Convention, it is understood, has not been ratified by the Chinese Government, owing to the difficulty of defining Outer and Inner Tibet, and in 1918 Tibet took the offensive and threw off the last vestiges of Chinese suzerainty. When the Chinese province of Szechuan went over to the South, the Central Government at Peking was unable to finance the frontier forces or to withstand the Tibetan advance which was directed from Lhasa and appeared to be ably managed. After the Tibetan army had occupied some towns on the confines of the Szechuan marshes, hostilities were suspended and an armistice was concluded.

From what has gone before it will be seen that the importance which formerly attached to the political condition of Tibet was much less a local than an external question, and was influenced by our relations with Russia and China rather than with our relations with Tibet. Russia having relapsed into a state of considerable confusion, and China having relapsed into a state of absolute confusion, these external forces temporarily at any rate disappeared, and Tibet no longer loomed on the Indian political horizon. The veil was drawn afresh over Lhasa, and affairs in that country pursued an isolated course with this considerable difference. The Dalai Lama was now on terms of the greatest cordiality with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in

Central Asia brought about by the Revolution in Russia and the collapse of Government in China, and Mr. Bell, C.M.G., I.C.S., Political Officer in Sikkim, was deputed for this purpose. In 1922 telephonic communication between Lhasa and India was established. The Chinese have lately tried to increase their hold on Tibet but without persuading the Tibetans to accept closer association.

There followed in 1936 the death of the Dalai Lama and the Tibetans have ever since been trying to discover the babe in whose body, they believe, his re-incarnation must simultaneously have occurred. They have so far not succeeded. Meanwhile the Tashi Lama who occupies the spiritual chieftainship in Tibet is the Dalai Lama does the chieftainship in temporal affairs is living in China, having left Tibet during the lifetime of the late Dalai Lama, as a result it is sad of disagreement with him. To all outward appearances events proceed from day to day in Tibet as before. A British Goodwill Mission visited Tibet in the winter of 1950. It spent several months in Lhasa and there established or renewed highly friendly relations with the Tibet Government officials and the Tibetan people. The Mission was led by Mr. P. J. Gould, I.C.S., of the Political Department, who has many personal friends among the leading men of Tibet, and one of his colleagues was left behind in Lhasa where he still remains to maintain the liaison between Tibet and the headquarters of the Government of India.

Political Officer in Sikkim. Mr. T. G. Gould, I.C.S.

VIII—THE NORTH-EASTERN FRONTIER

The position on the northern frontier has been considered as if the British line were contiguous with that of Tibet. This is not so. The real frontier States are Kashmir, Nepal, Sikkim and Bhutan. From Chitral to Gilgit, now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal where the British district of Kumaon is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles there is a narrow strip of native territory between British India and the true frontier. The first of these frontier States is Kashmir. The characteristics of this State are considered under Indian States (q.v.), it is almost the only important Native State in India with frontier responsibilities and it worthily discharges them through the agency of its efficient Indian State troops—four regiments of Infantry and two Mountain Batteries, composed mainly of the Rajput Dogras, who make excellent fighting material. One of the most important trade routes with Tibet passes through Kashmir—that through Ladakh. Then we come to the long narrow strip of Nepal. This Gurkha State stands in special relation with the British Government. It is for all practical purposes independent, and the British

resident at Khatmandu exercises no influence on the internal administration. The governing machine in Nepal is also peculiar. The Maharaj, Dhiraj, who comes from the Sesodia Rajput clan, the bluest blood in India, takes no part in the administration. All power vests in the Prime Minister, who occupies a place equivalent to that of the Mayors of the Palace, or the Shoguns of Japan. The present Prime Minister, Sir Chandra Shamsheer, has visited England, and has given conspicuous evidence of his attachment to the British Government. Nepal is the main Indian outpost against Tibet or against Chinese aggression through Tibet. The friction between the Chinese and the Nepalese used to be frequent, and in the eighteenth century the Chinese marched an army to the confines of Khatmandu—one of the most remarkable military achievements in the history of Asia. Under the firm rule of the present Prime Minister Nepal has been largely free from internal disturbance, and has been raised to a strong bulwark of India. Nepal is the recruiting ground for the Gurkha Infantry, who form such a splendid part of the fighting arm of the Indian Empire. Beyond Nepal are the smaller States of Bhutan and Sikkim, whose rulers are Mongolian by ex-

traction and Buddhists by religion. In view of Chinese aggressions in Tibet, the Government of India in 1910 strengthened their relations with Bhutan by increasing their subsidy from fifty thousand to a lakh of rupees a year, and taking a guarantee that Bhutan would be guided by them in its foreign relations. Afterwards China was officially notified that Great Britain would protect the rights and interests of these States. At the request of the Nepalese Government, a British railway expert was deputed to visit the country and advise on the best means of improving communications with India. As the result of his report the Nepalese Government have decided to construct a light railway from Bilehkhahori to Raxaul. Great success has attended the orders passed by the Nepalese Government abolishing slavery.

Assam and Burma

We then come to the Assam border tribes—the Dadas the Miris the Abors and the Mishmis. Excepting the Abors none of these tribes has recently given trouble. The murder of Mr Williamson and Dr Gregorson by the Mityong Abors in 1911 made necessary an expedition to the Dihang valley of the Abor country on the N.E. frontier. A force of 2,500 and about 400 military police was employed from October 1911 to April 1912 in subduing the tribe. After two or three small actions the murderers were delivered up. The cost of the expedition was Rs. 21,60,000. At the same time friendly missions were sent to the Mishmi and Miri countries. Close contact with these forest clad and leech infested hills has not encouraged any desire to establish more intimate relations with them. The area occupied by the Nagasares runs northwards from Manipur. The Nagasares a Tibeto Burman people, devoted to the practice of head hunting, which is still vigorously prosecuted by the Independent tribes. The Chin Hills is a tract of mountainous country to the south of Manipur. The corner of India from the Assam boundary to the northern boundary of the Shan States is for the most part included in the Mitykina and Bhamo districts of Burma. Over the greater part of this area, a labyrinth of hills in the north, no direct administrative control is at present exercised. It is peopled by the Shans and the Kachins. Civilisation is said to be progressing and steps have been taken to prevent encroachments from the Chinese side. Negotiations between Britain and China on this subject were long in progress, particularly

with a view to the frontier between Burma and the Chinese province of Yunnan where the absence of a defined boundary makes the maintenance of the peace difficult. A Delimitation Commission (consisting of British and Chinese Commissioners with a Neutral President) proceeded to the frontier region in November 1935, to spend the winter settling the line between the two countries. The Neutral President is the distinguished Swiss engineer officer, Colonel F. Iselin. It became obvious in April 1936, that the Commission would be unable to complete its work before the end of the current dry season and the Chairman therefore decided that it should disperse and reassemble in November, 1936, to complete its task.

On re-assembling according to this plan, the Commission spent several more months completing its inquiries and eventually in the Spring of 1937 presented a unanimous report. This document of which full details have not yet been published, definitely laid down upon the map the frontier line between Burma and Yunnan as prescribed by the latest Anglo-Chinese agreement on the subject. It therefore provides both Governments with exact data for the pursuit of negotiations concerning frontier questions still unsettled between them.

There is a considerable trade with China through Bhamo. On the Eastern frontier of Burma are the Shan States, with an area of fifty thousand square miles and a population of 1,300,000. These States are still administered by the Sawbwas or hereditary chiefs, subject to the guidance of Superintendents and Assistant Superintendents. The Northern Shan Railway to Lashio, opened in 1903, was meant to be a stage in the construction of a direct railway link with China, but this idea has been put aside, for it is seen that there can never be a trade which would justify the heavy expenditure. The Southern Shan States are being developed by railway connection. The five Karenni States lie on the frontier south of the Shan States. South of Karenni the frontier runs between Siam and the Tenasserim Division of Burma. The relations between the Indian Government and the progressive kingdom of Siam are excellent. A notable humanitarian development of recent years is the success of the measures to abolish slavery in the Hukawng Valley. In this remote place in the north east of Burma a mild system of slavery existed, but in response to the initiative and pressure of British officers they were all freed by April 1926.

NEPAL

The small hilly independent Kingdom of Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5,580,000, chiefly Hindus. The greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-capped peaks which culminate in Mount Everest (29,002 feet) and others of slightly less altitude. The country before the Gurkha occupation was split up into several small kingdoms under Newar kings. The Gurkhas under Prithvi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhaktapur, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family Maharaja Jung Bahadur Rana obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendants of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816 and subsequent agreements by which a representative of the British Government is received at Kathmandu. By virtue of the same treaty the Government maintained a representative at the Court of the other and her treaty relations with Tibet allow her to keep a Resident at Lhasa of her own. Her relation with China is of a friendly nature. Ever since the conclusion of the treaty of 1816 the friendly relations with the British Government have steadily been maintained. During the rule of the late Prime Minister it has been at its height as is evidenced by the valuable friendly help in men and money which has been given and which was appreciatively mentioned in both the Houses of Parliament and by Mr Asquith in his Guildhall speech in 1915. The message from His Majesty the King Emperor to the Nepalese Prime Minister sent on the termination of hostilities and published at the time as also Viceroy's laudatory address to the Nepalese contingent on the eve of their return home after having bravely fulfilled their mission in India eloquently and gratefully acknowledged the valuable help rendered by Nepal during the four and a half years of war. In recognition of this help Nepal receives an unconditional annual present of rupees ten lakhs from the British Government to be paid in perpetuity. To further strengthen and cement the bonds of friendship that have subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December 1923.

From the foregoing account of the history of Nepal it will be seen that the Government of the country has generally been in the hands of the Minister of the day. Since the time of Jung Bahadur this system of government has been clearly laid down and defined. The sovereign, or Maharajadhiraja, as he is called, is but a

dignified figure head, whose position can best be likened to that of the Emperor of Japan during the Shogunats. The present King, His Majesty Maharajadhiraja Tribhuvan Bir Bikram Jung Bahadur Shah Bahadur Shum Shere Jung Deva, ascended the throne on the death of his father in 1911. The real ruler of the country is the Minister who, while enjoying complete monopoly of power, couples with his official rank the exalted title of Maharaja. Next to him comes the Commander in Chief who ordinarily succeeds to the office of Minister.

The present Minister is the head of affairs of Nepal is Maharaja Bhum, Shum Shere Jung Bahadur Rana GCSI GCMG, KCSI, VC, YD. Yit Jung Protting Shum Chum Luh Chum Shang Ching (Chinese), Honorary Lieutenant General British Army, and Hon. Colonel, 4th Gurkhas, who succeeded the late Maharaja Chandra Shum Shere Jung Bahadur Rana as Prime Minister and Supreme Commander in Chief in November 1929. Soon after this accession to power with the consummate skill and political acumen of a born diplomat he averted a threatened breach of relations with Tibet. A man of proved ability as the Commander in Chief of Nepal he has inaugurated several urgent and important works of public utility. Already he has abolished certain uneconomical impost such as those on salt, cotton, etc. has tentatively suspended capital punishment in the kingdom with a view to its final abolition, constructed a second water works, improved mintage and expanded general education. The reclamation on a large scale of forest areas both in the hills and the Terai is now going on, to provide a hearth and home for Gurkhas retiring from British Service and put to the overflow population now migrating outside the country. In all his public utterances he has expressed an earnest desire to uphold and augment the traditional friendship with the British Government.

Rice, wheat and maize form the chief crops in the lowlands. Mineral wealth is supposed to be great, but, like other sources of revenue, has not been developed. Communications in the State are primitive, but since 1920 the Government has already undertaken the construction of a good and prominent road for vehicular traffic from Amlekhgunj to Blumphedi—the base of a steep ridge in the main route to the capital of the country from British India—and also has installed a ropeway to connect this base with the capital proper covering a distance of 14 miles. A light railway from Amlekhgunj covering a distance of 25 miles in the route and connecting with the B & N W Ry at Raxaul also has been constructed and opened for traffic since March 1927. It has also put up a telephone over this route connecting the capital with the frontier township of Birgunje near Raxaul. The revenue is about two crores of rupees per annum. The standing army is estimated at 45,000, the highest posts in it being filled by relations of the minister. The State is of considerable archaeological interest and many of the sites connected with scenes of Buddha's life have been identified in it by the remains of inscribed pillars.

British Envoy—Lieut Col F M Bailey, CIE.

Railways to India.

The prospect of linking Europe and Asia by a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always lain in the direction of lines approaching India. More than 50 years ago a Select Committee of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Calat and Port Said to Koweit, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian railway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans Persian railway, connecting India, across Persia with the Russian lines between the Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness arising from their estimate of the value it would possess in their grand aim to overthrow the British Empire. The outbreak of the great war and the success of the Germans in involving Turkey into it saw the final stages of the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphrates to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghdad at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samarra.

The war compelled the British to undertake considerable railway development northward from Basra the port at the mouth of the Shat el Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system consists of a metre-gauge line from Basra via Nasareh, on the Euphrates thence northwards to Baghdad, the line passing a considerable distance westward to Kut-el-Amara, of historic fame. From Baghdad the line runs eastward approximately to the foot of the pass through which the Persian road crosses the frontier of that country. A line branches off in the neighbourhood of Kirkir in the direction of Mosul. A line also runs westward from Baghdad to Feluja, on the Euphrates. A link

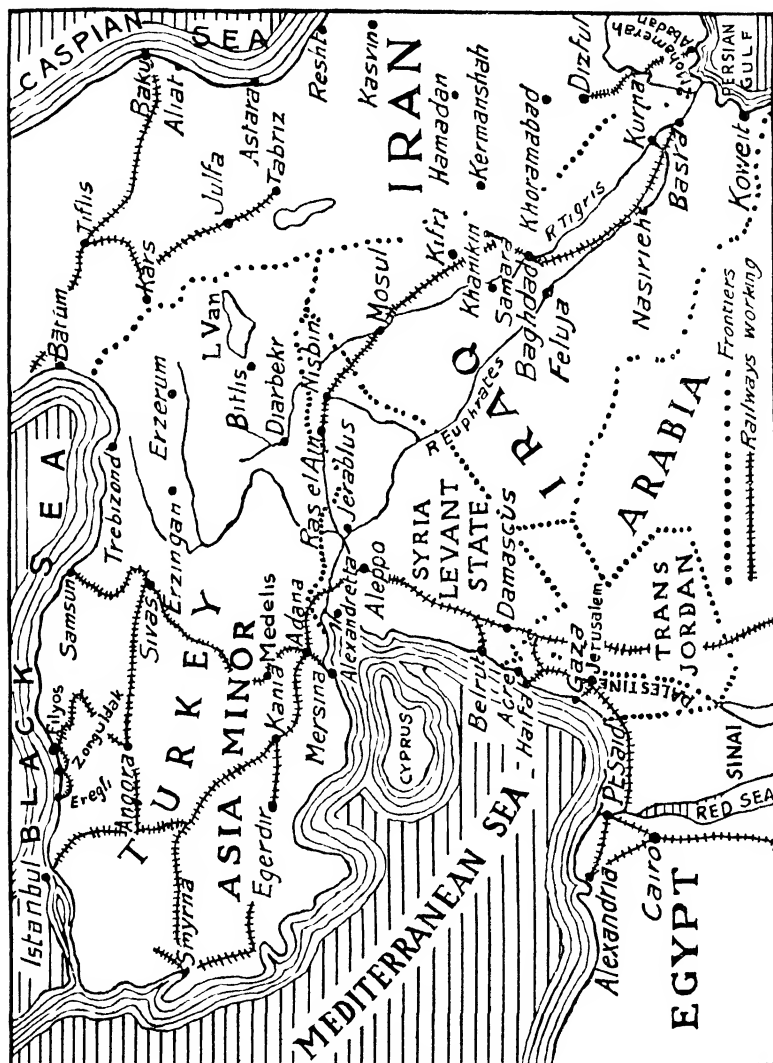

between the Iraq system and the railways of Asia Minor has not yet materialised.

The Trans Persian line to join the Russian (Caucasian system) and the Indian railways first assumed proportions of practical importance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the point likely to be the termini of a Trans Persian line. The Russian system reached Julfa, on the Russo Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south east of Lake Urumia. The Indian railway system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

The Foreign Minister of Persia, or Iran as it is now called, visited New Delhi in November, 1915, for informal discussions with the Government of India with a view to enlisting British help in the development of rail communications in Eastern Persia. The development thus envisaged was of a new Persian railway system linked with the British line running from Quetta, through Nushki, towards the Baluchistan-Sistan frontier. The Quetta-Nushki line was extended across the Sistan border into Persia during the Great War. Its terminus was then at Duzdap (or Zaidabad), in Persia. It has long ceased to be used further towards Persia than Nokkundi, in Baluchistan. The informal discussions did not crystallize into an agreement of formal undertaking on either side.

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Merv to Herat, on the northern frontier of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the current situation in Central Asia and beyond the Indian North West Frontier does not suggest the early removal of the strategic difficulties. The completion of a broad gauge line extending the Indian railway system through the Khyber Pass to Landi Khana, at its western extremity, opens a prospect of further possible rail connections with Afghanistan.

Britain's special interests in regard to Iranian communications have hitherto primarily been associated with lines running inland from the Persian Gulf, to supersede the old mule routes. Special importance has for many years been attached to the provision of a railway from Mohammerah at the opening of the Karun Valley, where the Karun River runs into the Shat el Arab, just below Basra, northwards into the rich highland country of Western Persia, where the valuable West Persian oilwells also lie. Britain has long established special relations with the Karun Valley and has a large trade there.

The Army.

The great sepoy army of India originated in the small establishments of guards, known as peons, enrolled for the protection of the factories of the East India Company, but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first fortified position was occupied by the East India Company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746. Following the French example, the English raised considerable sepoy forces and largely increased the military establishments. In 1748 Major Stringer Lawrence landed at Fort St David to command the forces of the Company. The English foothold in India was then precarious and the French under Duplex were contemplating fresh attacks. It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander in Chief. In Madras the European companies were developed into the Madras Fusiliers; similar companies in Bengal and Bombay became the 1st Bengal and 1st Bombay Fusiliers. The native infantry were similarly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in 1754.

Struggle with the French—From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Duplex had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals and the power of England was established by the battle of Plassey in Bengal, and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owing nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahratta Princes and others by Muslim adventurers such as Hyder Ali of Mysore. A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and

the Indians numbered some 67,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artillery companies were raised.

In 1798, the Marquis Wellesley arrived as Governor General, firmly imbued with the necessity of destroying the last vestiges of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mahratta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army officered by Europeans under the French adventurer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Deccan against the prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Emperor was released from the domination of the Mahrattas. Subsequently Holkar also was reduced, and British power established on a firm footing.

Mutiny at Vellore—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the mutineers. This retribution put a stop to any further outbreaks in the army.

Overseas Expeditions—Several important overseas expeditions were undertaken in the early part of the nineteenth century. Bourbon was taken from the French, Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris. Practically the whole army took the field and all India was turned into a vast camp. The

Mahratta Chiefs of Poona, Nagpur, and Indore rose in succession, and were beaten, respectively, at Kirkee, Sitabadi, and Mehildpur. This was the last war in Southern India. The tide of war rolled to the north never to return. In the Punjab, to which our frontier now extended, our army came into touch with the great military community of the Sikhs.

In 1824, the armies were reorganised, the double battalion regiments being separated, and the battalions numbered according to the dates they were raised. The Bengal Army was organised in three brigades of horse artillery, five battalions of foot artillery, two regiments of European and 68 of Indian infantry, 5 regiments of regular and 8 of irregular cavalry. The Madras and Bombay armies were constituted on similar lines, though of lesser strength.

First Afghan War and Sikh Wars.—In 1839, a British Army advanced into Afghanistan, and occupied Cabul. There followed the murder of the British envoys and the disastrous retreat in which the army perished. This disaster was in some measure retrieved by subsequent operations, but it had far-reaching effects on British prestige. The people of the Punjab had witnessed these unfortunate operations, they had seen the hostilities which never returned, and although they saw also the avenging armies they no longer regarded them with their former awe. Sikh aggression led to hostilities in 1845-46, when a large portion of the Bengal Army took the field under Sir Hugh Gough. The Sikhs were defeated after stubborn fights at Muddki and Ferozeshahr, the opening battles, but did not surrender until they had been overthrown at the battles of Alwal and Sohraon. Two years later an outbreak at Multan caused the Second Sikh War, when after an indecisive action at Chillianwala, our brave armies were finally overcome at Gujerat, and the Punjab was annexed. Other campaigns of this period were the conquest of Sind by Sir Charles Napier, and the Second Burmese War, the first having taken place in 1824.

The conquest of the Punjab extended over the frontier to the country inhabited by those turbulent tribes which have given so much trouble during the past sixty years while they have furnished many soldiers to our army. To keep order on this border the Punjab Frontier Force was established and was constantly engaged in small expeditions which, while they involved little bloodshed, kept the force employed and involved much arduous work.

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops. In the Madras Army 8,000 British and 49,000 Indian troops, and in Bombay 9,000 British and 45,000 Indian troops. The proportion of Indian to British was therefore too large for safety. The causes of the mutiny were many and various. Among these were the annexation policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn, interference with the privileges of the sepoy with respect to certain allowances, and lack of power on the part of commanding officers either to punish or reward. The final spark which fired the revolt was the

introduction of a new cartridge. The muskets of those days were supplied with a cartridge in which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore unclean alike for Muhammadans and Hindus. This was interpreted as an attempt to destroy the caste and the religion of the sepoys. Skillful agitators exploited this grievance, which was not without foundation, and added reports that flour was mixed with bone dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Barrackpore where sepoy Mangai Pande attacked a European officer. The next most serious manifestation was the refusal of men of the 3rd Bengal Cavalry at Meerut to take the obnoxious cartridge. These men were tried and sentenced to long terms of imprisonment, their fetters being riveted on parade on the 9th May. Next day the troops in Meerut rose, and, aided by the mob, burned the houses of the Europeans and murdered many. The troops then went off to Delhi. Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place remained inactive and the mutineers were allowed to depart unmolested to spread the flames of rebellion.

Delhi is the historic capital of India. On its time worn walls brood the prestige of a thousand years of Empire. It contained a great magazine of ammunition. Yet Delhi was held only by a few Indian battalions, who joined the mutineers. The Europeans who did not succeed in escaping were massacred and the Delhi Emperor was proclaimed supreme in India. The capital constituted a nucleus to which the troops who mutinied in many places flocked to the standard of the Mughal. An army was assembled for the recovery of Delhi but the city was not captured until the middle of September. In the meantime, mutiny had spread. The massacres of Cawnpore and Jhansi took place, and Lucknow was besieged until its relief on the 27th September. The rebellion spread throughout Central India and the territory that now forms the Central Provinces, which were not recovered until Sir Hugh Rose's operations in 1858 ended in the defeat of the Rani of Jhansi.

Minor Campaigns.—During the period until 1879, when the Second Afghan War began, there were many minor campaigns including the China War of 1860 the Amoyea Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading figure was Lord Roberts. There were expeditions to Egypt and China, and Frontier Campaigns of which the most important was the Tirah Campaign of 1897. There were also the prolonged operations which led up to or ensued upon the annexation of Burma, several campaigns in Africa, and the expeditions to Lhasa. But until 1914, since the Afghan War, the army of India, except that portion of the British garrison which was sent to South Africa in 1899, had little severe fighting, although engaged in many arduous enterprises.

Reorganisation after the Mutiny—In 1857 the East India Company ceased to exist and their army was taken over by the Crown. At this time the army was organized into three armies, *viz* Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor reorganizations took place during the following years, such as the linking of three Regiments together and the raising of Class Regiments and Companies. In 1895 the next large reorganization took place. This was the abolition of the three Armies and the introduction of the command system. Four Commands were formed, *viz* Punjab, Bengal, Madras and Bombay.

Lord Kitchener's Scheme—This system lasted until 1904 when under Lord Kitchener's reorganization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western corresponding to the Punjab, Bombay and Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delegation of administrative powers to Divisional Commanders, retention of such powers by Lieutenant Generals of Commands led to delay in the despatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each under a General Officer who was responsible for the command, inspection and training of the troops but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917 when both had practically the same functions as their predecessors. It was now realised that administration was being unduly centralised at Army Headquarters and the machinery was becoming clogged with unnecessary details. To secure efficiency at A. H. Q. therefore, a certain measure of decentralisation was carried out in 1915. With the alteration of the designation Army to "Command" at this time, a considerable increase was made in the administrative staffs of the two Commands and the General Officers Commanding were given powers to deal with all administrative questions other than those dealing with matters of policy, new principles or war.

The commands were increased to four in 1920, each under a General Officer Commanding-in-Chief.

Present System of Administration

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and Its Evolution," a publication issued in 1924 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. This post is filled by a senior officer of the Indian Army with recent Indian experience.

The Military Secretary is assisted by one first grade staff officer, selected from the Indian Army. In order that he may keep in touch with the current Indian affairs, the Military Secretary is expected to visit India during the tenure of his office. In addition, by a practice which has obtained for many years, a retired Indian Army officer of high rank has a seat upon the Secretary of State's Council.

The superintendence, direction and control of the civil and military government of India are vested in the Governor General in Council, who is required to pay due obedience to all such orders as he may receive from the Secretary of State. The Viceroy's Executive Council exercise in respect of Defence administration the same authority and functions as they exercise in respect of other departments of the Government. In the first phase of the representative institutions conferred upon India by the Montagu-Chelmsford Reforms Scheme, Defence expenditure and the direction of Defence policy have been excluded from the control of the Indian Legislature.

The Commander in Chief—The next authority in the chain of administrative arrangements is His Excellency the Commander in Chief, who by custom is also the Defence Member of the Viceroy's Executive Council. The appointment is held by His Excellency General Sir Robert A. Cassels G.C.B., C.S.I., D.S.O., Indian Army who succeeded Field Marshal Sir Philip Chetwode. He is also a member of the Council of State. All the work connected with the administration of Defence, the formulation and execution of the Defence policy of the Government of India, the responsibility for maintaining every branch of the Army, combatant and non-combatant, in a state of efficiency, and the supreme direction of any military operations based upon India are centred in one authority,—the Commander in Chief and Defence Member. In addition, he administers the Royal Indian Navy and the Royal Air Force in India. The Commander in Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, *viz*, the Chief of the General Staff, the Adjutant General, the Quartermaster General and the Master General of Ordnance.

The Defence Department—The Department is administered by a Secretary who like other Secretaries in the civil departments, is a Secretary to the Government of India as a whole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Sub-section 4, Section 26 of the Regimental Debts Act, 1893 (56 Vict. C. 5) and the Regulations made thereunder Secretary to the Government of India in the Military Department. He also exercises the powers vested in the Army Council by the Geneva Convention Act, 1911, so far as that Act applies to India under the Order in Council No. 1551 of 1918. He is assisted by a Deputy Secretary, two Under Secretaries, a Director of Military Lands and Cantonments, a Director of Regulations and Forms, and one Assistant Secretary.

The Defence Department deals with all army services proper, and also the administration

of the Royal Indian Navy and the Royal Air Force in India, in so far as questions requiring the orders of the Government of India are concerned. The Defence Department Secretariat has no direct relations with commanders of troops or the staffs of formations subordinate to Army Headquarters. It has continuous and intimate relations with Army Headquarters in all administrative matters and is responsible for the administration of Cantonments, the estates of deceased officers and the compilation of the Indian Army List. The Army administration is represented in the Legislature by the Defence Member in the Council of State, and by the Defence Secretary in the Legislative Assembly.

The Military Council—Is composed of the Commander-in-Chief as President, and the following members, namely: The Chief of the General Staff, as Vice President, the Adjutant General, the Quartermaster General, the Master General of Ordnance, the Air Officer Commanding Royal Air Force, the Secretary to the Government of India in the Defence Department, and the Financial Adviser Military Finance, representing the Finance Department of the Government of India. An Under Secretary in the Defence Department, acts as its Secretary. It is mainly an advisory body, constituted for the purpose of assisting the Commander in Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander in Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference. The heads of the minor independent branches of Army Headquarters and the directors of technical services attend when required.

Military Territorial Areas

Indian Territory is divided in four commands each under a General Officer Commanding in Chief and the Independent District of Burma under a Commander. The details of the organization are given in the table on the next page and it will be seen that commands comprise 13 districts, 4 Independent Brigade Areas and 30 Brigades and Brigade Areas. The Northern Command, with its headquarters at Murree, coincides roughly with the Punjab and North West Frontier Province, the Southern Command, with headquarters at Poona, coincides roughly with the Bombay and Madras Presidencies and part of the Central Provinces and Rajputana, the Eastern Command, with headquarters at Naini Tal, coincides roughly with the Bengal Presidency, the United Provinces, Bihar, Orissa and Assam, the Western Command, whose headquarters are at Karachi, covers Sind and Baluchistan.

The General Officer Commanding in Chief of each command is responsible for the command administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements.

Apart from the four commands, the only formation directly controlled by Army Headquarters is the Burma district which, mainly because of its geographical situation, cannot conveniently be included in any of the four command areas. The Aden Independent brigade which was under the administrative control of the Government of India was transferred to the administrative control of His

Majesty's Government from the 1st April 1927.

The distribution of the troops allotted to the commands and districts has been determined by the principle that the striking force must be ready to function in war, commanded and constituted as it is in peace. With this end in view, the Army in India is now regarded as comprising three categories of troops:

- (1) Covering Troops,
- (2) The Field Army,
- (3) Internal Security Troops.

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations to form a screen behind which mobilisation can proceed undisturbed. The force consists of approximately 12 infantry brigades with a due proportion of other arms.

The Field Army consists of 4 Divisions and 4 Cavalry Brigades. The Field Army is India's striking force in a major war.

Army Headquarters

The organization of the Army Headquarters with the Commander in Chief as the head, is founded upon four Principal Staff Officers charged with the administration of—

- (a) The General Staff Branch,
- (b) The Adjutant General's Branch,
- (c) The Quartermaster General's Branch,
- (d) The Master General of Ordnance Branch.

General Staff Branch

C G S—Lieut. General Sir Ivo I. B. Vesev, KCB, KBE, CMG, DSO, Brit. Ser.
D C G S—Maj. Genl. C. J. E. Auchinleck, CB, CSI, DSO, OBE, IA.
M G, Cav—Maj. Genl. G. E. H. Brooke, DSO, MC, Brit. Ser.
M G, R A—Maj. Genl. R. H. Carrington, DSO, Brit. Ser.
S O in C—Brig. C. J. S. McCornu, OBE, MC, Brit. Ser.

This Branch deals with military policy with plans of operations for the defence of India, with the organization and distribution of the army for internal security and external war, the administration of the General Staff in India, the supervision of the training of the military forces for war, their use in war, the organisation and administration of the general staff in India, the education of officers, the supervision of the education of warrant and non-commissioned officers and men of the Army in India, and inter-communication services.

Adjutant General's Branch

A G—Major General R. C. Wilson, CB, DSO, MC.
D A G—Maj. Genl. M. S. Sunders, CB, DSO, IA.
D M S—Maj. Genl. L. A. Walker, CB, IMS, KES.

This Branch deals with all matters appertaining to the raising, organising and maintenance of the military forces in officers and men, the peace distribution of the army, discipline, pay and pensions, martial, military and international law, medical and sanitary matters affecting the Army in India, personal and ceremonial questions, prisoners of war, recruiting, mobilization and demobilization. The Judge Advocate-General forms part of the Branch. The Director of Medical Services in India, who was independent before the war, is now included in the Adjutant-General's Branch.

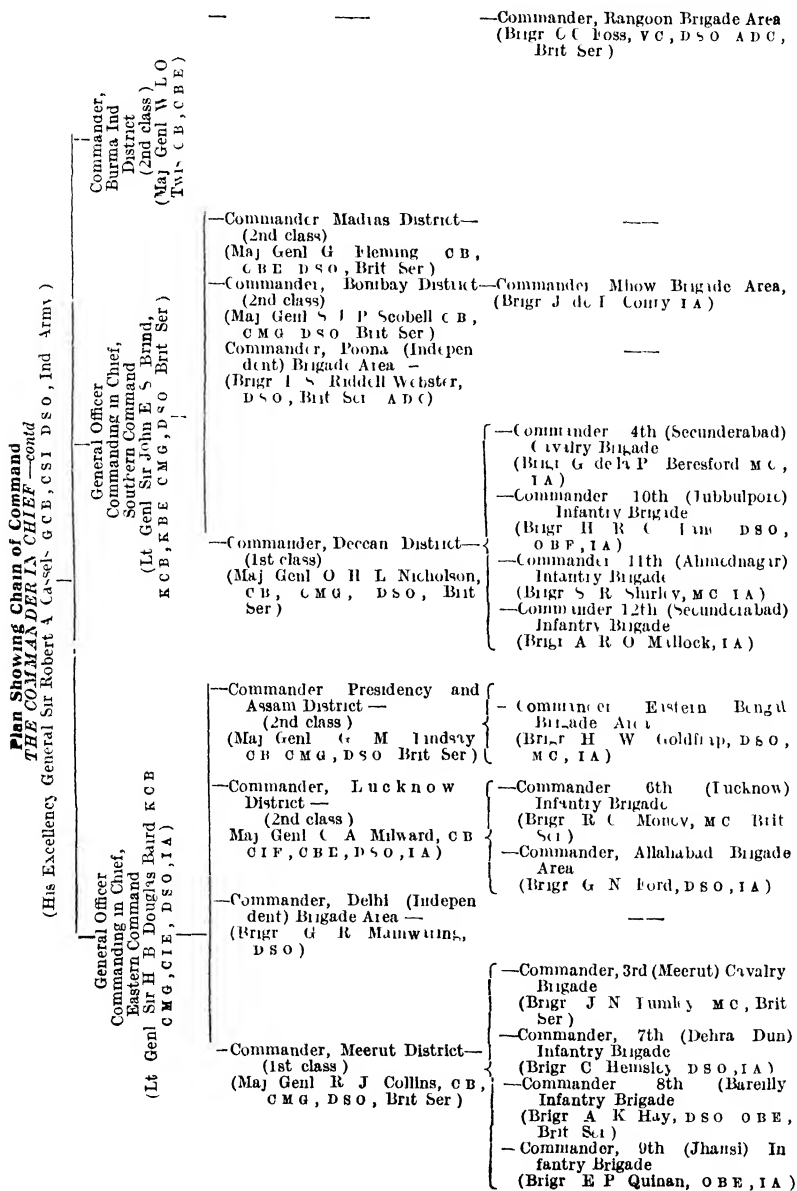

**Plan Showing Chain of Command
THE COMMANDER IN CHIEF**

(His Excellency General Sir Robert A. Cassel, GCB, CSI, DSO Ind Army)

General Officer
Commanding in Chief,
Northern Command
(Lt Genl Sir John F. D. Coleridge
KCB (N.C. DSO, IA, ADC)

General Officer
Commanding in Chief,
Western Command
(Lt Genl Sir Walter W. Pitt Taylor,
KCB, C MG DSO Brit Ser)

- Commander, Baluchistan District — (1st class)
(Maj) Genl J J Huddleston
C B C MG, DSO, MC, Brit Ser
- Commander, Zhob (Independent) Brigade Area
(Brigr) J J Ross, OBI, MC IA)
- Commander Sind (Independent) Brigade Area
(Lt Col) A J H Chope DSO, IA)
- Commander, Waziristan District — (2nd class)
(Maj) Genl D F Robertson
C B DSO, IA)
- Commander, Lahore District — (1st class)
(Maj) Genl B R Moberly C B DSO, IA)
- Commander, Rawalpindi District — (1st class)
(Maj) Genl L de Burgh, C B, DSO, OBE, IA)
- Commander Kohat District — (2nd class)
(Maj) Genl H J Houghton, C B, OBE, CBE, IA)
- Commander, Peshawar District — (1st class)
(Maj) Genl C P D Strettell, C B IA)
- Commander, 4th (Quetta) Infantry Brigade
(Brigr) B C T Paget, DSO, MC, Brit Ser
- Commander, 5th (Quetta) Infantry Brigade
(Brigr) F J Fontm, MC, IA)
- Commander, Razmik Brigade
(Brigr) J S Marsahll, C B, DSO OBE, IA)
- Commander, Bannu Brigade
(Brigr) E H Maynard MC IA)
- Commander, Wana Brigade
(Brigr) L M Heath, CBE DSO MC IA)
- Commander, 2nd (Sialkot) Cavalry Brigade
(Brigr) F Gwiltin, DSO MC, IA)
- Commander, Perozpore Brigade Area
(Brigr) H M Purrows IA)
- Commander, Jullunder Brigade Area
(Brigr) G C B Buckland DSO, MC IA)
- Commander, Lahore Brigade Area
(Brigr) E I Wilson DSO Brit Ser
- Commander, Ambala Brigade Area
(Brigr) E G Hall, CBE, IA)
- Commander, 1st (Abbottabad) Infantry Brigade
(Brigr) R D Inskip, DSO, MC)
- Commander, 2nd (Rawalpindi) Infantry Brigade
(Brigr) C D Noyes MC, IA)
- Commander, 3rd (Jhelum) Infantry Brigade
(Brigr) A N Joyner Ackland DSO MC Brit Ser)
- Commander Kohat Brigade
(Brigr) R S Abbott, MC, IA)
- Commander, 1st (Risalpur) Cavalry Brigade
(Brigr) H Macdonald, DSO, IA)
- Commander, Landikotai Brigade
(Brigr) A L M Molesworth, IA)
- Commander Peshawar Brigade
(Brigr) R N O Connol, DSO, MC, Brit Ser)
- Commander Nowshera Brigade
(Brigr) Hon H R L G Alexander, CSI, DSO, MC Brit Ser ADC)

Quarter Master General's Branch

Q M G—Lt Genl Sir Aithui W H M
Mons KCB, CMG, DSO, IA

D Q M G—Maj Genl H F Salt, CB,
CMG, DSO, Brit Ser

D S & T—Maj Genl L M Steward, CB,
CBE, IA

This Branch is concerned with the specification, provision, inspection, maintenance and issue of supplies, *i.e.* foodstuffs, forage, fuel etc. and is responsible for the following Services—Transportation Movements, Quartermaster Supply and Transport, Military Farms, Remounts, Veterinary, Garrison and Regimental Institutes. Also for the purchase of grains and of minor supplies not provided in bulk by the authority responsible for production and provision.

Master General of the Ordnance Branch

M G O—Genl Sir Henry E ap Rhys
Pryce, KCB, CMG, DSO, IA, ADC

D M G O—Maj Genl R H Hazlet CB,
CBE, DSO, Brit Ser

This Branch controls the ordnance and clothing factories and is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores clothing, and necessaries and conducts all matter relating to contracts in respect of food stuffs &c., and supply in bulk of general stores and materials. The Master General is also responsible for the design, inspection and supply of guns, carriages, tanks, small arms, machine guns, ammunition, chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions.

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are

(1) MILITARY SECRETARY'S BRANCH

Mil Secy—Maj Genl N C Bannatyne,
CBE, CIE, IA

The Military Secretary deals with the appointment, promotion and retirement of officers holding the King's Commission, of officers of the Indian Land Forces, the selection of officers for staff appointments, and the appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board.

(2) ENGINEER IN CHIEF'S BRANCH

E in C—Maj Genl H S Gaskell, CB,
DSO, Brit Ser

The Engineer in Chief is the head of the Corps of Royal Engineers in India. He is responsible for Engineer operations and Engineer Services during war and peace, the preparedness for war of the Engineering services. The supply of Engineer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs.

In addition to the above, the Army Headquarters staff includes certain technical advisers, *viz.* the Major General, Cavalry, the Major General, Royal Artillery, and the Adviser and Secretary, Board of Examiners.

The duties of the Inspector of the Army Educational Corps, India and the Inspector of Physical Training are carried out by the Commandants of Army School of Education, India, Belgaum and Army School of Physical Training, Ambala, respectively.

Regular British Forces in India

The British cavalry and British infantry units of the army in India are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. In the case of British cavalry the same arrangement cannot be applied, as one unit only comprises the regiment.

In Great Britain, in peace time, units are maintained at an establishment smaller than that required for war. In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry—There are 5 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

British Infantry—The present number of British infantry battalions in India is 45, each with an establishment of 28 officers and 865 other ranks.

In 1921, an important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks. Battalions had always maintained a quota of Indian followers but up to 1921 the combatant personnel was entirely British. In 1921, on the abolition of the Machine Gun Corps eight machine guns were included in the equipment of a British infantry battalion. This number was increased to twelve in 1927. In 1929, a change of organisation was introduced, and the battalion now comprises—*Headquarters Wing*—1 Support Company and 3 Rifle Companies. Each Rifle Company has 4 Lewis guns. The Support Company is organised into—Headquarters and 3 Platoons (all on pack) each of 2 Sections of 2 Vickers guns each. The peace establishment of Indian combatant personnel is fixed at one Indian officer and 42 Indian other ranks. The Support Company platoon, as it is called is transferred *en bloc* to another British battalion when the battalion to which it was originally attached proceeds on relief out of India.

Royal Artillery—Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries.

The peace organisation of the artillery at the present day is as follows.

Royal Horse Artillery—Comprises four independent batteries. Each battery is armed with six 18 pounder guns.

Field (Higher and Lower Establishment) Brigades—Four brigades on the higher establishment, each consisting of headquarters and four batteries. Four brigades on the lower establishment, each consisting of headquarters and four batteries. A brigade on the higher establishment consists of 2 batteries of six 18 prs each and 2 batteries of six 4.5" Howitzers. A brigade on the lower establishment consists of 2 batteries of four 18 prs each and 2 batteries of four 4.5" Howitzers.

Field (Mechanised) Brigade—Two mechanised brigades each consisting of two batteries with armed four 18 pounder guns, and two batteries armed with four 4.5" howitzers.

Indian Mountain Brigades—Six brigades each consisting of headquarters, one British light and three Indian mountain batteries. One unbrigaded mountain battery also one mountain Artillery Section for Chitral and one Survey Section. All batteries are armed, with four 3.7 howitzers. The armaments of the Frontier posts at Fort Milward, Fort Salop, Fort Jhansi, Wana Mir Ali, Wana Ihal, Chaman, Hindubagh Landi Kotai Shagari Chikdara and Fort Sandeman are also manned by personnel of Indian Mountain Brigades, R A.

Mountain Brigades—There are two such brigades. Three batteries in each brigade, two of which are armed with six 6" howitzers and one battery with four 60 pounder guns.

Heavy Brigade—One battery at Bombay and one at Karachi.

Anti Aircraft—Headquarters One battery, located at Bombay. The battery is armed with eight 3 inch 20 cwt guns.

Indian Regiment of Artillery—The first unit of this new corps has been raised as a field artillery brigade and is designated A Field Brigade Indian Artillery. The establishment of this brigade consists of brigade headquarters, 2 batteries each of 18 prs guns and 2 batteries each of four 4.5" howitzers.

Artillery Training Centres—One centre at Muttra, for Indian ranks of R H A and of field medium and anti air craft batteries and another centre at Ambala for Indian ranks of Light Mountain and Heavy Artillery. These centres were created for the recruitment and training of Indian personnel. A training battery to recruit and train Indian ranks for the Indian Artillery has been formed from 1st April 1936 by expanding the Royal Artillery Training Centre at Muttra. There is also a R A Boys Depot at Bangalore.

Engineer Services

The Engineer in Chief—The head of the Corps of Royal Engineers in India is directly responsible to His Excellency the Commander in Chief. The Engineer in Chief is not a Staff Officer, but the technical adviser of the Commander in Chief on all military engineering matters and is responsible for

(1) Engineer operations and engineer services during war and peace

(2) The preparedness for war of the engineering services

(3) The supply of engineer stores during war and peace

(4) The execution and maintenance of all military works

(5) The constructional efficiency, accuracy and economy of all projects and designs submitted by him

The Organisation—The Engineer organisation of the Army consists of two main branches, viz., the Sappers and Miners and the Military Engineer Services.

The composition of the Corps of Sappers and Miners is as follows

Queen Victoria's Own Madras Sappers and Miners, with headquarters at Bangalore. King George's Own Bengal Sappers and Miners, with headquarters at Roorkee. Royal Bombay Sappers and Miners, with headquarters at Kirkee.

The personnel of the Corps consists of Royal Engineer officers, Indian Army Officers from the late Pioneer Corps, Indian officers holding the Viceroy's commission, a certain number of British warrant and non commissioned officers. Indian non commissioned officers and Indian other ranks. Each Corps is commanded by a Lieutenant Colonel, who is assisted by a Superintendent of Instruction, an Officer in Charge Works shops, an Adjutant, three Quartermasters, three Subadar Majors, a Jemadar Adjutant and a Jemadar Quartermaster.

Field Troops are mounted units, trained to accompany cavalry, and are equipped to carry out hasty bridging, demolition and watersupply work. Field Companies are trained to accompany Infantry Divisional Headquarters. Companies are small units containing highly qualified tradesmen and are trained to carry out technical work in connection with field workshops. Army Troops Companies are somewhat smaller units than field companies; they are required to carry out work behind divisions, under the orders of Chief Engineers, e.g. heavy bridging work, large water supplies, electrical and mechanical installation.

The Military Engineer Services control all military works in India, and Burma except in the case of a few small outlying military stations, which are in charge of Public Works Department. They control all works for the Royal Air Force and all such works as are entrusted to them in respect of the Royal Indian Navy and they are charged with all civil works in the North-West Frontier Province and Baluchistan under the orders in each of these two areas, of the Governor and Agent to the Governor General, respectively. They also control civil works in Bangalore, under the Mysore Government.

The Engineer in Chief is assisted by a Deputy Engineer in Chief (Works) and a Deputy Engineer in Chief (Electrical and Mechanical). In each Command there is a Chief Engineer, while in the Northern Command a Deputy Chief Engineer administers Military and Civil works in the N W F P and is Secretary, P W D, to the Govt of N W F Province. The Chief Engineer, Western Command, is the

Secretary, P W D., to the Agent to the Governor General in Baluchistan. Both at Army Headquarters and in Commands there are Staff Officers, R E., and Technical Officers. At the headquarters of each district there is a Commander, Royal Engineers assisted in certain districts by A C S R L Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of brigade areas and military stations, their charges being divided into sub divisions under Sub divisional Officers. The sub divisions are Buildings and Roads, Electrical and Mechanical, and Furniture and Stores. There are sub overseers for Buildings and Roads and the Barrack Department subordinates in charge of Furniture and Stores are assisted by store keepers.

Royal Air Force in India

The Royal Air Force in India is controlled by the Commander in Chief in India as part of the defence services of the Indian Empire. The air force budget is incorporated in the Defence Services Estimates. The Commander of the Air Force the Air Officer Commanding in India is an Air Marshal whose rank corresponds to that of a Lieutenant General in the Army. The appointment is now held by Air Marshal Sir Edgar R. Tullow Hewitt KCB CMC DSO MC.

The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the seat of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely air staff personnel, technical stores, medical and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant General's and Military Secretary's branches, the Quartermaster General's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

Subordinate formations—The formations subordinate to the Royal Air Force Headquarters are—

- (i) GROUP COMMAND, comprising 2 Wing Stations of two squadrons each, on a station basis
- (ii) Wing Command comprising 2 squadrons not on a station basis
- (iii) Station Commands
- (iv) The Aircraft Depot
- (v) The Aircraft Park
- (vi) The Transport Flight
- (vii) R A F Hill Depot Lower Topa

Group Command—The Group Command is known as No 1 (Indian) Group Headquarters, and is located at Peshawar. The Group Commander is a Group Captain, corresponding in rank to a Colonel in the Army. His staff is organised on the same system as that of the Headquarters of the R A F in India. The

establishment of the Group consists of 7 officers and 21 airmen.

The subordinate units to No 1 (Indian) Group Headquarters are as follows—

- No 1 Wing Station, R A F, Kohat
- No 2 Wing Station, R A F, Risalpur

Army Co-operation Squadron at Peshawar

Wing Command—There is one Wing Command only namely 3 (Indian) Wing, R A F, located at Quetta. The Wing Commander is an officer with Air Force rank corresponding to a Lieutenant Colonel in the Army.

He is equipped with a staff organised on approximately the same system as the Headquarters of a Group. The Wing Establishment consists of 5 officers and 13 airmen.

Wing Station Commands—There are 2 Wing station commands in India, one located at Peshawar and the other at Risalpur. Each station consists of two squadrons on a reduced squadron basis with one administrative head, i.e., Station Headquarters under the command of a Wing Commander. The strength of the Station Headquarters is 8 officers and 112 airmen, while that of the two squadrons totals 24 officers and 106 airmen. The wing Station at Risalpur also administers the Parachute Section.

The Squadrons—Of the 8 squadrons 7 are extended along the North West frontier from Quetta to Risalpur and one is stationed at Ambala.

The squadron is the primary air force unit, and it consists normally, of a Headquarters and three flights of aeroplanes. A flight can be detached temporarily but not permanently from its squadron as repair facilities, workshops and stores cannot economically be organised on anything less than a squadron basis. The squadrons headquarters comprises the officers and other ranks required for the command and administration of the squadron as a whole, it includes the workshops and repair units, the armouries and equipment stores of the squadrons.

The number of aeroplanes in a squadron varies with the type of aeroplane with which the squadron is equipped, but speaking generally squadrons on a peace basis have twelve aeroplanes, i.e., four in each of three flights. This does not however apply to the twin engined bombing squadrons.

Of the 8 squadrons 4 are equipped with Bristol fighters and four with Wapitis and they are allotted for distant reconnaissance and bombing duties, of the other four, which are allotted for Army Co-operation duties, two squadrons are equipped with Bristol fighters and two with Wapitis aircraft.

Squadron Establishment—The establishment of officers in a squadron consists of seven officers in the Headquarters, and fifteen officers allotted to flying duties. This allows a reserve of one officer for each of the operative flights.

The establishment of other ranks is 123 airmen.

The Aircraft Depot—The Aircraft Depot may be conveniently described as the wholesale store and provision department of the Royal Air Force. Technical stores are received from the United Kingdom, and in the first instance, held by this unit. It is the main workshop and repair shop of the Force, where all engine repairs, and aircraft repairs of any magnitude are carried out. New aeroplanes received from the United Kingdom are also erected here. The Depot is located at Drigh Road Karachi.

The Aircraft Park—Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment intermediate between the squadrons and the Aircraft Depot. It receives stores from the depot and distributes them to the squadron. The Stocks held in the Park are, however, usually limited to items necessary at short notice for operations and the quantities held are kept as low as distance from the depot and local conditions will admit. In war, an Aircraft Park is intended to be a mobile formation though the aircraft Park in India cannot be made mobile under ordinary conditions. In peace, the Aircraft Park is located at Lahore. In addition to the above functions, practically the whole of the motor transport bodies required for R A F vehicles and all other mechanical transport vehicles in the command are built or repaired at Aircraft Park. The Transport Unit is administered by this unit.

Composition of Establishment—The personnel of the Royal Air Force in India consists of officers, warrant officers, non commissioned officers and men in the ranks of the R A F of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps R A F in India. The officers are employed on administration, flying and technical duties but all with the exception of officers of the store and medical branches are required to be capable of flying an aeroplane. A proportion of airmen are also trained and employed as pilots for a period of five years after which period, they revert to their technical trades. Apart from these airmen all warrant officers non commissioned officers and airmen are employed solely on technical duties. The only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

The warrant officers, non commissioned officers and airmen are employed at all units. The personnel of the Indian Technical and Followers Corps are employed as follows—

- | | |
|-------------------------|-----------------------------|
| (a) Technical Section | Aircraft Depot [*] |
| (artificers) | Aircraft Park |
| (b) M T Drivers Section | All Units |
| (c) Followers Section | All Units |

The total establishment of the Royal Air Force in India is as follows—

Officers	262
Airmen	1,828
Indian Officers, other ranks and followers	1,010
Civilians	509

The Royal Air Force Medical Services—In India, as in the United Kingdom the Air Force has a medical service of its own. Flying is carried out under conditions which differ widely from those on the ground. With the growth of aeronautics therefore, it was found necessary to create a separate department of medical science whose functions broadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects of different forms of illness and physical disability upon flying efficiency and to apply in practical form the results ascertained. The essential object in view is to save life by ensuring, so far as possible that those who fly are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 10 officers and 2 airmen. The Medical Administration is controlled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the R A F in India.

Indian Air Force—This force came into existence on 8th October 1932 the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained commission as Pilot Officers. These officers will form the first unit of the Indian Air Force. The training of cadets for the Indian Air Force cannot at present be undertaken in India and arrangements have been made to continue their training at Cranwell.

Regular Indian Forces

Indian Cavalry—The present number of Indian cavalry regiments is 21.

The peace establishment of an Indian cavalry regiment comprises

- | |
|--|
| 14 British officers |
| 10 Indian officers |
| 492 Indian non commissioned officers and men |
| 192 Followers |

Indian Infantry—The establishment of the Indian Infantry is constituted as follows

	Battalions
19 Infantry Regiments consisting of	98
3 Regiments of Sappers and Miners	7
10 Gurkha regiments consisting of	20
32	125

The normal strength of an active battalion is—

	British Officers	Indian Officers	Indian other ranks
Infantry	12	20	703
Gurkhas	13	22	898

The strength of an infantry training battalion depends upon the number of battalions forming the regiment. The average is as follows —

British Officers 10 Indian Officers 15, and Indian other ranks 780

In 1932 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed *e.g.* road making etc. were now generally performed by labour. The whole organization has therefore been disbanded and the opportunity has been taken to make a much needed addition to the various Engineer units (Sappers and Miners).

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation.

Reserve—The conditions of the reserve areas follows —

The Indian Army Reserve consists of private soldiers or their equivalent. It is comprised of class C reservists for Indian Cavalry, Artillery Sappers and Miners, Signals and Infantry and class I for Gurkha Rifles. The new class C reserve was introduced for Indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May 1932. There still remain a number of classes A and B reservists which count against the authorised establishment of the reserve but those will be gradually eliminated.

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially.

Reserve pay at certain specified rates is admissible from the date of transfer to, or enrolment in, the reserve. When called up for service or training reservists receive pay and allowances in lieu of reserve pay, at regular rates according to their arm of the service.

The establishment of reservists is fixed at present as follows —

Cavalry	2,940
Artillery	2,044
Engineers	2,340
Indian Signal Corps	625
Infantry	22,120
Gurkhas	2,000
Railway Nucleus Reserve	652
Supplementary Reserve	255
Total	32,986

The Indian Signal Corps—The Corps is organised on the same lines as a Sapper and Miner Corps, with a headquarters for recruiting and training personnel, and detached field units for the various army formations. The head of the corps is the Signal Officer in Chief in the General Staff Branch at Army Headquarters. He acts as a technical adviser on questions connected with

signals, and is also responsible for the technical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command. The British portion of the Corps has now been amalgamated with the Royal Corps of Signals.

The Signal Training Centre, India, is located at Jubbulpore, and is commanded by a Lieut. Colonel, assisted by a staff. British and Indian, organised on very much the same lines as the headquarters of a Corps of Sappers and Miners.

The various types of field units and the number maintained are —

Corps Signals Headquarters including Line and Wireless Company	2
Cavalry Brigade Signal Troops	4
Divisional Signals	4
District Signals	3
Experimental Wireless Section	1
Job Signal Section	

In addition, there is an Army Signal School which carries out the training of regimental signalling instructors.

The formation of the District signals units was effected in 1926 with the transfer of Communications on the North West Frontier to the Post and Telegraphs Department. This transfer of communications also made feasible the raising of the A and C troops of Cavalry Brigades. Signals to include a Wireless Section each the formation of two Corps Signal Headquarters, 1 the District Signals are located at Peshawar, Waziristan and Kohat.

Royal Tank Corps—Six armoured car companies arrived in India in 1921. Two more companies arrived in 1925. Two Group Headquarters were sanctioned in 1925. They were located as follows—the Northern Group at Rawalpindi this Group Headquarters commanded companies in the Northern and Eastern Commands. The Southern Group at Poona. This Group Headquarters commanded companies in the Southern and Western Commands.

These have been abolished and their duties are carried out by the Commander R. Tank Corps Northern Command, so far as that command is concerned and by the Commandant R. T. C. School Ahmednagar in respect of the other three commands. There is a school at Ahmednagar for the training of R. T. C. personnel and the conduct of experiments.

Organisations—3 Light Tank Companies. Each company consists of Headquarters and 3 Sections and is armed with 25 Carden Lloyd Light Tanks, 4 for Company Headquarters and 7 per section.

5 Armoured Car Companies. Each company consists of Headquarters and 3 Sections and is armed with 16 armoured cars. 1 for Company Headquarters and 5 per section. The armoured cars at present in India are of various types.

The establishments of the Royal Tank Corps formations are shown below —

	British Officers	British other ranks	Followers	Motor cars	Motor cycles	Armoured cars	Lorries
Tank Corps School	5	41	15	1	2	9	9
Armoured Car Company	12	145	2	2	6	16	10

Medical Services—The military medical services in India are composed of the following categories of personnel and subordinate organisations —

(a) Officers and other ranks of the Royal Army Medical Corps serving in India

(b) Officers of the Indian Medical Service in military employment

(c) The Indian Medical Department, consisting of two branches, viz., (i) assistant surgeons and (ii) sub assistant surgeons

(d) Queen Alexandra's Imperial Military Nursing Service

(e) The Queen Alexandra's Military Nursing Service for India

(f) The Army Dental Corps

(g) The Indian Military Nursing Service

(h) The Indian Hospital Corps

Of these categories the officers and men of the Royal Army Medical Corps and the Army Dental Corps the assistant surgeons of the Indian Medical Department and the Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra's Military Nursing Service for India are primarily concerned with the medical care of British troops while the officers of the Indian Medical Service, the sub assistant surgeons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily with the medical care of Indian troops. The Indian Hospital Corps serves both organisations.

Civilians of miscellaneous classes employed by the Army in Waziristan are given medical treatment in military hospitals and arrangements have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy and diabetes.

Royal Indian Army Service Corps—The Royal Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps by which name the service was known up to 1923. The Royal Indian Army Service Corps which is under the control of the Quartermaster General, is constituted in three main branches, namely (a) Supply, (b) Animal transport, and (c) Mechanical Transport. The

latter is constituted upon a special basis, which is generically, a sub division of the Royal Army Service Corps organisation.

The strength of the establishment is shown by categories in the following table —

SUPPLY

Officers with King's commissions	132
Indian officers	83
British other ranks	250
Civilians	734
Followers	1,881
Total	3,080

ANIMAL TRANSPORT

Officers with King's commissions	52
Indian officers	125
British other ranks	37
Civilians	97
Indian other ranks	9,809
Followers	1,475
Total	11,595

There are also 1,576 driver reservists.

The total number of mules and camels maintained under the present organisation, including the depots and the detachment in Kashmir, are 13,258 and 3,916 respectively. There are also 401 ponies and 12 bullocks. Wheeled and pack transport are combined. The company on the lower establishment represent the pre-war 'cadre', other companies being maintained in peace time at full war establishment.

MECHANICAL TRANSPORT

Officers with King's commissions	73
Indian officers	54
British other ranks	155
Indian other ranks	3,087
Civilians	180
Followers	990
Total	4,539

There are also 3,270 reservists.

The mechanical transport establishment consists of the following —

(a) Field units—

- 6 M T Companies consisting of 6 head quarters and 24 sections
- 5 Motor ambulance units
- 2 M T F Companies (Mobile Repair Units) consisting of 2 head quarters and 4 sections
- Headquarters Chaklala

(b) Maintenance units—

- Headquarters Maintenance Group (M T)
- 4 Heavy Repair shops
- Central M T Stores Depot
- Vehicle Reserve Depot
- Experimental Section

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscellaneous purposes. The total establishment now consists of 2,068 vehicles with 109 motor cycles.

The mechanical transport was taken over by the Indian Army Service Corps in 1927. At present the officers of the service are mainly drawn from the Royal Army Service Corps since at present there are no facilities in India for training officers in every branch of mechanical transport duties. The establishment of officers includes however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the service are drawn entirely from the Royal Army Service Corps.

The Ordnance Services which are under the M G O may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with clothing and general stores other than engineering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Army and the Royal Air Force in India to the best advantage of the State.

Army Remount Department—The following are among the most important duties for the remount service.—The provision of animals for the Army in India. The enumeration throughout India of all animals available for transport in war. The animal mobilization of all units, services and departments of the Army. A general responsibility for the efficiency of all the animals of the Army both in peace and war. The administration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilization. Breeding operations of a direct character.

The department is organised on lines corresponding to the remount service in the United Kingdom. Its composition is as follows

The Remount Directorate at Army Headquarters consisting of one Director and an Assistant Director. 4 Remount officers, on attached to each Command Headquarters, 6 Superintendents of Remount Depots, 5 District Remount officers of horse breeding areas and the Ahmednagar Stud, 10 Assistant Remount officers and 8 Veterinary officers.

Veterinary Services in India—The Veterinary services are responsible for the veterinary care, in peace and war, of animals of British troops Indian cavalry and artillery, I A S C units, the remount department (excluding horse breeding operations) etc. The veterinary services include The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corps.

The organisation consists of 20 veterinary hospitals. Class I, 25 veterinary hospitals, Class II, 25 branch veterinary hospitals, 9 sick lines and 12 Indian Army Veterinary Corps Sections of personnel posted to veterinary hospitals during peace and forming a cadre for expansion on mobilisation to provide technical personnel for all veterinary units.

Military Farms Department—This department, which is under the control of the Quartermaster General consists of two branches.

(i) The military grass farms, which provide fodder for the army.

(ii) The military dairy farms, for the provision of dairy produce for hospitals, troops and families.

Educational Services—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as follows including training schools —

British officers	Indian officers	B O	I O	Civilians
65	52	164	90	490

Terms of service in the Indian army are as follows —

Cavalry, 7 years service in army and 8 years in the reserve.

Artillery, 7 years service in army and 8 in the reserve for gunners and drivers (horse), drivers (mechanical transport) 6 years in army and 9 years in the reserve, and 4 years service in army for Heavy Artillery personnel.

S & M Corps, 7 years service in army and 8 in the reserve.

Indian Signal Corps, 7 years service in army and 8 in the reserve.

Infantry (except Gurkhas and trans frontier personnel of the Infantry other than Orakzais), 7 years in army service and 8 years in the reserve.

Gurkhas and trans-frontier personnel of infantry, 4 years' service in army.

Indian combatant personnel of British Infantry 6 years in army.

Indian Military establishments of the Indian Army Ordinance (corps 4 years service in the army)

Annual transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and 9 in the reserve

All combatants in the Works Corps, 2 years service in army

Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in army

Except in the case of those enrolled in the Works and of those who are non-combatants, all schoolmasters, clerks, artificers, armourers, engine drivers, furriers, carpenters, tailors and bootmakers 10 years' service in army

The period laid down for service in the army is the minimum and may be extended. Combatants may be enrolled direct into the Reserve, in which case there is no minimum period of service, but no one is allowed to serve in the reserve or in any class of the reserve for a longer period than is permitted by the regulations in force

Frontier Militia and Levy Corps—These forces are civil troops i.e., they are administered and paid by the Civil authorities and not by the Army. They are however officered by Officers of the Regular Indian Army. These forces were raised for duty on the North-West Frontier and at present consist of the following—Kurrum Militia, Lochi Scouts, South Waziristan Scouts, Chitral Scouts (Militia Scouts), Zhob militia and the Mekran Levy Corps

The Auxiliary Force

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adoption of compulsory military service would be undesirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis that could be trained to a fairly definite standard of efficiency, and in the result an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a musketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, acting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches of the service—cavalry, artillery, engineer infantry—in which are included railway battalions, machine gun companies, a Signal Company, and the Medical and Veterinary Corps. Units of the Auxiliary Force

are under the command of the local military authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the scheduled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enrol in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

The duties connected with the Defence Light Section at Calcutta, Bombay, Karachi and Rangoon are performed by the Light Companies R 1 to R 4 (A to D) at those stations, assisted by Indian ranks of Sapper and Miner Units.

Indian Territorial Force

The Territorial Force is one of the several aspects of the Indianisation of the military services. The force is intended to cater, amongst other things, for the military aspirations of those classes of the population to whom military service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Membership of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the war. It has been modelled on the old militia in England. The essence of its scheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of intensive training, to take their place by the side of regular units in war.

The Indian Territorial Force consists at present of three main categories, provincial battalions, urban units and the university training corps units. The last are recruited from the staff and students of Indian universities. They are trained all the year round by means of weekly drills during terms and a period of 15 days in camp and are equipped with a permanent staff of British instructors. On ceasing to belong to a university, a member of the corps is discharged. In the case of the university training corps units there is no liability to perform the liability to render actual military service. Their purpose is mainly educative to inculcate discipline and form character. But, incidentally, they are expected to be a source of supply of both officers and men for the provincial and urban units.

The members of the provincial battalions accept the full liability for service which has been mentioned. Seven such battalions were constituted in the first instance. The number is now eighteen and, though the unit establish-

ment has not been completely filled in all cases, the movement has already achieved a greater degree of success than might have been anticipated at so early a stage. Although for the present the infantry arm only has been created with the addition of the I I F Medical Branch the force by law may include every other army service.

Men enrol in the provincial battalions for a period of six years, the period being reduced to four years in certain cases. On the completion of the first period they can re-enrol voluntarily for further specified periods. During his first year every man does preliminary training for one calendar month and during every year he receives one month's periodical training. Members of *urban units* have only a provincial liability. 4 such units were constituted in 1928 in Bombay, Madras and the United Provinces, one of which has since been dis-banded. Members enrolled for a period of 6 years and train all the year round. During his first year every man does 32 days preliminary training and in every subsequent year 16 days periodical training.

The Indian State Forces

The Indian State Forces, formerly designated Imperial Service Troops, consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for State service. It has been the custom in emergency for State troops to be lent to the Government of India, and the Government of India have on many occasions received military assistance of great value from this source. But the rendering of such aid is entirely at the discretion of the Ruling Princes and Chiefs. Government, on the other hand, provide permanently a staff of British officers, termed Military Advisers and Assistant Military Advisers to assist and advise the Ruling Princes in organising and training the troops of their States.

After the war had ended, the Indian States like the Government of India, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three categories of troops namely

Class A—Troops in this class are organised on the present day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army.

Class B—These troops consist of units which are, in most cases, little inferior in training and discipline to troops of Class A, but they are not organised on present-day Indian Army establishments. They have, as a rule, retained the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C—These troops consist in the main of militia formations, which are not permanently embodied. The standard of training, discipline and armament, prescribed for this class, is generally lower than the standard prescribed for Class B troops.

The authorized and actual strength of the Indian State Forces on the 1st October 1936 amounted to—

	Authorized strength	Actual strength
Artillery	1 616	1,409
Cavalry	9 294	8 574
Infantry	38 158	32,547
Camel Corps	466	430
Motor Machine (Gun Section)	150	93
Sappers	1 301	1,054
Transport Corps	1 535	1 443
Grand total	52 550	45 649

Officers

There are two main categories of officers in the Indian Army those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians apart from the Gurkha officers of Gurkha battalions, and have a limited status and power of command both of which are regulated by the Indian Army Act and the rules made thereunder. Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military Academy, Woolwich.

King's Commissioned officers for the Indian Army are obtained from two main sources from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment, the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurst. A third source is from among University candidates. When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance an officer of the Unattached List, and is posted for a period of one year to a British battalion or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, he is posted as a squadron or company officer to a regiment or battalion of the Indian Army. Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant duties, and acquire at first hand an intimate knowledge of the requirements of the combatant arms.

The promotion in rank of King's commissioned officers of the Indian Army is regulated by a time scale up to the rank of Lieutenant Colonel but is subject also to certain professional examinations and tests being successfully passed. The rank of Lieutenant Colonel is in normal course attained at 26 years' service; promotion beyond this rank is determined by selection.

Indian Officers—One of the most momentous decisions of the Great War, so far as the Indian Army is concerned, was that which rendered Indians eligible to hold the King's commission in the army. King's commissions are obtainable by Indian gentlemen in three ways: (1) By qualifying as a cadet through the Royal Military College Sandhurst or the Royal

Military Academy, Woolwich Examinations are held twice a year in India for the selection of suitable candidates for admission. (2) By the selection of specially capable and deserving Indian officers or non commissioned officers of Indian Regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way. (3) By the bestowal of honorary King's commissions on Indian officers who have rendered distinguished service but whose age and lack of education preclude their being granted the full King's commission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying military ambition and of enjoying a military career on terms of absolute equality with the British officer who, as a general rule also enters the army by qualifying at Sandhurst or Woolwich. Until 1931 ten vacancies at Sandhurst and three at Woolwich were reserved annually for Indian cadets.

A further measure adopted by the Government was the establishment of the Prince of Wales Royal Indian Military College at Dehra Dun a Government institution for the preliminary education of Indians who desire to qualify for the King's commission in the army through the Royal Military College, Sandhurst or the Royal Military Academy Woolwich. The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized. The units selected for Indianization were 7th Light Cavalry, 16th Light Cavalry, 2nd Madras Pioneers, 4/19th Hyderabad Regiment, 5th Royal Buffs, 5th Mahratta Light Infantry, 1/7th Rajput Regiment (Q V O I I), 1/15th Punjab Regiment, 2/1st Punjab Regiment.

In 1932 a considerable advance in the Indianization of the Army was made by the announcement that it was intended to Indianize a Division of all Arms and a Cavalry Brigade. In order to implement this decision the following units have been marked for Indianization: 3rd Cavalry, 5/2nd Punjab Regiment, 5/6th Rajputana Rifles, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Sikh Regiment, 4/12th Frontier Force Regiment and 6th Royal Battalion 13th Frontier Force Rifles, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of an artillery services, to make up a complete Division. The Indian Regiment of Artillery has been formed on the 15th January 1935 and the first unit of this new corps has been raised as a field artillery brigade. This brigade is designated A Field Brigade, Indian Artillery.

In order to train officers for the Indian Army of the future the Indian Military Academy at Dehra Dun was opened in October 1932. It will provide officers for all arms: cavalry, infantry, artillery and signals. The first batch of officers passing out of the Academy received their commissions on the 1st February 1935.

Indian Military Academy—How to improve the quality of candidates for the Indian Military Academy at Dehra Dun has recently

been under consideration. A press note was issued by the Defence Department in October, 1936, in which the problem was examined in detail. It consisted of a memorandum which had been prepared on the subject by a Committee consisting of members of both Houses of the Central Legislature and of a circular reply to this memorandum by the Commander in Chief, Sir Robert Ross. The Committee was constituted as a result of a debate which took place in the Council of State during which the present difficulty in obtaining candidates of the right type for the Academy had been discussed.

The members of the Committee prefaced their memorandum by stating in general terms that they did not agree with the policy being followed with regard to the Indianization of the Army since they thought that the process could be speeded up. They then made observations and suggestions on various points—such as for example, that the provision under certain conditions for a refund by parents of part of the cost of training, young officers was too extensive, that more scholarships should be granted to cadets of the Academy by Local Governments, that the fees charged by the Academy should be reduced, that passage of the final examination of the Prince of Wales Royal Indian Military College by students who did not gain admission to the Academy should entitle them to admission to the Universities, that the activities of the University Training Corps should be expanded, that more Indians should be admitted to the Staff College and that the problems created by the disparities in age between British and Indian officers of similar rank should be favourably dealt with.

The Commander in Chief in reply, expressed gratitude to the Committee for their work and for the studied moderation and reasonableness of their recommendations. Some of these recommendations he accepted, and he undertook that officers would be fully and sympathetically considered. He asked the Committee not to expect startling results from the acceptance of certain of their recommendations since the process of expanding the field of choice and improving the quality and quantity of the candidates for cadships must inevitably be gradual and depend largely on public opinion.

Training Institutions

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units—

Staff College, Quetta

Senior Officers School, Belgium

School of Artillery, Karkul

Equitation School, Saugar

Small Arms Schools (India), at Pichuruthi and Ahmednagar

Army School of Physical Training, Ambala

Army Signal School, Poona

Royal Tank Corps School Ahmednagar

Army School of Education, Belgium

Army School of Cookery, Poona

Army Veterinary Schools Ambala and Poona

Indian Army Service Corps Training Establishment, Rawalpindi

Indian Army Ordnance Corps School of Instruction, Kurkee

The object of these Schools is to ensure to all the units throughout the Army a constant supply of officers, warrant officers, non-commissioned officers and men provided with a thorough up-to-date knowledge of various technical subjects and with the ability to pass on this knowledge.

Following the procedure adopted at Home, the Small Arms and Machine Gun Schools were amalgamated in February 1927. Instruction in the rifle, light gun, etc., is carried out at Pachmarhi and in the machine gun at Ahmednagar.

The King George's Royal Indian Military Schools at the Lum, Jullundur and Ajmere, and the Kitchener College, Nowgong, also exist for the education of the sons of Indian soldiers with a view to their finding a career in the Indian Army. The latter at present assists in the training of Indian NCOs for promotion to Viceroy's Commission. The Prince of Wales's Royal Indian Military College at Dehra Dun exists for the preliminary education of Indians who desire to qualify for the King's Commission in the Army through the Indian Military Academy.

Army in India Reserve of Officers—Previous to the Great War there existed what was called the Indian Army Reserve of Officers, a body of truned officers available to replace casualties in the Indian Army. The war proved that for many reasons this reserve did not fully meet requirements and in 1922 the Army in India Reserve of Officers was constituted.

The revised Regulations for the A I R O published in 1934 provide that the following gentlemen may be granted commissions in the Reserve—

(1) Ex-Officers who having held King's commission in any Branch of His Majesty's British Indian or Dominion Forces, either naval military (including the Auxiliary Force (India) and Indian Territorial Force) Marine or Air, have retired therefrom and are no longer liable for service therein, and who are resident in India, Burma or Ceylon.

(2) Civil officials of gazetted status serving under the Government of India or a local Government, whose services can be spared in the event of general mobilization being ordered.

(3) Private gentlemen who are resident in India, Burma or Ceylon.

Ceylon Government officials are not eligible for appointment to the Army in India Reserve of Officers.

Applicants for Category Medical (includes Dental) must possess a qualification registrable in Great Britain and Ireland under the Medical Acts in force at the time of their appointment.

Dental applicants must possess a qualification registrable in Great Britain and Ireland under the Dentists Acts in force at the time of their appointment.

Applicants for Category Veterinary must be in possession of the diploma M.R.C.V.S.

The strength of the Reserve on the 1st January 1937 was 779.

The Fighting Races—The fighting classes that contribute to the composition of the Indian Army have hitherto been drawn mainly from the north of India. But the experiences of the great war have caused some modifica-

tions in the opinions previously held as to the relative value of these and other fighting men. The numbers of the various castes and tribes enlisted in the Army have since the war undergone fluctuations, and it is not possible at present to give exact information as to their proportions. Previous to the war the Sikhs contributed very large numbers both to the cavalry and infantry, and the contribution of the Gurkhas was also large. The Sikhs, who inhabit the Punjab originated in a sect founded near Lahore by a peasant in the early part of the sixteenth century and in the course of a hundred years grew into a formidable militant power. Muhammadans of various races contribute a still larger proportion to both the cavalry and infantry. These are drawn both from the north and the south of India, as well as from beyond the Frontier. They are all excellent fighting men, hardy and warlike, who have furnished soldiers to all the great powers of India for many hundreds of years. As cavalry the Muhammadans are perhaps unequalled by any other race in the East being good horsemen and expert men at arms.

Next in point of numbers are the Gurkhas of Nepal, of whom there are twenty complete battalions, which during the war were considerably increased. As fighters in the hills they are unsurpassed even by the Pathans in the North-West Frontier, but the Garhwals and Kumaonis are equally good mountaineers.

The professional military caste of India from time immemorial has been the Rajput, inhabiting not only Rajputana but the United Provinces and Oudh. Of fine physique and martial bearing, these warriors of Hindustan formed the backbone of the old Bengal Army, and have sustained the English flag in every campaign in the East. Their high caste and consequent prejudices in no respect interfere with their martial instincts and efficiency in war. They furnish many battalions. The Garhwals are Hill Rajputs, good and gallant soldiers, who have proved themselves equal to any other troops on the field of battle and have established an imperishable record in the war both in Europe and in the East. The two battalions which existed in 1914 have since been increased to four. The Jats are a fine and warlike race of Hindus found in the Delhi and Rohtak districts and adjoining territory. It was these people who held out so bravely at Bharatpur and repelled Lord Lake's army in 1805. They have proved themselves good soldiers on the battlefields of Europe. Dogras are good and steady soldiers found in the hilly districts of the Punjab. They fought well in Flanders and in Mesopotamia.

Among those who have rendered signal and gallant service in the war are the Maharrattas of the Deccan and the Konkan, who have revived their reputation held by their race in the days of Shivaji, the founder of the Maharratta Empire. It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

In addition to the castes that have been mentioned, other caste men from the south and other parts of India have filled the ranks of the Sappers and Miners, and done their duty well in every campaign in which they have been engaged.

During the war the Victoria Cross was awarded for conspicuous gallantry to 2 Indian officers 4 non commissioned officers and 6 other ranks of the Indian Army

The Military Cross was awarded to 96 Indian Officers for distinguished service rendered during the Great War and to 3 Indian Officers for service in Waziristan

A large number of Indian Officers and men were also granted Foreign decorations

Summary of India's Effort in the War — In a despatch by the Commander in Chief published in July, 1919, the whole operations of the Indian Army during the war are reviewed His Excellency gives in it the following

figures showing the extent of India's contribution in terms of men. On the outbreak of war, the combatant strength of the Indian Army, including reservists, was 194,000 Indian ranks, enlistments during the war for all branches of the service amounted to 791,000, making a total combatant contribution of 985,000. Of this number, 552,000 were sent overseas. As regards non combatants, the pre war strength was 45,000, an additional 427,000 were enrolled during the war and 391,000 were sent overseas. The total contribution of Indian personnel has thus been 1,457,000, of whom 943,000 have served overseas. Casualties amounted to 106,594, which include 36,696 deaths from all causes. The number of animals sent overseas was 175,000 *

Budget Expenditure on National Defence

A part of the Defence expenditure on the Indian Budget is incurred in England, the nature of such expenditure being indicated in the detailed Tables of Army, Navy and Military Engineer Services expenditure. This expenditure is met by transfer of funds from India from the 1st April, 1920 to the 31st March, 1927, the accounts were prepared on the basis of the rate of 2s per rupee for the conversion of English sterling transaction into rupees. From the 1st April 1927 the accounts

are being prepared at the standard rate of 1s 6d per rupee.

As a rule, the receipts collected by the various departments are not set off against expenditure as appropriations in aid, but are shown separately on the receipts side of the budget. This is especially the case with the receipts of the Military Departments, which amount to considerable sums.

The Provincial Governments incur no expenditure for Military purposes.

SUMMARY OF DEFENCE EXPENDITURE (Gross)

Table 1

	1934-35	1935-36	1936-37
	Closed Accounts	Revised Estimates	Budget estimates as passed
	Rupees (000 s omitted)		
Defence Services—Effective	40 28 45	41 59 17	42,83,05
Defence Services—Non effective	8 60 99	8,72 06	8 37,54
Transfer to Defence Reserve Fund from	68,92	24,89	82,40
Total	49 64,27	50 06 34	50,38,19

NOTES—(1) This summary includes the cost of the Royal Air Force, which is included in the Army Estimates, and also the expenditure on non effective services, but does not include debt service.

(2) All Expenditure for Military purposes incurred in the United Kingdom by the Indian Government, as also all contributions to the Imperial Government for these purposes, are included in the above figures.

ANALYSIS OF DEFENCE EXPENDITURE

1 The following table gives the main items of Army Expenditure, (gross) shown for India and England separately —

Total Effective Services			4 19,72
(2) Non effective Services			4,55,80
B <i>Royal Air Force</i>			
Effective			94,74
Non effective			5 20
Total England			9,75,46
Total Defence Services Expenditure			
Effective	40 28 35	41 59 17	42,83 00
Non effective	8,66,19	8,72 06	8 37 54
Grand Total	48 94 54	50,31 23	51 20 59

The amounts expended in England on effective services consist of such charges as payments to the War Office and Air Ministry in London in respect of British Forces serving in India, the transport to India of these forces and payments on account of stores taken to India by British Forces, educational establishments in England for Indian Services leave pay of Indian and British service Officers on the Indian Establishments purchase of imported stores etc. The expenditure on non effective services consists of payments to the War Office in London for retired pay to British forces for services in India and to non-effective and retired officers of the Indian Service and of various gratuities.

Although a sum of Rs 454.5 millions only has been allotted in the Budget for 1936-37 to meet the net expenditure on Military Services Rs 503.8 millions (including receipts) will be available for expenditure under the heading "Military Services" made up of Rs 392.8 millions for expenditure in India and Rs 109.9 millions in England.

The gross working expenses of military establishments such as bakeries, pasture and dairy farms, army clothing factories, and storage depots, army ordnance factories and base mechanical transport workshops are included in the Budget.

The division of expenditure on *Military Engineer Services* between India and England is as shown below —

	1934-35	1935-36	1936-37
	Closed Accounts	Revised Estimates	Budget Estimates
	(Rupees	000 s omitted)	
India	3 12 52	3,62 09	3 65 61
England	3,80	4 23	4.05
Total	3,16 32	3,66,32	3,69,66

Cost of the Army—A Tribunal was set up in 1932 to investigate the amount of India's contribution towards the recruiting and training expenses in England of the British troops and airmen who serve for a part of their time in India. The Tribunal has also examined India's counter claim to a contribution towards the cost of her defence expenditure.

The Tribunal was an advisory body which met in November with instructions to report to the Prime Minister. The Chairman was Sir Robert Garran, until recently Solicitor General in the Commonwealth of Australia. Lord Tomlin and Lord Dunedin were nominated by His Majesty's Government, and Sir Shadi Lal, Chief Justice of the Punjab High Court, and Sir Muhammad Sulaiman, the Senior Puisne Judge of the High Court of Allahabad, by the Government of India.

The matters on which the Tribunal will make recommendations have been subjects of controversy for many years, and, as was recognized in the Report of the Simon Commission, the issue bears upon the great constitutional problem now under consideration. One reason for the connexion is the heavy burden of the cost of defence upon India. Taking the Central and Provincial Governments together, it amounts to 29 per cent of the total expenditure, and if the Central Government alone is considered it amounts to 54 per cent. These calculations take account of net receipts only from semi commercial undertakings such as railways, posts, and telegraphs.

Capitation payments—When, after the Mutiny, the troops of the East India Company were amalgamated with those of the Crown

a capitation rate of £10 on every British soldier sent to India was fixed. This worked out at an average annual sum of roughly, £631,000.

In 1870 objections were raised by both sides to the £10 rate, and until 1878 India made payments on account averaging £440,000 per annum. An Act of Parliament confirmed these amounts as full payment with the effect of writing off outstanding War Office claims. In 1890 the capitation rate was fixed at £7 10s. Meanwhile the British forces in India had been substantially increased and the altered rate represented an annual expenditure of about £734,000. A committee presided over by Lord Justice Romer was appointed in 1907. It held that the capitation charge was justified in principle. In the following year the Secretaries of State for India and War (Lord Morley and Lord Haldane) agreed to a compromise whereby the rate was raised to £11 8s, the annual charge on India being thereby increased by about £300,000. During the War India met this liability as part of her normal military expenditure and all extraordinary costs arising from the employment of Forces from India in the various theatres of War were met by the British Exchequer, in accordance with decisions of Parliament.

The great increases in rates of pay and cost of equipment led to the capitation rate being raised in 1920 to £28 10s. Since 1924 India has paid on account each year £1,400,000, compared with War Office claims, backed by elaborate details which amounted in 1926-28 to approximately £4,500,000 and would still exceed the provisional payments by about £300,000 annually. The Government of India has disputed the bill.

The Strength of the Army.

BRITISH TROOPS

The following table gives the average strength of British troops, and the main facts as regards their health for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 —

Period	Average strength	Admissions	Deaths	Invalids sent home	Average constantly sick
1910 14 average	69,440	39,389	303	488	2,094 57
1915 19 "	66,199	58,367	583	1,980	3,277 53
1920	57,332	61,429	385	2,314	3 488 08
1921	58 681	60,515	408	749	3,070 04
1922	60,166	37 836	284	714	1 902 32
1923	63,139	37,595	237	979	1,793 31
1924	58,614	38,569	246	879	1,857 95
1925	57,378	36 069	166	997	1,750 19
1926	56,798	36,893	171	910	1,758 60
1927	55,632	34,666	149	829	1,654 22
1928	56 327	33 034	166	556	1,635 99
1929	59,827	38,742	203	671	1,746 84

INDIAN TROOPS.

The average strength of Indian troops, including those on duty in China and Nepal and other stations outside India in 1928 was 131,190

The following table gives below the actuals and ratios of sickness, deaths, and invaliding for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929 —

Period	Average strength	Admissions	Deaths	Invalids	Average constantly sick	Ratio per 1,000 of strength			
						Admissions	Deaths	Invalids	Average constantly sick
1910 14 (average)	130,261	71,213	573	699	2,662	544 6	4 39	5 4	20 7
1915-19 (average)	204,298	161,028	3,435	4,829	7,792	788 2	16 81	23 6	38 1

THE VICTORIA CROSS

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross, gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following —

Subadar (then Sepoy) Khudadad Khan, 129th Baluchis—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 139th Garhwal Rifles—For great gallantry on the night of the 23rd/24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

Rifleman Kulbir Thapa, 23rd Gurkha Rifles—For most conspicuous bravery during operations against the German trenches south of Maquilsart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety, returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

Havildar (then Lance Naick) Lala, 41st Dogras—killing a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naick Lala insisted

on going out to his Adjutant, and offered to crawl back with him on his back at once. When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

Sepoy Chatta Singh, 9th Bhopal Infantry—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan, 89th Punjabis—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line with in 150 yards of the enemy's entrenched position. He beat off three counter attacks and worked his gun single handed after all his men, except two belt fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shovels. But for his great gallantry and determination our line must have been penetrated by the enemy.

Lance Dafedar Govind Singh, 28th Cavalry—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 1½ miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

Rifleman Karan Bahadur Rana, 23rd Gurkha Rifles—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire in creeping forward with a Lewis gun in order to engage an enemy machine gun which had caused severe casualties to officers and other ranks who had attempted to put it out of action. No 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him

and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bombers and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day, and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

Ressaldar Badlu Singh, 14th Lancers, attached 29th Lancers—For most conspicuous bravery and self sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh es Samarivah Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single handed, but all the

machine guns and infantry had surrendered to him before he died. His valour and initiative were of the highest order.

Rifleman Gobar Sing Negi, 2nd Battalion, 39th Garhwal Rifles—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

Sepoy Ishaw Singh, 28th Punjabls—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded them with his body and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

THE EAST INDIES SQUADRON.

Since 1903 a squadron of the Royal Navy, known as the East Indies Squadron, has been maintained in Indian waters. It has naturally varied in strength from time to time. In 1903 the squadron consisted of one second class and three smaller cruisers and four sloops or gunboats. In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910 when one second class cruiser was withdrawn and two smaller vessels substituted, and three cruisers were lent from the Mediterranean to assist in the suppression of the arms traffic in the Gulf. By 1913 the position of the East Indies

squadron had considerably improved. The battleship Swiftsure had taken the place of the second class cruiser which had been a flagship, and another second class cruiser replaced the Perseus.

The present composition of the East Indies Squadron (Fourth Cruiser Squadron) is as follows—

"Norfolk" (Flag), Cruiser, 9,850 tons.
"Emerald", Cruiser, 7,550 tons. "Enterprise" Cruiser, 7,580 tons (temporarily replaced by "Colombo" Cruiser, 4,200 tons), Sloops "Shorcham", "Bidford", "Fowey," and "Lupin."

India contributes £100,000 a year towards naval expenditure and approximately £3,000 a year on account of Indian Transport Service performed by the Admiralty, and also maintains the Royal Indian Navy.

India's Naval Expenditure

Since 1869 India has paid a contribution of varying amounts to the Imperial Government in consideration of services performed by the Royal Navy. Under existing arrangements which date from 1896 7 the subsidy of £100,000 a year is paid towards the upkeep of certain ships of the East India Squadron, which may not be employed beyond prescribed limits, except with the consent of the Government of India. India's total naval expenditure is well under half a million pounds.

The question of a new distribution of the burden of the cost of Imperial Naval Defence was discussed at the Imperial Conference in London in October—November 1926. The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed.

The Royal Indian Navy consists of a Depot Ship, 4 Sloops, 2 Patrol vessels and a Survey vessel. A fifth sloop has just been completed in England and will replace one of the Patrol vessels.

ROYAL INDIAN NAVY

The Royal Indian Navy (The Sea Service under the Government of India) traces its origin so far back as 1612 when the East India Company stationed at Surat found that it was necessary to provide themselves with armed vessels to protect their commerce and settle ments from the Dutch or Portuguese and from the pirates which infested the Indian coasts. The first two ships, the Dragon and Hoseander (or Oslander), were despatched from England in 1612 under Captain Best, and since those days under slightly varying titles and of various strengths the Government in India have always maintained a sea service

The periods and titles have been as follows —

Hon E I Co's Marine	1612—1686
Bombay "	1686—1830
Indian Navy "	1830—1863
Bombay Marine	1863—1877
H M Indian Marine	1877—1892
Royal Indian Marine	1892
Royal Indian Navy	1934

India's Naval Force has always been most closely connected with Bombay, and in 1668 when the E India Co took over Bombay, Captain Young of the Marine was appointed Deputy Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into an Imperial Marine under the Government of India, Bombay has continued to be the headquarters and the official residence of the Flag Officer Commanding

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties. Royal Indian Marine Ships "DUFFERIN," "HARDINGE," "NORTHBROOK," "LAWRENCE," "DALHOUSIE" and "MINTO" had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean, North Sea, North Red Sea and Caspian Sea Fleets.

In addition to transport duties in Indian Ports, Officers were sent to Marseilles, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and Barges to and in Mesopotamia and it was necessary to enlist a number of Temporary Officers, Warrant Officers and men to the numbers of approximately 240, 60 and 2,000 respectively for these and other duties.

Reorganisation Schemes—After the War the Government of India asked Admiral of the Fleet, Lord Jellicoe, who was visiting India, to draw up a scheme for the reorganisation of the Service. His valuable suggestions were unfortunately too ambitious for Indian finances and could not be accepted.

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the R I M was not included in their terms of reference, they strongly recommended that the R I M should be reorganised

as a combatant service. The Government of India in 1920 obtained from the Admiralty the services of Rear Admiral Mawby as Director, R I M, to draw up a scheme of reorganisation within limited lines. His scheme, however, was not adopted, and Admiral Mawby resigned his appointment.

The R I M then fell upon hard times, money was scarce, the report of the Inchcape Committee necessitated drastic retrenchments, and the working of the Montagu Chelmsford reforms resulted in the Local Governments having to defray the cost of the work of R I M ships on their various stations, on lighthouse duties, transport work carrying of officials, etc. The Local Governments were naturally inclined to think that if they had to pay they would like to have a say in the management, and that if the work could be done cheaper locally, they should arrange to carry out the duties themselves. Further, the Inchcape Committee recommended that the three large troopships should be scrapped and all troopship carried out under contract, which would have left the Marine with only the Survey Department and the Bombay Dockyard.

A Combatant Service—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisation of the Service as a combatant force. This Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian Navy, with a strength in the first instance of 4 armed sloops, 2 patrol vessels, 4 mine sweeping trawlers, 2 surveying ships and a depot ship, the Service in the first instance to be commanded by a Rear-Admiral on the active list in the Royal Navy. The scheme was accepted by the Indian and Home Governments, and the necessary Act to permit India to maintain a Navy was passed through both Houses of Parliament.

To effect this change in the title, it was necessary to draw up a new Indian Naval Discipline Act and this had to be passed through the Assembly and Council of State in India.

In February 1928, the Bill was introduced but failed to pass in the Assembly by a narrow margin of one vote. In February 1934, the Bill was reintroduced to the Assembly with certain minor amendments but in response to a plea for circumspection, the Government circulated the Bill.

In August, the Bill was reintroduced and passed by the Assembly and Council of State. On 2nd October 1934 the Royal Indian Navy was inaugurated, the historic ceremony taking place in Bombay.

The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and war then ceased to exist.

The Royal Indian Navy which has been evolved from the late Royal Indian Marine is one of the Empire's Naval Forces and is under the command of a Flag Officer of the Royal Navy. Its work in addition to training its personnel for war, *e.g.*, minesweeping, gunnery, communications, etc., includes fishery protection in the Bay of Bengal and other Naval duties. A close liaison is maintained between the Royal Indian Navy and the East Indies Squadron.

Personnel, 1936

HEADQUARTERS STAFF

Flag Officer Commanding, Royal Indian Navy and P S T O, East Indies	Vice Admiral A E F Bedford, C B
Naval Secretary	Paymaster Commander M H Elliott, M B E, R N
Flag Lieutenant	Lieut Comdr St J A D Garniss, R N
Chief of the Staff	Captain A G Maundrell C I E, R N
Captain Superintendent	Commander T M S Milne Henderson, O B E, R N
Staff Officer (Operations)	Commander P A Mare, R N
Commander of the Dockyard	Commander H P Hughes Hallett, M B E, D S C R N
Squadron Signal Officer	Lieut H C Bird, R N
Squadron Gunnery Officer	Lieut K Durston, R N
Engineer Captain	Engineer Captain G L Annett, R N
Engineer Manager	Engineer Commander F Clark, R N
1st Assistant to the Engineer Manager	Engineer Lieut Comdr A B Collins
2nd Assistant to the Engineer Manager	Engineer Lieut G W A Burgess, R N
Naval Store Officer	J A B Hawes, Esq (Temp)
Financial Adviser	R Jagannathan, Esq, M A, B L
Chief Superintendent	V G Rose, Esq

MARINE TRANSPORT STAFF

Divisional Sea Transport Officer, Bombay	Commander H C Beuchamp, R N
Asst Sea Transport Officer	Lieut Comdr A H Watt, R N
Sea Transport Officer, Karachi	Lieut Comdr F F W Harvey, R N

CIVILIAN GAZETTED OFFICERS

Constructor	E J Underhay, Esq
Assistant Constructor	Shavik H Aderbad, Esqr
Electrical Engineer	N T Patterson, Esq
Assistant Naval Store Officer	F Hearn, Esq (Temp)

OFFICERS

Captains	9	WARRANT OFFICERS	
Commanders	17	Gunners and Boatswains	17
Lieutenant Commanders, Lieutenants, and Sub Lieutenants	47	Warrant Telegraphists	8
Engineer Captain	1	Warrant Mechanics	2
Engineer Commanders	13	Schoolmaster (Warrant Rank)	2
Engineer-Lieutenant-Commanders, Engineer Lieutenants and Engineer-Sub-Lieutenants	35	Warrant Writers	10

PETTY OFFICERS AND MEN

Who are recruited, in the main, from the Bombay Presidency and the Punjab, in almost equal proportions

SHIPS

		Standard Displacement			
Escort Vessel	H M I S	Clive	1,737 36 tons	1,700	Horse Power
" "	"	Cornwallis	1,405 "	2,500	"
" "	"	Hindustan	1,190 "	2,000	S H P

" "	"	Dalhousie	----- "	-----	
Patrol Vessel	"	Pathan	665 "	3,200	S H P

In addition to the above there are 11 vessels composed of minesweeping and steam trawlers, service launches, target towing tugs, distributed at Bombay, Calcutta, and Karachi

Dockyards

There were two Royal Indian Marine Dock yards at Bombay and at Calcutta, the former being the more important. The one at Calcutta has been closed. There are 5 graving docks and a wet basin at Bombay, together with factories

Medical Staff

Medical Officer, G D Gripper R A M O

Officer in Medical Charge of Dispensary,
Assistant Surgeon P F D Mellow, I M D

R I N Warrant Officers

Officer in charge, Dockyard Police Force,
Gunner P O Hara, R I N

Boatswain of the Dockyard, Boatswain A V
Green, M B E, R I N

Appointments

In addition to the regular appointments in the ships of the Royal Indian Navy, and in H M I N Dockyard, the following appointments under the Government of India, Commerce Department are held by the officers of the Royal Indian Navy —

BOMBAY

Principal Officer, Mercantile Marine Department, Bombay District Nautical Surveyor,

Mercantile Marine Department, Bombay District,
Principal Engineer and Ship Surveyor, 2nd,
3rd and 4th Engineer and Ship Surveyors

CALCUTTA

Principal Officer Mercantile Marine Department, Calcutta District, Nautical Surveyor
Mercantile Marine Department, Calcutta District
Principal Engineer and Ship Surveyor, 2nd, 3rd,
4th and 5th Engineers and Ship Surveyors

MADRAS

Principal Officer, Mercantile Marine Department, Madras District, and Engineer and Ship Surveyor

KARACHI

Principal Officer, Mercantile Marine Department, Karachi District

ADEN

Principal Officer, Mercantile Marine Department, Aden District

CHITTAGONG

Nautical Surveyor and Engineer and Ship Surveyor

PORT BLAIR

Engineer and Harbour Master

Agriculture.

As crops depend on the existence of plant, food and moisture in the soil, so the character of the agriculture of a country depends largely on its soil and climate. It is true that geographical situation, the character of the people and other considerations have their influence which is not inconsiderable, but the limitations imposed by the nature of the soil and above all by the climate tend to the establishing of a certain class of agriculture under a certain given set of conditions.

The climate of India, while varying to some extent in degree in most respects is remarkably similar in character throughout the country. The main factors in common are the monsoon, the dry winter and early summer months, and the intense heat from March till June. These have the effect of dividing the year into two agricultural seasons, the *Kharif* of Monsoon and the *Rabi* of winter season, each bearing its own distinctive crops. Between early June and October abundant rains fall over the greater part of the continent while the winter months are generally dry, although North Western India benefits from showers in December and January. The south of the Peninsula, and especially the Madras Presidency, however, is more truly tropical especially in the south and depends mainly on the N. E. monsoon, here the two crop seasons can hardly be said to exist. The distribution of the rainfall throughout the year, which is of considerable importance to agriculture is none too favourable, but is not quite so bad as is often represented. The rainfall is greatest at what would otherwise be the hottest time of the year, viz. mid summer and when it is most needed. It should be remembered that in a hot country intermittent showers are practically valueless as evaporation is very rapid. Heavy rainfall concentrated in a limited period though it has its drawbacks and demands a special system of agriculture has many advantages in hot countries.

Soils—Four main soil types can be recognised in India viz (1) the red soils derived from rocks of the Archaean system which characterise Madras, Mysore and the South East of Bombay and extend through the East of Hyderabad and the Central Provinces to Orissa, Chota Nagpur and the South of Bengal. (2) The black cotton or *regur* soils which overlie the Deccan trap and cover the greater part of Bombay, Berar and the Western parts of the Central Provinces and Hyderabad with extensions into Central India and Bundelkhand. The Madras *regur* soils though less typical are also important. (3) The great alluvial plains, agriculturally the most important tract in India as well as the most extensive, mainly the Indo Gangetic Plain embracing Sind, northern Rajputana, most of the Punjab, the plains of the United Provinces, most of Bihar and Bengal and half of Assam. (4) The laterite soils which form a belt round the Peninsula and extend through East Bengal into Assam and Burma.

The great alluvial plains are characterised by ease of cultivation and rapid response to irriga-

tion and manuring. broadly speaking there are few soils in the world more suited to intensive agriculture so long as the water supply is assured. The other soils are less tractable and call for greater skill in management and are less adapted to small holdings, of these the *regur* soils are the most valuable.

Agricultural Capital and Equipment—India is a country of small holdings and the commonest type is that which can be cultivated with one pair of bullocks under local conditions. Large holdings are practically unknown, and are mainly confined to the planting industries. Farming is carried on with a minimum of capital, there being practically no outlay on fencing, and very little on buildings or implements. Many causes militate against the accumulation of capital and agricultural indebtedness is heavy and the interest on loans high. Great progress has been made by the co-operative credit movement during the last twenty years. There are now 105,083 Co-operative Societies in India with 4,304,309 members and a working capital of nearly 96 crores of rupees. Some 90 per cent of these Societies are concerned with the financing of agriculture. Not only have these societies brought cheaper credit to the cultivator but they have striven to inculcate the lesson that cheap credit is only valuable if applied to productive purposes and have encouraged thrift.

Equipment—Practically all cultivation is done by bullocks and the capacity of these as draught animals varies from district to district as well as depending on the cultivator's individual circumstances. The best types in common use are capable of handling what would be considered as light single horse implements in Europe. In those tracts where irrigation is from wells bullocks are also used for drawing water, they also drive the sugarcane crusher and tread out the grain at harvest, and they are still almost the sole means of transport in rural areas. His implements being few, a cultivator's bullocks form by far the most important item of his movable property.

Implements are made of wood although ploughs are usually tipped with iron points, and there is a great similarity in their shape and general design. Iron ploughs were being introduced in large numbers in the decade following the war, but the fall in the prices of agricultural commodities in recent years has lessened the demand for these implements. The levelling beam is used throughout the greater part of the country in preference to the harrow and roller and throughout Northern India the plough and the levelling beam are the only implements possessed by the ordinary cultivator.

On black cotton soils the commonest implement is the *bakhar* a simple stirring implement with a broad blade. Seed drills and drill hoes are in use in parts of Bombay, Madras and the Central Provinces, but throughout the greater part of the country the seed is either broadcasted or ploughed in. Hand implements consist of various sizes of hoes, the best known of which are the *kodali* or spade with a blade set at an angle towards the labourer who does

not use his feet in digging and the *khurpi* or small hand hoe. Of harvesting machinery there is none, grain is separated either by treading out with oxen or beating out by hand and winnowing by the agency of the wind, cultivators have come to recognize the efficiency of winnowers and simple reapers and these, like iron ploughs, are likely to become popular when conditions improve. Even motor tractor ploughs are now estimated to number hundreds and a few steam ploughing sets are at work reclaiming land from deep rooted grasses.

Cultivation—Cultivation at its best is distinctly good but in the greater part of the country there is plenty of room for improvement. As in any other country success in agriculture varies greatly with the character of the people depending largely as it does on thrift and industry. In most places, considering the large population, cultivation is none too good. Agriculture suffers through lack of organization and equipment. Two economic factors tend to keep down the standard of cultivation. Holdings are not only small but fragmented and the Indian laws of inheritance both perpetuate and intensify this evil. Very definite attempts are now being made in several provinces and states to amend matters and consolidate holdings but the process is necessarily slow. Secondly, cultivators rarely live on or near to their holdings but congregate in villages. The need for mutual protection is less than formerly and though tradition dies hard sub villages are now springing up in many places.

For *rabi* crops which demand a fine seed-bed preparatory tillage consists mainly of repeated treatments with the indigenous plough (or on black soils the *bakhar*) which serves the purpose of plough harrow and cultivator, combined with applications of the levelling beam. Crude as these implements are, they produce in Northern India a surface mulch and moist sub soil which is the aim of all dry farming operations. For *kharif* crops the preparation is much less thorough as it is essential to sow without delay. Manure is generally applied to more valuable crops like sugarcane cotton tobacco, etc. Seeding is either done broadcast or by drilling behind a wooden plough or drill thinning and spacing are not nearly so well done as they might be and intercultivation is generally too superficial. Harvesting is done by sickle where the crops are cut whole and there is little waste involved. At their best the ryots methods are not ineffective but being uneconomical of both cattle and manpower, they are seldom carried out fully. The use of simple improved implements and of machines which lessen the strain on the bullocks, which the agricultural department is steadily fostering, is an important factor in raising the general standard of agriculture.

Irrigation—The concentration of the principal rainfall in less than a third of the year, which is not the sowing period of the *rabi* crops, places a very definite limit on the yield which can be obtained from the principal cereal crops. Some other crops, e.g., sugarcane, can hardly be grown indeed without supplementary watering. With adequate irrigation the yield from the principal grain crops in Northern India is

doubled even in areas where the monsoon is generous, whilst in the great canal colonies and in Sind barren desert has become fertile land. The Indian canal system is by far the largest in the world. In 1932-33 the total length of the main and branch canals and distributaries amounted to some 75 000 miles irrigating an area of 33 million acres, and the value of crops irrigated from Government works was estimated at about 87 crores. It has been calculated that when works under construction are completed and when the various new canals are developed fully, the irrigated area will probably reach 50 million acres. The protective effect of the canals in many areas is no less important than the enhanced yield. Protective irrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great perennial canals in the North of India draw their supply from snow fed rivers, the inundation canals run only when the rivers rise with the melting of the snow in April May and must close when supplies fall at the end of the monsoon. Other canals depend for their supply during the dry part of the year on water stored behind great dams thrown across suitable gorges and are in consequence less dependable than the larger snow fed systems. Water rates are levied on the area of irrigated crops matured so that Government bears part of the risk of failure of crops. Different rates are charged for different crops and vary somewhat in different parts of India. Rates are also lower when the water has to be lifted than when flow irrigation is given.

The Madras and Bombay Presidencies possess some of the most spectacular irrigation schemes in the world. The Cauvery Mettur irrigation system inaugurated in 1934 is considered to be the biggest in the British Empire and the largest single block masonry reservoir in the world with a storage capacity of 93 500 million cubic feet. This project, together with the Kannambadi project in Mysore is said to bring into productive use about 80 per cent of the flow of the Cauvery river besides serving as a great moderator of floods. The Wilson Dam at Bhandara impounding 272 feet of water, is far and away the highest dam in India, whilst the Sukkur Barrage in Sind across the Indus irrigates a desert whose area far exceeds that of any other scheme conceived by engineers.

Irrigation from Wells—About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few feet to over fifty feet. Their numbers have greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased owing to the high price of draught cattle and the increasing cost of their maintenance.

All agricultural departments are now giving increased attention to the better utilisation of underground water supplies, existing wells being improved by boring and tube wells of large capacity installed and equipped with pumping machinery. Efficient types of water lifts are rapidly replacing the old fashioned *mholas*

Tank irrigation is common in Central and Southern India. Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub soil water level is as important as the direct irrigation.

Manures—Although the number of cattle maintained in India is very high and indeed excessive there is everywhere a shortage of farmyard manure. This is partly due to the small use of bedding, for which straw can ill be spared and to the keeping of cattle in the open but mainly to the use of dung as the principal source of village fuel. Hence the supply of organic matter to Indian soils is deficient. Unfortunately the Indian cultivator does not possess the skill of the Chinaman in the making of composts and much valuable manurial material is wasted in every Indian village and to the detriment of sanitation. Green manure crops are spreading slowly and the use of oil cakes, especially castor cake, for the more valuable crops like sugarcane and tobacco is increasing.

The general trend of the results of experiments carried on by the various agricultural departments is to show that a better supply of organic manures is everywhere important, nitrogen is the most common limiting factor for India as a whole, phosphatic manures are definitely advantageous in certain more limited tracts. Manuring for higher production is gradually spreading as the result of village demonstrations at present prices of certain artificial fertilisers, notably ammonium sulphate and the newer types of soluble phosphatic manure are definitely profitable not only for tobacco, sugarcane and market garden crops but for some staple crops, but generally speaking the fall in the prices of agricultural produce has arrested progress in the use of fertilisers.

Rice—Rice is the most extensively grown crop in India although it predominates in the wetter parts of the country, viz. in Bengal, Bihar and Orissa, Bham and Madras. The area fluctuates slightly around 80 million acres and the yield is about 30 million tons. The crop requires for its proper maturing a moist climate with well assured rainfall. The cultivated varieties are numerous differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an intimate acquaintance with those grown in their own localities. The better qualities are sown in seed beds and transplanted in the monsoon. Broadcast rice is grown generally in low lying areas and is sown before the monsoon as it must make a good start before the floods arrive. Deep water rice grows quickly and to a great height and are generally able to keep pace with the rise in water level.

For transplanted rice the soil is generally prepared after the arrival of the monsoon and is worked into a puddle before the seedlings are transplanted. The land is laid out into small areas with raised partitions to regulate the distribution of the water supply. The seedlings are planted either singly or in small bunches containing from 4 to 6 plants each and are simply pushed into the mud at distances of 6 to 12 inches apart. Either by bunding

to retain rainfall or by artificial irrigation the details varying with locality, the rice fields are kept more or less under water until the crop shows signs of ripening. The area under improved varieties of rice distributed by the agricultural departments is now well over 2 million acres. A scheme for the intensification of research on rice in all the principal rice growing provinces financed by the Imperial Council of Agricultural Research and the Empire Marketing Board is in progress.

India (excluding Burma) consumes more rice than she produces; the balance in the past having been provided almost entirely by Burma. The year 1934-35 was marked by a phenomenal increase in the amount imported (591 lakhs of tons as compared with 0.88 of a lakh in the preceding year) and also by the fact that nearly the whole of the imports came from Siam and French Indo-China mainly in the form of broken rice. These imports had such a depressing effect on prices in the Madras Presidency that it became necessary to impose an import duty of 12 annas a munda.

Wheat—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two thirds of the total area, and probably three quarters of the total output in India. The majority of the varieties grown belong to the species *Triticum vulgare*. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing employed. Wheat for export is well cleaned and there has been great improvement in this respect of recent years. Most of the Indian wheats are soft weak wheats but there are some well known Macaroni wheats amongst them. The largest wheat acreage of recent years was that of 1933-34, namely 36 million acres, but the yield did not come up to the record harvest of 1930 which exceeded 10½ million tons. Recent crops have averaged 9½ million tons per annum which is only slightly in anything above normal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 but have since been nominal. Indian wheat having been well above world parity and the home market protected by an import duty on foreign wheat. With the development of irrigation from the Flood Barrage Canal in Sind and in the newer Punjab Canal Colonies a further increase in wheat production is practically certain and although the internal consumption of wheat will increase with the growth of population there is likely to be an exportable surplus in the not distant future. The crop is generally grown after a summer fallow and except in irrigated tracts depends largely on the conservation of the soil moisture from the previous monsoon. Rains in January and February are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under

improved varieties of wheat is now 7 million acres. The Imperial Council of Agricultural Research has recently appointed two Standing Committees to advise on problems connected with rice and wheat.

The Millets—These constitute one of the most important groups of crops in the country supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are Jowar (*Sorghum vulgare*), the great millet, and Bajra, the Bulrush millet (*Pennisetum typhoides*). Generally speaking the Jowars require better land than the Bajras and the distribution of the two crops follows the quality of the soil. Neither for Jowar nor Bajra is manure usually applied though Jowar responds handsomely to high manuring and cultivation is not so thorough as for wheat. The crop is generally sown in the beginning of the monsoon and so it requires to be thoroughly weeded. It is often grown mixed with the summer pulses especially Arhar (*Cajanus indicus*—pigeon pea) and other crops, and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces *rabi* Juar is also an important crop. The produce is consumed in the country.

Pulses—Pulses are commonly grown throughout India in great variety and form at once the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rotations and a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good mixed cropping is common. The principal pulses are Arhar (*Cajanus indicus*) gram (*Cicer arietinum*), various species of *Phaseolus* and *Pisum*.

Cotton—Is one of the most important commercial crops in India and despite the sharp fall both in quantity and value due to the trade depression raw cotton was first in the list of exports for 1931-32. The area under cotton in the quinquennium ending 1929-30 was 26.2 million acres and the average yield 5.5 million bales. In the year following, as a result of low prices the area contracted to less than 22 million acres but has again risen to over 25 millions in 1931-32. Indian mills now consume annually about 2,300,000 bales of Indian cotton and at present some 100,000 bales per annum of imported cotton (Egyptian, Sudan and African) of a staple longer than is produced in India. The principal export is of short staple cotton of $\frac{1}{8}$ staple but there is also in normal years an export of Indian medium $\frac{1}{8}$ to 1 $\frac{1}{8}$ staple cottons such as Punjab/American and Karunganni. The area under improved varieties of cotton is now estimated to be approximately 4 million acres. Of these 2.7 million acres represent long and medium staple cottons, the remainder being short staple varieties of improved yield and ginning percentage. There is no Indian cotton belt. Bombay, the Central Provinces, Hyderabad, Baroda, Madras, the Punjab and the United Provinces all have important cotton tracts

producing distinct types. Sowing and harvesting seasons are equally diverse, the former extending from May to December in different parts of the country and the latter from October to May and June. Yields vary greatly, in the best irrigated tracts the normal yield is about 200 lbs of ginned cotton per acre and yields much above these have been recorded, whilst in the poorest unirrigated tracts 60 lbs per acre is a good crop. Of recent years as the result of the work of the agricultural departments and the Indian Central Cotton Committee, the quality and yield of the staple cottons has improved and also the yield and cleanliness of the short staple tracts.

The Cotton Transport Act, the Cotton Ginning and Pressing Factories Act, the Bombay Cotton Markets Act, the C. P. Cotton Markets Act and the Madras (commercial crops) Market Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing. In certain provinces legislation has been enacted or is under consideration with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton. Agricultural departments have continued their campaign of cotton improvement apart from improvements in methods of cultivation.

Exports—The exports of raw cotton from India by sea to foreign countries for the last 5 fiscal years (ending March 31st) were as follows (in thousands of bales of 400 lbs each):—

Countries	1932 33	1933 34	1934 35	1935 36	1936 37
United Kingdom	167	342	347	456	601
Other parts of the British Empire	7	3	6	12	14
Japan	1,085	1,022	2,011	1,759	2,427
Italy	150	261	278	154	163
France	124	163	148	166	155
China (exclusive of Hong Kong, etc.)	134	337	142	109	72
Belgium	128	145	157	225	311
Spain	52	61	60	67	26
Germany	152	247	153	263	214
Other countries	64	159	148	155	284

Japan is the most important buyer, and by virtue of an agreement between the Governments of India and Japan which will

have effect up to the 31st March 1940 for a million bales of raw cotton taken by Japan. British India will import 283 million yards of Japanese piecegoods.

Sugarcane—India until recently a large importer of sugar, is one of the most important sugarcane growing countries in the world. The area in 1935-36 is estimated at 4,007,000 acres as against 2,980,000 acres, the average for the quinquennium ending 1934-35. The crop is mostly grown in the submontane tracts of Northern India more than half the area being in the United Provinces. The indigenous hard, thin low sucrose canes have now largely been replaced by seedling canes of high quality mainly the productions of the Imperial Sugarcane Breeding Station, Coimbatore. The total area under improved varieties of cane in India in 1933-34 was estimated at 2.13 million acres representing 61 per cent of the total. In the United Provinces and Bihar improved canes occupy more than 80 per cent of the area. The effect of the improved varieties is clear from the fact that while the area under cane in India in 1935-36 (4.01 million acres) represents only an advance of 34.3 per cent over the quinquennial average the yield (5.91 million tons expressed as gur) represents an increase of 51 per cent. The protection afforded by the Sugar Industry Protection Act of 1932 has given a stimulus to the production of sugar by modern methods. By the end of 1934-35 there were 130 sugar factories in India making sugar by modern methods as against 31 factories prior to 1931-32 and it is expected that the season of 1935-36 will see 139 factories in operation. The total production of sugar, including that refined from gur, in 1934-35 was 679,000 tons as against 228,120 tons in 1931-32 and 684,000 tons are likely to be produced in 1935-36. Imports of sugar of all sorts in 1934-35 amounted to 223,000 tons as against 370,000 tons in 1932-33 and 901,200 tons in 1930-31. It is expected that within a few years India will not only provide her own requirements of sugar but will have a surplus for export.

The Sugar (Excise Duty) Act of 1934 has imposed an excise duty of 10s. per cent on Khandasari and Rs. 15.0 per cent on all other sugar except palm-yras sugar produced in factories.

Oilseeds—The crops classified under the heading are chiefly groundnuts, linseed, sesamum and the cruciferous oilseeds (rape, mustard, etc.). Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature, they cover an immense area.

Groundnut though of modern introduction is already an important crop particularly in Madras, Bombay, Burma and Hyderabad. The area has not however achieved stability. It rose steadily from 1.5 million acres in the pre-war period to 8.23 millions in 1933-34. There have been successive drops in the past two years, the acreage for 1935-36 being 4.70 millions. The yield in 1934-35 was 1.9 million tons, of which 511,200 tons were exported as compared with a pre-war average export of 212,000 tons.

Linseed requires a deep and moist soil and is grown chiefly in the Central Provinces, Bihar and Orissa and the United Provinces. The crops are grown for seed and not for fibre and the common varieties are of a much shorter habit of growth than those of Europe. The yield varies greatly from practically nothing up to 500 to 600 lbs. of seed per acre. It is grown largely for export. At the beginning of the century India supplied practically the whole of the world's demand for linseed, the area having gone as high as 5 million acres with a yield of 630,000 tons. In recent years foreign competition mainly from the Argentine has contracted the market for Indian linseed and with it the area under the crop. Exports dwindled to 72,000 tons in 1932-33 as compared with the pre-war average of 379,000 tons. The preference granted to Indian linseed in the United Kingdom under the Ottawa Agreement combined with two successive short harvests in the Argentine helped India to regain her pre-war position in the British market in 1933-34 when Britain took 174,000 tons out of a total of 379,000 tons. Exports diminished however, in 1934-35 the British taking being 109,000 tons out of a total export of 238,000 tons.

Sesamum (Gingelly) is grown mostly in Peninsular India as an autumn or winter crop. In 1934-35 it occupied an area of 5.2 million acres with a yield of 404,000 tons. About 10 per cent of the production is exported and the rest consumed locally.

The Cruciferous Oilseeds form an important group of crops in Northern India where they grow freely and attain a fair state of development. The area under rape and mustard, including an estimated figure for the area grown mixed with other crops is about 64 to 7 million acres annually. Production in 1934-35 was estimated at 890,000 tons of which 36,900 tons were exported as compared with 115,000 tons in 1932-33. Several species are grown and there are numerous local varieties. A large portion of the crop is crushed locally for domestic consumption.

Jute—Two varieties of the plant are cultivated as a crop, *Capsularis* and *Olitorius*. Jute growing is confined almost entirely to Bengal, Assam, Bihar and Orissa. The crop requires a rich moist soil. Owing to river inundation this part of India receives a considerable alluvial deposit every year and the land is thus able to sustain this exhausting crop without manure. The crop is rather delicate when young but once established requires no attention, and grows to a great height (10 to 11 feet). Before ripening the crop is cut and retted in water. After about three weeks submersion the fibre is removed by washing and beating. The areas in 1935-36 was estimated at 1,947,000 million acres as compared to 2,670,000 millions in the previous year; production in 1935-36 was 6,397,000 bales as against just over 84 millions in 1934-35. The total weight of raw and manufactured jute exported during 1934-35 amounted to 1,437,000 tons. This is a distinct recovery over the exports of the three previous years. Although the present acreage is much less than some years ago a vigorous campaign is in progress to reduce it still further.

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varieties cultivated *Nicotiana Tabacum* is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The crop is only suited to small holdings where labour is plentiful as the attention necessary for its proper cultivation is very great. The seed is germinated in seed beds and the young plants are transplanted when a few inches high, great care being taken to shield them from the sun. The crop is very carefully weeded and hoed. It is topped after attaining a height of say, 2 ft., and all suckers are removed. The crop ripens from February onwards and is cut just before the leaves become brittle. The greater part of the tobacco grown in India is intended for *Hookah* smoking and is coarse and heavy in flavour. Lighter kinds are also produced for cigar and cigarette manufacture. Of recent years there has been important development in the production in commercial quantities of better quality cigarette tobacco both in Madras and in Bihar. The exports of unmanufactured tobacco during 1934-35 amounted to 26 million lbs. compared to 29 million lbs. in the previous year. The most important market is the United Kingdom which took 9 million lbs. during 1934-35. The area in 1933-34 was 1,183,000 acres with an outturn of 556,000 tons. The production in India of bright flue cured tobacco suitable for cigarette making has increased considerably, particularly in the Guntur District of the Madras Presidency and several thousands of flue curing burns have been installed in recent years.

Livestock Census—The report on the 4th Census of Livestock in India, taken in January 1935, shows that there were then in British India (excluding Bengal and Bihar) and Orissa 113 million heads of bovine cattle made up roughly of about 84 million heads of oxen and 29 million heads of buffaloes. The total figure for this census is over 5 millions (or about 5 per cent.) higher than that recorded at the preceding census in 1930.

Oxen accounted for an increase of 2.7 millions and buffaloes for an increase of 2.5 millions. In the case of oxen there was an increase of a little over 3 millions in young stock, but bulls and bullocks showed a decrease of about half a million, the reduction occurring mainly in Madras.

Cows recorded a decrease of over a lakh (1,00,000) the decline occurring mainly in the Central Provinces and Berar.

Both male and cow buffaloes increased in number the former by nearly a quarter of a million and the latter by little over half a million. The variations occurring mainly in the United Provinces and the Punjab.

Sheep declined in number by over 1½ million to a total of 22 millions the notable decrease being in Madras, the United Provinces, the Central Provinces, and Berar.

Goats numbered 26 millions, showing an increase of over one million as compared with the previous census—the chief increases being in the United Provinces and the Punjab.

There were no appreciable variations in the total number of horses and ponies, which amounted to nearly 14,000,000, but donkeys increased by about a lakh. Mules numbered 65,000 and camels a little over half a million.

Ploughs and carts gave a return of 17 and 5 millions respectively showing a slight increase (mainly in the United Provinces) as compared with the previous census figures. For draught purposes cattle are mainly used everywhere though male buffaloes are important as draught animals in the rice tracts and damper parts of the country. Horses and mules are practically never used for agricultural purposes. For dairy purposes, the buffalo is important, the milk yield being high and the percentage of butter fat considerably above that in cow's milk. The best known breeds are the Murri buffaloes of the Punjab, the Jafferaludi buffaloes of Kathiawar and the Surti buffaloes of the Bombay Presidency. The cattle and buffalo population in India is abnormally high amounting to over 60 per cent. of the human population. The spread of cultivation has diminished the grazing grounds, insufficient fodder crops are raised and many of the cattle are small ill fed and inefficient. Nevertheless the best Indian breeds have many merits. Of the draught types the best known breeds are the Hissar Nellore, Amrit Mahal, Gujrat (Kankrej), Kangaym, Kherigarh and Malvi the Sahiwal (Punjab), Gir (Kathiawar), Scindi and Hansi are amongst the best milking breeds. On the Government cattle breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude scrub bulls and where serious efforts to maintain a good strain of cow are made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium bull system is also working well in some tracts. Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued effort and persistent endeavour are essential. There is no branch of agricultural improvement where the land owners of India could render greater service.

Dairying—Though little noticed hitherto dairying forms a very important indigenous industry throughout India. The annual cash value of dairy products has been estimated at over 800 crores of rupees and the importance of milk and dairy products to the health and development of the people cannot be overestimated. Apart from liquid milk the best known products are native butter (ghree) and cheese (dahi). During recent years a considerable trade in tinned butter has sprung up and there seems to be no reason why an important industry should not be built up in other dairy products, such as milk powder, condensed milk and casein. Pure ghee and milk can usually be procured in the villages but in towns dairy products can scarcely be bought unadulterated.

The Government of India maintain an Institute of Animal Husbandry and Dairying at Bangalore where students are given 2 year courses for the Indian Dairy Diploma but little provision has

hitherto been made for the extensive industrial research into the handling and processing of milk and dairy products under Indian conditions, which is essential for the development of dairying as a village industry. This matter is now receiving the attention of the Imperial Council of Agricultural Research.

It is sufficient here to say that there is a growing recognition of the fact that as India's economic development proceeds a better balance between crop production and animal industry is needed and that the raising of crops for the feeding of dairy stock, instead of for sale as such, will be of increasing importance.

Animal Husbandry—Details of the steps taken and progress made in the control of disease and improvement of stock are given in a biennial review (1933-35) of animal husbandry in India.

As a result of systematic work a stage has now been reached in which, given the necessary staff, rinderpest (cattle plague), the most dreaded of cattle diseases, can now be brought under control at a comparatively small cost. Two kinds of vaccines derived from goats are in use for the purpose: the blood virus and the tissue virus. Two important points established as a result of work with these products in the field are (1) that goat virus can be used with safety in the face of actual outbreaks, and (2) that the immunity conferred by this virus extends to as much as 36 months, which is at present the longest time after vaccination at which it has been possible to carry out tests under field conditions. A considerable fall in the incidence of the disease has occurred where goat virus vaccination has been extensively employed. Of a total number of deaths among

cattle amounting to 200,000 in 1934-35, namely 125,000 or 62 per cent. were due to rinderpest. The percentage of deaths among inoculated cattle, however, was only 0.17.

As a result of an intensive study of equine diseases, the Imperial Veterinary Research Institute at Muktesar in collaboration with the military authorities, has succeeded in isolating an organism by inoculation of which the disease known as strangles can now be produced in susceptible animals.

With regard to *surra* a fatal form of the disease has been found to be very prevalent not only in equines but in cattle in certain parts of India, and further investigations on it are being carried out.

The vaccines issued from Muktesar have been found to be very satisfactory for the control of hemorrhagic septicæmia and black quarter in cattle.

For the development of dairying it was decided to expand the existing Dairy Institute at Bangalore and to establish a research station at Anand. Systematic selective breeding of indigenous dairy breeds was continued at Government farms and considerable improvement in type, conformation and performance was effected.

The poultry industry in India is still seriously handicapped by the ravages of contagious diseases, particularly Doyle's or Ranikhet disease, but so far no satisfactory prophylactic agent has been found. A fowl pox vaccine and biological products for the prevention of fowl cholera have, however, been successfully produced at the Imperial Veterinary Research Institute.

AGRICULTURAL PROGRESS

Agricultural Progress—The historical aspect of agricultural development in India has been fully dealt with in the report of the Lunithgow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricultural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr J. A. Voelker, Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book *Improvement of Indian Agriculture* is still a valuable reference book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saldapet in 1871, Poona in 1880, Cawnpore in 1881 and Nagpur in 1883, there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. Of these the earliest were Mollison in Bombay

(subsequently Inspector General of Agriculture), Barber and Benson in Madras, Hayman in the United Provinces and Milligan in the Punjab. In 1901, the first Inspector General of Agriculture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord Curzon whose famous despatch of 1903 marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Pusa, completely staffed provincial departments of agriculture with agricultural colleges and provincial research institutes and an experimental farm in each important agricultural tract. To the establishment of the Imperial Agricultural Research Institute at Pusa, Lord Curzon devoted the greater part of a generous donation of £30,000 given by Mr Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the

diseases and pests of plants and animals. The addition of the Imperial Institute of Animal Husbandry and Dairying (with a branch farm at Wellington), the Imperial Cattle breeding Farm at Karnal and the Anand Creamery enabled livestock work to be carried out on a scale not possible at Pusa. The Imperial Sugarcane breeding station at Coimbatore is yet another branch of the Imperial Agricultural Research Institute. The Bihar Earthquake of 1934 caused considerable damage to the Pusa Institute and Provincial Governments have steadily developed and strengthened their agricultural departments. The Institute was moved to New Delhi and the new buildings erected for the purpose were formally opened there in September 1936.

Parallel developments took place in the provision made for matters connected with animal health. The now world famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped research institute which also manufactures protective sera and vaccines of which some 6 million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General. The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Muktesar Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress—As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes—at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the

chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough. More than 16 million acres are known to be under improved crops—the further area due to natural spread is indeterminable. Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new triumphs. The position was authoritatively reviewed by the Royal Commission on Agriculture which reported in 1928. Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural departments having shown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his methods improved, the problem is now to develop and intensify such work so that a general advance in agricultural practice will result. At no time has there been a greater need for co-ordinated effort directed towards the solution of agricultural problems. Only by increased efficiency can India meet the situation caused by low prices for all agricultural commodities and the intense competition in world markets arising from production in excess of effective demand.

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial Council of Agricultural Research. It works in collaboration with the special marketing staff appointed in the various provinces.

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

In Chapter III of their Report, the Royal Commission on Agriculture stated that the most important problem with which they had been confronted was that of devising some method of infusing a different spirit into the whole organisation of agricultural research in India and of bringing about the realisation on the part of research workers in this country that they are working to an end which cannot be reached unless they regard themselves as partners in a common enterprise. They had found not only a lack of sufficiently close touch between the Pusa Research Institute and the provincial agricultural departments but also between the provincial departments themselves. After describing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which the provincial agricultural departments and non-official interests would be represented, the Commission proposed the establishment of an Imperial Council of Agricultural Research

The primary function of the Council would be to promote, guide and co-ordinate agricultural including veterinary, research in India and to link it with agricultural research in other parts of the British Empire and in foreign countries. It would make arrangements for the training of research workers, would act as a clearing house of information in regard not only to research but also to agricultural and veterinary matters generally and would take over the publication work at present carried out by the Imperial Agricultural Department. The Commission proposed that the Council should be entrusted with the administration of a non-lapsing fund of Rs 50 lakhs to which additions should be made from time to time as financial conditions permit. Its Chairman should be an experienced administrator with a knowledge, if possible, of Indian conditions and, in addition, there should be two other whole time members of the Council for agriculture and animal husbandry respectively. The Commission suggested that the Council should consist of thirty-six members, in addition to the Chairman and the two whole time members. Of these, eight would be nominated by the Government of

India, eighteen would represent the provincial, agricultural and veterinary departments, three would represent the Indian Universities, two would represent the Indian Central Cotton Committee and the planting community respectively and five would be nominated by the Council for the approval of the Government of India. The Council would largely work through a Standing Finance Committee and sub-committees. A provincial committee should be established in each major province to work in close co-operation with it. The advisory duties of the Agricultural Adviser to the Government of India would be taken over by the Chairman and whole-time members of the Research Council, his administrative duties being taken over by a whole-time Director of the Pusa Institute.

Constitution of the Council.—In a Resolution issued on May 23rd, 1929, the Government of India stated that whilst they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the organisation outlined above was recommended they considered a Council of thirty-nine members would be too large to be really effective and that it was not desirable that the Legislative Assembly should be deprived of its normal constitutional control over an activity which affects the staple industry of India. They had, therefore, decided that the central organisation should be divided into two parts, a Governing Body which would have the management of all the affairs and funds of the Council subject to the limitation in regard to the control of funds which is mentioned below and an Advisory Board the functions of which would be to examine all proposals in connection with the scientific objects of the Council which might be submitted to the Governing Body, to report on their feasibility and to advise on any other questions referred to it by the Governing Body. The Governing Body would consist of the Member of the Governor-General's Council in charge of the portfolio of Agriculture, who would be *ex officio* Chairman, the Principal Administrative Officer of the Council, who would be *ex officio* Vice-Chairman, one representative of the Council of State, two representatives of the Legislative Assembly, one representative of the European business community elected by the Associated Chambers of Commerce of India, one representative of the Indian business community elected by the Federation of Indian Chambers of Commerce and Industry, the Provincial Ministers of Agriculture, two representatives elected by the Advisory Board and such other persons as the Governor-General in Council might from time to time appoint.

The Advisory Board would consist of all those whose inclusion in the Council was recommended by the Royal Commission with the exception of the representatives of the Central Legislature and the representatives of the European and Indian commercial communities, who, under the modified scheme, would be members of the Governing Body. In view of their exclusion from the Advisory Board, the university representation would be increased from three to four and the scientific

representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association. A representative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be *ex officio* Chairman of the Advisory Board.

The Government of India further announced that for the lump grant of Rs. 50 lakhs recommended by the Royal Commission, they had decided to substitute an initial lump grant of Rs. 25 lakhs of which Rs. 15 lakhs would be paid in 1929-30, supplemented by a fixed minimum grant annually. The annual grant would be Rs. 7.25 lakhs of which Rs. 5 lakhs would be devoted to the furtherance of the scientific objects of the Council and the remaining Rs. 2.25 lakhs to the cost of its staff and secretariat. The Council would have an entirely free hand in regard to the expenditure of the grants made to it for scientific purposes subject to the condition that no liability in respect of such matters as leave or pension contributions after the research for which the grant had been given would be incurred. In regard to the grant to meet the cost of staff, establishment, etc., the Council would be in the same position as a Department of the Government of India Secretariat.

The Council has since been constituted a separate Department of the Government of India for the purpose of administering this grant.

The Government of India also stated their decision that the Council should not be constituted under an Act of the Imperial Legislature as recommended by the Royal Commission but should be registered under the Registration of Societies Act, XXI of 1860. In pursuance of this decision, a meeting of those who would constitute the Society was held at Simla in June, 1929 to consider the terms of a memorandum of association and the Rules and Regulations. At that meeting, it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs. 2 lakhs to the funds of the Council. This offer was gratefully accepted and the Revenue Member of the Nizam's Government has been added to the Governing Body, the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board. Since then donations of one lakh each, payable in 20 equal annual instalments have been made by the Mysore, Baroda, Cochin, Travancore and Kashmir States and each nominates one representative to the Governing Body of the Council and two technical members to the Advisory Board. The Bhopal State has also been admitted as a constituent member of the Council on payment of a donation of Rs. 50,000 in 20 equal annual instalments and has been allowed the same representation on the Council as has been granted to the other constituent States.

Personnel.—In addition to the 19 *ex-officio* members the Governing Body included at the commencement of 1937 the following gentlemen—

The Hon. Mr. Husain Imam, elected by the Council of State, Pt. Sri Krishna Dutt, Paliwal M.L.A. and Mr. Mohamed Azhar Ali M.L.A., elected by the Legislative

Assembly, Sir Joseph Kay and Mr Chunilal B Mehta representing the business community Messrs Carpenter and Kerr elected by the Advisory Board, and the Hon'ble Sir Frank Noyce, and Diwan Bahadur Sir T. Vijayaraghavacharya additional members appointed by the Governor General in Council. The Chairman of the Council is the Hon'ble Member of the Council of His Excellency the Governor General for the time being in charge of the portfolio of Agriculture. The Hon. Kunwar Sir Jagdish Prasad, KCSI Kt. CSE, CIE, CBE.

The whole time officers of the Council are — The Vice Chairman—Since the retirement of Diwan Bahadur Sir T. Vijayaraghavacharya on the 25th October 1935, the post has not been permanently filled.

Officiating Vice Chairman and Principal Administrative Officer — Sir Bala Bhat Kt. CIE, MBE, ICS (on deputation under the Commerce Department Government of India).

Secretary — Mr N C Mehta BA (Cintab), BA at Law, ICS.

Animal Husbandry Expert — Colonel Sir Arthur Oliver OBE CMG, FRCVS (on leave).

Officiating Arable Husbandry Expert — Dr W Burns, DSc (Edm), IAS.

Superintendents — Messrs P M Sundaram BA, S C Sarkar, BA, and T S Krishnamurti BA (Offg).

Agricultural Marketing Adviser — Major A M Livingston, MC MA, BSc.

Director, Imperial Institute of Sugar Technology Coimbatore — Mr R C Srivastava BSc.

Toxist Research Entomologist — Rao Bahadur V Ramachandra Rao, IAS MA FRS.

Statistician — Rao Bahadur M Vaidyanathan MA LLB, FSS.

Chief Economist — Dr Ramji Das Kapur MSc, PhD.

IMPROVEMENT OF AGRICULTURAL MARKETING

In view of the importance of improved agricultural marketing as an aid to the general economic recovery of the country the Government of India decided to give effect to the recommendations made by the Royal Commission on Agriculture and generally endorsed by the Central Banking Enquiry Committee regarding marketing surveys. After consultation with the Provincial Governments it was decided that the first step should be the appointment for a limited period of a highly qualified and experienced Marketing Expert with practical knowledge of agricultural marketing in other countries. This officer and the necessary assistants should be attached to the Imperial Council of Agricultural Research and should undertake the investigation of marketing problems formulate schemes for improvement make recommendations as regards standard grades for the various commodities and advise local Governments and provincial Departments of Agriculture generally in regard to agricultural marketing.

In accordance with this decision the office of the Agricultural Marketing Adviser to the Government of India was constituted with effect from the 1st January 1935 at Delhi. With Mr A M Livingston as the Agricultural Marketing Adviser, the central staff consists of 3 Senior Marketing Officers, 3 Marketing Officers, one Supervisor for Experimental Grading and Picking Stations and 12 Assistant Marketing Officers. Some 92 full time Marketing Officers are operating throughout India and Burma. Out of these 32 (Assistant Marketing Officers) have been provided in the provinces out of grants made by the Imperial Council of Agricultural Research. In provinces and States for which no Senior Marketing Officers shown the Director of Agriculture supervises the work of the Marketing Officers. In addition to the full time

Marketing staffs referred to 226 Officers have been nominated to deal with marketing questions in the major Indian States and Minor Administrations. The Assistant Marketing Officer (Offg) appointed by the Coffee Cess Committee is attached to the office of the Agricultural Marketing Adviser.

The investigation work connected with the surveys ranges over the whole field of marketing but special attention is devoted to a study of prices and the quality of the products concerned. In this latter connection a considerable amount of analytical work has been done at various research institutions in the country. Generally speaking the market investigations have been carried out by means of personal interviews assisted by a standard list of questions in the form of questionnaires and the Marketing Officers in the course of their work apart from visiting the villages and mandis interview representative members of different groups of persons concerned in the production and distribution of commodities for example producers, distributors, wholesalers, manufacturers, railway agents and so on.

The Central Marketing Staff are responsible for survey work in a large number of States which do not have staff of their own. They have also to advise and assist the local Marketing Staffs in carrying out their work.

Surveys were in the first instance initiated in regard to rice, wheat, husked groundnuts, tobacco, fruits, milk, eggs, livestock and hides and skins and also in respect of Markets and Fairs and Co-operative Marketing. At a conference between the Central Marketing Staff and Senior Marketing Officers in provinces and States held at Delhi in April 1936 it was agreed that as soon as the completion of the enquiries regarding any of the foregoing com-

modities permitted survey work should be commenced on the following —

- Cereals* barley, gram and maize
- Oilseeds* coconuts, mustardseed, rapeseed and toria
- Fruits* mangoes
- Vegetables* potatoes
- Special crops* coffee
- Animal Husbandry Products* sheep and goats' wool and hair and ghee and butter

The first report recently issued by the Agricultural Marketing Adviser gives an exhaustive picture of the marketing of wheat in India. It contains considerable material which should be of interest to all those connected with the wheat trade. Its price has been specially fixed so low as Re 1 4 a copy so that it may suit all pockets. Copies of the report (Report on the marketing of wheat in India) are available for sale at all Government book depots and in the office of the Manager, Central Publication Branch, Civil Lines, Delhi. Similar reports on tobacco, eggs, grapes, cattle and humped are under preparation.

Arrangements were made for the analysis of samples of new commodities at various centres. By courtesy of certain large exporters at Calcutta and Karachi an analysis was made from their books of the quality of exported hides and skins on the basis of trade selections on the Hamburg system of classification.

Although development work is mainly the concern of provincial staffs certain experimental grading and packing stations were established for hides (at Agia and Delhi) fruits (oranges at Nagpur and grapes at Nasik) eggs (at Pabbi in N.W.P. and Kottanakara in Travancore) and for *ata* from washed and conditioned wheat ground at Delhi. The system of grades adopted at these experimental stations is based on the commodity analyses and discussions with representatives of the trade. Soon after this work started necessity was felt for taking suitable steps to protect these grade designations and marks from being copied or otherwise misused. The Agricultural Produce (Grading and Marking) Act 1937 (Act I of 1937) was accordingly passed by the Central Legislature in March 1937. Rules were passed under the Act prescribing grade designation and standards of quality for eggs, oranges, grapes, hides and skins and published in the Gazette of India dated 27th February 1937 and 20th March 1937. The General Rules made at the same time empower the Agricultural Marketing Adviser to issue certificate of authorisation to suitable persons desirous of being authorised to grade and mark their produce with the prescribed designation marks.

As a general policy it is hoped that, as far as many of the heavy commodities are concerned grades and standards will be controlled by suitable trade associations like the East India Cotton Association at Bombay. In pursuit of this policy and with a view to encouraging and developing the sense of corporate responsibility for improving marketing methods the Central Marketing Staffs have held many conferences, both formal and informal with various trade and manufacturing interests concerned with the marketing of different commodities. In the course of the year Grain Trade Associations and millers co-operated with the Central Marketing Staff in formulating the basis of an all India standard contract for wheat and linseed. As a result of mutual discussion the Federation of Indian Farmers was established at Cawnpore and the Indian Tobacco Association at Guntur. Part of the object of both these bodies is to maintain grade standards and promote their use in the trade. Discussions were also held with sugar interests with a view to establishing at an early date a comprehensive association for controlling futures trading on the basis of defined standards. It is desired to acknowledge the ready spirit of co-operation shown by the large number of associations without which it would have been impossible to make so much progress.

A bulletin containing the prices (both ready and futures) stocks and movements of wheat, linseed and rice is compiled at the Headquarters from information received from the important markets of Amritsar, Jallpur, Karachi, Bombay, Calcutta and Hapur. This is passed on to the All India Radio Delhi Station from where it is broadcasted (both in Urdu and English) every Sunday evening.

The question of cold storage and refrigerated transport, which had been engaging the active consideration of Army authorities, has also been taken up by the Agricultural Marketing Adviser, who is to act as liaison officer and to attend to enquiries from the trade and general public concerning cold storage. At the instance of the Army authorities a company (The Indian Cold Storage Company, Delhi) has been formed for the erection of cold storage depots at several places in Northern India. These depots, when erected, will cater for the requirements of both military and commercial interests.

Apart from the work of the Central Staff all the local Marketing Staffs in provinces and States were by force of circumstances driven to take some kind of development work. For example, the Madras local Marketing Staff have formed two fruit growers' associations, the United Provinces Staff have done much work in connection with the Lucknow Exhibition and the Fruit Development Board in Assam. The Senior Marketing Officer provided local growers of pineapples with an outlet for their produce. It has been increasingly evident that nearly all the interests concerned are anxious to assist the Marketing Staffs in speeding up the progress of improved marketing.

List of the Central Marketing Officers and the Senior Marketing Officers in Provinces and Indian States —

A — Central Marketing Staff

Agricultural Marketing Adviser to the Government of India — Major A McD Livingstone, M C, M A B Sc

Senior Marketing Officers — C B Samuel, M A B Sc (Hons) A M Thomson, H C Javaraya, L Ag F L S F R H S

Marketing Officers — B P Bhargava, B Sc, A M Inst F S Dr T G Shirname, B Ag, Ph D F S F R Econ S, D N Khurody, I D D (Hons)

Supervisor for Experimental Grading and Packing Stations — P L Fandon, B Sc (Wales), F R Econ S (Lond)

Assistant Marketing Officers — Tiryugi Prasad, M A, LL B, F A Shah B A Hukmat Khan, B Sc (Agri) K Comarasamy Chetty, B Sc (Edin) S C Chakravarty, B Ag (Bom) E M Bee, K Gopalan M A Dip Econ, CH D B Com (Manchr), Shashikant N D D (Scot) Fazal Haq B A M Sc (Reading) Nurul Islam Y T Desai B Ag, M Sc (Econ) London F R Econ S, Dr T G Menon, B Sc (Agri) (Munich)

B — Provincial Marketing Officers

Madras — K Gopalakrishnan Raju, L Ag

Bombay — Dr M B Ghatge, B Ag, Ph D

Bengal — A R Malik, M A, B Ag

United Provinces — J A Manawwar, M A, B Sc (Edin), M S A (Texas)

Punjab — Kartar Singh, L Ag, B Sc, (Agri), N D D (Reading)

Bihar and Orissa — B N Sarkar, L Ag

Central Provinces — R H Hill, M A (Cantab)

Burma — R Watson I A S (Officiating)

Assam — L K Handique, B Sc Agri (Edin)

C — Indian States Marketing Officers

Hyderabad — Ahmed Mohiuddin B A

Mysore — V Venkatachar M A, B Com, also Superintendent of Commercial Intelligence

Kashmir — Captain R G Wreford (Chairman Jammu and Kashmir Marketing Board)

Patna — Harchand Singh, L Ag

Bhopal — K F Haider

Cochin — M Sankara Menon, B A, B Ag

IMPERIAL INSTITUTE OF SUGAR TECHNOLOGY

The Indian Sugar Committee of 1920 recommended *inter alia* the establishment of a Central Research Institute as necessary to the proper development of the sugar industry in this country. The necessity for such an institute was greatly emphasised since the date of the Report by the rapid expansion of the industry during the past few years.

The Government of India accepted the recommendation of the Sugar Committee and started with effect from 1st October 1936, for a period of five years the Imperial Institute of Sugar Technology at Coimbatore. It was decided to take over with the concurrence of the Government of the United Provinces the Sugar Section of the Harcourt Butler Technological Institute and develop it into the Imperial Institute of Sugar Technology.

It is decided that the Institute should undertake research on—

- Problems of Sugar Technology in general and those of the sugar factories in India in particular,
- The utilisation of the by products of the industry,
- Detailed testing of new varieties of cane under factory conditions, and
- General problems of sugar engineering and chemistry

The Institute also provides adequate facilities for the training of students in all branches of Sugar Technology and arranges for short courses for men already employed in

the industry. It is also responsible for the collection, tabulation and analysis of scientific control returns from factories and making the results of detailed study of these returns available to factories in the shape of technical reports. The Institute is in other words, intended to furnish assistance of a scientific and technical nature to all factories which may need it. Besides carrying on research on fundamental problems of sugar chemistry it acts as the medium for harmonising the latest developments in the sugar industry abroad with the conditions prevailing in this country.

The administration of the Institute was vested in the Imperial Council of Agricultural Research Department, Government of India. Mr R C Srivastava, formerly Sugar Technologist to the Imperial Council of Agricultural Research, was appointed the first Director of the Institute. A representative body was constituted to advise from time to time on the problem to be investigated at the Institute and to undertake periodic reviews of its activities.

The first academic session of the I I S T commences on the 10th July 1937, and facilities will be provided for the training of students in the following courses —

- 1 Associateship in Sugar Technology
- 2 " " Engineering
- 3 Fellowship " " Technology
- 4 " " Engineering
- 5 Sugar Boilers Certificate Course
- 6 Short courses of instruction to be given in the off season

Rubber †	23,004	26,042	26,639	28,023	24,351	20,117	6,381(b)	12,915	37,156

Notes—The acreage of crops given in this table is for British India only, but the yield includes the crops in certain Indian States also. The total of food crops and non food crops shown here up to the year 1929-30 does not agree with the total sown area as the latter area includes certain areas in the United Provinces for which details are not available.

* Groundnut, coconut, castor and other oilseeds † The statistics of the production of tea, jute and rubber are for calendar years

† Other dyes & tanning materials, other drugs & narcotics and miscellaneous non food crops

(b) Decrease is due to general slump in the rubber market

Irrigation.

The chief characteristics of the Indian rainfall are its unequal distribution over the country, its irregular distribution throughout the seasons and its liability to failure or serious deficiency. The normal annual rainfall varies from 40 inches at Cherrapunji in the Assam hills to less than three inches in Upper Sind. The greatest rainfall actually measured at any station in any one year was 90.5 inches, recorded at Cherrapunji in 1861, while at stations in Upper Sind it has been nil. There are thus portions of the country which suffer as much from excessive rainfall as others do from drought.

The second important characteristic of the rainfall is its unequal distribution throughout the seasons. Except in the south east of the peninsula, where the heaviest precipitation is received from October to December, by far the greater portion of the rainfalls during the south west monsoon between June and October. During the winter months the rainfall is comparatively small the normal amount varying from half an inch to two inches, while the hot weather, from March to May or June, is practically rainless. Consequently it happens that in one season of the year the greater part of India is deluged with rain and is the scene of the most wonderful and rapid growth of vegetation, in another period the same tract becomes a dry, sun burnt waste. The transition from the latter to the former stage often occurs in a few days. From the agricultural point of view the most unsatisfactory feature of the Indian rainfall is its liability to failure or serious deficiency. The average annual rainfall over the whole country is about 45 inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But if separate tracts are considered, extraordinary variations are found. At many stations annual rainfalls of less than half the average are not uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought.

Scarcity—Classing a year in which the deficiency is 25 per cent as a dry year and one in which it is 40 per cent as a year of severe drought, the examination of past statistics shows that, over the precarious area, one year in five may be expected to be a dry year and one in ten a year of severe drought. It is largely in order to remove the menace of these years that the great irrigation systems of India have been constructed.

Government Works—The Government irrigation works of India may be divided into two main classes, those provided with artificial storage and those dependent throughout the year on the natural supplies of the rivers from which they have their origin. In actual fact, practically every irrigation work depends upon storage of one kind or another but, in many cases, this is provided by nature without man's assistance. In Northern India, upon the Himalayan rivers, and in Madras, where the

cold weather rains are even heavier than those of the south west monsoon, the principal non storage systems are found.

The expedient of storing water in the monsoon for utilization during the subsequent dry weather has been practised in India from time immemorial. In their simplest form such storage works consist of an earthen embankment constructed across a valley or depression, behind which the water collects, and those under Government control range from small tanks irrigating only a few acres each to the huge reservoirs recently completed in the Deccan which are capable of storing over 20,000 million cubic feet of water. By gradually escaping water from a work of the latter type, a supply can be maintained long after the river on which the reservoir is situated would otherwise be dry and useless.

The Three Classes—Previously all irrigation works were divided into three classes Productive, Protective and Minor, but during the triennium 1921-24 the method of determining the source from which the funds for the construction of Government works was provided was changed, and now all works, whether major or minor, for which capital accounts are kept have been reclassified under two heads, Productive and Unproductive, with a third class embracing areas irrigated by non-capital works. The main criterion to be satisfied before a work can be classed as productive is that it shall within ten years of the completion of construction, produce sufficient revenue to cover its working expenses and the interest charges on its capital cost. Most of the largest irrigation systems in India belong to the productive class. The total capital outlay direct and indirect on irrigation and navigation works including works under construction amounted at the end of the year 1934-35 to Rs. 150.89 crores.

Unproductive works are constructed primarily with a view to the protection of precarious tracts and to guard against the necessity for prodigious expenditure on the relief of the population in times of famine. They are financed from the current revenues of India, generally from the annual grant for famine relief and insurance, and are not directly remunerative. The construction of such work being separately justified by a comparison of the value of each acre protected (based upon such factors as the probable cost of famine relief, the population of the tract, the area already protected and the minimum area which must be protected in order to tide over a period of severe drought) with the cost of such protection.

Nearly one eighth of the whole area irrigated in India from Government works is effected by minor works for which no capital account is kept.

Growth of Irrigation—There has during the last fifty years, been a steady growth in the area irrigated by Government irrigation works.

from 10½ million acres in 1878-79 the area annually irrigated rose to 1½ million acres at the beginning of the century and to 29.88 million acres in 1934-35.

The main increase has been in the class of productive works, which irrigated 4½ million acres in 1878-79 and rose to 20 756 209 acres in 1926-27. During the year 1934-35 the areas irrigated by productive and unproductive works amounted to 21,361 503 acres and 3 639,387, acres respectively.

The area irrigated in 1934-35 was largest in the Punjab, in which province 10.48 million acres were irrigated during the year. In addition about 663 391 acres were irrigated from channels which although drawing their supplies from British canals lie wholly in the Indian States. The Madras Presidency came next with an area of 7.3 million acres followed by Sind with an area of 4.06 million acres.

Capital and Revenue—The total capital invested in the works has risen from Rs. 42.36 lakhs in 1900-01 to Rs. 150.89 crores in 1934-35. The gross revenue for the year was Rs. 1,234 lakhs and the working expenses Rs. 492 lakhs the net return on capital being therefore 4.9 per cent. In considering the latter figure it must be remembered that the capital invested includes considerable expenditure on two large projects the Flood (Sukkur) project and the Chutry Mathur Project. The former project which was opened for irrigation in 1932 did not yield any revenue this year as against Rs. 25 lakhs in the preceding year while the latter project which was completed during the year under review yielded a net revenue of Rs. 598 000 only.

Charges for Water—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may however be regarded as exceptional. Over the greater part of India water is paid for separately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by 'lift' that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

Various other methods of assessment have been tried such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully understands the principle of 'No crops no charge' which is now followed as far as possible in canal administration, but has no confidence in a system under which his liability for water rate is independent of the area and quality of his crop.

The rates charged vary considerably with the crop grown, and are different in each province and often upon the several canals in a single

province. Thus in the Punjab, they vary from Rs. 7-8-0 to Rs. 12 per acre for sugarcane, from Rs. 4 to Rs. 7-8-0 per acre for rice, from Rs. 3-4-0 to Rs. 5-4-0 per acre for wheat, from Rs. 1 to Rs. 4-4-0 per acre for cotton and from Rs. 2 to Rs. 3-4-0 per acre for millets and pulses. Charge is made for additional waterings. Practically speaking, Government guarantees sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted.

A somewhat different system the long lease system, is in force in parts of Bengal and the Central Provinces under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high it is always a question whether irrigation will be necessary at all and if the cultivators have to pay the full rate they are apt to hold off until water becomes absolutely essential and the sudden and universal demand then usually exceeds the supply. By paying a reduced rate every year for a term of years they become entitled to water when required, consequently there is no temptation to wait till the last possible moment and the demand is much more evenly distributed throughout the season.

Taken as a whole, irrigation is offered on extremely easy terms and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

Central Bureau of Irrigation—An important event of the triennium 1930-33 was the establishment of a Central Bureau of Irrigation as an essential adjunct of the Central Board of Irrigation. This organization satisfies a want long felt by irrigation officers and has great potentialities in connection with the development of Indian irrigation. The Bureau came into being in May 1931. Its main objects are to ensure the free exchange of information and experience on irrigation and allied subjects between the charged officers of the various provinces, to co-ordinate research in irrigation matters throughout India and to disseminate the results achieved to convince at intervals general congresses at which selected irrigation matters will be discussed by officers from various provinces and to establish contact with similar bureaux in other countries with a view to the exchange of publications and information. These objects necessitate among other things the maintenance of a comprehensive library of irrigation publications both Indian and foreign and the expenditure on the establishment and on the library is considerable. The Bureau was financed during the year 1931-32 by the Government of India, but local Governments have since consented to contribute towards its support and it has thus achieved an independent existence under the Central Board of Irrigation. The Government of India contributing in the same manner as provincial Governments.

Triennial Comparisons—The average area irrigated in British India by Government works of all classes during the triennium 1930-33 was 30.23 million acres.

The results obtained in each province are given in the table below —

Provinces	Average area irrigated in triennium 1927-30	Average area irrigated in triennium 1930-33
Madras	7 277,967	7,484,406
Bombay (Deccan)	406,748	382 729
Sind	3 579 592	3 690,000
Bengal	90 054	63,740
United Provinces	3 639,867	3 805,205
Punjab	11,200 550	10,995 258
Burma	1 994 321	2 076,435
Bihar and Orissa	937 067	886,834
Central Provinces	400 438	403 181
North West Frontier Province	403 064	395 089
Rajputana	31,984	21 098
Baluchistan	22 407	21 430
Total	29 954 059	30,231 468

Productive Works — Taking productive works only a triennial comparison is given in the following table. It will be seen that the average area irrigated by such works during the triennium was approximately two hundred thousand less than in the previous period —

Provinces	Average area irrigated in previous triennium 1927-30	Average area irrigated in triennium 1930-33
Madras	3 821 815	3 825 277
Bombay Deccan	2 637	6 089
Sind	2 661 519	2 705,647
United Provinces	3 372,506	3 308 892
Punjab	10,775 734	10 314 031
Burma	1, 78,39	1 446,121
Central Provinces	21,883	<i>nil</i>
North West Frontier Province	237 750	203,225
Total	22,212 403	22 009 295

Taking the productive works as a whole, the capital invested in them was, at the end of 1934 Rs. 10 658 lakhs. The net revenue for the year was Rs. 715 lakhs giving a return 6.76 per cent as compared with 9 per cent in 1918-19 and 9½ per cent in 1919-20. In considering these figures it must be remembered that the capital invested includes the expenditure upon several works which have only lately come into operation and others which were under

construction which classes at present contribute little or nothing in the way of revenue; moreover only receipts from water rates and a share of the enhanced land revenue due to the introduction of irrigation are credited to the canals so that the returns include nothing on account of the large addition to the general revenues of the country which follows in the wake of their construction.

Unproductive Works—Turning now to the unproductive works, the areas irrigated in the various provinces during the triennium were as below —

Provinces	Average area irrigated in previous triennium 1927-30	Average area irrigated in triennium 1930-33
Madras	266,849	261,624
Bombay Deccan	239,278	204,715
Sind	831,722	834,305
Bengal	67,802	39,548
United Provinces	252,643	274,565
Punjab	424,756	681,227
Burma	539,253	562,169
Bihar and Orissa	904,303	884,350
Central Provinces	333,482	374,556
North West Frontier Province	195,314	191,850
Rajputana	31,984	25,098
Baluchistan	22,407	21,430
Total	4,109,793	4,455,437

Non-capital Works—The results obtained from the non capital works are given below —

Provinces	Average area irrigated in previous triennium 1927-30	Average area irrigated in triennium 1930-33
Madras	3 180 303	3 297,565
Bombay Deccan	164 843	169,568
Sind	86 351	62 637
Bengal	22 252	21,673
United Provinces	14,717	21,748
Burma	76,676	68,145
Bihar and Orissa	2,764	2 484
Central Provinces	45,067	30,628
Total	3 601,963	3 674,448

Irrigated Acreage—A comparison of the acreage of crops matured during 1933-34 by means of Government irrigation systems with the total area under cultivation in the several provinces is given below —

Provinces	Net area cropped	Area irrigated by Government irrigation works	Percentage of area irrigated to total cropped area	Capital cost of Government irrigation and navigation works to end of 1934-3, In lakhs of rupees	Estimated value of crops raised on areas receiving State irrigation In lakhs of rupees
	Acrees	Acrees			
Madras	37 539 000	7 302 000	19.4	2 034	2 075
Bombay Deccan	26 405 000	388 000	1.4	1 068	243
Sind	4 192 000	4 069 000	97.1	3 021	621
Bengal	27,921 000	1 30 000	0.5	531	10
United Provinces	35 033 000	3 527,000	10.9	2 618	1,843
Punjab	29 833,000	* 10,45,000	3.1	3,451	3,223
Burma	18 164 000	2,054 000	11.3	688	531
Bihar and Orissa	29,547 000	853 000	2.9	628	350
C. P. (excluding Barar)	20,809 000	323 000	1.6	68	93
N. W. F. Province	2 555 000	† 410 000	16.0	302	113
Rajputana	446 000	27 000	5.9	36	6
Pithuristan	410 000	20,000	5.0	36	3
Total	232 854 000	29 888 000	12.8	15 098	9 111

* In addition 6 63 391 acres were irrigated on the Indian State channels of the Western Jumna canal, the Sirhind and the Ghaggar canals.

† Including 31 498 acres irrigated by the Pihampur canal for which it present no capital and revenue accounts are kept.

New Works—The major works of exceptional importance are the Lloyd Barrage and Canals in Sind, the Cauvery (Mettur) project in Madras and the Sutlej Valley (Canals in the Punjab). The Lloyd Barrage, which was opened by His Excellency the Viceroy early in 1932 is the greatest work of its kind in the world, measuring 4 725 feet between the faces of the regulators on either side. The canals construction scheme has been completed, and the revenue account of the scheme was opened with effect from the financial year 1932-33.

Providing for the irrigation of a total anticipated area of approximately 5½ million acres on attainment of full development the main features of the scheme are a Barrage approximately a mile long across the river Indus near Sukkur, three large canals taking off from above the Barrage on the right bank of the River and four canals on the left bank of the River with a separate head regulator for each canal. The total expenditure (excluding interest charges) incurred on the project to the end of March 1935 amounted to Rs 20.08 crores. The construction estimate of the project was closed on the 30th September 1933. The year under review was the third year of operation of the Barrage canals and their general working was satisfactory. The important construction work carried out during the year under review consisted of the excavation of main and branch watercourses and the construction of modules and hume pipe culverts.

The Sutlej Valley Works which reached completion by the end of 1932-33 received the sanction of the Secretary of State for India in 1921-22. It falls into four natural groups centred on the Ferozepur, Sulaimanki, Islam, and Panjnad Headworks. During the triennium ending 1932-33 all the State Canals taking off from the first three headworks namely the Bikaner, Jodwah, Eastern Sadiqui, Bahawalpur and Qampur Canals were handed over to the States. The remaining two canals, namely the Abbassi and Panjnad Canals taking off from the Panjnad Headworks, were also handed over to the Bahawalpur State during the year. The total expenditure on the Project to the end of 1932-33 amounted to Rs 21.12 crores which include Rs 11.63 crores contributed by the States of Bikaner and Bahawalpur—the co-partners in the Project. The total area to be irrigated is 5 103 000 acres, or nearly 8 000 square miles. Of this 2 075 000 acres are perennial and 3,028 000 acres non perennial irrigation. 1,942,000 acres are in British territory, 2,825,000 acres in Bahawalpur and 341 000 acres in Bikaner.

The Cauvery Mettur Project is the most important project completed during the year under review and its inauguration ceremony was performed on the 21st August 1934. The project was sanctioned in 1925 and its sanctioned estimate amounts to Rs 737 lakhs. It has been framed with two main objects in view, first to improve the existing fluctuating water supplies

for the Cauvery delta irrigation of over a million acres and secondly to extend irrigation to a new area of 301,000 acres. The project involved—

- (i) the construction of a large dam on the Cauvery at Mattur, the object of the dam being to store the flood waters of the river and to pass them down to the delta as and when required;
- (ii) the construction of an irrigation canal (the Grand Anicut canal) taking off on the right bank of the Cauvery; and
- (iii) the improvement and extension of the existing Vaidyar canal in the Cauvery delta.

A saving of Rs. 74.73 lakhs is expected in the sanctioned estimate and the project is

estimated to yield a net revenue of over Rs. 50 lakhs. Apart from the extension of irrigation to new areas (271,000 acres on the Grand Anicut canal and 30,000 acres on the Vaidyar canal) second crop cultivation is expected to increase by 175,000 acres. The construction of the dam in addition to the development of irrigation in the Cauvery delta enabled the development of electrical power and the Mattur Hydro Electric Scheme is expected to be completed by April 1948. The potentialities of Mattur as an industrial centre are now considerable for the area will possess the great advantages of cheap power in ample supply of water and proximity to cotton and groundnut fruits and there are also factory sites in the vicinity of the railway and the river Cauvery.

WELLS AND TANKS

So far we have dealt only with the great irrigation schemes. They are essentially exotic, the products of British rule, the real eastern instrument is the well. The most recent figures give thirty per cent. of the irrigated area in India as being under wells. Moreover the well is an extremely efficient instrument of irrigation. When the cultivator has to raise every drop of water which he uses from a varying depth, he is more careful in the use of it, well water exerts at least three times as much duty as canal water. Again, owing to the cost of lifting, it is generally used for high grade crops. It is estimated that well irrigated lands produce at least one third more than canal watered lands. Although the huge areas brought under cultivation by a single canal scheme tend to reduce the disproportion between the two systems, it must be remembered that the spread of canals increases the possibilities of well irrigation by adding, through seepage, to the store of subsoil water and raising the level.

Varieties of Wells.—Wells in India are of every description. They may be just holes in the ground, sunk to subsoil level, used for a year or two and then allowed to fall into decay. These are temporary or kicha wells. Or they may be lined with timber, or with brick or stone. They vary from the kacha well costing a few rupees to the masonry well, which will run into thousands or in the sandy wastes of Pithaner where the water level is three hundred feet below the surface to still more. The means of raising the water vary in equal degree. There is the *puottah*, or weighted lever raising a bucket at the end of a pivoted pole, just as is done on the banks of the Nile. This is rarely used for lifts beyond fifteen feet. For greater lifts bullock power is invariably used. This is generally harnessed to the *mot* or leather bag, which is passed over a pulley overhanging the well, then raised by bullocks who walk down a ramp of a length approximating to the depth of the well. Sometimes the *mot* is just a leather bag more often it is a self-acting arrangement which discharges the water into a sump automatically on reaching the surface. By this means from thirty to forty gallons of water are raised at a time, and in its simplicity, and the ease with which the apparatus can be constructed and repaired by village labour the *mot* is unsurpassed in efficiency. There is also the Persian wheel, an endless chain of earthenware

pots running round a wheel. Recently attempts have been made, particularly in Madras, to substitute mechanical power, furnished by oil engines, for the bullock. This has been found economical where the water supply is sufficiently large, especially where two or three wells can be linked. Government have systematically encouraged well irrigation by advancing funds for the purpose and exempting well watered land from extra assessment due to improvement. These advances, termed *tabari*, are freely made to approved applicants the general rate of interest being 6½ per cent. In Madras and Bombay ryots who construct wells, or other works of agricultural improvement, are exempt from enhanced assessment on that account. In other provinces the exemption lasts for specific periods, the term generally being long enough to recoup the owner the capital sunk.

Tanks.—Next to the well, the indigenous instrument of irrigation is the tank. The village or the roadside tank is one of the most conspicuous features in the Indian scene. The Indian tank may be any size. It may vary from a great work like Lakes Fife and Whiting in the Bombay Presidency or the Periyar Lake in Travancore, holding up from four to seven billion cubic feet of water, and spreading their waters through great chains of canal, to the little village tank irrigating ten acres. They date back to a very early stage in Indian civilisation. Some of these works in Madras are of great size, holding from three to four billion cubic feet with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still irrigate from two to four thousand acres are said to be over 1,100 years old. Tank irrigation is practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces including Burma and finds its highest development in Madras. In the ryotwari tracts of Bombay and Madras all but the smallest tanks are controlled by Government. In the zamindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight million acres, but in many cases the supply is extremely precarious. So far from tanks being a refuge in famine they are often quite useless inasmuch as the rainfall does not suffice to fill them and they remain dry throughout the season.

Meteorology.

The meteorology of India like that of other countries is largely a result of its geographical position. The great land area of Asia to the northward and the enormous sea expanse of the Indian Ocean to the southward are determining factors in settling its principal meteorological features. When the Northern Hemisphere is turned away from the sun in the northern winter, Central Asia becomes an area of intense cold. The meteorological conditions of the temperate zone are pushed southward and we have over the northern provinces of India the westerly winds and eastward moving cyclonic storms of temperate regions, while, when the Northern Hemisphere is turned towards the sun, Southern Asia becomes a superheated region drawing towards it an immense current of air which carries with it the enormous volume of water vapour which it has picked up in the course of its long passage over the wide expanse of the Indian Ocean so that at one season of the year parts of India are deluged with rain and at another persistent dry weather prevails.

Monsoons—The all important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, dry, fine weather, clear skies, low humidity and little air movement are the characteristic features of this season. The summer rains cease in the provinces of the North West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather conditions extend slowly eastward and southward so that by the end of October they embrace all parts of the country except the southern half of the Peninsula and by the end of the year have extended to the whole of the Indian land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are—Westerly winds of the temperate zone over the extreme north of India, to the south of these the north east winds of the winter monsoon or perhaps more properly the north east Trades and a gradually extending area of fine weather which, as the season progresses, finally embraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period, viz the Madras coast and the north west of India. In the former region the north east winds which set in over the Bay of Bengal in October coalesce with the damp winds of the retreating summer monsoon which current curves round over the Bay of Bengal, and blowing directly on to the Madras coast gives to that region the wettest and most disturbed weather of the whole year for while the total rainfall for the four months June to September is the summer monsoon, at the Madras Observatory amounts to 15.46 inches the total

rainfall for the three months October to December amounts to 31.78 inches. The other region in which the weather is unsettled during this period of generally settled conditions, is North west India. This region during January February and part of March is traversed by a succession of shallow storms from the westward. The number and character of these storms vary very largely from year to year and in some years no storms at all are recorded. In normal years, however, in Northern India periods of fine weather alternate with periods of disturbed weather (occurring during the passage of these storms) and light to moderate and even heavy rain occurs. In the case of Peshawar the total rainfall for the four months December to March, amounts to 57.5 inches while the total fall for the four months, June to September, is 4.85 inches, showing that the rainfall of the winter is, absolutely, greater in this region than that of the summer monsoon. These two periods of subsidiary rains are of the greatest economic importance. The fall in Madras is, as shown above of considerable actual amount while that of North west India though small in absolute amount is of the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months—March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period there occurs a steady transference northward of the area of greatest heat. In March the maximum temperatures, slightly exceeding 100° occur in the Deccan, in April the area of maximum temperature between 100° and 105° lies over the south of the Central Provinces and Gujarat, in May maximum temperatures, varying between 105° and 110° , prevail over the greater part of the interior of the country while in June the highest mean maximum temperatures, exceeding 110° occur in the Indus Valley near Jacobabad. Temperatures exceeding 120° have been recorded over a wide area including Sind, Rajputana, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 127° registered at Jacobabad on June 12th, 1919. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India including the disappearance of the north east winds of the winter monsoon, and the air circulation over India and its adjacent seas becomes a local circulation, characterised by strong hot winds down the river valleys of Northern India and increasing land and sea winds in the coast regions. These land and sea winds as they become stronger and more extensive initiate large contrasts of temperature and humidity which result in the production of violent local storms. These take the forms of dust storms in the dry plains of Northern India and of thunder and hailstorms in regions where there

is inter-action between damp sea winds and dry winds from the interior. These storms are frequently accompanied with winds of excessive force, heavy hail and torrential rain and are on that account very destructive being known as "Nor'westers" in Bengal.

By the time the area of greatest heat has been established over North west India, in the last week of May or first of June, India has become the seat of low barometric pressures relatively to the adjacent seas and the whole character of the weather changes. During the hot weather period, discussed above the winds and weather are mainly determined by local conditions. Between the Equator and Lat 30° or 35° south the wind circulation is that of the south east trades, that is to say from about Lat 30° 35° south a wind from south east blows over the surface of the sea up to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, i.e., between the Equator and Lat 20° to 25° North there exists a light unsteady circulation the remains of the north east trades, that is to say about Lat 20° North there is a north east wind which blows southward till it reaches the thermal equator where side by side with the south east trades mentioned above the air rises into the upper strata of the atmosphere. Still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment of the south west monsoon period. The sun at this time is progressing slowly northward towards the northern Tropic. Hence the thermal equator is also progressing northward and with it the area of ascent of the south east trades circulation. Thus the south east trade winds cross the equator and advance further and further northward as the thermal equator and area of ascent follows the sun in its northern progress. At the same time the temperature over India increases rapidly and barometric pressure diminishes, owing to the air rising and being transferred to neighbouring cooler regions—more especially the sea area. Thus we have the southern Trades circulation extending northward and the local land and sea circulation extending southward until about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up the immense circulation of the South east Trades with its cool, moisture laden winds rushes forward, becomes linked on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions—the **south west monsoon** proper. This is the most important season of the year as upon it depends the prosperity of at least five sixths of the people of India.

When this current is fully established a continuous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat 30° S to Lat 30° N the southern

half being the south east trades and the northern half the south west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporation is constantly in progress so that where the current enters the Indian seas and flows over the Indian land it is highly charged with aqueous vapours.

The current enters the Indian seas quite at the commencement of June and in the course of the succeeding two weeks spreads over the Arabian Sea and Bay of Bengal up to their extreme northern limits. It advances over India from these two seas. The Arabian Sea current blows on to the west coast and sweeping over the Western Ghats prevails more or less exclusively over the Peninsula, Central India, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion curves to south at the head of the Bay and over Bengal and then meeting with the barrier of the Himalayas curves still further and blows as a south easterly and easterly wind right up the Gangetic plain. The south west monsoon continues for three and a half to four months, viz, from the beginning of June to the middle or end of September. During its prevalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current blows directly on to the west coast districts. Here it meets an almost continuous hill range is forced into ascent and gives heavy rain alike to the coast districts and to the hilly range, the total averaging about 100 inches most of which falls in four months. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current. The northern portion of the current blowing across the Gujarat, Kathiawar and Sind coasts gives a certain amount of rain to the coast districts and frequent showers to the Aravalli Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab Eastern Rajputana and the North west Himalayas. In this region the current meets and mixes with the monsoon current from the Bay.

The monsoon current over the southern half of the Bay of Bengal blows from south west and is thus directed towards the Ienasserim hills and up the valley of the Irrawady to which it gives very heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low lying districts of East Bengal and immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives excessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advance

from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kashmir

To the south of this easterly wind of the Bay current and to the north of the westerly wind of the Arabian Sea current there exists a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Chota Nagpur to Orissa, where neither current of the monsoon prevails. In this area the rainfall is uncertain and would probably be light but that the storms from the Bay of Bengal exhibit a marked tendency to advance along this track and to give it heavy falls of occasional rain

The total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast the amount diminishes eastward is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras. It is over 100 inches on the Tenasserim and South Burma coast and decreases to 20 inches in Upper Burma. It is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The month to month distribution for the whole of India is —

May	31 inches
June	79 ,
July	112 ,
August	103 ,
September	70 ,
October	33 ,

Cyclonic storms and cyclones are an almost invariable feature of the monsoon period. In the Arabian Sea they ordinarily form at the commencement and end of the season, viz., May and November, but in the Bay they form a constantly recurring feature of the monsoon season. The following gives the total number

of storms recorded during the period 1877 to 1901 and shows the monthly distribution —

	Jan	Feb	Mar	Apr	May	June
Bay of Bengal			1	4	13	28
	July	Aug	Sep	Oct	Nov	Dec
Bay of Bengal	41	36	45	34	22	8
	Jan	Feb	Mar	Apr	May	June
Arabian Sea				2	15	
	July	Aug	Sep	Oct	Nov	Dec
Arabian Sea	2		1	1	5	

The preceding paragraphs give an account of the normal procession of the seasons throughout India during the year but it must be remembered, that every year produces variations from the normal and that in some years these variations are very large. This is more particularly the case with the discontinuous element rainfall. The most important variations in this element which may occur are —

- (1) Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North west India
- (2) A prolonged break in July or August or both
- (3) Early termination of the rains, which may occur in any part of the country
- (4) The termination throughout the monsoon period of more rain than usual to one part and less than usual to another part of the country. Examples of this occur every year

About the middle of September fine and fresh weather begins to appear in the extreme north west of India. This area of fine weather and dry winds extends eastward and southward the area of rainy weather at the same time contracting till by the end of October the rainy area has retreated to Madras and the south of the Peninsula and by the end of December has disappeared from the Indian region, fine clear weather prevailing throughout. This procession with the numerous variations and modifications which are inseparable from meteorological conditions repeats itself year after year

INDIA METEOROLOGICAL DEPARTMENT

Functions of the Department—The India Meteorological Department was instituted in 1875 to combine and extend the work of various provincial meteorological services which had sprung up before that date. The various duties which were imposed on the Department at the time of its formation were from time to time supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed may be briefly summarised as follows—

(a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms

(b) The issue of storm warnings by wireless to ships in the Indian seas and the making of arrangements for the collection of meteorological data from ships

(c) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease

(d) The issue to the public of up-to-date weather reports and of rainfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India

(e) Meteorological researches of a general character but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall

(f) The issue of seasonal rainfall forecasts

(g) The issue of telegraphic warnings of heavy rainfall by special telegrams to district officers on departmental warning lists (e.g., canal and railway engineers) and by means of the ordinary daily weather telegram to the public in general

(h) Supply of meteorological astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals

(i) Technical supervision of rainfall registration carried out under the control of provincial Government authorities

(j) The study of temperature and moisture conditions in the upper air by means of instrument-carrying balloons and of upper winds by pilot balloons

(k) The issue of weather reports and warnings to aircraft, civil and military, the latter being in collaboration with the Royal Air Force

(l) The training and examination in meteorology of candidates for air pilots' licenses

(m) Study of meteorology in relation to agriculture a subject on which the Royal Commission on Agriculture in India made recommendations

In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as—

(n) Determination of time in India and the issue of time signals also the determination of errors of chronometers for the Royal Indian Navy

(o) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona

(p) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal

(q) Maintenance of seismicological instruments at various centres

ORGANISATION

It is necessary to note that practical meteorology implies a meteorological organisation not merely individual meteorologists relying upon their own personal and purely local observations. The making of a single forecast in any of the larger meteorological offices of the world requires the co-operation of some hundreds of persons. In India some 400 observers co-operate daily to take simultaneous observations at about 300 separate places and hand in their reports to telegraphists who transmit them to forecast centres, where for rapid assimilation clerks decode them and chart them on maps. Meteorological experts then draw therefrom the conclusions on which their forecasts are based. There are other observatories which take observations for climatological purposes but do not telegraph them.

An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Telecommunication Convention.

While the above is true in general of all applications of practical meteorology its application to aviation involves the existence of a specialised and particularly designed organisation. Aviators require detailed information about the weather, they wish to know winds at different levels have information about visibility fogs dust storms, thunderstorms height of low clouds etc. along with forecasts of changes in these elements. Many of these are local short lived and rapidly changing phenomena.

Definite recommendations regarding the nature of information to be supplied to aircraft, the exhibition of current weather information at aerodromes and the meteorological organisation of international airways have been embodied in Annex G of the International Convention of Air Navigation. In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and forecasts of weather conditions along the

routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main aerodrome along aerial routes and forecasts prepared at such centres should be transmitted to the other aerodromes for the information of pilots. Other recommendations refer to hours and kind of observations and manner of codifying them.

In Europe practically all observatories record and telegraph readings at least thrice daily, while stations near air routes do so every three hours. In the United States of America readings are made at least twice daily at all observatories, every three hours at most observatories near air routes and every hour at observatories along air routes. In addition, every aerodrome receives by telewriter frequent regular reports from certain stations along the air routes a few of these at half hourly and most at hourly intervals in order that the aviators may be supplied with current up to date information of actual weather on the air route itself. In India* the meteorological service for aviation is for financial reasons not able to attain the minimum recommended in annexe G of the International Convention. The network of observatories in India is much sparser than that in Europe and America and the frequency of observations taken at each of them much smaller. The four thousand mile air route between Bahrain and Victoria Point is served by two forecasting centres at Karachi and Calcutta which prepare two synoptic charts a day based on observations taken twice daily at observatories reporting to them. The sole forecasting centre in Southern India is at Poona where facilities are available for the issue of one forecast daily. The opening of a chain wireless stations along the main trans India air route has enabled special meteorological facilities to be made available to airmen flying along that route. A system of exchange of current weather reports at specified hours between stations on the route and of voluntary reports of warning of adverse weather has been introduced with the co operation of the Director of Wireless and the Director of Civil Aviation making it possible for each wireless station to have in a collected form the information regarding the actual weather at neighbouring stations on the air route for supply to fliers. Stations taking part in the scheme are Karachi, Jodhpur, Delhi, Allahabad, Calcutta, Chittagong, Akyab, Sandoway, Bassem, Rangoon and Victoria Point. Apart from routine observations at stated times, airmen can obtain information of current local weather at any time by wireless by special requisition. Further the transmission along the wireless chain twice daily, of the latest weather forecasts and upper wind and low cloud information for each part of the air route has been arranged. This enables the latest weather reports to be available to air craft in flight as well as at the principal aerodromes on the route where they are displayed suitably on weather notice boards.

For the Karachi Madras service arrangements exist for communicating current weather in

formation to aerodromes from a few observatories on the route to supplement the information available in the reports supplied by the forecasting centres.

In order to fulfil the various duties described above, the organisation of the department is made up of a central office, 7 sub offices, 36 pilot balloon observatories and 328 weather observatories of various classes to distribute over a region stretching from Persia, Aden, Zanzibar on the west to Burma on the east. The central office at Poona is the administrative headquarters of the department. The control over weather observatories including the responsibility for scrutiny of records and for checking and computation of data received from them is divided between the offices at Poona, Calcutta and Karachi. Forecasting for aviation is divided between these three offices and two offices at Peshawar and Quetta, the last two forecast for military flying and do not serve civil aviation. Storm warning for shipping in the Bay of Bengal is carried on by the Meteorological Officer at Calcutta while similar duties in respect of the Arabian Sea are undertaken at Poona. The Upper Air Observatory, Agra, is in administrative charge of all the pilot balloon observatories in India, Burma and the Persian Gulf. The Bombay and Allahabad observatories specialise in the study of Geophysics particularly terrestrial magnetism and seismology while the observatory at Kodakanal specialises in the study of the solar physics. The next section describes in somewhat greater detail, the general duties of the offices mentioned above.

GENERAL DUTIES OF THE MAIN OBSERVATORIES AND OFFICES

(a) **Headquarters Office, Poona (F U W I)**—The general administration of the department is carried on by the Headquarters Office in Poona. In addition it is in immediate and complete charge of all second, third, fourth and fifth class weather observatories in Kashmir, Gujarat, Central India, the Central Provinces and the Peninsula and is responsible for the scrutiny of records and checking and computation of data received from them. It receives telegraphic reports of morning observations collected at practically all pilot balloon and first, second, third and fifth class observatories in India and issues daily a telegraphic summary of general weather conditions with forecasts of probable changes in weather during the next 24 hours for the whole country. It undertakes the issue of heavy rainfall warnings for practically the whole country except north-east India and the issue of warnings for storms in the Arabian Sea. Its duties on behalf of aviation consist in the issue of weather reports to airmen on routes in central and southern India for the Karachi Madras air service. It issues forecasts for the major section viz., Ahmedabad to Madras. This office prepares and publishes the Daily, Weekly and Monthly Weather Reports and an Annual Volume entitled the India Weather Review and issues two annual volumes containing rainfall data of about 3,000 stations in India. In collaboration with the Agra Observatory, it

* Fuller details of the aviation organisation are contained in the departmental pamphlet entitled 'Meteorological Organisation for Airmen'.

also publishes an annual volume containing all upper air data collected in India. It is responsible for the preparation of normals of rainfall, temperature, humidity, etc., for all observatories in India. It issues long range seasonal rainfall forecasts for the country. It collects and examines weather logs from ships in the Arabian Sea. It supplies all weather observatories with instruments and stores from the stock, which it maintains. It is also responsible for the design, specification test and repair of all meteorological instruments. On its transfer from Simla to Poona the Headquarters Office was equipped as an upper air observatory and a first class weather observatory. It also has facilities for research in theoretical and practical meteorology. It is now one of the two main centres for the conduct of upper air research in India, sounding balloon work directed from there has been largely responsible for our present extension of knowledge of the free atmosphere over the Peninsula. Publications of meteorological research in the Department are edited and issued from Poona. This office also collects and compiles, for the International Commission the upper air data collected over India, Ceylon, Siam, Indo China, Malaya, the Dutch East Indies, Somaliland and British East Africa.

A branch for agricultural meteorology has been sanctioned temporarily and is financed by the Imperial Council of Agricultural Research. Its statistical investigations include a critical enquiry into the available data on the area and yield of crops for the various presidencies and districts in India and after careful selection, the correlation of some of them with the accumulated meteorological data. On the experimental side, it aims to study microclimatology, evolve suitable instruments for such work, standardize methods of observations and in general undertake a detailed study of the air layer near the ground.

(b) **Meteorological Office and Observatory, Alipore, Calcutta (F P W¹ S T)**—The Alipore Office serves as a regional forecast centre and is responsible for the publication of the Calcutta Daily Weather Report for storm warning in the Bay of Bengal and for heavy rainfall warning in north east India. It issues weather reports to airmen on routes lying in Burma, Assam, Bengal, Bihar and Orissa and the east United Provinces, on the trans India route, its responsibility extends over the section Allahabad to Victoria Point. To meet the needs of aviation, an afternoon chart is prepared in addition to the long established morning chart, the area of the latter being extended to meet the new needs. It has charge of all second, third, fourth and fifth class observatories, in the area comprising Burma and the Bay Islands, Assam, Bengal, Bihar and Orissa and the east United Provinces including the checking and computation of data therefrom. It also supplies time signals by time ball to Fort William, by wireless to shipping at sea and by telegraphic signal throughout the Indian telegraph and railway

systems. It is also a first class weather observatory, pilot balloon observatory and seismological station.

(c) **Karachi (F W¹ P A)**—This office was established primarily as a forecasting centre for aviation. It now issues weather reports for airmen on routes lying along the Persian Gulf and Mekran coasts and in Sind, Rajputana, the Punjab, west United Provinces and north Gujarat. On the empire and international air route across India its responsibility extends over the section between Bushire or Bahrain on the west and Allahabad on the east.

The forecasting office is temporarily located in Karachi Cantonment and will be transferred to Drigh Road Civil Aerodrome when buildings are provided there. Meanwhile, a first class weather observatory and pilot balloon station have been started at Drigh Road.

The Karachi Office administers all second, third, fourth and fifth class observatories in Persia and Arabia, Baluchistan, the North West Frontier Province, the Punjab, Sind, Rajputana and the west United Provinces. As the basis of the weather reports and forecasts issued to aviators, it prepares two weather charts daily, drawn up mainly from observations received from the observatories under its own control. A daily weather report is also being published, as an experimental measure.

(d) **Upper Air Observatory, Agra (U W¹ S)**—Agra Observatory is the headquarters of all pilot balloon work in India. It is responsible for the maintenance and supervision of the work of the pilot balloon observatories in India, Burma and the Persian Gulf and supplies them with the equipment necessary to carry on their daily observations, these duties have necessitated the provision of a hydrogen factory to make hydrogen gas and compress it into tubes, as well as the provision of a workshop for the design, manufacture and repair of instruments, principally for upper air work. All data from pilot balloon observatories are collected, checked, and statistically summarised at Agra. This observatory is also a principal centre of upper air research work in India. The sounding balloon work there (in the course of which balloons have provided information of conditions up to as great a height as 90,000 feet) has been responsible for most of our present knowledge regarding the free atmosphere over India. There is a seismological station attached to this observatory.

(e) **Colaba and Alibag Observatories (W¹ S T M)**—These observatories specialise in the study of geophysics, particularly terrestrial magnetism and seismology, and in addition carry on the duties of a first class weather observatory. The routine magnetic work at Alibag, as well as the publication of the magnetic data, is arranged in accordance with the recommendations of the International Commission

† Classified into various classes, the number as it stood on 31st March 1934 would be distributed as follows —

W¹=15, W²=166, W³=86, W⁴=22, W⁵=24 and W⁶=15

for Terrestrial Magnetism. The observatories take star or sun observations for the determination of time, and the Colaba Observatory is responsible for the time ball service at the Bombay Harbour and the rating of chronometers belonging to the Royal Indian Navy. In recent years researches on atmospheric electricity and microseisms in relation to major weather phenomena over the sea have also been undertaken there.

(f) **Kodaikanal (Sp W¹ S)**—The observatory at Kodaikanal specializes in the study of the physics of the sun and is specially equipped for spectroscopic observations and research. The routine work is decided in accordance with the recommendations of the International Astronomical Union which prevent any serious overlapping of work in the comparatively few solar physics observatories in the world. This observatory also undertakes the duties of a first class weather observatory and a seismological station.

(g) **Quetta and Peshawar (F W¹ P A)** Aviation on a regular basis was first started in this country by the Royal Air Force in north west India, and the need to arrange for local forecasting was first experienced there. Two forecast centres were accordingly started in 1925 at Quetta and Peshawar each under an R A F Meteorologist who was entrusted with the charge of issuing forecasts of weather over the Lahore Peshawar Quetta-Karachi air routes for R A F aeroplanes and detailed local forecasts and warnings each for his own immediate neighbourhood. Route forecast for the Royal Air Force flying over the Punjab, Waziristan North West Frontier Province Baluchistan and Sind are issued by these offices. The Meteorological Department has been exercising full technical control over the work of the two offices, supplying instruments, meeting the cost of the staff of clerks and observers at each centre and supplying data by telegram from its observatories. An officer seconded from the Indian Meteorological Service but paid by the Royal Air Force is now holding the post of the Meteorologist at Quetta, the office at Peshawar is in charge of a Royal Air Force officer who is under the technical, not administrative control of the Meteorological Department.

7 The auxiliary centres are situated at Rangoon, Akyab, Dum Dum*, Allahabad, Jodhpur and Drigh Road. The professional or Meteorological Assistant stationed at these centres is authorised to add to the weather report received from the forecasting centres his own conclusions about the local weather situation. The latest information available regarding the local surface conditions and upper winds can also be obtained from him.

Meteorological Office, Poona—Dr C W B Normand, M A, D Sc (Edin), Director General of Observatories.

Meteorologists—Dr S K Banerji, M Sc, (Calcutta), Mr V V Sohoni B A M Sc, (Bombay) (on leave), Dr K R Ramanathan, (Hons) B Sc (Bombay) M Sc, and Ph D (Lond), Mr S Basu, M Sc (Allahabad), Mr J M Sil, B A (Calcutta), B Sc (Eng) (Boston Tech), Dr S R Savur, M A (Madras) Ph D (London), and Mr A A K Roy, B Sc (Cal), B A (Oxon), M A D Sc (Madras), Dr K J Kabraji B A

Assistant Meteorologists—Mr V D Iyer, B A (Madras), Mr Barkat Ali, B A, M Sc (Punjab), Mr B N Screenivasalah M Sc (Calcutta), Dr K Das, M Sc (Punjab), Ph D (Lond), Mr S S Lal M Sc (Lucknow & Lond), D IC and Mr U N Ghosh M Sc (Ogg).

Agricultural Meteorologist—Dr L A Ramdas M A, Ph D (Calcutta).

Agricultural Assistant Meteorologist—Dr R J Kalamkar, B Ag, B Sc (Nagpur), Ph D (London).

Upper Air Observatory, Agra—Mr G Chatterji M Sc (Calcutta), Meteorologist in charge, Dr N K Sur, D Sc (Allahabad) Meteorologist Mr S I Malurkar B Sc (Mys), M Sc (Canthib) Assistant Meteorologist Mr S P Vinkateshwaran B A (Hons) (Madras) and Dr A K Das M Sc (Cal), D Sc (Paris), Assistant Meteorologist.

Meteorological Office, Alipore, Calcutta—Dr S N Sen, M Sc (Cal and Lond), Ph D (Lond) Meteorologist Mr B K Roy M Sc (Calcutta) Assistant Meteorologist Mr S K Das M Sc (Dacca and Lond), D IC (Lond), P R Mt Sc Sc (Lond), Assistant Meteorologist and Mr C Ramaswamy, M A (Hons) (Madras) Assistant Meteorologist.

Meteorological Office, Karachi—Dr S K Pramanik M Sc (Lucknow), Ph D (Lond), D IC Meteorologist Dr B N Desai, M Sc (Bombay) Ph D (Edin), B A, IL B (Bombay) Assistant Meteorologist and Dr S Mal M Sc (Benares), Ph D (Lond) D IC Assistant Meteorologist.

Meteorological Office, Bombay—Dr S C Roy M Sc (Calcutta), D Sc (Lond), Meteorologist.

Solar Physics Observatory, Kodaikanal—Dr T Royds, D Sc (London) Director and Dr A L Narayan, M A D Sc (Madras) Meteorologist.

Meteorological Office, R A F, Peshawar—Mr L H Starr, Meteorological Officer.

Meteorological Office, R A F, Quetta—Mr P R Krishna Rao B Sc (Mysore) (Ogg).

* At present the functions of this centre are being carried on by the Meteorological Office at Calcutta, for want of proper building accommodation at Dum Dum.

MONSOON OF 1936

There were no pronounced breaks in the monsoon but the precipitation of the period June to September, was unevenly distributed, there being several spells of heavy rain in the Gangetic plain, giving rise to serious floods, and scanty rains in the Deccan and Gujarat. Averaged over the plains of India the season's rainfall was in excess by 4 per cent.

June—The Arabian Sea branch of the monsoon was established in Malabar on the 20th May. It advanced northwards as a rather weak and shallow current but strengthened somewhat along the west coast early in the month, and also entered the Peninsula temporarily. Early in the third week of June it again strengthened on the west coast and remained fairly vigorous over the Peninsula during the last ten days of the month. Under the influence of a storm which formed in the north Bay on the 11th the Bay monsoon extended into the central parts of the country, Gujarat and temporarily to the United Provinces. A strengthening of the monsoon current towards the end of the third week led to the establishment of the monsoon in the United Provinces and its extension into north west India. A depression formed on the 26th near the Sandheads and strengthened the monsoon from the Konkan to Orissa, while another depression which appeared over the Central Provinces on the 28th and travelled westwards strengthened it generally in north west India and caused its extension into Sind. Severe floods were reported from Assam, the Central Provinces and the United Provinces causing damage to life and property.

July—The monsoon was active in north east India, the United Provinces, the east and north Punjab and in and around the Central Provinces. This activity was mainly due to (1) two depressions which passed inland from the Bay of Bengal on the 3rd and 23rd of the month, (2) two land depressions which appeared near Lucknow on the 7th and 27th and (3) a low pressure wave which passed inland from the north west angle of the Bay on the 18th. In particular the two Lucknow depressions were responsible for heavy rain in the United Provinces as a result of which severe floods occurred in the Ramganga, Gomti, Ipti and Gogra rivers and caused considerable damage to a number of villages and towns.

August—During the first five days of the month the monsoon was strong in and around the Central Provinces and caused widespread and locally heavy rain there. The following were the chief features of the weather during the next three weeks: (1) The marked activity of the seasonal trough of low pressure over the Gangetic plain between the 5th and 10th resulting in strong monsoon in the United Provinces and north east India, with very heavy rain in the east United Provinces leading to serious floods there once again. (2) Two depressions, which formed in the Bay of Bengal off the Orissa coast,

on the 16th and the 24th respectively crossed the Orissa coast. Both filled up over the Central Provinces, the first on the 18th August and the second on the 1st September. These gave abundant rainfall over the Central Provinces and Orissa. The first of these also strengthened the monsoon over the Peninsula as a whole, while the second caused a spell of strong monsoon over the north Madras coast and north Hyderabad. But for these two spells and another along the west coast and the north Deccan during the first week the monsoon was generally weak over the Peninsula during the month. The Bay branch of the monsoon was fairly active in lower Burma. There were spells of strong monsoon in north west India, particularly along and near the western Himalayas, between the 3rd and the 5th, the 10th and the 12th and the 17th and the 22nd.

September—The monsoon was strong from Bengal to the east Punjab and in and around the west Central Provinces on the first two days. After the 3rd, it weakened in Bengal and Assam but continued to be active from Chota Nagpur to the west United Provinces, and in the Central Provinces till the 5th. In association with a depression which formed in the north Bay of Bengal off the Orissa coast on the 5th, travelled across the central parts of the country and merged into the seasonal low over north west India after four days, the monsoon was strong in Orissa, the Central Provinces, Gujarat and north west India generally. It continued to be active over northern and central India till the 12th after which its activity was confined to north east India.

The Arabian Sea monsoon was generally weak over the Peninsula during the first half of the month while the Bay branch was active during the first week in Burma and weakened thereafter. By the middle of the 3rd week the transition type of weather began to set in and thunderstorm activity commenced in the Peninsula and north-east India. This activity increased in the Peninsula after the 23rd and in consequence part of the Deccan partially made up its deficiency of rains during the monsoon proper.

October—Two severe cyclonic storms formed in the Bay of Bengal, one in the first week and the other in the fourth week. The former which developed in the central Bay and crossed the Orissa coast received via Chota Nagpur to east Bengal. It caused widespread and locally heavy rain in Burma and north east India including Orissa. The second formed in the south Bay and crossed the Circars coast causing widespread and locally heavy rain along the east Madras and Orissa coast and in the Central Provinces. The north east monsoon set in over the Bay of Bengal early in the third week of the month and was established towards the middle of that week. A western disturbance passed across north west India but the associated rainfall was scanty.

The total rainfall for the season—June to September—averaged over the plains of India was 38.2 inches, 4 per cent in excess of the normal. The following table gives detailed information of the seasonal rainfall of the period

DIVISIONS	RAINFALL, JUNE TO SEPTEMBER, 1936

Famine.

To the student of Indian administration nothing is more remarkable than the manner in which great problems arise, produce a corresponding outburst of official activity to meet them and then fall into the background. This general truth is illustrated by a study of the history of famine in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry. Nearly three quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence. Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a region of erratic and uncertain rainfall. The rainy season is short and if for any natural reason there is a weakness, or absence, of the rain bearing currents then there is either a poor harvest or no harvest at all. In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade of grass. In the old days there were no rail ways to distribute the surplus of one part of India to the districts where the crop had failed. There were often no roads. The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. The people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died. Commencing with the Orissa famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises. After the famine of 1899-1900 this responsibility was also shouldered by the Indian States. Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relief covering the whole field. But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of India is covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas much less dependent on the monsoon rainfall. At the same time the scientific study of the problems of Indian agriculture has raised the capacity of even the dry zones. The peasantry has accumulated a certain reserve against the rainless days from the prosperity which accompanied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit. The spread of manufacturing enterprise has

lightened the pressure on the soil. The relation of famine to the question of Indian administration has therefore changed. In an exceptionally bad year it may create administrative difficulties. It has ceased to be an administrative and social problem.

Famine under Native Rule

Famines were frequent under Native rule and frightful when they came. "In 1630," says Sir William Hunter, in the History of British India, "a calamity fell upon Gujarat which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants." In 1631 a Dutch merchant reported that only eleven of the 60 families at Swally survived. He found the road thence to Surat covered with bodies decaying, on the highway where they died, there being none to bury them. In Surat that great and crowded city, he could hardly see any living persons but the corpses at the corner of the streets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone. Pestilence followed famine." For other historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India. It has come to be seen that whilst railways have checked the old fashioned practice of storing grain in the villages they have made the reserves, where they exist, available for the whole of India. In India there is now no such thing as a food famine, the country always produces enough food for the whole of the population, famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved.

History of Recent Famines

The Orissa famine of 1865-67 may be taken as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was a little slow in appreciating the need for action but later food was poured into the district in prodigious quantities. Thirty five million units were relieved (a unit is one person supported for one day) at a cost of 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the population, died in Orissa alone. This was followed by the Madras famine of 1866, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900. It is estimated that out of a total population of a million and a half in Marwar, one million emigrated. There was famine in Bihar in 1873-74, then came the great

South Indian Famine of 1876-78. This affected Madras, Mysore, Hyderabad and Bombay for two years and in the second year extended to parts of the Central and United Provinces and to a small tract in the Punjab. The total area affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5,250,000 in British territory alone. Through out British India 700,000,000 units were relieved at a cost of Rs 8½ crores. Charitable contributions from Great Britain and the Colonies aggregated Rs 84 lakhs.

The Famine Codes

The experiences of this famine showed the necessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the famine relief system to-day. They recommended (1) that employment should be given on the relief works to the able-bodied, at a wage sufficient for support, on the condition of performing a suitable task, and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. They recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the crop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst the duty of Government is to save life, it is not bound to maintain the labouring population at its normal level of comfort. Provincial codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4,000,000 at the time of greatest distress. The cost of famine relief was Rs 7½ crores, revenue was remitted to the extent of Rs 1½ crore, and loans given aggregating Rs 1½ crore. The charitable relief fund amounted to about Rs 1½ crore, of which Rs 1½ crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, comparable with it in severity, and that the expense was moderate. But before the Local Governments had been given time to digest the proposals of this Commission or the people to recover from the shock, the great famine of 1899-1900 supervened.

The Famine of 1899-1900

This famine affected 475,000 square miles with population of 59,500,000. In the Central

Provinces, Berar, Bombay, Ajmer, and the Kussar district of the Punjab famine was acute. It was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar. It was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mean. In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune were affected. The people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late to save life. A very large area in the Indian States was affected and the Marwaris swept from their impoverished land right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief and the total cost was estimated at Rs 15 crores. The famine was also marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs 3½ crores, the Indian States did a great deal to bring their administration into line with that in British India. Although actual deaths from starvation were insignificant the extensive outbreaks of cholera and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this famine were collated by the Commission presided over by Sir Antony MacDonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the necessity of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans, the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance and a full enlistment of non-official help. The wage scale was revised, the minimum wage was abolished in the case of able-bodied workers, payments by results were recommended, and proposals were made for saving cattle.

The Modern System

The Government of India are now in possession of complete machinery to combat the effects of drought. In ordinary times Government is kept informed of the meteorological

conditions and the state of the crops programmes of suitable relief works are kept up-to-date, the country is mapped into relief circles reserves of tools and plant are stocked If the rains fail, policy is at once declared, non officials are enlisted, revenue suspended and loans for agricultural purposes made. Test works are then opened, and if labour in considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and gratuitous relief given to the infirm. On the advent of the rains the people are moved from the large works to small works near their villages, liberal advances are made to agriculturists for the purchase of plough, cattle and seed. When the principal autumn crop is ripe the few remaining works are gradually closed and gratuitous relief ceases. All this time the medical staff is kept in readiness to deal with cholera which so often accompanies famine, and malaria, which generally supervenes when the rains break.

Famine Protection

Side by side with the perfection of the machinery for the relief of famine has gone the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are railways and irrigation. These are of two classes productive and protective. Productive works being estimated to yield profits which will pay interest and sinking fund charges are met from loans, protective works, which do not pay directly from revenue. In order to guarantee that there should be continuous progress with protective works, the Famine Insurance Grant was instituted in 1876. It was decided to set apart from the general revenues Rs 1½ crores annually or one million sterling. The first charge on this grant is famine relief, the second protective works, the third the avoidance of debt. The chain of protective railways is now practically complete. Great progress is being made with protective irrigation. Acting on the advice of the Irrigation Commission an elaborate programme of protective irrigation works has been constructed, particularly in the Bombay Deccan—the most famine-susceptible district in India—and in the Central Provinces.

Under the Statutory Rules framed under the Government of India Act of 1919, Provincial Governments (except Burma and Assam) are required to contribute from their resources a fixed sum every year for expenditure on famine. These annual assignments can be expended on relief of famine only, the sum not required for this purpose is utilised in building up a Famine Relief Fund. The Fund provides, as its main and primary object, for expenditure on Famine Relief proper, the word "Famine" being held to cover famine due to drought or other natural calamities. The balance at the credit of the Fund is regarded as invested with the Governor General in Council and is available for expenditure on famine, when necessary and, under certain restrictions on protective and other works for relief of famine.

The Outlook

Such in brief is the official programme and organisation which has been built up out of the experience and practice of the past. Yet everything goes to show that Government activity to save human life will never be wanted in the future on the colossal scale of former times, even so recently as 1899-1900. Each succeeding failure of the rains indicates that there has been in silent progress an economic revolution in India. In the year 1918 the rains failed more seriously and over a wider area than during any monsoon in the recent history of India. The deficiency in the rainfall was more marked than in the great famine of 1899. Yet such was the increased resisting power of the people that instead of a demand for State relief from over five millions, the maximum number at any time in receipt of public assistance was never so large as six hundred thousand. The shock to the social life of the community was insignificant, the effects of the drought completely disappeared with the good rains of the following year.

Increased Resisting Power

The causes of this economic change in the conditions of India whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rains failed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he jirds up his loins and goes in search of employment in one of the industrial centres, where the supply of labour is, when general economic conditions are normal, rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often misnamed a hoard, the balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, represent small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one third of the land in the Punjab is now under irrigation and in other Provinces, particularly in the famine susceptible tracts of the Bombay Deccan irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by plague and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This prevented the increase of congestion, but brought some areas particularly in the Indian States, below their former population-supporting capacity. (The 1931 census showed an increase of over 30 million in the population since 1921.) The increase of railways distributes the resources of the country with ease, the spread

of the co-operative credit movement has improved rural credit. Finally, there is the considerable development of manufacturing industry which is generally short of labour and helps to absorb the surplus of a famine year. Whilst the Government is completely equipped with a famine code, there is no reason to suppose that there will ever recur such an emergency as that of 1899. Famine can now be efficiently met by the liberal distribution of tagavi, the suspension and remission of the land revenue demand, the relief of the aged and others who cannot work, the provision of cheap fodder for the cattle with possibly some assistance in transporting the affected population of the famine affected tract to the industrial centres.

The increased resisting power of the people was effectively demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1920 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Punjab and Central India. The largest number of persons on relief of all kinds did not exceed 0.45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept Government aid, and in assisting in the rehabilitation of the cultivators when the rains break. At every great famine large sums have been subscribed particularly in the United Kingdom, for this purpose and in 1899-1900 the people of the United States gave generous help. With the idea of providing a permanent famine fund the Maharaja of Jaipur gave in 1900 a sum of Rs 15 lakhs in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress.

This Trust Fund in a few years increased to Rs 28,10,000. During 1934 it increased further the invested balances of the United Provinces Famine Orphans fund being transferred to the Trust. It now stands at Rs 32,78,400. It is officially called the Indian People's Famine Trust, and was constituted under the Charitable Endowment Act 1890. The income of the Trust is administered by a board of manage-

ment consisting of 13 members appointed from different provinces and Indian States. Sir Ernest Burdon, K.C.I.R., C.S.I., I.C.S. Auditor-General in India is the Secretary & Treasurer of the Trust. The endowment of Rs 32,78,400 above mentioned is permanently invested and the principal never taken for expenditure. The income from it is utilised for relief work as necessary and unexpended balances are temporarily invested, so as to make available in years of trouble savings accumulated when expenditure is not necessary. The temporary investments—in Government Securities—at the end of 1936 stood at Rs 3,200 and the cash balance at the same time was Rs 28,09,58 so that the total available for expenditure at the commencement of 1937 was Rs 31,29,58.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Government in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practices and Government help its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the people makes them able to meet temporary periods of stress in a manner formerly unimaginable. Famine in the old terrible sense of the term has in fact ceased to occur. This was well illustrated by the events of 1919, when the land suffered from a failure of the rains more general throughout India and worse in degree than any previously recorded by the Meteorological Department but the crisis was borne with a minimum of suffering. The demands upon the Famine Trust have consequently so greatly diminished in their original sense that hardly any money is now distributed from it for the relief of famine in the proper sense of the word, resulting from rain failure and expenditure has mainly become grants of assistance to sufferers from floods. The total expenditure upon real famine in the old sense was only Rs 50,000 during the year 1929, while expenditure on relief of distress caused by floods was Rs 4,75,000 in the same year. The terms of the Trust fortunately, permit of management on lines according with modern needs.

Hydro-Electric Development.

India promises to be one of the leading countries of the world in regard to the development of hydro-electric power and great strides in this direction have already been made. India not only specially lends itself to projects of the kind, but peremptorily demands them. Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfall is only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water therefore must be stored for use during the dry season. Favourable sites for this exist in many parts in the mountainous and hilly regions where the heaviest rainfalls occur and the progress already made in utilising such opportunities by the electrical transmission of power affords high encouragement for the future. Further, hydro-electric schemes can frequently be a sociated with important irrigation projects the water being first used to drive the turbines at the generating stations, and then distributed over the fields.

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India. On this recommendation the Government of India in 1918 appointed the late Mr G. T. Barlow, C.E., then Chief Engineer, Irrigation Branch, United Provinces, to undertake the work, associating with him Mr J. W. Meares, M.I.C.E., Electrical Adviser to the Government of India. Mr Barlow died, but Mr Meares issued a preliminary report in September, 1919, summarising the state of knowledge of the problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr Meares showed that industries in India absorbed over a million horse

power, of which only some 285,000 h.p. is supplied by electricity from steam, oil or water. The water power so far actually in sight amounts to 11 million horse-power, but this excludes practically all the great rivers, which are at present uninvestigated. Thus the minimum flow of the seven great rivers eastward from the Indus is stated to be capable of giving not less than three million horse-power for every thousand feet of fall from the Himalayas while similar considerations apply to rivers in other parts. Some doubt is expressed as to the estimate of seven million horse-power in the Irrawaddy and Chindwin rivers, given in the report of the London Conjoint Board of Scientific Studies.

The Report points out that the Bombay Presidency holds a unique position owing to its great existing and projected schemes at Lonavla, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro Electric Works

The greatest Hydro Electric undertakings in India are the three schemes developed and brought into operation by Tata Sons, Ltd. and continued under their management until 1929, when they were transferred to the management of the Tata Hydro Electric Agencies, Ltd., in which Messrs Tata Sons retained a substantial interest. These undertakings are—

- | | |
|--|-----------------|
| (a) The Tata Hydro Electric Power Supply Company, Ltd. | Started in 1915 |
| (b) The Andhra Valley Electric Power Supply Company Ltd. | „ 1922 |
| (c) The Tata Power Company Ltd. | 1927 |

These Hydro Electric schemes have a combined normal capacity of 246,000 H.P. and provide electrical energy for the City of Bombay, Bombay suburbs, Jhansi, Kalyan and (rester) Poona.

Bombay, after London, is the second largest City in the British Empire and is the largest manufacturing centre in India. Its population, including suburbs at the 1931 census was 1,326,313 with a total population of approximately 1,600,000 in all of the areas served by these companies. Its cotton mills and other factories consume about 150,000 H.P. which until these Hydro Electric schemes came into operation was entirely produced by thermal stations using fuel coming from great distances.

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above sea level within a few miles of Bombay City situated on the shores of the Arabian sea with their heavy rainfalls was taken full advantage of for providing Bombay City and vicinity with an adequate and economical power supply.

The hydraulic work² of the Tata Hydro Electric Power Supply Company are situated near Lonavla at the top of the Bhor Ghats. The monsoon rainfall is stored in three lakes, namely Lonavla Walwan and Shiravta from which it is conveyed in open masonry canals to the Forebay at Khandala and thence through steel pipes to the Power House at Khopoli at the foot of the Ghats, where the head at turbine nozzles is 1,750 feet or approximately 750 lbs per sq inch. The normal capacity of the Power Station at Khopoli is 48,000 KW or 64,300 H P. This scheme was formally opened by H E The Governor of Bombay on the 8th of February 1915.

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro Electric Supply Company's lakes where an additional 48,000 KW (or 64,300 H P) could be developed. These investigations resulted in the formation of the Andhra Valley Power Supply Co and the construction of the schemes the principal features of which consist of a reservoir formed by a dam about 190 feet high across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri. The head of water at turbine nozzles is 1,750 feet or approximately 750 lbs per sq inch. The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli.

The Tata Power Company's scheme on the Nila Muli River to the South East of Bombay was investigated and developed along lines similar to the Andhra Valley scheme and has a normal installed capacity of 87,500 KW or 117,000 H P. The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Tata Hydro Electric Power Supply Co, the Andhra Valley Power Supply Co and the Tata Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co Ltd, the majority of the mills and industries in Bombay City, the B & C J Railway for their suburban electrification, the whole of the energy required by the G. I. P. Railway in Bombay City and for their main line traction up to Kalyan, the whole of the electrical energy required by the Poona Electric Supply Company and the distributing licenses in Dhana Kalyan and the Pombay suburbs.

These three schemes operating as a unit under one management provide an adequate and economical power supply in the areas mentioned above for all purposes. The rate for energy delivered to the Mills, factories and Railways has for several years shown a steady decrease and now averages £0.51 of an anna per unit, which downward trend will continue as industries develop and individual consumptions increase.

This power supply greatly enhances the natural advantages Bombay has as a great manufacturing, trading and shipping centre.

The fact that the Bombay Electric Supply and Tramways Company has shut down its steam driven generating plant and now takes its supply in bulk from the various Tata companies is of note and it is of more than passing interest to note that the Poona Electric Supply Company has recently adopted a similar course. This is a phase of hydro electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts or double the pressure commonly employed in India for overhead long-distance transmission.

Mysore Hydro-Electric Works

The first Hydro Electric Scheme of any magnitude undertaken in India or indeed in the East was that on the Cauvery River in Mysore State which with its generating station, transmission line and distributing system was inaugurated in 1902.

The Cauvery River rises in the district of Coorg in the Western Ghats and flows across Mysore State. The principal object of this scheme was the supply of power to the Mining companies on the Colar Gold Field about 92 miles from Srirangam on the site of the generating station. This transmission line was for a number of years the longest line in Asia. Since 1902 the supply of electrical energy from Srirangam has been provided for Bangalore and Mysore cities and about 200 other towns and villages in the South Eastern Hill of the State.

The initial undertaking has constantly been expanded so that its total capacity now stands at 46,000 H P. This is the maximum obtainable from the water available. This great increase has been made possible by the construction of the Krishnarajasagar reservoir near Mysore City, which has a capacity of 44,000 million cubic feet or storage above the minimum draw off.

The number of the consumers of electricity continues to increase rapidly every year with greatly increased demands. The Government of Mysore have encouraged this growth in the use of electrical energy and have made a survey of Hydro Power resources of the State and prepared plans for the construction of a second generating station at the most economical site.

The more important sites where a Hydro Electric power station can be constructed are Mekadatu the Shimshav Falls, the Krishnarajasagar and the Jog Falls (the Gersopp Falls). These power sites provide Mysore State with ample hydro power resources to meet the requirements of the State for a long time to come.

Works in Madras

The Pykara Hydro-Electric Scheme an undertaking of the Madras Government, was commenced at the end of 1929, the first stage of the project being completed at the end of 1932. The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Nilgiri Plateau having a catchment area of nearly 42 sq miles. The average rainfall in the area is 110 in per annum, the rainfall varying considerably at various points.

The natural head available exceeds 4,000 ft which is higher than any other in the British Empire or America. A number of suitable reservoir sites are available with a total capacity of about 3,000,000,000 cubic ft, which will be utilised as required by the load growth. With full storage 90,000 H P can be developed in addition to the 30,000 H P from the tail water at a lower site where a further drop of 1,000 ft can be obtained.

The present head utilised is only 3,080 ft, developing a maximum of 22,000 H P. A large forebay of 58,000,000 cubic ft capacity and another reservoir of 26,000,000 cubic feet provide the requisite storage. Water from the intake of the river is led by a flume to the forebay from whence it is led through a single steel pipe to a surge pipe at the head of the penstock consisting of two pipes each in three sections of 27 in, 24 in, and 21 in in diameter and 9 100 ft in length.

Three sets of direct coupled turbo generators of 10,000 H P each generate 3 phase, 50 cycles 11,000 volts which is taken through 110/66/11 K V 7,810 K V A transformers and switchgear in the yard of the generating station and transmitted to the receiving station at Combarator 50 miles away by a double circuit transmission lines.

The engineering features of the Mettur Hydro Electric Scheme provide an interesting contrast to the Pykara Hydro Electric Scheme now in operation. The Mettur (Stanley) Dam, one of the largest structures of its kind in the world, is 176 feet high and can impound a total of 93,500 million cubic feet of water. This storage is primarily for irrigation purposes, but the water let down for irrigation is also to be utilised to the best advantage for the generation of hydro electric power.

During the construction of the dam four pipes 8.6 feet in diameter were built into the structure and equipped with the necessary valves, gates, screens, and other fittings. The function of these pipes was for surplussing from the reservoir during the latter part of the construction period and for power generation afterwards. Each of these pipes represent about 15,000 horse power awaiting development. Each pipe is designed to discharge a maximum of 1,250 cusecs for power purposes.

The operating head will vary from 160 feet at full reservoir level to a normal minimum of 80 feet. The average head will be 135 feet. Under such water conditions a minimum demand of 19,200 or 7,680 H P continuous may be met without the assistance of other plants.

It is proposed to instal four double horizontal Francis turbo generator sets of 15,000 horsepower each, one of which will be spare. Only two units are to be provided at first, the third will be added in the third, and the fourth in the seventh year of operation should load conditions justify the additional generating capacity.

The original scheme included four single vertical units of 13,000 horse power each but the Consulting Engineers to the Secretary of State for India preferred the arrangement outlined above and their recommendation was adopted. The plant when completed will thus be capable of a maximum output of 60,000 horse power.

The generators will operate at 11,000 volts, 50 cycles, having a normal rating of 12,500 K V A each. They will be specially designed for transmitting power eventually to Madras.

Works in Kashmir

A scheme of much importance from its size, but more interesting because of the developments that may be expected from it than for the part which its current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River Jhelum, near Baramulla, which lies thirty-four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and the forebay at the delivery end of the flume have a capacity for carrying water sufficient for the generation of 20,000 electrical horse power. Four pipes 600 feet long lead from the forebay to the power house, and from forebay to waterwheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 kw, 3 phase, 2,300 volt, 25 period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 kw generating plant being installed within it. Two transmission lines run side by side as far as Baramulla, 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulla was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation. The lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinagar, the line terminates at the State silk factory, where current is supplied not only for driving machinery and for lighting, but for heating. The greater part of Srinagar city is now electrically lighted.

Recent Progress

Apart from the development of the projects outlined above the past few years have witnessed comparatively little progress in hydro electric

works. The Manda Project in the Punjab, which utilises the water of the Uhi river for the generation of power with which a large number of towns in that province will be electrified came into operation in 1933. The scheme has been formulated in three stages. The first is to develop 48,000 horse power from the ordinary discharge of the river, the second involves the formation of a storage reservoir by the construction of a dam and would double the electrical output, whilst the third would utilize the same water several miles down-stream and provide an additional 64,000 horse power. Another interesting project is the hydro electric grid scheme in the United Provinces which will carry electric power to a large number of towns and villages and will, it is anticipated, assist greatly in the development of rural areas.

A small plant was completed and put into operation at Naini Tal during 1923, and the erection of another small plant was commenced at Shillong, but otherwise there is nothing to record. It is interesting to note, however, that preliminary investigations are proceeding with a view to the erection of hydro-electric plants in various parts of India. In the tea districts of Kalimpong and Kurseong, for example, it is proposed to harness a promising water power site and to supply current to an important area in which are situated more than two hundred tea factories.

The Sutlej Hydro Electric Project at one time appeared to be one of the most promising propositions in the country but owing to financial considerations it has now been indefinitely shelved.

Local Self-Government.

A field of the administration of India profoundly affected by the Reforms of 1919 was that of local government. This was one of the subjects transferred to Indian ministers, and under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of a century has been disappointing. The greatest successes have been won in the Presidency towns and particularly by the Municipality of Bombay. The difficulties in the way of progress were manifest. Local government had to be a creation—the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil are stirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from the villages are built up the larger administrative titles—tahsils, sub divisions, and districts.

The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood cutting. The inhabitants of such a village pass their life in the midst of these simple surroundings welded together in a little community with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, e.g., in the greater part of Assam in Eastern Bengal, and on the west coast of the Madras Presidency the village as here described does not exist, the people living in small collections of houses or in separate homesteads.—(*Gazetteer of India*)

The villages above described fall under two main classes, viz.—

Types of Villages.—(1) The severalty or *rayatwari* village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers though some of the non-cultivated lands may be set apart for a common purpose, such as grazing and waste land may be brought under the plough only with the permission of the Revenue authorities and on payment of assessment. The village government vests in a hereditary headman known by an old vernacular name such as *patel* or *reddi*, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled.

(2) The joint or landlord village the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole its incidence being distributed by the body of superior proprietors, and a certain amount of collective responsibility still, as a rule, remains

The village site is owned by the proprietary body who allow residences to the tenantry, artisans, traders and others. The waste land is allotted to the village, and, if wanted for cultivation, is partitioned among the shareholders. The village government was originally by the *punchayet* or group of heads of superior families. In later times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities, but the artificial character of this appointment, as compared with that which obtains in a *rayatwari* village is evidenced by the title of its holder, which is generally *lambaradar*, a vernacular derivative from the English word 'number'. It is this type of village to which the well known description in Sir H. Maine's *Village Communities* is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under them."

Village Autonomy.—The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now disappeared owing to the establishment of local civil and criminal courts, the present revenue and police organisation, the increase of communications, the growth of individualism, and the operation of the individual *rayatwari* system which is extending even in the north of India. Nevertheless, the village remains the first unit of administration, the principal village functionaries—the headman, the accountant and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there has been an active propaganda in favour of reviving the village council tribunal, or *Punchayet* and the Decentralisation Commission of 1908 made the following special recommendations—

"While, therefore, we desire the development of a *punchayet* system, and consider that the objections urged thereto are far from insurmountable, we recognise that such a system can only be gradually and tentatively applied and that it is impossible to suggest any uniform and definite method of procedure. We think that a commencement should be made by giving certain limited powers to *Punchayets* in those villages in which circumstances are most favourable by reason of homogeneity, natural intelligence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy which must be the work of many years will require great care and discretion, much patience and judicious discrimination between the circumstances of different villages, and there is a considerable consensus of opinion that this new departure should be made under the special guidance of sympathetic officers.

This is, however, still mainly a question of future possibilities and for present purposes it

is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too early to say what life they have. The Punjab Government has passed a Village Panchayat Act, which enables Government to establish in a village, a system of councillors to whom certain local matters, including judicial power, both civil and criminal of a minor character, may be assigned. In Bihar a Village Administration Act has been passed for the administration of village affairs by villagers themselves, including minor civil and criminal cases. Other Governments have taken steps in the same direction.

Municipalities—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, medical, charity, and local public works. New Municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self government. Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and responsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility: some items of provincial revenue suited to and capable of development under local management being transferred with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position—There are some 781 municipalities in British India, with something over 21 million people resident within their limits. Of these municipalities, roughly 710 have a population of less than 50,000 persons and the remainder a population of 50,000 and over. As compared with the total population of particular provinces, the proportion resident within municipal limits is largest in Bombay, where it

amounts to 20 per cent, and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent of the total population. Turning to the composition of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion. Ex officio members are only 7 per cent and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the discharge of these responsibilities, there is a municipal income of Rs 14.03 crores derived principally from taxation just over one-third coming from municipal property contributions from provincial revenues and miscellaneous sources. Generally speaking, the income of municipalities is small: the four cities of Calcutta, Bombay, Madras and Rangoon together providing over 40 per cent of the total. The heaviest items of this expenditure come under the heads of Conservancy and "Public Works," which amount to 14 per cent and 13 per cent, respectively. Water supply comes to 13 per cent, Drainage to 4 per cent and Education to over 11 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City for example the expenditure on education amounts to more than 21 per cent of the total funds, while in the Central Provinces and Berar it is over 17 per cent.

District Boards—The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam there is a board subordinate to which are two or more sub-district boards, while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-district boards besides 45 Union Panchayats in Madras. This machinery has jurisdiction over a population which was over 2.21 millions in 1930-31. Leaving aside the Union Committees and Union Boards or Panchayats the members of the Board numbered over 16,000 in 1930-31 of whom 73 per cent were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent of the whole membership. Only 11 per cent of the total members of all boards are officials of any kind. The total income of the Boards in 1930-31 amounted to Rs 16.57 crores, the average income of each board being Rs 2,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent in Bombay and in the N. W. F. Province to 63 per cent in Bihar and Orissa. The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges.

Medical relief is also sharing with education though in a less degree the lion's share of the available revenue

Improvement Trust—A notable feature in the recent sanitary history of India is the activity played by the great cities in the direction of social improvements. In Bombay Calcutta Lucknow Allahabad Rangoon and Cawnpore the Improvement Trusts developed important activities which are described in a separate chapter (q v). In Bombay the work of the Improvement Trust is carried forward by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities.

Provincial Progress—There was passed in Bengal in 1919 a Village Self Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. In 1930 31 the number of Union Boards rose to 4,510. There are also 12 Union Committees. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their own affairs.

In Bombay the development of village self government has also proceeded, as the result of an Act for constituting, or increasing the power of village committees which was passed in 1920 by the Legislative Council. In this presidency, some 145 out of 155 municipalities had a two thirds elected majority of councillors in the year 1930 31, and a distinct step forward has been projected by the administration in the direc-

tion of liberalizing the constitution of all municipal bodies. The policy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards. In Madras also the institutions of local self government continued to progress in an encouraging manner. In the United Provinces the new District Boards which consist of non-official members only with elected non-official Chairman, were plunged straight way into financial difficulties. In the Punjab municipal administration has shown improvement, the general attitude of the members in regard to their responsibilities being promising for progress in the future. In the Central Provinces, the year 1920 witnessed the passing of a Local Self Government Act intended to guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman and the wider powers of control given to local bodies have been an incentive to the development of local self government, leading to an increased sense of public duty and responsibility. Another very important measure regulating municipalities was passed into law in 1922. Its chief features are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control. In the North West Frontier Province, the institution of local self government is somewhat of a foreign growth. An important extension of the elective principle was made a year or two ago and it is hoped that this will prove a success.

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instituted by Government in January, 1912, with a view to making provision for the improvement and expansion of Calcutta by opening up congested areas leaving out or altering streets, providing open spaces for purposes of ventilation or recreation demolishing or constructing buildings and rehousing the poorer and working classes displaced by the execution of improvement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 649,995 in 1891, and increased to 801,251, or by 25 per cent., by 1901. The corresponding figure according to the 1921 Census was 993,508 and this had increased by 1931 to 1,196,734.

The problem of expansion was difficult, because of the peculiar situation of Calcutta, which is shut in on one side by the Hooghly and on the other by the Salt Lakes.

Preliminary investigations continued for several years, so that it was only in 1910 that legislation was eventually introduced in the provincial legislature and the Trust instituted by it. The Bill provided for a large expenditure on improvement schemes and the provision of open spaces and for special local taxation to this end. It also provided for the appointment of a whole-time chairman of the Board of Trustees, and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trustees at 31st March 1936—Mr C. W. Garner I.C.S., Chairman. Mr J. C. Mukherjee, Bar-at-Law, Chief Executive Officer. Calcutta Corporation (*ex officio*). Mr D. J. Cohen, elected by the Corporation of Calcutta under Section 7 (1) (a) of the Calcutta Improvement Act, 1911. Mr Prabhudayal Himatsingka elected by the elected Councillors Corporation of Calcutta under Section 7 (1) (b) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926. Mr Charu Chandra Biswas C.I.E., elected by Councillors other than elected Councillors of the Corporation of Calcutta under Section 7 (1) (c) of the Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926. Mr W. H. Thompson, elected by the Bengal Chamber

of Commerce, Sir Hari Sankar Paul, Kt, elected by the Bengal National Chamber of Commerce, Khan Bahadur Muhammad Abdul Momin, CIE, Sir Badritas Gouka, Kt, CIE, Rai Bahadur Dr Hardhan Dutt, Mr Bernard Matthews FRIBA, MPTI, appointed by the Local Government

During the 24 years that it has now been at work, the Trust have decided, and partly or entirely carried through, many improvement schemes for opening up congested areas, laying out or widening streets and providing open spaces

In Central Calcutta many highly insanitary *bustees* have been done away with and several roads of an improved type laid out the most important of which is the Chittaranjan Avenue 100 ft wide, which at present extends from Beadon Street to Chowringhee, now extended from Chowringhee to Shambazar. It is intended ultimately to extend it up to the Chitpur Bridge. But at present there is no direct connexion between Chitpur Bridge and the Barrackpore Trunk Road as Lockgate Road has been severed by the sidings of the Eastern Bengal Railway. In these circumstances the Board considered that traffic would be better served by postponing the extension to Chitpur Bridge and constructing a road to Shambazar which is the terminus of the Barrackpore Trunk Road and of the Dum Dum Jessore Road. The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is likely before long to gain increased importance by being linked up with Dalhousie Square on the West by means of a new road 84 feet wide which the Trust have constructed between Mission Row and Mangoe Lane. A further extension of this road from Chittaranjan Avenue to Wellington Street on the east is now in progress.

In the north of the City, two large and fifteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossipore Chitpore open space measuring 53 bighas and 156 bighas respectively. The Cossipore Chitpore Park has a small artificial lake and the layout of the area surrounding the lake has been completed. Four football grounds have been provided for schools and clubs of North Calcutta. Some tennis courts are also being made. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been driven through this highly congested area. The approaches to the City have also been adequately widened.

Some progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. This Scheme is known as Maydapat, Scheme No XXVII.

The new 84-ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been completed so that there is now a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road

on the east. The widening of Maniktala Road between Upper Circular Road and Maniktala Bridge which has been completed forms a further extension of this main roadway which will eventually continue at a width of 100 ft to the extreme eastern limit of Maniktala. Another important scheme which is now complete is the new 60 ft road between Darpanarayan Tagore Street and Pathurlaghath Street which, with the side roads, opens up a very congested area and forms a portion of a main projected north and south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Ahiritollah.

The passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties has made it financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazaar. The Kalakar Street scheme in Bara Bazaar which forms the southern section of the aforesaid road is one of the schemes to which the new Act is to be applied. It has been published under Section 43 of the Calcutta Improvement Act, and sanctioned by Government. Another scheme to which this Act is to be applied is the widening of a short length of Darmahatta Street and it will be interesting to see how the methods of assessment provided for in the Act will work out in practice.

The Suburban Arcs to the south and south-east of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores of earth have been filled up. Russa Road which forms the southern approach to the town has been widened to 150 ft for a length of one mile and 100 ft for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. To improve the drainage of this area a 100 ft wide East to West road, from Ballygunge Railway Station to Chella Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds has been completed.

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake. The road round the main lake has been surfaced with asphalt and lighted with electricity and is much frequented in the evenings. Sites for club houses adjoining the main lake have been allotted to several clubs. Excavation has been continued in a new section of the lake which is to be attractively laid out with an island to which the public will have access by means of a footbridge. The Calcutta Tramways Co. Ltd., have now extended tram tracks from Russa Road along Rash Behari Avenue to Ballygunge Station.

The Board in pursuance of its policy of carrying out schemes in the centre of the town and in the suburbs simultaneously, so as to have an adequate supply of suburban sites for residential buildings to meet the needs of those displaced from overcrowded areas in the centre

of the town has carried out a large development scheme for the improvement of another section of the undeveloped area between Russa Road and the Lake District

To the east of the city, several new roads have been constructed in Scheme No VIII (New Ballygunge Road—Park Circus to Old Ballygunge Road). They are now open to traffic, and the majority of them are surfaced with asphalt. Arrangements have been made for lighting the roads with electricity. The development of Calcutta east of Lower Circular Road, between Park Circus and Middle Road, Entally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the bustee dwellers, who are pushed further east as the development from bustee conditions to blocks of masonry buildings proceeds. The utilisation of highly improved lands for bustee purposes is not an economic proposition, but at the same time, it is necessary to provide the essentials of sanitation for the working classes.

The linking up of Amherst Street with London Street by a broad thoroughfare has commenced in two small sections. The Trust has constructed a large park near Park Circus Scheme No VIII, known as Eastern Park, measuring 65 bighas, with a large playing field for football and tennis. The Gorachand Road Scheme provides for the completion of the northern portion of this park and the commencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally. As the scheme involved the demolition of a large number of busees, investigations were made to ascertain the best means of reducing the displaced bustee population as a result of which a Bustee Rehousing Scheme at Christopher Road which will cost the Trust Rs 2,70,000 for land acquisition and Rs 1,97,000 for engineering works has been taken in hand.

The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres. In 1912, Mr Bompas, the first Chairman of the Trust, pointed out that in the ratio, viz., about 9 per cent of its public open spaces which measured about 1,250 acres (including the Maidan, the Horticultural and the Zoological Gardens) to its total acreage, Calcutta was almost on a par at that time with London possessing 6,675 acres of public parks or gardens while its percentage exceeded that of New York, Berlin and Birmingham. But about 1,000 acres of Calcutta's 1,250 was accounted for in the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date the Trust had added (including the new lake at Dhakuria)—another 250 acres.

Lastly for the housing of the displaced population the Trust has undertaken on a large scale the following schemes—

In the early stages three blocks of three storied tenement buildings containing 252 lettable rooms were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect *bastis* of

their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means, e.g., school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs 2,44 868 and are let at very low rents—ground floor rooms at Rs 5 per mensem and top floor rooms on Rs 6 per mensem, each room measuring 12' x 12' with a 4 ft verandah in front opening on to a central passage 7 ft wide. The total collection of rent during the year 1935-36 including previous year arrear was Rs 14,328.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for busees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktila Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-housing Scheme—In this scheme 4 detached and 35 semi detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Rehousing scheme had been sold by private sale shortly after the 31st March 1927.

Bow Street Re-housing Scheme—Seven blocks of buildings containing one roomed, two-roomed and three roomed suites have been constructed to rehouse Anglo-Indians displaced by the operations of the Trust. This scheme has proved a striking success. There are 132 suites for letting and the rent received from these suites during the year 1935-36, amounted to Rs 26,372.

Parkpara Re-housing Scheme—This scheme has an area of 86 bighas well laid out in 96 building sites. A new rehousing scheme has been undertaken by the Board, as already stated, at Christopher Road for the bustee population to be displaced by the execution of scheme No XXXV (Eastern Park to Gorachand Road). A special feature of the new scheme is that the land is to be developed as a model bustee for displaced bustee dwellers. Special facilities are offered to dishoused persons for securing land in various improved areas for reinstatement purposes.

Bridges—Some progress has been made in replacing the old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, by modern and up-to-date bridges to suit the growing traffic requirements. The opportunity is being taken of widening the Maniktala, Narikeldanga and Bellaghata Bridge approaches on both sides—on the west (in the case of Maniktala and Narikeldanga Bridges) right up to Circular Road. The new bridges of the city will in their traffic capacity compare favourably with those of London. The new Bridges at Maniktala, Bellaghata and at

Shambaswar have roadways of 37 feet, with two footpaths each 10 feet in width. The Chittpore Bridge reconstruction of which has been completed has been redesigned as a reinforced concrete bridge capable of accommodating four lines of fast traffic and two lines of slow traffic. The Alipore Bridge, the reconstruction of which has been completed, has a roadway of 30 feet (3 traffic widths) and 2 footpaths of 6 feet each, and these are also to be the probable widths of the Tollygunge and Hastings Bridges which need re building.

Financial—Capital charges during the year 1935-36 amounted to Rs 84.64 lakhs which included Rs 72.98 lakhs spent on land acquisition and Rs 10.64 lakhs on engineering works. The gross expenditure of the Trust on Capital Works up to the end of the year 1935-36 was Rs 15,92,23,784. To meet this large expenditure, the Trust has borrowed Rs 3,19,50,000, other Capital receipts (mainly from the sale of land and buildings) have yielded Rs 7,24,16,944 and the revenue fund from its annual surplus (after providing for the service of loans) has contributed Rs 4.75 crores to Capital Works.

The Indian Ports.

The administration of the affairs of the larger ports (*Calcutta, Bombay, Madras, Karachi, Rangoon and Chittagong*) is vested by law in bodies specially constituted for the purpose. They have wide powers, but their proceedings

are subject in a greater degree than those of municipal bodies to the control of Government. At all the ports the European members constitute the majority and the Board for Madras consists mainly of European members.

Figures for 1935-36 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table—

	Income	Expenditure	Capital Debt
	Rs	Rs	Rs
Calcutta	3,00,27,620	3,19,34,314	24,50,94,403
Bombay	2,66,02,138	2,63,76,349	19,86,32,695
Madras	31,46,183	32,05,921	1,53,77,785
Karachi	64,99,408	64,21,028	4,28,59,000
Rangoon	75,34,972	67,33,811	5,04,28,667
Chittagong	6,46,978	6,60,926	26,60,156

CALCUTTA

The Commissioners for the Port of Calcutta are as follows—

Mr F. H. Elderton, *Chairman*
Mr W. A. Burns, *Deputy Chairman* (on leave)

Elected by the Bengal Chamber of Commerce—
Mr A. O. Brown, Mr G. W. Leeson, Mr C. F. L. Milne Robertson, Mr S. C. Lyttelton, Mr J. Reid Kay, Mr K. J. Nicolson

Elected by the Calcutta Trades' Association—
Mr H. R. Norton

Elected by the Bengal National Chamber of Commerce—Mr J. C. Binerjee, Mr Nallini Ranjan Sarkar

Elected by the Indian Chamber of Commerce—
Mr A. L. Ojha

Elected by the Muslim Chamber of Commerce—
Mr M. A. Aziz Khan

Elected by the Municipal Corporation of Calcutta—A. K. M. Zakariah,

Nominated by Government—Captain C. R. Bluet, R.N., Mr J. A. Bell, Mr A. F. Hurvy, Mr V. L. D. Jarrad, Mr G. N. Bower

The principal officers of the Trust are—
Secretary—Mr C. W. T. Hook (on leave)

Mr S. L. Dass (offg.)

Traffic Manager—Mr W. Steer (offg.)

Chief Accountant—Mr J. Dand, C.A. (on leave) Mr J. G. Mair, C.A. A.S.A.A. (offg.)

Chief Engineer—Mr A. M. Widdicome, A.M.I.E.E. (offg.)

Deputy Conservator—Commander C. V. L. Norcock, O.B.E., R.N. (Retd.)

Medical Officer—Lt Col F. J. Anderson, M.B., B.S., F.R.C.S., I.M.S.

Consulting Engineers and London Agents—Messrs. Rendel, Palmer and Tritton

The traffic figures and the income of the Trust for the last fifteen years are as follows —

Year	Docks			Jetties	Stream		Nett tonnage of shipping entering the Port	Income
	General Exports	Coal Exports	Imports	Imports	Exports	Imports		
	Tons	Tons	Tons	Tons	Tons	Tons	Tons	Rs
1921 22	974,783	1,687,222	697,361	622,411			3,446,021	2,19,17,042
1922 23	1,414,166	1,174,041	304,109	680,053			3,336,722	2,64,75,522

The revenue of the Trust in 1935-36 amounted
to Rs 2,42,93,212 and the expenditure to
Rs 2,39,75,338 The result of the year's working
was a surplus of Rs 22,789 under General
Account which has been transferred to the
Revenue Reserve Fund and a surplus of
Rs 9,11, under Pilotage Account which
has been transferred to the Vessels Replacement
Fund The balance of the Revenue Reserve
Fund at the close of the year amounted
to Rs 52,98,266 The aggregate capital
expenditure during the year was Rs 3,74,74
The total debt of the Trust at the end of
the year amounted to Rs 1,98,321 lakhs repay-
ment of which is provided for by annual sinking
fund contributions from revenue the accumu-
lation of the sinking fund is at 31st March
1936 was Rs 261 lakhs in addition to this
put from property appreciation the Reserve
and other fund total Rs 87.77 lakhs

The trade of the Port of Bombay during the
1st official year aggregated Rs 181 crores
in value

The number of steam and square-rigged
vessels which during recent years have entered
the docks or been berthed at the harbour
walls and paid dues, excluding those which
have unloaded and loaded in the stream —

Year	Number	Tonnage nett
1916 to 1921 (average)	2,086	1,758,888
1921 to 1926	1,962	4,574,817
1926 to 1931	1,954	4,749,570
1931-32	1,866	4,588,577
1932-33	1,836	4,691,183
1933-34	1,913	5,099,247
1934-35	1,994	5,000,637
1935-36	1,990	5,096,662

The two dry docks were occupied during
the year by 170 vessels, the total tonnage
amounting to 652,788 an increase of 163,761
tons from the previous year

SHIPPING

Number of vessels which entered the Port during the year 1935-36 exclusive of vessels put back and fishing boats was 3,901 with a tonnage of 2,610,467 as against 3,713 with a tonnage of 2,580,715 in 1934-35, 928 steamers of all kinds entered the Port with a tonnage of 2,448,799 against 924 and 2,405,404 respectively in the previous year. Of the 928 steamers 685 were of British Nationality.

The imports during the year totalled 839,000 tons against 81,000 tons in the previous year. The shipments were 1,015,000 tons in 1935-36 against 1,175,000 in 1934-35.

The total volume of imports and exports was 1,855,000 tons against 1,940,000 tons in the previous year.

for 5 months and 5 days from 23rd April 1937 or date of availing)

Assistant Engineers—Mr R Ry V Dayanandam Kunath Avergal B.A., B.L., M.R., Ry S. Nigabushanum Aiyar Avergal B.A., M.E., A.I.E.E. (on leave for 3 months from 6th February 1937)

Assistant Engineer (Electrical)—Mr R Ry K. Subramaniam Aiyar Avergal M.E., A.I.E.E. (on leave for 2 months from 30th March 1937)

Harbour Master—Mr L T Lewis (on leave for 7 months and 20 days from 12th November 1936), Mr L J Whitlock (Acting Harbour Master)

Assistant Harbour Masters—Mr B Henmin, Lt (Commander) C M Best R.N.R. (Retd.)

Assistant Traffic Managers—Mr R Ry M S Venkataraman Avergal B.A. (on leave for 1 month and 27 days from 15th February 1937), (Acting) Mr F F D Lanoy (Arvallo), Mr L A Abraham B.A., F.C.I.

Deputy Chief Accountant—Mr R Ry R. Rangaswamy Aiyar Avergal B.A.

Deputy Chief Accountant (Engineering)—Mr R Ry V Muthuswamy Aiyar Avergal B.A.

Office Manager—Mr R Ry G M Ganapathi Aiyar Avergal

The receipts of the Trust during 1935-36 on Revenue Account from all sources were Rs 41,46,183 as against Rs 33,93,906 in 1934-35, and the gross expenditure out of revenue was Rs 32,05,921 as against Rs 30,31,734 in 1934-35. A contribution of Rs 5,22,029 was made to Reserve Funds during 1935-36. 697 vessels with an aggregate net registered tonnage of 24,41,739 tons called at the port during the year against last year's figure of 784 vessels with a net registered tonnage of 26,09,138 tons.

RANGOON

The personnel of the Commissioners for the Port of Rangoon is comprised of seventeen members—

Appointed by Government—A N Strong, M.A., Bar at Law (Chairman), A T McCraith, Lt Commander H R Inigo Jones, R.N., L P S Bourne

Ex Officio—Messrs W H Payton, I.C.S. (Chairman, Rangoon Development Trust), W J Ward (Collector of Customs), and J E M Rowland (Agent, Burma Railways)

Elected by the Burma Chamber of Commerce—Messrs C G Wodehouse (Vice Chairman), J Tait and H S Bowlby (One vacant)

Elected by the Rangoon Trades Association —
J K Gibson, C A

Elected by the Chinese Chamber of Commerce —
Shimeln Huie

Elected by the Burma Indian Chamber of Commerce — Vhje Dhyia (on leave) R L Thakker and N K Karanjia

Elected by the Burmese Chamber of Commerce —
U Thein Maung, B A, M M F

Elected by the Corporation of Rangoon —
U Htoon May

Principal Officers are —

Secretary — C Witcher

Chief Accountant — S A Wetherfield, B A, A C A

Chief Engineer — W D Beatty, B A, B A I, M Inst CE

Deputy Conservator — Commander C M L Scott, B N (Retd)

Traffic Manager — W P T Puh

The income and expenditure on revenue account for the Port of Rangoon in 1935-36 were —

	Rs
Income	72,05,954
Expenditure	69,51,709

The capital debt of the Port at the end of the year was Rs 4,91,28,667. The balance (including investments at cost) at the credit of the different sinking funds on 31st March 1936 was Rs 2,24,24,209.

The total sea borne trade of Rangoon during the year 1935-36 was 5,240,500 tons of which 1,325,546 tons were imports, 3,891,056 tons exports and 23,898 tons transhipment. The total number of vessels (including Government vessels) entering the Port was 1,598 with a total net registered tonnage of 4,278,639 showing a decrease in the number of vessels and a decrease of 19,290 tons in the net tonnage as compared with the previous year.

CHITTAGONG

Chittagong in Eastern Bengal, lying on the right bank of the river Karaiakuli at a distance of 12 miles from the sea, was already an important Port in the sixteenth century, when the Portuguese gave it the name of Porto Grande.

The construction of the Assam Bengal Railway has facilitated the transport of trade with Assam and Eastern Bengal for which the Port of Chittagong is the natural outlet.

Chittagong, Bengal Lat 22° 21' N, Lon. 91° 50' E 1933 Pop 53,150

TRADE

Imports — Salt, mineral oil, machinery, tea, estate stores, rice, coal and railway material.

Exports — Wax, jute, tea, hides, cotton, cupas, rice, paddy, eggs, poultry and live stock.

Accommodation — Vessels of any size can proceed 9 miles up the Karnatuli to Chittagong at H W O S draught of 22 ft to 26 ft.

There are 5 berths for ocean going vessels at the Assam Bengal Railway jetties, also two sets of fixed moorings.

Jetties are 2,100 ft long, provided with hydraulic cranes 17 to lift 35 cwt and 4 to lift 10 tons, ample shed accommodation, and jetties are in direct rail communication with the Assam Bengal Railway system, cargo in bulk being dealt with direct into wagons. Depth at jetties about 26 feet at L W S I.

Provisions — Fresh provisions, good drinking water and coal obtainable.

Navigation — There are three river bars, two of which have been permanently improved by training works, and the third is being similarly treated. The necessity for dredging has been very greatly reduced.

Night pilotage is in force except during the S W monsoon.

Charges — Port dues 4 annas 6 pies per reg ton. Hospital dues 2 pies per reg ton. Harbour Masters fee Rs 32. Mooring and unmooring in fixed berths Rs 32. Swinging berths Rs 16. Berth alongside jetties Rs 40, per day, night work and holidays extra.

Pilotage not exceeding —	Rs a	Rs a

VIZAGAPATAM HARBOUR PROJECT

The question of creating a harbour at Vizagapatam to supply an outlet for a large area of fertile country adjacent to the east coast of India, hitherto undeveloped, with considerable mineral resources and without suitable access to the outside world was first formulated in the days of the East India Company. That the creation of such a port would have beneficial influence on this area was unquestioned. Vizagapatam lies in front of the only practicable gap in the barrier of the Eastern Ghats, is

formed by nature to be the outlet of the Central Provinces, from which a considerable amount of trade has taken this route in the past, even with the imperfect communications hitherto available. A necessary complement of the scheme was the construction of the proposed railway from Parvatipuram to Rapur now completed, which with the existing coastline of the Bengal Nagpur Railway would make a large and rich area tributary to the proposed port and obviate the long and expensive

circuit by Calcutta. A link has also been supplied in the most direct route to Rangoon from Europe by way of Bombay, while from an imperial point of view, the provision of a fortified port on the long and almost unprotected stretch of coast between Colombo and Calcutta is held to be a consideration of great importance. The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose.

The Government of India with the approval of the Secretary of State and the Legislative Assembly, sanctioned the construction of the new railway line from Raipur to Parvati puram. The work is completed and the line opened to traffic. They also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major Port.

The work was carried out by a staff of Engineers under the direct charge of an Engineer in Chief who comes under the administrative charge of an Administrative Officer for the development scheme, a post which is held ex officio by the Agent of the B. N. Railway.

The scheme for the construction and development of the Harbour will be carried out in stages according to the demand of trade. The first stage is now complete. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Viceroy took place on 19th December 1933.

The present provision includes a 1,000 ft diameter Turning Basin together with access to the steamer Berths and an Entrance Channel dredged out to afford a passage 300 ft wide at the bottom. Vessels of 25 ft 6 ins draft and 530 ft length are admitted at present.

A quay wall comprising three 500 ft Berths has been completed and equipped with 3 ton electric cranes. Storage accommodation aggregating 140,000 sq ft of covered area in three single storied sheds has been provided in the vicinity of the quay, equipped with full railway and road facilities. Two sheds with lighter berths have been completed for export cargo. Special facilities have been provided for the storage and shipment of manganese ore. In addition to the quays, four Mooring Berths have been installed around the Basin and additional facilities provided for dealing with lighter cargo.

A large area of land has been reclaimed in the course of the dredging operations, and it has been laid out in blocks served by broad roadways. Plots are available for office sites and for industrial concerns. Water supply and electric lighting have been arranged for.

The floating equipment of the Harbour comprises five tugs of 1,500, 600, 450, 120 and 100 H.P. respectively and 22 lighters.

A graving dock with an entrance 60 ft 6 in broad has been provided, but though adapted for future extension and for use by vessels larger than the dredging craft which now use it, length of ships is at present restricted to 300 feet.

The port is at present capable of dealing with lifts of 50 tons on the quays but cannot lift more than 3 tons into and out of vessels.

The sea entrance channel is protected on the South side by the provision of a sand trap and protecting Breakwater.

At present ships enter and leave the Harbour during day time only and pilotage is compulsory.

The Port is administered by the Government of India through the Agent of the Bengal Nagpur Railway who is represented at Vizagapatam by a Deputy Administrative Officer.

The principal officers are —

Administrative Officer — V. L. D. Jarrad, Calcutta.

Deputy Administrative Officer & Traffic Manager — E. G. Lilley, Vizagapatam.

Port Engineer and Deputy Conservator — L. E. Johnson, Vizagapatam.

Smuggling in India — With the increase in British Indian customs duties, smuggling has grown in volume and the Government of India had recently to appoint a Special Officer to report on its extent and the means necessary for its suppression.

This officer's report in 1936 disclosed that large quantities of such articles as silk, sugar and suchlike are being smuggled into British India from the French Settlements of Pondicherry and Karikal, thereby seriously endangering Government revenues and dislocating normal business in those goods.

Governments therefore, decided that effective measures to suppress this traffic should at once be taken. The Customs cordons were greatly strengthened and in outer cordon placed around Karikal. Co-operating with each cordon is a special detective staff which watches the movements of smugglers. The coast north and south of both Settlements are patrolled by coastguards and launches equipped with searchlights and signalling apparatus. Search day and night for smuggling craft. Land has been acquired for the erection of an impenetrable bullock wall on the more open parts of the frontiers.

To protect the Customs staff against the danger of attack by numerically stronger bodies of smugglers, arrangements have been made to station bodies of armed police at strategic points on the two frontiers.

The whole preventive arrangements are in charge of the Collector of Salt Revenue in Madras. This post has been temporarily merged in order that the situation can be closely and continuously watched by a responsible and experienced officer.

Already the steps taken are justifying their expense. Reports show that the regular smuggling traffic has been dislocated to such an extent that a certain amount of merchandise is being diverted to the regular ports — Bombay, Calcutta and Madras.

Education.

Indian education is unintelligible except through its history. Seen thus, it affords the spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far sighted race of rulers whose aim has been to guide a people alien in sentiments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the *intelligentsia* are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. In recent years, however, strenuous efforts have been made to remedy these defects. Primary Education Acts have been passed in the several provinces in favour of the expansion of primary education among the masses. On the other hand, the numbers of students in colleges and universities have grown apace, and especially during the period of financial depression the volume of middle class unemployment has reached alarming proportions. A movement has therefore set in with the object of stemming the drift of unsuitable students to universities by means of a radical reconstruction of the school system of education.

The Introduction of Western Learning

—In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a stable government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor General to leave the Hindus "to the practice of usage, long established among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the stimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance."

It was from sources other than Government that the desire for western knowledge arose in India. In 1816, David Hare, an English watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Roy, to institute the Hindu College for the promotion of western secular learning. The new institution

was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu College, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College, whose object was to teach "the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madhusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time onward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impetus to the introduction of western learning was the devotion of **Christian missionaries**. The humanitarian spirit which had been kindled in England by Wesley, Burke and Wilberforce, influenced action also in India. Carey, Marshman and Ward opened the first missionary College at Serampore in 1818 and twelve years later, Alexander Duff reversed the whole trend of missionary policy in India by his insistence on teaching rather than on preaching, and by the foundation of his school and College in Calcutta. In Madras the missionaries had been still earlier in the field, for as early as in 1787 a small group of missionary school-boys were being directed by Mr Schwarz. The Madras Christian College was opened in 1837. In Bombay, the Wilson School (afterwards College) was founded in 1834.

Tord William Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks of somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of English. But this decision did not entail that Oriental learning should be neglected still less that the development of the vernaculars should be discouraged. Other changes powerfully contributed to the success of the new system. The freedom of the press was established in 1835, English was substituted for Persian as the language of the Courts in 1837 and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India and, though the Muhammadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional level of their co-religionists, and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Indian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instruction were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available public funds had been expended upon a few Government schools and colleges, and instituted a policy of grants-in-aid to private institutions. Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in India, and lead to a gradual but steady extension of its benefits to all classes of people. Another feature of the despatch was an outline of a university system which resulted in the foundation of the Universities of Calcutta, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has undoubtedly been of value in several ways. It enabled Government to select recruits for its service on an impartial basis; it did much, through the agency of its Colleges to develop backward places; it accelerated the conversion of Indians to a zeal for western education, and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators; they did not deal directly with the training of men, but with the examination of candidates, they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination requirements and by uniform courses, their teachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions, they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction, they hoped that the system of education would rouse the people of India to develop the vast resources of their country and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The encouragement of the grant-in-aid system was

advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the private institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being removed gradually by the establishment of independent Boards of Intermediate and Secondary Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902

In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent of the ordinary members of the Senates and to approve the election of the remainder; the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects but their scope was in practice limited to post-graduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boundaries. Neither the Commission nor the Government discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority which would be representative of the universities and of the departments. They assumed the permanent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it.

N.B.—In the educational tables of most provinces the new census figures of 1931 have been used, hence the percentages for 1931 are not strictly comparable with those for 1930

Recent Developments.

Government of India Resolutions on Indian Educational Policy—The Indian Universities Act of 1904 was followed by two important resolutions of the Government of India on Indian Educational Policy—one in 1904 and the other in 1913. The resolution of 1904 was comprehensive in character and reviewed the state of education in all its departments. The following passage from it summarises the intentions of Government—

The progressive devolution of primary, secondary and collegiate education upon private enterprise and the continuous withdrawal of Government from competition therewith was recommended by the Education Commission in 1883 and the advice has generally been acted upon. But while accepting this policy, the Government of India at the same time recognise the extreme importance of the principle that in each branch of education Government should maintain a limited number of institutions, both as models for private enterprise to follow and in order to uphold a high standard of education. In withdrawing from direct management it is further essential that Government should retain a general control, by means of efficient inspection over all public educational institutions. The comprehensive instructions contained in this resolution were followed in the next few years by the assignment to the provinces of large Imperial grants, mainly for University, technical and elementary education. The resolution of 1913 advocated, *inter alia*, the establishment of additional but smaller Universities of the teaching type, it reaffirmed the policy of reliance on private effort in secondary education, it recommended an increase in the salaries of teachers and an improvement in the amounts of grants-in-aid, and it insisted on proper attention being paid to the formation of character in the education given to scholars of all grades. It further discussed the desirability of imparting manual instructions and instruction in hygiene, the necessity for medical inspection, the provision of facilities for research, the need for the staffing of the girls' schools by women teachers and the expansion of facilities for the training of teachers. The policy outlined in 1913 materially accelerated progress in the provinces, but the educational developments foreshadowed were in many cases delayed owing to the effects of the Great War.

The Reforms Act—The Reforms Act of 1919 has altered the conditions of educational administration in India. Education is now a 'transferred' subject in the Governors' provinces and is, in each such Province, under the charge of a Minister. There are, however, some exceptions to this new order of things. The education of Europeans is a 'Provincial reserved' subject, *i.e.*, it is not within the charge of the Minister of Education, and to the Government of India are still reserved matters relating to Universities like Aligarh, Benares and Delhi and all such new universities as may be declared by the Governor-General in Council to be central subjects. The Government of India are also in charge of the Chiefs' Colleges and of

all institutions maintained by the Governor-General in Council for the benefit of members of His Majesty's Forces or of other public servants or of the children of such members or servants.

Administration—The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Council, of which he himself is an elected member, has brought the subject directly under popular control in the twelve major provinces. Generally speaking, education, excluding European education, is not, however, under the charge of a single Minister in all the provinces of India. Certain forms of education have been transferred to the technical departments concerned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruction is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the local government for the administration of education. The authority of Government, in controlling the system of public instruction, is in part shared with and in part delegated to Universities as regards higher education and to local bodies as regards elementary and vernacular education. In some provinces, boards of secondary, or of secondary and intermediate, education have also been set up and have to some extent relieved the Universities in those provinces of their responsibilities in connection with intermediate education and with entrance to a University course of studies. Institutions under private management are controlled by Government and by local bodies by 'recognition' and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and in rarer cases by local bodies.

Department of Education, Health and Lands of the Government of India—In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923 the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. The Hon. ble Kunwar Sir Jagdish Prasad and Sir Gunga Shankar Bajpai are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Education Commissioner. The present Education Commissioner is Mr J. L. Patkinson, M.A., F.E.S., who is an eminent educationalist of wide experience.

Central Advisory Board of Education—In 1920, a Central Advisory Board of Education was created in India under the chairmanship of the Education Commissioner with the Government of India. This Board served a very useful purpose in offering expert advice on important

educational matters. But as a result of the recommendations of the Indian Retrenchment Committee, which was presided over by Lord Inchoape, it was abolished in 1923 in the interests of economy. This Board was revived in 1935. Its main functions are to serve as a clearing house of ideas and a reservoir of information. The first meeting of the Board was held in December 1935. The most important question discussed by the Board was that of unemployment and educational reconstruction and a number of important and far-reaching recommendations were made by it in respect to this matter. The main subject of deliberation at the second annual meeting of the Board which was held in December 1936 was that of primary education. The Board felt that neither the administration nor the progress of primary education in India was satisfactory. To get the question examined more carefully, the Board decided to refer the matter to its Vernacular Education Sub Committee, with definite suggestions in regard to the nature of administration and control of primary education. The problem of primary education for girls was also considered by the Board which generally approved of the recommendations made by its Women's Education Sub Committee, which are now being communicated to provincial Governments for their comments. It is to be hoped that the activities of this Board will prove of great value to the development of education in India on right lines. The constitution of the Board is as follows —

The Hon'ble Member in charge of the Department of Education, Health and Lands
(*Chairman*)

The Education Commissioner with the Government of India

Ten nominees of the Government of India

One member elected by the Council of State

Two members elected by the Legislative Assembly

Three members nominated by the Inter University Board, India

One representative of each local Government (*either the Minister for Education or his deputy or the Director of Public Instruction or his deputy*)

There is also a Secretary to the Board, who is appointed by the Government of India

As recommended by the Board, the Bureau of Education in India, which was abolished in 1923, will also be revived under the control of the Education Commissioner with the Government of India for dealing specifically with the collection and dissemination of literature relating to educational problems in the various provinces.

Educational Services — Until recently, the educational organisation in India consisted mainly of three services—(i) the Indian Educational Service, (ii) the Provincial Educational Service, and (iii) the Subordinate Educational Service. The Indian Educational Service came into existence as a result of the recommendations made by the Public Services Commission

of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent than the pay of the Indian recruit. Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islington Commission of 1912-16, the Indian Educational Service was formed into a superior educational service and all posts were thrown open to Indian recruitment. The Provincial Educational Service was simultaneously reorganised and a number of posts, generally with their Indian incumbents, were transferred to the superior service. This reorganisation resulted in a considerable Indianisation of the superior educational services in India. It was then laid down that the proportion of Indians in this service should on an average be 50 per cent of the total strength, excluding the posts in Burma.

In 1924, all recruitment to the Indian Educational Service was stopped as a result of the recommendations of the Royal Commission on the superior services in India. The Commission recommended that "for the purposes of local Governments no further recruitment should be made to the all India services which operate in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments". The Commission further recommended in regard to the question of the future recruitment of Europeans that "it will rest entirely with the local Governments to determine the number of Europeans who may in future be recruited. In this matter the discretion of local Government must be unfettered but we express the hope that Ministers on the one hand will still seek to obtain the co-operation of Europeans in these technical departments and that qualified Europeans on the other hand may be no less willing to take service under local Governments than they were in the past to take service under the Secretary of State. As a result of the acceptance of these recommendations, the Indian Educational Service is dying out and with the gradual retirement of its existing members, the history of the service which has had a brief but fine record will be brought to an end. The present organisation of education in the provinces is largely the work of members of this service, while in the sphere of higher education, it has trained many men of more than ordinary attainments.

The new Provincial Educational Services, which function under provincial control as the superior educational services, have been constituted in most provinces. These schemes vary from province to province, but it may be generally remarked that, while the rates of pay are not uniform, they consist of two main classes—class I into which the existing Indian Educational Services have been merged for the time being, and class II which may be said to represent the old Provincial Educational Service.

The existing Provincial and Subordinate Educational Services in the provinces have been affected, more in some provinces than others, by the changes which have taken place since 1919. Communal interests have influenced recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service contentment. But these results are the natural consequences of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departments in the provinces.

Hartog Committee on Education—The most notable event in recent years has been the appointment of the Auxiliary Committee of the Indian Statutory Commission, under the Chairmanship of Sir Philip Hartog, to report on the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document on the present state of education in India.

Lindsay Commission—Another Commission, which deserves mention was appointed in 1929 by the International Missionary Council to investigate the various problems connected with the higher education provided by the various Missionary bodies working in India. It was presided over by Dr A. D. Lindsay, Master of Balliol College, Oxford. The Commission visited India in 1930-31 and its report was published in 1931.

Unemployment Committee, United Provinces—This committee known popularly as the Sapru Committee from the name of its distinguished chairman the Right Hon. ble Sir Tej Bahadur Sapru was appointed by the Government of the United Provinces in 1934 to investigate the question of unemployment among educated youngmen and to suggest practical ways and means for reducing the same. The report of the committee which was published in 1936, constitutes a valuable document not only for the United Provinces but for the whole of India.

Statistical Progress

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

(a) STUDENTS

Year	In Recognised Institutions			In All Institutions (Recognised and Unrecognised)		
	Males	Females	Total	Males	Females	Total
1926-27	8,777,739	1,751,611	10,529,350	9,315,140	1,842,356	11,157,496
1927-28	9,260,266	1,899,890	11,160,156	9,778,737	1,996,445	11,775,222
1928-29	9,515,109	2,032,388	11,547,497	10,028,086	2,137,753	12,165,839
1929-30	9,743,740	2,149,853	11,898,602	10,256,914	2,258,212	12,515,128
1930-31	9,796,683	2,260,154	12,056,837	10,313,493	2,375,591	12,689,086
1931-32	9,752,937	2,369,529	12,122,466	10,273,888	2,492,649	12,766,537
1932-33	9,715,753	2,476,384	12,192,137	10,247,062	2,606,470	12,853,532
1933-34	9,866,619	2,625,177	12,491,796	10,417,839	2,755,051	13,172,890
1934-35	10,063,528	2,757,292	12,820,760	10,616,623	2,890,246	13,506,869

(b) EXPENDITURE

Year	Total Expenditure on Education in British India	
	Public Funds	Total
	Rs	Rs
1926-27	15,59,23,968	24,58,47,572
1927-28	16,45,30,915	25,82,78,819
1928-29	17,12,24,514	27,07,32,253
1929-30	17,50,03,644	27,42,82,018
1930-31	17,99,26,248	28,51,61,446
1931-32	18,84,19,016	27,18,56,622
1932-33	16,42,56,219	25,78,76,864
1933-34	15,66,36,461	26,17,65,186
1934-35	15,74,65,078	26,52,11,420

In 1934-35 the total expenditure on education in British India amounted to Rs 26,52,11,420 of which 43.7 per cent came from Government funds 15.7 per cent from District Board and Municipal funds 25 per cent from fees and 15.6 per cent from all other sources.

The average annual cost per scholar amounted to Rs 20.11.0 as follows : to Government funds Rs 9.0.7, to local funds Rs 3.11.1, to fees Rs 5.2.10 and to other sources Rs 3.3.8.

It may be noted that, out of a total of 9,722,390 boys in primary and secondary Classes of all schools, 3,725,094 were enrolled in Class I or the lowest class alone. In the case of girls,

the corresponding figures were 2,780,752 and 1,516,265. Again out of 8,456,454 boys in primary Classes 3,725,094 or 44.1 per cent were in Class I alone. These figures for girls were 2,608,553, 1,516,265 and 58.1 per cent. There is thus much wastage and stagnation in the lowest classes. Efforts are being made in all provinces to check this wastage, as is noticeable from the fact that whereas during the period 1930-33, 21 per cent of the boys completed the 4 class primary course in the normal course of four years, during 1932-35 this percentage rose to 26. But the evil cannot be eradicated so long as the number of single teacher schools which is 57.5 per cent in the case of boys' primary schools, is not appreciably reduced.

The different types of institutions with the scholars in attendance at them are shown in the following table —

Types of Institutions	Number of Institutions		Number of Scholars	
	1934	1935	1934	1935
<i>Recognised Institutions</i>				
Universities	16	16	10,762	11,003
Arts Colleges	255	259	78,069	81,307
Professional Colleges	69	69	18,917	19,498
High Schools	3,356	3,467	1,007,544	1,043,897
Middle Schools	10,074	10,617	1,314,720	1,318,107
Primary Schools	200,934	200,273	9,806,356	10,030,672
Special Schools	6,648	6,506	254,828	257,276
Total of Recognised Institutions	221,852	221,907	12,491,796	12,820,760
Unrecognised Institutions	34,872	34,906	681,094	686,109
Grand total of all Institutions	256,724	256,263	13,172,890	13,506,869

Primary Education — The primary schools are mainly under the direction of the local boards and municipalities. In recent years eight provincial legislatures have passed Primary Education Acts authorising the introduction of compulsory education by local option. All the Acts are drafted on very similar lines. If a local body at a special meeting convened for the purpose decides by a two-thirds majority in favour of the introduction of compulsion in any part of the area under its control, it may then submit to Government, for approval, a scheme to give effect to its decision. The scheme must be within the means of the local body to carry out with reasonable financial assistance from

Government. Ordinarily the age limits of compulsion are from six to ten years though provision is made for prolonging the period. Provision is also made in all the Acts for the exemption of particular classes and communities and for special exemption from attendance in cases of bodily infirmity. Walking distance to a school is generally defined as one mile from the child's home. The employment of children, who should be at school, is strictly forbidden and a small fine is imposed for non-compliance with an attendance order. The Acts generally provide that, subject to the sanction of the local Government, education where compulsory shall be free. The Madras Elementary Education Act of 1920 contained such provision, but it

has recently been amended so as to allow fees to be charged in schools under private management situated in areas where education is compulsory, reserving however a number of free places for poor pupils in such schools in areas where there are no free schools. Such in brief are the ordinary provisions of the various provincial Education Acts. Local bodies have not however shewn as yet any great alacrity in availing themselves of the opportunity afforded them by these Acts.

Compulsory Primary Education—The following tables shows the urban and rural areas in which compulsion had been introduced by the year 1934-35 —

Province	Acts	Areas under 'Compulsion'		
		Urban areas	Rural areas	No of Villages in Rural areas under compulsion
Madras	Elementary Education Act, 1920	27	7	104
Bombay	Primary Education (District Municipalities Act, 1918)	4		
	City of Bombay Primary Education Act, 1920	1		
	Primary Education Act, 1923	5	2	150
Bengal	Primary Education Act, 1919 & 1930	2		
United Provinces	Primary Education Act, 1919	36		
	District Boards Primary Education Act, 1926		25	357
Punjab	Primary Education Act, 1919	62	2 920	9 328
Bihar and Orissa	Primary Education Act, 1919	1	2	15
Central Provinces and Berar	Primary Education Act, 1920	27	173	440
Assam	Primary Education Act, 1926			
Delhi	(Punjab Act extended to Delhi, 1925)	1	9	16
Total		166	3,138	10,410

N B—This table does not include areas for which schemes of compulsory primary education are under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

The poverty of local bodies is usually the cause assigned to their diffidence to introduce compulsory education to any appreciable extent.

Secondary and High School Education—Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools, one leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial and other non literary pursuits. Some years later, what were called B and C classes were started in some schools in Bengal

but, as they did not lead to a university course, they have not been successful. In more recent years the Government of India have advocated the institution of a school final examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination, which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbersome and certain modifications were made in the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this pur-

pose. Similarly, the Administration of Delhi has established a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer, for Rajputana, Central India and Gwalior. In the Punjab the school leaving examination is conducted by a Board. But the main difficulty has not yet been touched. The University which recognises the schools has no money where with to improve them and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recognition of schools, and no connection whatever with the private unaided schools. This dual authority and this division of responsibility have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the schools by withdrawing from the University the Intermediate classes and by placing them in a number of the better schools in the State.

As has already been stated, there is now a widespread desire to cure these evils by a radical reconstruction of the school system of education. The main defect of the present system is that all pupils, even those in the primary stages, are educated on the assumption that they will ultimately proceed to a university. In consequence, very many pupils drift on to a university and prolong unduly their purely literary studies. In order to counteract this tendency, the school system should be divided into separate stages, each with a clearly defined objective released from the trammels of a university. On the successful completion of each stage, pupils should be encouraged either to join the humbler occupation of life or to proceed to separate vocational institutions, which should be provided in more ample measure than at present.

Reconstruction along these general lines was first proposed by the Punjab University Committee, and was subsequently endorsed by the Universities Conference which met in Delhi in 1934. Its details have been worked out in greater detail in an important Resolution of the Government of the United Provinces later in the same year. The matter was also considered by the Central Advisory Board of Education which generally endorsed the views expressed by the Universities Conference and suggested that expert aid should be obtained to work out the scheme of school reconstruction in the provinces. The suggestion of the Board was accepted by the Government of India who have brought out educational experts from England who are now investigating the question of educational reconstruction in the United Provinces, Punjab and Delhi. Unfortunately because of the shortness of time it was not possible for the Government of India to obtain an adequate number of experts for a simultaneous survey of educational problems throughout India.

Anglo Indian and European Education—There are schools for Europeans and Anglo Indians which are placed under the control of

special inspectors for European Schools. The education of the domiciled community has proved to be a perplexing problem, and in 1912 a conference was summoned at Simla to consider the matter. The difficulty is that European Schools are very remote from the general system of education in India. But efforts are being made to bring these schools more into line with the ordinary schools, and Indian Universities generally are affording special facilities for Anglo Indian boys who may proceed for higher education in Indian colleges.

Recently, as a result of the recommendations made by the Irwin Sub Committee of the Third Indian Round Table Conference, Provincial Boards for Anglo Indian and European Education have been constituted in almost all Provinces, and an Inter Provincial Board has also been constituted the first meeting of which was held in January 1935 under the auspices of the Government of India. The office of the Inter Provincial Board has been located in Delhi. The present Secretary of the Board is Mr F F C Edmonds, M.A., M.Sc., late Inspector of Schools Coorg and Bangalore. He is also the Chief Inspector of Anglo Indian and European Schools in India.

Medium of instruction in public schools—The position of English as a foreign language and as a medium of instruction in public schools was discussed by a representative conference which met at Simla in 1917 under the Chairmanship of Sir Sankaran Nair, the then Education Member. Although it was generally conceded that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English medium was defended by some on the ground that it improved the knowledge of English. The result of the conference was therefore inconclusive. Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in certain subjects. There seems to be no doubt that the use of the vernacular as the medium of instruction and examination is gradually increasing all over India.

The main difficulty, however, is that school classes have often to be split up at considerable expense into a number of language sections. The problem needs further investigation, especially in the direction of evolving a common script for at least a single province. If not for the whole of India. In this connexion, Mr A. Latifi, I.C.S., has done good pioneer work in respect to the Romanised Urdu Script.

Boy Scout Movement—A happy development in recent years has been the spread of the boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline.

It is gratifying that intimate contact is being established between the Boy Scout Movement and the Junior Red Cross and St John's Ambulance Associations as well as with movements for social uplift and improvement of village conditions.

Girl Guide Movement—This movement is making steady progress. There is, however, a lack of those competent and willing to give instruction.

Medical Inspection—Arrangements have been made for medical inspection of scholars but progress has been hampered by the shortage of funds and the continued indifference of parents. In the United Provinces schools are now inspected by officers of the Public Health Department. In Madras, the scheme of medical inspection of schools has been made compulsory in all Government institutions and it has been made a condition of recognition that all secondary schools should introduce the scheme. In Burma the grants in aid for medical inspection have been temporarily suspended on account of retrenchment, but most medical officers have continued the inspection of pupils without remuneration. In Bihar & Orissa certain posts of school medical officers were abolished in 1932, for the same reason, but it has since been found possible to revive them. There is, however, still need for adequate facilities for the treatment of children suffering from diseases. In a few towns in the Punjab, anti-factory arrangements exist not only for medical inspection but also for effective treatment, and an extension of this useful scheme is under contemplation.

The activities of Junior Red Cross and St. John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in the health of others.

Professional and Technical Education—A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Its buildings were seriously damaged by the Bihar earthquake in 1914. The Institute has therefore been transferred to New Delhi, where new buildings have been constructed for it.

Conferences have been held at Pusa, Simla and Poona, with the object of providing a suitable training in agriculture. A Royal Commission on Agriculture has submitted its report and as a result of its recommendations an Imperial Council of Agricultural Research has been established by the Government of India at their headquarters. Among commercial colleges, the most important is the Sydenham College of Commerce in Bombay. Industrial institutions are dotted about India, some maintained by Government, others by municipal bodies or local boards and others by private bodies. The most important are the Victoria Jubilee Technical Institute in Bombay, The Indian Institute of Science at Bangalore, the product of generous donations by the Tata family. The tendency in recent years has been to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Silpur, Poona, Madras, Rangoon, Patna and Benares each of which except that at Roorkee is affiliated to a university. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the larger towns where not only architecture and the fine arts are studied, but also practical crafts like pottery and iron work. There are two forest colleges at Dehra Dun and Coimbatore and a Technical Institute is in existence at Cawnpore and a Mining School at Dhanbad. Mining and metallurgy are also taught by the Mining and Metallurgical College at Benares which provides a 4 year course leading to a B.Sc. degree in each subject. Provision has been made by the Government of India for the training of cadets for the Mercantile Marine Service and a ship I.M.I.S. Dufferin has been stationed for this purpose in Bombay waters.

The following table shows in summary form the number of such institutions and of students attending them—

Type of Institution	1934		1935	
	Institutions	Students	Institutions	Students
<i>Colleges—</i>				
Training	22	1,696	23	1,701
Law	12	7,274	13	7,256

N B—Figures against training colleges include those of the training colleges attached to the Universities at Benares and Aligarh and of the teaching department of Rangoon University

Indian School of Mines

The Government of India maintains the Indian School of Mines at Dhanbad for high grade instruction in Mining Engineering and Geology. A Diploma (A.I.S.M.) is granted and certain statutory privileges are enjoyed by Diploma

holders in respect of the examinations of the Department of Mines for the Coal Mine Managers Certificates of Competency. There are three year Certificate Courses but the full Diploma Course occupies four years.

Universities.

The first University in India, that of Calcutta, was founded in 1857. Between 1857 and 1887 four new Universities, at Bombay, Madras, Lahore and Allahabad were added. These five universities were all of the affiliating type. The Government of India had recognised in their resolution of 1913 the necessity of creating new local teaching and residential universities in addition to the existing affiliating universities. The development of this policy was accelerated by the strength of communal feeling and the growth of local and provincial patriotism, leading to the establishment of a number of teaching universities. The new type of universities has since been strongly advocated by the Calcutta University Commission which has offered constructive proposals as to the lines to be followed in university reform.

Calcutta University Commission—The report of the Calcutta University Commission

was published in August 1919.

The Commission gave detailed suggestions for the reorganisation of the Calcutta University, for the control of secondary and intermediate education in Bengal and for the establishment of a unitary teaching University in Dacca. These measures concerned only Bengal but it was generally recognised that some of the criticism made by the Commissioners admit of a wider application. Committees were consequently appointed by the Universities of Madras, Bombay, Patna and the Punjab to consider the findings of the Commission. In the United Provinces two committees were appointed, one to prepare a scheme for a unitary teaching University at Lucknow, the second to consider measures for the reorganisation of the Allahabad University and the creation of a Board to control secondary and intermediate education.

The Punjab University Enquiry Committee was appointed in 1932 and submitted its report in the following year. The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever increasing number of its students many of whom are ill fitted for such education. The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education."

Statistics of Universities—1935

There are now 18 Universities in India, of which two are situated in Indian States. The following table gives the latest available figures and certain other particulars about these Universities —

University	Type (a)	Original date of foundation	Faculties in which degrees are awarded (b)	No of Members of Teaching Staff			No of Institutions			No of Students			No of Students in Arts and Science
				In University Departments	In Constituent Colleges	In Affiliated Colleges	University Departments	Constituent Colleges	Affiliated Colleges	In University Departments	In Constituent Colleges	In Affiliated Colleges	
1 Calcutta (c)	Affiliating and Teaching	1857	A, Sc, Ed, Eng, M, L, Com, O	213	1,409	60	15	—	1,333	28,468	—	—	2,588

17 Agra	Affiliated	1927	A Sc L Com, Ag			427			15			3,720	1,595
18 Annamalain (i)	Unitary	1929	A Sc, O	71			1			508			82

(a) An *Affiliated* University is a University which recognises external colleges offering instruction in its courses of studies, a *Teaching* University is one in which some or all of the teaching is controlled and conducted by teachers appointed by the University, a *Unitary* University is one, usually localised in a single centre, in which the whole of the teaching is conducted by teachers appointed by and under the control of the University

(b) *Faculties* — A = Arts, Ag = Agriculture, Com = Commerce, Ed = Education (Teaching), Eng = Engineering, F = Forestry, F A = Fine Arts, L = Law, M = Medicine, O = Oriental Learning, Sc = Science, Tech = Technology, Th = Theology

(c) Reconstituted in 1904

(d) Reconstituted in 1923

(e) Reconstituted at Hyderabad (Deccan)

(f) Reconstituted in 1933

(g) Situated at Annamalainagar, Chidambaram

(h) Reconstituted in 1921

(i) Situated at Waltair (South India)

Intermediate Colleges—One important part of the Calcutta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of India and incorporated in the Acts establishing the Lucknow and Dacca and reconstituting that of Allahabad, namely, the separation of the intermediate classes from the sphere of university work and of the two top classes of high schools from the rest of the school classes. The separated classes have been combined together and the control over them has been transferred from the University to a Board of Secondary and Intermediate Education. Such a Board was constituted for the Dacca University area by a notification of the Government of Bengal in 1921.

The United Provinces Board was constituted by an Act passed in the same year. The Aligarh Muslim University has, however, reverted to the old system under which the Intermediate classes form part of the University, and the separate Intermediate College has been abolished. In Ajmer Merwara, the Intermediate classes are under a separate Board which operates in Rajputana, Central India and Gwalior. Intermediate Colleges of the new type have also been established in the Punjab but they are affiliated to the Punjab University.

Inter-University Board—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter University Board came into being during 1925. All the Universities in India are now members of the Board. Its functions are—

(a) to act as an inter university organisation and a bureau of information,

(b) to facilitate the exchange of professors

(c) to serve as an authorised channel of communication and facilitate the co ordination of university work,

(d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries,

(e) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education

(f) to act as an appointments bureau for Indian universities

(g) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities

The Board has not yet had much influence on University policy in India but it has done a considerable amount of useful work in collecting information and in stimulating thought regarding current University problems.

Education of Indian Women and Girls—There is still a leeway to be made good. All the influences which operate against the spread of education amongst the boys are reinforced in the case of women by the *purdah* system and the custom of early marriage.

Arts colleges, medical colleges, and the like admit students of both sexes, and a few girls attend them. The Lady Hardinge Medical College for Women at Delhi gives a full medical course for medical students. The Shreemati Nathibai Damodhar Thackersey Indian Women's University was started some ten years ago by Professor Karve. It is a private institution and is doing good pioneer work.

The All India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All India Women's Education Fund Association has also been established in connection with this Conference. This association appointed in 1930 a special committee to enquire into the feasibility of establishing a central Teachers Training College of a specialised Home Science character. This committee recommended the establishment of such a college "on absolutely new lines which would synthesise the work of existing provincial colleges by psychological research. The proposal was adopted by the Association and a college, called the Lady Irwin College, has since been established in New Delhi.

The comparative statement below shows the state of women's education during 1934-35—

	No of Institutions		Enrolment		Total No of Females under instruction	
	1934	1935	1934	1935	1934	1935

(a) Includes both District Board and Municipal Funds

Education in the Army—The Army in India undertakes the responsibility of the education of certain sections of the community. Its activities are directed into various channels with certain definite objects, which may be summarised as follows—

(i) the education of the soldier, British and Indian, in order to—

(a) develop his training facilities,

(b) improve him as a subject for military training and as a citizen of the Empire,

(c) enhance the prospects of remunerative employment on his return to civil life

(ii) The fulfilment of the obligations of the State to the children of soldiers, serving and ex-service (British and Indian)

(iii) The provision, as far as possible, of training for the children of soldiers, who have died in the service of their country

(iv) The creation of a body of Indian gentlemen educated according to English public school traditions, which should provide suitable candidates for admission to the Royal Military College Sandhurst

Doon School—The efforts of the Indian Public Schools Society, which owes its origin to the initiative and enthusiasm of the late Mr S R Das have culminated in the establishment of a school at Dehra Dun. The school will attempt to develop in an atmosphere of Indian culture and social environment, the best features of English Public Schools. It was opened by His Excellency the Viceroy (Lord Willingdon) in October, 1931. The Society has been fortunate in securing the Chand Bagh Estate at Dehra Dun for the location of the school. In order to provide for extension, the Society has also acquired the Skinner Estate which adjoins the Chand Bagh Estate. There are at present about 250 pupils, who are

distributed in four houses. Mr A E Foot continues to be the headmaster. He is assisted by fifteen masters, of whom six have been appointed from England. The school prepares candidates for the Senior Cambridge examination. The Board of Management of the Society which maintains the school includes among others the Hon ble Sir Frank Noves (*Chairman*) the Hon ble Kunwar Sir Jagdish Prasad Sir Pheroze Sethna Mr J G Talbait Mr J B Parkinson and Mr M W Scotts (*Honorary Secretary*)

Indigenous Education—Of the 13,506,860 scholars being educated in India 686,109 are classed as attending 'private' or 'unrecognised institutions'. Some of these institutions are of importance. The Gurukula near Haridwar and Sir Rabindra Nath Tagore's school at Bolpur have attained some fame and the numerous monastery schools of Burma are well known. There is also an Indian Women's University at Bombay to which reference has been made under the education of Indian women and girls. This University provides instruction through the medium of vernacular, English being, however, a compulsory subject. Four colleges are affiliated to the University which are situated at Bombay, Poona, Aligarh, Dabod and Baroda. Connected with every big mosque in northern India there is some educational organisation and the schools attached to the Fatehpuri and Golden Mosques at Delhi and the Dar ul Uloom, Deoband, are noted. These institutions generally have a religious or 'national' atmosphere.

The Ayurvedic and Unani Tibbia College, Delhi, founded by the late Hakim Ajmal Khan, is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also gives some training in surgery.

BOY SCOUTS

The Boy Scouts movement, initiated in England by Lord Baden Powell (the Chief Scout) has spread widely in India, both among Europeans and Indians. The Viceroy is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas. The aim of the Association is to develop good citizenship among boys by forming their character—training them in habits of observation, obedience and self reliance—inculcating loyalty and thoughtfulness for others—and teaching them services useful to the public and handicrafts useful to themselves.

INDIAN HEADQUARTERS

Chief Scout for India—His Excellency The Most Honourable the Marquess of Linlithgow K.T., G.M.S.I., G.M.I.E.

Chief Commissioner—Captain Nawab Sir Muhammad Ahmad Said Khan K.C.S.I., K.C.I.F., M.B.E., of Chhatari.

Deputy Chief Commissioner—Rai Bahadur G. Dutta.

General Secretary for India—N. N. Bhose Esq. B.A. (Cantab.), Barrister at Law, D.C.O.

Travelling Secretary for India—G. T. J. Thaddaeus, Esq., B.A., D.C.O. (S. & R.), Ak. L. (for India).

Headquarters Council for India—

President—The Chief Scout for India.

Chairman—The Chief Commissioner (ex officio).

Members—The Treasurer (ex officio).

The Deputy Chief Commissioners (ex officio).

Six Members elected by the Provincial Delegates to the Triennial All-India Conference.

Six members elected by State Delegates to the Triennial All India Conference.

Secretary—The General Secretary (ex officio).

The Co-operative Movement.

Rural Poverty—The outstanding feature of Indian rural economy that is bound to arrest the attention of any observer is the appalling poverty of the rural population. The various estimates official and non official, that have been made of the income per head of population in India at various times leave the matter absolutely in no doubt. The Central Banking Enquiry Committee estimates that the average income of an agriculturist in British India does not work out at a higher figure than Rs 42 a year. The vast magnitude of this evil will be better realised when we take into account the predominance of the agricultural population in India. In 1891 61 per cent of the total population of the country lived on agriculture; this percentage rose to 66 in 1901 and to 73 per cent in 1921. In 1931 the percentage has fallen a little to 67. The poverty of the agriculturist may be due to a variety of causes, but we cannot ignore the fact that agriculture has in a large measure ceased to be an industry worked for profit; the cultivator labours not for a net return but for subsistence. The extent of an **average holding** which works out at about 6 acres for an agricultural family of 5 persons is too inadequate to maintain it in ordinary comfort even with the low standard of living which is so characteristic of the rural population of India. Moreover the Indian cultivator is in a large measure exposed to the vicissitudes of seasons and the **vagaries of the monsoon**. In every 5 years there is but one good year, one bad year and three indifferent years. These unfavourable conditions might be mitigated to some extent by a well conceived policy of **irrigation** by the State, but so far, of the total cultivated area in the country about 16 per cent only has irrigation facilities from rivers, tanks or wells while the remaining 84 per cent depends merely on rainfall. The frequency of failure of crops, owing to drought and floods, frost and pests coupled with the low vitality and high mortality of the live stock, render the economic position of the cultivator worse still. The inadequacy of the **subsidiary occupations** to supplement the slender income from agriculture contributes further to his extreme economic weakness. He has sufficient spare time on his hands to devote himself to subsidiary occupations but he has been exposed to the full blast of competition of forces from the rest of the world and many of the industries on which he relied in the past have suffered largely from or been wiped out by the competition of machine made articles. The recent fall in the world prices of agricultural produce has affected him powerfully for he is now being drawn steadily into the sphere of influence of markets both national and international and he has neither the organisation nor the credit facilities to help him as in countries like the United States of America and Canada and several European countries. In addition to these numerous difficulties the Indian agriculturist has another serious handicap in this that

he is largely illiterate. The percentage of literacy in India is still very low being only 8 per cent and any progress in agriculture is well nigh impossible without the background of general education. All these factors lead to the most outstanding feature of Indian rural economy—the chronic and almost hopeless **indebtedness** of the cultivator. The Central Banking Enquiry Committee has estimated that the total rural indebtedness in India is about Rs 900 crores. Though indebtedness of the agricultural population has been there from old times, it is acknowledged that the indebtedness has risen considerably during the last century and more especially during the last 50 years. This colossal burden of debt is the root problem which has got to be faced in any attempt towards the economic regeneration of the masses. Numerous causes have been advanced to account for rural indebtedness and we already have pointed out some of the general causes which give rise to it. A peculiarity, however, that we notice is that the debt which remains unpaid during the lifetime of the cultivator who contracted it passes on as a burden to his heirs so that many agriculturists start their career with a heavy burden of ancestral debt which they in their turn pass on with some further increase to their successors. Ignorance and improvidence, extravagance and conservatism have further been held forth as the reasons for the continued growth of this heavy load. A marriage festival in the family tempts him to launch out into extravagance while funeral feasts prove no less costly. All these factors—the uneconomic nature of the agricultural industry, chronic and heavy indebtedness and illiteracy form a thoroughly depressive background of Indian rural economy.

Genesis of the Movement—It is no wonder under the circumstances detailed above to find that the Indian agriculturist has constant recourse to borrowing and that too not only for any kind of improvement that he may contemplate but for his current agricultural needs as also for periodical unproductive purposes such as weddings and funeral feasts. The absence of any banking organisation in the country side has driven him into the arms of the **sowcar** or the mahajan who, while proving a very accommodating person, has exercised a grip on him from which it has been found almost impossible to extricate him. The usurious rates of interest charged, coupled with various devices which increase still further the actual rate of interest, and the numerous services which the sowcar performs as a retail tradesman and the buyer of his produce, make him the dominant force in the village, reducing the agriculturist to the position of a serf, toiling for generation after generation, without ever hoping for a release from his clutches, getting bare subsistence as a reward for all the trouble that he might take and therefore becoming listless, fatalistic and absolutely unprogressive. In 1883 the Land Improvements Loans Act was passed and this was followed in the next year

by the Agriculturists Loan Act enabling Government to advance loans repayable by easy instalments and at low rates of interest for improvements and also for current agricultural needs. In 1892 Sir Frederick Nicholson submitted a report to the Madras Government on the possibility of introducing land and agricultural banks and the discussion thus initiated by him was continued by Mr Duperrex of the U. P. in his 'Peoples Banks for Northern India'. The caste system of the Hindus had the ideas of common brotherhood among the Moslems were evidences of the peoples natural aptitude for co operation and the *madras* of Southern India furnished a practical proof of this aptitude. The Government of India in 1901 appointed a committee to consider the question of the establishment of agricultural banks in India and the report of this committee resulted in the passing of the Co operative Credit Societies Act of 1904. The co operative movement was thus launched in India on the 25th March, 1904. The Act aimed at encouraging thrift self help and co operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies for small and simple folks with simple needs and requiring small sums only. Knowledge of and confidence in their fellow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same tribe class or caste. In order to provide facilities in urban areas for the small man, urban societies were also permitted. The Act introduced the principle of unlimited liability for rural societies following the Raiffeisen system in Germany, though it permitted urban societies to choose the Schulze Delitzsch model. The local Governments were empowered to appoint special officers called Registrars of Co operative Societies, whose duty it would be to register societies formed under the Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well. The seed thus sown has grown to day in the course of 30 years into a fine tree with twigs and branches, spread out in many directions. In spite of several weaknesses in the co operative movement in India to day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country side and has led to a steady improvement in various directions of the life of the Indian cultivator. Moreover the use of the vote, the elective system, self help, self reliance, compromise, gives and takes work on an organized plan, rounding of angularities are great items in the training up of a citizen and the co operative societies have been great schools for political and civic education. Since the launching of the movement in 1904, there have been amendments of the co operative law and committees and commissions of enquiry to remedy defects and to suggest further lines of action. These we shall note later on.

Growth of Co operation—In the first few years of the movement the number of societies grew up very slowly but the growth was considerably accelerated from 1910 and the average

number of societies from 1910 to 1915 was about 1,100. The pace of growth still further quickened and now there are 93,160 agricultural societies and about 11,436 non agricultural ones. Table 1 shows the distribution of these societies by provinces. It will appear from the table that progress in different parts of India has not been uniform. Bengal, the Punjab and Madras have the largest number of Societies—while the other major provinces like Bombay, Bihar and Orissa, the United Provinces and the Central Provinces, Burma and Assam show distinctly smaller figures. The Punjab with about 22,000 societies stands first in the number of societies (88) per one lakh inhabitants while Bengal which has a larger number of societies than the Punjab stands second in that respect with 46. The progress in smaller areas like Coorg and Ajmer Merwara, must be regarded as very satisfactory in view of their small population, since the number of societies per one lakh inhabitants works out in their case at 128 and 122 respectively. It is satisfactory to note that the co operative movement has spread not only among the British Indian Provinces but also in Indian States and compared to the total population, Bhopal and Gwalior lead in this matter though the premier States of Kashmir, Mysore, Baroda and Hyderabad have also made considerable progress. Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1935 at 44 lakhs. Taking the normal family at a little under 5, it is clear, therefore, that more than two crores of the people of India are being saved by this movement. There is no single movement in the country fraught with such tremendous possibilities for the uplift of masses as the co operative movement and there is no single movement with such a large percentage of the population affected by it. Though the Punjab leads in the number of members of societies (30) per one thousand inhabitants, Bombay comes next with 26.8, while Madras and Bengal rank thereafter. This shows that the size of societies varies in different provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society as compared with the other provinces of British India. Of the smaller areas Coorg takes a leading place with 80 members per one thousand inhabitants while Travancore has an average of 39. Membership is a much better test in many respects of progress than the number of societies and from this point of view, the progress in Bombay, the Punjab, Coorg, Travancore and Bhopal must be regarded as distinctly satisfactory. There is, however, a third aspect also of the growth of the movement. Merely the number of societies, or the membership in the societies is not an index of the work that is being done and of the benefits which are being conferred by the movement on the population affected. The societies are predominantly credit organisations or rather small banking institutions and the part that they play can be better appreciated from their working capital than from merely the number of members. In this direction also we must note the marvellous progress so far achieved by the movement. From about Rs. 68 lakhs, which was the average up to 1910, the working capital has advanced very rapidly and stands to day at about Rs. 97

crores. It is pleasing to note from Table 3 that this large sum has been derived mostly from non Government sources. The share capital, the reserve fund and the deposits from members together contribute about Rs. 38 crores and this is really owned capital or the members own money. The provincial or central banks and other societies contribute a little less—29 crores while the non members or the outside public contribute over 29 crores. This latter item shows to a remarkable extent the growth of public confidence in co operative institutions and speaks well in general of the management of the societies and the very useful purpose they serve in the banking organisation of the country. The distribution of the working capital by provinces and States gives us a further insight into the progress made in this direction by the co operative movement in different parts of India. The Punjab and Bombay lead in this respect with 117 annas per head of population. Madras and Bengal fall behind with 53 and 57 respectively. Among the smaller areas, Ajmer Merwara comes out first with 142 annas per head of population while Coorg follows with 122. Of the Indian States, Indore takes the first place with 91, while Mysore, Baroda and Bhopal follow with 54, 50, 51 respectively. Bombay stands an easy first in the matter of deposits from members which amount to over three crores out of a total working capital of about 17 crores and this is one of the best tests of the success of a co operative society. It is obvious from a glance at the figures in the tables that there has been very rapid progress in the number of societies, in their membership and in the working capital of these societies. The Punjab, generally speaking, leads in many respects with Bombay coming close behind. The smaller areas and the Indian States have also achieved considerable progress though the movement there started comparatively later. The agricultural societies predominate in all the provinces and States while non agricultural, that is, urban societies show a much slower development. While there is much room for satisfaction at the phenomenal growth of the movement in rural and urban areas, it must be admitted however, that merely the figures of the number, membership and working capital are not enough to base conclusions upon. But before we proceed further, we must now explain the chief component parts of the structure, as it has now been built up, of the co operative movement in the country.

Financial Structure of the Movement—Apart from the comparatively few co operative societies at present working in India for non credit purposes, it must be recognised that whether in urban or rural areas, a co operative society largely means a small bank or a credit institution for providing financial accommodation to its members on a co operative basis. Of these credit institutions, by far the greater proportion is rural. The rural credit society has, for its main purpose, the financing of the agriculturist and as such it needs funds. The original idea of co-operative credit lies in making available to the needy the surplus of the well to do brethren through the medium of the society but in Indian villages, the well to do and the

needy rather form distinct groups, the former playing or trying to play the sower. Thus instead of comprising more or less all sections of the population of the village, the society is rather made up of the needy section only, at any rate, very largely. Even otherwise, the slender savings of the well to do would not be enough to meet the wants of the needy and each village society is not therefore, able to be self sufficient, making available the deposits of its well to do members as loans for the needy ones. The heavy load of unproductive debt of the average Indian farmer, his habit of investing his savings, if any, in lands and ornaments, and his illiteracy and consequent lack of the banking habit soon made it apparent that the rural credit societies could not be expected to raise the required funds in deposits either from members or locally. The question of funds for the working of a rural co operative Society thus becomes a vital question. Indeed Central banks have therefore been brought into existence at the district head quarters in order to raise money from towns and make them available to the primary rural societies. Following up the idea further, it has been found necessary to have a provincial bank at the provincial head quarters to serve as a balancing centre for the central banks and to make available larger funds for the primary societies through the central banking institutions. The financial structure of the co operative movement is thus largely composed of three parts—(i) the Agricultural Credit Society, (ii) the central financing agencies and (iii) the provincial banks. Obviously one more part in the structure seems possible and desirable, namely, an Apex All-India Co operative Bank. So far, however, such an All India Bank has not been started and the provincial banks have been content with an All India Provincial Co operative Banks Association.

Agricultural Credit Societies—The success of these societies is closely related to their very peculiar constitution. In an ordinary joint stock company, a member is liable only to the extent of the value of his share holding and his liability is therefore limited, but in the case of agricultural credit societies, the liability is unlimited that is to say, members are jointly and severally liable to the creditors of the society for the full amount of the debts incurred by it. Such a liability would never be acceptable to any person, unless he was imbued with the broader vision of brotherhood between members and unless he himself had an active voice in the management of the society and had a more or less full knowledge of the character and antecedents of his fellow members. Co operative credit is the capitalisation of character and unlimited liability is the great instrument to secure the admission into a society as members of these persons only who by their character and antecedents deserve to be taken into that brotherhood which imposes such an obligation as unlimited liability on all so that they either swim or sink together. To secure success, therefore the proper selection of members is of the utmost importance and it has been unfortunate that in India this has not been in practice as well kept in view as it should have been, in the eager desire to promote the formation of more and yet more societies.

Credit is a blessing only if turned to productive account, if used up for unproductive purposes, it is a curse. It would enrich the producer but it would only impoverish the consumer. It is capable of fruitful employment by the intelligent but it leads the illiterate and the ignorant towards perdition. The Indian agriculturist needs money for productive purposes, such as his current agricultural needs, land improvement, purchase of stock and implements, manures and seeds as also for unproductive purposes, such as repayment of old debts, weddings and funerals. He thus requires credit not only as a producer but also as a consumer—a producer who hardly makes profits from his industry and a consumer who has no past savings to enable him to tide over a bad period, but who is a perpetual borrower ready to live for to-day and letting the to-morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need of scope for improvements in his methods. Under such circumstances it is imperative for the management of the rural co-operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose. And yet it is in this respect that there is considerable scope for improvement.

The funds of an agricultural credit society are raised from entrance fees, share capital, deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund. The income from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. The volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial position. The ideal placed before these societies is the development of members' deposits to the extent of making the society financially self-sufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them and are, therefore, eminently desirable. Attempts are every where made to encourage them but the response has been small except in the province of Bombay where it forms about 1/5 of the total working capital. Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present.

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of the profits of these societies to reserve funds, and thereby provide against unforeseen losses, bad debts and losses on the realisation of certain assets such as by investment depreciation. The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital.

The funds collected by the agricultural societies in India at present are by no means negligible. They aggregate to over 34 crores

of rupees. Their financial position as on the 30th of June 1935 stood thus—

	In thousands of rupees
Share capital	4,29.96
Reserve Fund	9,17.97
Deposits	3,16.58
Loans	17,57.84
Total Working Capital	34,22.35

The figures show that these tiny agricultural societies in India work with over Rs 16 crores of their own capital (including members' deposits in this head) as against their outside borrowed capital of about Rs 18 crores. The owned capital was thus about 47 per cent of their total working capital, and this proportion is rising steadily as years pass by.

Central Financing Agencies—The formation of banks in urban areas on co-operative principles with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co-operative Act of 1904 was amended in 1912 and the Co-operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies. Soon thereafter the number of central financing agencies grew rapidly all over the country, especially in the United Provinces. The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them. On the 30th June 1935 the number of central banks was 61.

There are four main sources from which a central bank derives its working capital which stood in 1934-35 at 29.4 crores: (a) Share capital, (b) Reserve, (c) Deposits, (d) Loans.

The paid up share capital and reserves of central banks constitute the owned resources of these banks as distinguished from borrowed resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans. It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8. Deposits from members and non-members constitute the bulk of the borrowed capital of central banks. The total amount of deposits held by central banks in the year 1934-35 from individuals and other sources amounted to Rs 17.1 crores, and from primary societies to Rs 2.8 crores. Deposits in central banks are mainly of two kinds, viz., savings and fixed. Current deposits are not universal but confined only to selected central banks in selected areas. The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available and where loans for long periods are advanced, the periods of deposits are also comparatively

long In addition to funds obtained by deposits central banks raise loans either from outside banks, from other central banks from the local provincial bank or from Government. The total amount of loans held by the central banks in 1934-35 from outside banks from other co-operative banks and from the provincial banks was Rs 3.0 crores and from Government Rs 38 lakhs. Excepting in Burma central banks in other provinces of British India do not directly borrow loans from Government the central banks of Indian States, excepting Mysore and Travancore do to a greater or less extent hold loans from Government while in Gwalior, loans from Government constitute the most important item of the total working capital. Borrowings from outside banks are generally confined to accommodation obtained from the Imperial Bank of India against Government Securities or Promissory Notes executed by societies in favour of the central bank and endorsed by the latter in favour of the Imperial Bank. This accommodation is, however, limited and advances from other joint stock banks are also now rare. The main source of loans is, therefore the provincial bank, and where a provincial bank exists, the central banks are generally prohibited from having any direct dealings with either the Imperial Bank or any other joint stock bank or with one another. This rule is however not rigidly observed in the Punjab and Madras several central banks in the country, due to their long standing, now possess sufficient resources to be independent of any outside financial assistance but they all continue credit arrangements mainly with the provincial bank on which they rely for emergencies.

In the initial stages several central banks developed from ordinary urban societies which granted advances to individual shareholders. A few of such central banks have continued the practice and the amount advanced by central banks to individual members during the year 1934-35 was Rs 1.15 lakhs chiefly in the Punjab Bombay and Madras. This practice however is gradually being abandoned as the chief function of a central bank is to finance societies and to serve as their balancing centre. The total advances made by central banks to societies at the end of the year 1934-35 amounted to over Rs 8.5 crores.

After meeting management expenses the profits of central banks are distributed as allocations to reserves and dividends to shareholders. The combined net profits of the 615 central banks of the country during the year 1934-35 amounted to Rs 39 lakhs on the total working capital of Rs 29 crores the rate of dividend paid varied from 4 to 10 per cent. In different parts of the country but the most usual rate paid was 6 per cent per annum.

Provincial Co-operative Banks—In India, at present, all the major provinces except the United Provinces have apex banks functioning in them. There are apex institutions in two of the Indian States, Mysore and Hyderabad, though in the others also there are institutions corresponding to the apex bank or functioning as such. The Bank in Burma being in liquidation there are ten such institutions in all out of which, eight are in British India and two in the

Indian States. The constitutions of these institutions vary considerably, but the functions of all these institutions are more or less the same, namely, the co-ordination of the work of the central banks and provincialization of finance in them. It is found that in a large majority of the apex banks, the constitution is a mixed one, that is, both in the general body of the banks as well as in the directorate, there are individual shareholders as well as representatives of co-operative societies and central banks.

All apex banks both in British India and in the Indian States depend for their working capital largely on deposits from the affiliated co-operative societies as also from the public. It is therefore, thought necessary to insist upon the maintenance of fluid resources on a certain scale and in some provinces the Government of the province has prescribed definite rules with regard to the maintenance of fluid resources. The period for which deposits are accepted determine the maximum period for which they can lend out these borrowed funds to their clients and in every province the apex bank has fixed for itself a maximum term beyond which no loans are, in general sanctioned to the borrowing client. The following figures will clearly show the position and transactions of the apex banks in 1934-35—

Provincial Banks, 1934-35

	In thousands of rupees
Working Capital—	
Share Capital	73.99
Reserve and other funds	81.48
Deposits and loans—	
from individuals	5,73.35
from Provincial and Central banks	3,43.50
from societies	84.54
from Government	6.87
Total	11,63.73
Loans made during the year to—	
Individuals	33.24
Banks and societies	1,57.23
Total	6,92.47
Loans due by—	
Individuals	19.96
Banks and societies	4,77.66
Total	4,97.62

While accepting deposits from co-operative banks and the general public, most of the apex banks have also dealings in current account with the latter. The Punjab bank does not encourage such accounts with individual non-members, as it does not wish to enter into competition with central banks. Apex banks also generally carry on ordinary banking business, such as collecting hundis and dividends from companies and collecting the pay and pensions of public servants. The provincial banks of Bombay, Madras and the Punjab have floated long term debentures. The Bombay bank has so far issued debentures of the value

of Rs 9.8 lakhs and these debentures are recognised as a trustee security. The bank at Madras has floated debentures of the value of 2.18 lakhs on the security of a floating charge of the general assets of the bank, while the Punjab bank has issued debentures of the value of 5 lakhs. As in every banking institution these banks also are frequently troubled with surpluses and deficits, though at different times in the different institutions. There is therefore interlending of surplus funds between these apex banks, and during the period of shortage of funds, deposits are accepted from surplus banks and some of them call for special season deposits allowing favourable rates of interest to tide over the period of shortage. The All India Provincial Co-operative Banks Association enables the member banks to ascertain which of them are surplus in the period and by correspondence to arrange for inter provincial borrowings.

Overdues—Among the most important tests of the success or otherwise of a co-operative

credit society is undoubtedly the promptness in repayment of loans by members and it is in this respect that one has to recognise that in India, the societies have not attained any very great measure of success. On the 30th June 1935, the overdue loans in agricultural societies amounted to Rs 11,91,26,983 as compared with Rs 13,11,26,983 the year before the working capital of the agricultural societies was Rs 34,22,34,574, the loans due by individuals were Rs 26,49,52,879. The overdue loans were therefore 35 per cent of the working capital and 45 per cent of the total loans due by individuals. The position is however rendered more serious when one realises that the figures are considerably obscured by book entries and extensions of the date of repayment and in some cases by the farmers borrowing from the society to pay the society's dues and that the percentages represent merely an average for all India. The following table shows the position by different provinces on the 30th June 1935.

Overdue Loans in Agricultural Societies, 1934-35
(in lakhs of rupees)

Province	Working Capital	Loans due by individuals	Overdue loans by individuals	Percentage of overdue loans to	
				Working capital	Loans due
Madras	5.47	1.25	2.29	42	54
Bombay	4.04	3.75	1.62	41	48
Bengal	6.09	4.18	3.11	51	74
Bihar and Orissa	2.09	1.61	1.11	63	81
United Provinces	1.01	.74	.44	44	70
Punjab	8.64	6.81	.33	4	5
Purma	1.25	.81	.54	43	65
Central Provinces and Berar	1.39	1.10	.87	63	79
Assam	.34	.23	.22	65	96
Mysore	.57	.48	.26	46	54
Poona	.36	.30	.14	39	47
Hyderabad	.82	.60			
Gwalior	.11	.49	.39	1.26	80
Kashmir	.57	.43	.6	.2	14
Travancore	.36	.29	.20	.56	60
Others	.91	.79	.12	.13	15
Total	34.22	26.50	11.91	35	45

The position has since June 1935 grown more serious, since the fall of prices of agricultural produce and the world crisis and trade depression have reduced the repaying capacity of the agricultural borrower considerably and increased the terrible level of overdue loans in rural credit societies. This continued growth of overdue loans is an ominous portent and reflects very badly on the soundness of the co-operative structure. The loans having been based on the basis of the assets of members, the ultimate solvency of the societies is beyond dispute but severe pressure on members and the consequent wholesale liquidation of societies would react very seriously both politically and economically. The causes that have led to this

phenomenon, which menaces the entire existence of the co-operative movement are chiefly to be found in not basing the loans sanctioned on the repaying capacity of the borrowing member in sanctioning loans for unproductive though perhaps necessary social or domestic purposes or for the redemption of old debts and generally in the uneconomic nature of the agricultural industry. The loose scrutiny of the purposes stated in the loan applications and the absence of a careful watch on the way the loan is spent by the members, which must be the case, where almost every member is a borrower or a surety to other borrowers and where the societies are composed almost wholly of the needy section of the village, the well-to-do standing aloof, the

remissness in exerting pressure and in taking action against the defaulter, even when he is wilfully defaulting, add considerably to the growth of this menace of excessive overdues. The central financing agencies are more concerned with the assets that in the last resort are the security for their lendings and, with more funds than they could use, are more eager even than the Registrar himself for organising new credit societies.

Land Mortgage Banks—The loans advanced by co-operative societies to their members and by the central financing agencies to their constituent societies are, from the very nature of the source from which they derive the bulk of their finance, for short or intermediate terms only. By concentrating upon the growth and multiplication of rural credit societies and thus upon facilities for short and intermediate term loans, the co-operative movement did not provide for the redemption of old debts or for increasing the earnings of agriculturists which alone would prevent any further increase in their debts and pave the way for the paying off of the old ones. It does not seem to have been adequately realised that the removal or the lightening of the heavy load of indebtedness does not depend so much upon the easy terms on which co-operative finance can be made available, as upon the ascertainment of the amount of individual indebtedness to the sower, upon so fully financing the agriculturists that they could be prevented from resorting to the sower any more, and above all on making agriculture an industry sufficiently paying to leave a little saving after all legitimate current expenditure on agriculture and the household has been met, so that this saving could be applied to the liquidation of old debts. The mistaken notion associated with the start of the movement that co-operative credit could serve this purpose and which has clung more or less till now as evidenced by permitting this purpose to be regarded as a legitimate purpose for loans is largely responsible for increasing the load yet further. Short or intermediate term loans can, if judiciously employed, prevent any further increase in the burden, though even that in the present state of uneconomic agriculture seems scarcely possible, but it cannot leave any adequate margin of saving which could be employed to redeem past follies or misfortune. The sower, it is often forgotten, is the village retailer as also the purchaser of the villagers produce and what he cannot recover from the borrower by way of interest or the part payment of the principal of the loans, he can more than make good on the threshing floor or in his shop. The co-operative movement by concentration on the credit side has attacked him on one front only, so that the risks of non payment are saddled on the retailer, while the profits of the merchant and the retail shop keeper are still enjoyed by the sower. The attack ought to have been on all fronts. However, under the circumstances the clarification of the situation of indebtedness is most desirable as a preliminary towards tackling the important questions of the redemption of old debts. The Indian Central Banking Enquiry Committee has wisely emphasised the need for a vigorous policy of debt cancellation on a voluntary basis and for exploring the possibility of undertaking legislation to secure, if need be, the

settlement of debts on a compulsory basis. A simple Rural Insolvency Act as recommended by the Royal Commission on Agriculture and endorsed by the Central Banking Committee would also be an important step towards liberating those, who have already given up all their assets, from the incubus of ancestral and old debts, so that at least they and their heirs could start with a clean slate. In any case, the need for long term loans to the agriculturists for land improvement and for the redemption of old debts seems obvious, and it has now been recognised that the time has come for the provision of this facility by the starting of land mortgage banks.

There are three main types of such banks. The strictly co-operative type is an association of borrowers who raise credit by the issue of mortgage bonds bearing interest and made payable to bearer and is well illustrated in the German *Landschaften*. The commercial type is represented by the *Credit Foncier* of France, which works for profit and declares dividends. The third type—the quasi co-operative—has a mixed membership of borrowers and non-borrowers, operating over fully large areas and formed with share capital and on a limited liability basis. The banks organised so far in India are in a sense of the co-operative type though strictly speaking they belong to the quasi co-operative variety, admitting as they do to the membership a few non-borrowing individuals for attractive initial capital as well as business talent, organising capacity and efficient management.

At present there are 12 co-operative land mortgage banks in the Punjab. Two of these operate over whole districts, the rest confine their operations to a single tehsil. Bombay has 15 land mortgage societies, which have only recently started their operations. Bengal has two. Assam has five while Madras has 38 primary land mortgage banks and a central land mortgage bank has been started recently. It is too early to pronounce on the success or otherwise of these few banks. Among the objects for which these banks advance loans are the redemption of old debts, improvement of land and method of cultivation and the purchase of land in special cases. The Central Banking Committee think however that for a long time to come the resources of these institutions will be mainly required for enabling the cultivator to redeem his land and his house from mortgage and to pay off his old debts. One feels, however, extremely doubtful whether the emphasis should not be laid on the intensive and extensive development of agriculture since as pointed out above, unless agriculture becomes a paying industry the redemption is impracticable and illusory. The bulk of the funds of these banks will have to be raised by debentures and for these purposes there will have to be in the provinces central land mortgage banks as in Madras and in Bombay. Government will have also to render assistance to these institutions for the success of the debenture issue and its guaranteeing the interest as in the Punjab ought to meet all reasonable needs, though in special cases there would not be much harm in the Government purchasing debentures of a certain value. While mutual knowledge of and control over one another among members is the

insistent feature in the case of the unlimited liability credit society, the insistence in the case of a land mortgage bank with limited liability is on the capacity and business habits of the directorate in order to ensure sound valuation of security, careful investigation of titles, correct assessment of borrowers' credit and repaying capacity and on the efficient management of affairs.

Propaganda, Education and Training—

In the initial stages of the movement, it fell on the Registrar to carry on propaganda and organise co-operative societies. For this purpose the assistance of non-official honorary workers was imperative and in the various provinces a band of such workers was brought into existence, who as honorary organisers of the district or thinkers actively co-operated with the officials in carrying on propaganda, organising new societies as a result thereof and looking after the societies so started in some measure. With the rapid growth of co-operative societies, however, it was felt that for the further propagation of the movement it was desirable to carry on work by the non-officials in a more organised manner and for that purpose co-operative institutes were started in the various provinces. In some provinces, like Bombay, these institutions are mixed institutions with a membership of individual sympathisers and workers and of co-operative societies. In others like Madras and the United Provinces individuals were not admitted as members and the institutions became provincial unions of co-operative societies. In some provinces like Bihar and Orissa, they became federations of co-operative societies while in others like Bengal and Assam, they are known as co-operative organisation societies. Whatever the exact form assumed by these provincial institutions their functions were more or less the same in all provinces comprising propaganda and the focussing of non-official co-operative opinion on the various problems that confronted the movement from time to time. They have come to be regarded in an ever increasing measure as the third arm of the movement, the Registrar and his staff representing the administrative side, performing more or less the functions assigned to them under the statute, the provincial bank with the central banks and banking unions representing the financial side and as such concerned more with the financing of the movement and the institutes, unions, federations or organisation societies representing the propagandist side and as such concerned more with educating popular opinion and representing non-official views to the authorities. A few years back the All India Co-operative Institutes Association was established with a view to co-ordinate the activities of the provincial institutes, to formulate non-official co-operative opinion on important co-operative problems from time to time and to encourage the growth of co-operative literature.

It was soon perceived that one of the serious handicaps to the successful working of co-operative societies was the ignorance of the members and the absence of trained men as office bearers of societies. Illiteracy of the rural population, however, has been found too big a problem for these institutes and they have, therefore, at-

tempted only to spread knowledge of co-operation and co-operative principles to the members of societies and to train up the office bearers in various ways. Education has thus developed into an important function of these institutes. In Bombay, the Institute has created a special education board which maintains co-operative schools at different centres and conducts periodically training classes suitable for different types of workers and employees of co-operative societies. In the Punjab, however, co-operative education has been organised by the Co-operative Department, though the Punjab Co-operative Union renders active assistance therein. In Bihar and Orissa a permanent Co-operative Training Institute has been established at Sabour in the Bhagalpur Division which is controlled by a governing body which includes the Registrar and a few representatives of the Co-operative Education. Madras has organised 6 training institutes. In the United Provinces, Bengal and the Central Provinces, arrangements for co-operative training and education have not yet been properly made though there also it is the Department assisted by the provincial union which organises the training classes. The need for proper co-operative training and education has been felt in an increasing degree in recent years and the Central Banking Enquiry Committee has recommended very strongly the establishment of provincial co-operative colleges and an All India Co-operative College for the higher training of more important officials in the Department, banks or societies. No action apparently has been taken till now on these recommendations, but there is no doubt whatever that any serious attempt at improvement of the co-operative societies in the country must include a proper organisation of co-operative education not only for the office bearers of societies or the managers and inspectors of central and provincial banks but also for the inspectors, auditors and assistant registrars of the co-operative departments. The Government of India have for the last two years have placed at the disposal of each of the Provincial Governments about one lakh of rupees which were being devoted to a better organisation of co-operative training and education for the staff of the co-operative departments is also of other institutions.

In some provinces like the Punjab and Bihar and Orissa the provincial union or federation has been actively associated in discharging the Registrar's statutory function of the audit of societies and the Second All India Co-operative Institutes Conference held at Hyderabad (Deccan) in 1931 also expressed an opinion that the Registrar's statutory obligation in this matter could be discharged by a system of licensing and that audit should be a function entrusted to the provincial unions or federations. If this idea of a uniform system of audit through the provincial unions be accepted it will naturally follow that they will also have to assume the responsibility for supervision of the co-operative societies. The departmental audit or inspection by the central banks cannot dispense with the need of careful supervision which to be effective must be from within and the provincial federation or union is obviously the best agency for this friendly and efficient supervision. The combination of the functions of audit and of supervision as suggested by the

All India Conference and endorsed by the Central Banking Enquiry Committee would mean improved efficiency in the working of the movement while de-officialising it considerably and giving it the popular touch it lacks.

Non Credit Agricultural Co operation — For some years past increasing attention has been directed on other forms of co operation for the benefit of the rural population. Credit is but one of the needs of the cultivator, its organisation through co operation touches but the fringe of the problem and different provinces have been experimenting upon the application of co operative organisation to meet his different non credit needs. The problems of irrigation, consolidation of holdings, improved sanitation, fencing, cattle insurance, drying and supply of agricultural requisites and above all the marketing of agricultural produce have been therefore engaging the attention of co operators and societies for these purposes have been established here and there and have been working

with varying success. In a land of ignorant and illiterate agriculturists, it would appear wiser to adopt the rule of one village, one society, but the complexities of the non credit forms of co operation have induced the authorities to avoid the multiple purpose or general society and to favour the single purpose society and we have the curious spectacle of an agriculturist being viewed as one person with a bundle of needs, each one of which it is proposed to meet separately. A single society trying to meet all the needs of the agriculturist would attack the sowar on all fronts and would become a live force in the village which would tend to promote the ideal embodied in the famous phrase: Better living, better farming and better business. However, co operative opinion in India has not yet accepted the wisdom of this and yet believes in the theory of almost watertight compartments. The agricultural non credit societies in India on the 30th June 1934 were 4,494 distributed as under —

Non Credit Agricultural Societies, 1933-34

Province	Purchase and Purchase and sale	Production	Production and sale	Other forms of co operation	Total
Madras	76		13	35	424
Bombay	56	17	77	115	265
Bengal	80	935	250	46	1,301
Bihar and Orissa	3	1	1	6	11

Baroda	11	26	20	96	153
Other areas		3	29	23	55
Total	310	1,185	2,105	1,210	4,810

Of these the important are the marketing societies particularly for the sale of cotton in Bombay, and the consolidation holdings and better living societies in the Punjab.

Marketing Societies — Marketing of Agricultural produce is the real crux of the whole question of rural prosperity and betterment and as group marketing is always more effective than individual marketing especially in India where individual producer is illiterate and constitutes a small unit, co operative marketing has been accepted now as one of the most desirable ideals to work for. It is only the complexity of the working of co operative sale societies, the difficulty of providing for marketing finance, the lack of expert knowledge on the part of co operative officials and the lack of godown and storage facilities that have prevented the rapid multiplication of sale societies and their efficient working. It is really in the development of this form of co operative effort that ultimate success must be sought for in India, for credit alone could never bring comfort. Where it has been tried with success the results have been extremely satisfactory to the members. The tremendous headway made in European countries like Denmark and in the United States of America in co operative marketing organisation and the successful examples of the cotton

sale societies in Bombay should arrest attention and invite concentration on the co operative organisation of agricultural marketing. The jute and paddy sale societies of Bengal have not met with success, it is true, but the cotton grower in Gujarat and the Bombay Karmatak has reaped considerable benefit from the cotton sale societies. Absence of fraud in weighing, adequate and high prices, insurance of the produce against risks of fire, prompt payment of sale proceeds, financial accommodation till the produce is sold, information of daily price fluctuations in the Bombay market, supply of gunnies and genuine and certified seed, bonus and a dividend are no small gains to the agriculturist, who was otherwise at the mercy of the *adatyas* or worse still of his village sowar. The cotton sale societies of Surat have recently combined in a federation which has taken over the co operative ginning factory already started by the members. A few societies for the sale of other articles have also been organised in Pombay, such as jaggery, tobacco, chillies, paddy, onions and arecanut. Bengal has several jute sale societies with a Jute Wholesale sale at Calcutta and several paddy sale societies with a sale depot in Calcutta. The Punjab has several commission shops which provide storage facilities so that the grower could wait

for better prices, but which sell to local merchants yet, rather than to the merchants at the port. Madras has a number of sale societies, but their transactions are small and they have not yet made much progress.

Consolidation of Holdings—The law of primogeniture, by which the eldest son alone succeeds to the property of his ancestor and which is in force in some European countries does not obtain in India. Each heir is given a proportionate share of each item of the inherited property and not a share of the whole, equivalent to his portion. The result is that successive generations descending from a common ancestor inherit not only smaller and smaller shares of his land but inherit that land broken up into smaller and smaller plots. This continuous partition of each field amongst heirs leads to fragmentation, which is accentuated by the expansion of cultivation, irregularly over the waste by purchase and sales by the extinction of families in default of direct heirs and the division of their property amongst a large number of distant relatives, and by the break up of the joint family system and the custom of cultivation in common.

The disadvantages of fragmentation are obvious. A part of land is wasted owing to fragmentation being so excessive as to prevent any agricultural operations, and another part is lost in boundaries. Fragmentation involves endless waste of time, money and effort. It restrains the cultivator from attempting improvement. It prevents him from adopting scientific methods of cultivation. It discourages him from carrying out intensive cultivation. It enforces uniformity of cropping and especially restricts the growing of fodder crops in the period during which cattle are usually sent out to graze on the fields. The economic loss due to this system can be easily imagined and the only solution is consolidation of holdings. This most difficult important and interesting experiment originated in the Punjab in the year 1920. The procedure adopted in establishing a Co-operative Consolidation of Holdings Society is to call together all persons directly interested in land in a given village persuade them to accept the by-laws whereby a majority in a general meeting might approve a method of repartition, and then carry out actual adjustment of fields and holdings in such a manner that no single individual might have any grievance. As the result of patient work which has now extended over ten years some very striking results have been achieved and the movement for consolidation in the Punjab has assumed the dimensions of an important agricultural reform. It is steadily gaining in popularity, and as more staff is trained and the people become better educated to the advantages of the system the figures for the area consolidated are mounting up year by year. This work began in 1920-21 and in the 10 years that have elapsed since then, 2,63,462 acres have been consolidated by the end of July 1930 out of the whole cultivable area of about 30 millions, at an average cost of Rs 2.5 per acre.

In the Central Provinces some success in consolidation has been achieved in the Chittisgarh Division where scattered holdings are particularly common and it is not rare to see 10 acres broken into 40 plots. The Local Govern-

ment found it desirable to resort to legislation and passed the Central Provinces Consolidation of Holdings Act in 1924. Any two or more permanent holders in a village holding together not less than a certain minimum prescribed area of land may apply for the consolidation of their holdings, but the outstanding feature of the Act is that it gives power to a proportion not less than one half of the permanent right holders holding not less than two thirds of the occupied area in a village to agree to the preparation of a scheme of consolidation which scheme, when confirmed, becomes binding on all the permanent right holders in the village and their successors in interest.

In Bombay a Bill was introduced in the Legislative Council in 1928 to deal with certain features of the problem. When this Bill was introduced a good deal of opposition was created and it had to be ultimately dropped.

There are 11 societies for consolidation of holdings in the United Provinces and 11 in the Baroda State based on the Punjab model.

Rural Reconstruction—One of the main reasons why the achievements of the co-operative movement fall so short of the expectations of the promoters and workers lies in the extreme backwardness of the rural population and it is not too much to state that the ultimate success or otherwise of the co-operative movement lies bound up with general rural development and progress. So long as agriculturists remain steeped in illiteracy and ignorance are heavily and almost hopelessly indebted, have a fatalistic and listless outlook on life and have an extremely low standard of living, carrying on agriculture with simple tools and implements in more or less a primitive fashion, no great approach to the ideals and the goal of the co-operative and all other rural movements is possible. The co-operative movement itself is indeed a great experiment in rural reconstruction aiming to protect the agriculturist from exploitation of the usurer, the middleman, dalal and the merchant, but concentration on the credit side of the movement with but half-hearted attempts for the co-operative organisation of supply and marketing, a growing multiplicity of institutions for various purposes and above all the neglect of the educational, sanitary, medical and the social sides of village life explain very clearly why the achievements of the movement during the last 33 years have fallen far short of its objective. Rural reconstruction has, however, of late years claimed an increasing amount of attention, but so far attempts on a mass scale have not been made. What has been done has been individual effort—the efforts of individuals fired by the impulse of social service and moved by enthusiasm to utilise their opportunities to the best advantage by contributing to the welfare of the humble village folk. The best known of such centres is at Gurgaon in the Punjab. The work done there covers education, sanitation, medical relief, improvement of agriculture, female education and maternity welfare.

In the Central Provinces and Berar the local Government carried on from November 1929. The later part of 1933 saw a considerable impetus imparted to the cause of rural reconstruction in India. His Excellency Sir Frederick Sykes the then Governor of Bombay, concentrated on

village uplift and carried on an intensive propaganda in that behalf which has led to the formulation of a scheme whereby the work is being carried on earnestly by District Committees under the guidance of the District Collectors, the work being co-ordinated by Divisional officers. The Punjab has appointed Mr. Brayne of Gurgaon fame as Commissioner for Rural Reconstruction and Bengal has made a similar appointment and it appears that all provincial Governments are devoting considerable thought to this very important work.

Better Living Societies.—The Punjab has been responsible for introducing this very desirable type of co-operative society to promote better living among its members. There are about 300 such societies in that province and they have been doing quite important work in their own way. The societies do not collect any levy from their members except the small entrance fee and they lay down a programme of work and make rules for carrying it out from year to year, violation of which is punishable with fine under the by-laws. Though these societies in the first instance have for their object the curtailment of ruinous expenditure on marriages and other social occasions they have also helped in various other matters, so that apart from saving to their members thousands of rupees each year they are contributing to the general village uplift in some measure. Some of these societies have levelled and paved and swept the village lands, some have promoted sanitation, some have induced the villagers to improve ventilation in their houses, some have repaired and roofed the village drinking well, some have arranged that all manure should be pitfed, some have discouraged expenditure on jewellery, and some have stopped waste on farms. Thus in a variety of ways these societies generally have been great factors in the improvement of conditions in the life of the village. It is earnestly hoped that such better living societies will be started in large numbers in the various provinces of India or better still that the co-operative credit societies would take upon themselves the function performed by these societies and that the term better living be given as wide a connotation as possible so that the co-operative movement would be doing good to itself and the nation by carrying on the general work of village uplift as well as its own economic objective of strengthening the position of the agriculturist.

Urban Credit Societies.—While the chief objective of the co-operative movement was from the first to do service to the rural population it must be remembered that the Act of 1904 permitted two classes of societies—rural and urban, recognising thus the suitability of the co-operative method for solving the problems of urban population also. At present there are in all 11,428 non-agricultural societies with a membership of 1,87,753. Of these 5,411 are credit societies, the rest being societies for other purposes.

An important class of the urban population is that of the merchants and traders and though the joint stock banking system that has so far developed in India is quite well suited in many respects for them, from the point of view of the

small trader, it is co-operative banking that is obviously wanted. The importance of **People's Co-operative Banks** promoted for the benefit of urban people without any distinction of caste or creed is, therefore, very great, for the finance of small merchants, artisans and craftsmen for the stimulation of trade and industries in and around district and taluka towns. The principal business of these banks is short term credit and in this respect they resemble the ordinary commercial banks. In the absence of any industrial co-operative bank, it is also for the peoples bank to finance small industrialists and help the development of cottage industries, which still play a very considerable part in the industrial economy of India. Another very important function which falls to peoples banks is the financing of the marketing of the produce of the land from the field to the port or to the principal market centres and thus assist in the development of the internal trade of the country. It is only however, in the Bombay and Bengal Presidencies that we meet with some good institutions functioning as peoples banks. In Madras there are 1,063 non-agricultural credit societies but most of these are not real peoples banks. The Punjab has 1,000 unlimited liability societies and only 137 with limited liability. I can here hardly find any development of real peoples banks. In Bengal the limited liability urban credit societies number 510 and though these societies seem to have won public confidence the more important of them are salary earners' credit societies. Some of the divisions, especially the Chittagong divisions have several big concerns, however, working on sound lines. The question of starting Peoples Banks in Bihar and Orissa has not yet been seriously taken in hand. In the Bombay Presidency institutions with a working capital of Rs. 50,000 and more are classed as urban banks. Since 1923 co-operators in this Presidency have been very keen on having a full-fledged peoples bank in every taluka town for it has been realised that with the proper development of urban co-operative banking there is no doubt that the various units will come into touch with one another and that mutual settlement of terms and co-ordinated and harmonious work will greatly assist the development of inland trading agencies. Peoples banks are a repository of peoples' savings and nucleus for co-operative activity and an institution giving facilities for internal remittance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Presidency on the 30th June 1935 there were 111 urban banks most of which are fairly successful. The total membership was 2,09,603, the working capital was Rs. 4,83,53,376 and the reserve fund amounted to Rs. 25,59,114. It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the co-operative movement in India and other provinces might well follow Bombay's example in this direction.

An important variant of the urban co-operative society is the **Thrift Society**. The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the

end of the term with interest. In many societies, loans are advanced also but not exceeding a certain fixed proportion, usually $\frac{1}{2}$ of the deposits. The Punjab has about 1,000 such societies and the bulk of the members are school masters. There are about 125 thrift societies for women only having a membership of about 2,000. Madras has also more than 100 thrift societies and Bombay has half a dozen. Recently however **Life Insurance Societies** have been started in Bombay, Bengal and Madras. The Bombay society was started in July 1930 and for a few months worked as a provident society only issuing policies of Rs. 150 to Rs. 500 and that too without medical examination, the idea being to bring life insurance within easy reach of the small man in the village as in the town. It has no share capital and works on a mutual basis. It has now, however, widened its scope and has been writing policies for larger amounts under its ordinary branch, while under the rural branch, besides the ordinary small policies, it has recently issued a scheme for decreasing term insurance, which will, it is hoped, meet the needs of the primary societies and their borrowing members much better. It has by now written a business of over Rs. 30 lacs. The Bengal society is yet a provident society issuing small policies, while the Madras society—the South India Co-operative Insurance Society—has started vigorously as a full fledged life insurance society with share capital and comparatively low rates of premia and has already written a large business of about Rs. 30 lacs.

Review—The Co-operative Societies Act of 1904 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the **Co-operative Societies Act of 1912**. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than credit substituted a scientific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks.

In 1914 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the policy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co-operative Societies and be weaned from the sowars. In 1914, the **MacLagan Committee** on Co-operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co-operation. Punctual repayment of loans was insisted upon and all those societies that failed to live up to the ideal of co-operation were sought to be eliminated. From this time onwards the share of non officials in the movement assumed increasing importance and it came to be realized that for the success of the movement, decentralizing of the same was necessary. The Government of India Act of 1919 made co-operation a provincial transferred subject and the local Governments were left free to adapt the 1912 Act to their own requirements.

The steady growth of the **Central Financing Agencies** relieved the Registrars partly of the need for attending to this very important matter

in the development of co-operation, but propaganda still remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non official institutions should be established to take over this function from official hands. Accordingly **Co-operative Institutes** were started in various provinces, in some cases as unitary societies reaching down to the village through their branches in the divisions and the district, in other cases as a federation or union more or less complete of the primary societies. The part these non official bodies began to play henceforth became increasingly important, some adding to the primary function of propaganda others such as co-operative education, supervision over societies and even audit.

The steady progress of the movement—sometimes even too rapid—for nearly 20 years however, was found hardly to lessen the colossal burden of the indebtedness of the ryot for co-operative credit necessarily confined itself to short term loans. It was in the Punjab that the first **Co-operative Land Mortgage Bank** was started at Jhang in 1920. Soon after other provinces also followed suit.

While the movement was developing at a rapid pace it was found that financially the situation was worsening. Defaults in repayment were becoming increasingly common and **Co-operative Committees of Enquiry** were instituted in various provinces. The Central Provinces thought it necessary to have such a committee in 1922 while Bihar and Orissa followed with a similar committee in 1923. A few years after the Oxford Committee made similar inquiries for the U.P. the Townsend Committee for Madras and the Calvert Committee for Burma. These Committees have carefully analysed the position in their respective provinces and have made recommendations for the consolidation and rectification of the co-operative credit organisation and the extension of the non credit side of agricultural co-operation. The powers conferred upon the Local Government by the Act of 1919 to modify the Act of 1912 have been exercised so far in but few provinces such as Bombay, Burma, Madras, Bihar and Orissa. Bombay passed the **Co-operative Societies Act of 1925** incorporating the suggestions made from time to time for the amendment of the previous All India Act. This new Act made the object of the movement still wider than that of its predecessor and its preamble refers to "better living better business and better methods of production as the aim of the movement." The chief features of the Bombay Act of 1925 are the adoption of a scientific system of classification of societies, the improvement of the procedure for liquidation of cancelled societies, the extension of summary powers of recovery to the awards of arbitrators and the provision of penalties against specified offences. The Burma Act came into force in 1927 and the Madras Act in July 1932. Bihar and Orissa have also now passed similar Co-operative Acts of its own recently. The progress of the movement in forms other than credit has not been very remarkable and credit societies still predominate, especially the Agricultural Credit Societies.

The **non-credit movement** has had naturally more obstacles to overcome than the credit but the former is slowly gathering force in the shape of sale societies for cotton in Karnatak, Gujarat and Khandesh, cattle insurance societies in Burma and irrigation societies in Bengal and the Southern Division of the Bombay Presidency. Perhaps the most remarkable instance of the co-operative movement in India is to be found in the Punjab where consolidation of holdings has been successfully attempted through co-operation. In the non-agricultural non-credit sphere, a still smaller headway has been made. There are a number of housing societies especially in Bombay, Madras and Mysore and artisans societies and unskilled labour societies in Madras. It may be noted that on the agricultural side co-operative farming has hardly been touched and on the non-credit side the consumers' movement has made but meagre progress.

In 1926, the *Royal Commission on Agriculture* was appointed and co-operation formed only a part—though an important one—of its extensive enquiry. Recently, in consequence of the appointment of the provincial committees under the *Indian Central Banking Enquiry Committee*, the co-operative movement in the different provinces has been surveyed. But the provincial committees, for obvious reasons, confined their inquiries to banking in relation to agriculture, small industries and trade. Thus only those aspects of the co-operative movement which have an intimate bearing on the credit needs of the population and the development of banking facilities have been examined, while the need for separate enquiries into the whole movement in the different provinces of the lines of those undertaken in C. P., U. P. and Madras and emphasised by the Royal Commission on Agriculture is still to be met. Bihar and Orissa recently got its movement examined by a committee. Travancore followed suit and Mysore too appointed a Committee which has published its report last year. The Government of Bombay convened in June 1933 a Round Table Conference of official and non-official Co-operators to discuss the problems that confronted the Movement in Bombay. As a result of this Conference three Committees were appointed, one to examine the system of supervision over Co-operative societies by the Supervising Unions in the Presidency, another to report on the best way to help the agriculturists in these times of falling prices and trade depression, and the third to examine the problem of extension of land mortgage banking on a Co-operative basis. These Committees have submitted their reports, their recommendations have led to a tightening up of supervision, an extension of land mortgage banking and efforts to meet the growth of overdue loans.

The growing difficulties of the Co-operative Movement throughout India in these times of unprecedented depression led the Government of India to hold an All India Co-operative Conference at New Delhi on the 29th January 1934. This Conference was unique in so far as it was not restricted only to the Registrars of Co-operative Societies and their advisers

from the various provinces and States, but it also included some ministers in charge of Agriculture and Co-operation from the provinces and a representative of each of the two All India Co-operative organisations—the Institutes Association and the Provincial Banks Association. This Conference recommended the enactment of an All India Co-operative Societies Act so as to permit the registration of Co-operative Societies working in the whole of India or in more provinces than one. It also recommended earnest efforts for the development of land mortgage banks by the Government guaranteeing not only the interest on their debentures but also the capital and suggested the creation of a Central Co-operative Board under the Imperial Government with a small establishment to bring about a closer co-ordination of work between the different provinces and States of India. This last suggestion has met with some opposition, since after the promulgation of Co-operation under the Montagu Reforms of 1914, the provinces do not much fancy the imposition of control from the centre. And yet, there seems to be nothing wrong in the idea of a central organisation, which would be a clearing house for authentic information and stimulate progress through a careful study of experiments and efforts in particular areas and drawing attention of other areas to the success achieved or the deficiencies revealed. In December 1936 another Conference of Registrars met at Delhi and discussed the situation further.

It may also be mentioned that the **Indian States** were not slow in introducing the co-operative movement within their limits, and the movement in some of the more important of the States, such as Hyderabad (Deccan), Mysore, Baroda, Gwalior and Indore has made considerable progress, more or less on the same lines as those followed in the neighbouring British Indian Provinces.

The landmarks in the history of the co-operative movement in India are the Co-operative Credit Societies Act of 1904, the Co-operative Societies Act of 1912, the Madras Committee Report 1915, the provincialisation of co-operation, 1919, the establishment of institutes, unions and federations for propaganda, the Committees of Enquiry into the co-operative movement in several provinces, provincial legislation, the Report of the Royal Commission on Agriculture 1928, Reports of the Indian Central and Provincial Banking Enquiry Committees 1931, and marketing, surveys, debt conciliation schemes and land mortgage banking.

The movement has thus developed rapidly and the **stages of its evolution** may be briefly summarised as—agricultural credit, urban credit, centralised organisations, apex co-operative banks, propaganda by non-officials, non-credit agricultural co-operation, urban co-operative banking, long term loans and debt redemption schemes, land mortgage banks, co-operative education, rectification and consolidation of the credit movement, organisation of supervision over primary societies and rural reconstruction.

TABLE No 1
Number of Societies by Provinces and States for 1934-35 only

Province	Estimated Population (Millions)	Central	Supervising and Guaranteeing Unions	Agricultural	Non Agricultural	Total Number of Societies	Number of Societies per 100,000 Inhabitants
1	2	3	4	5	6	7	8
Madras	48.6	33	326	11,629	1,425	13,419	27.6
Bombay	23.0	16	116	4,731	907	5,770	25.1

It conducts a journal 'The Proceedings of the Benares Mathematical Society' in which original papers on Mathematics are published and maintains a library. There are about 60 members from all parts of India. Admission fee Rs 10 Annual subscription Rs 12 (Resident members) and Rs 5 (non resident members) *President* Dr Lakshmi Narayan, MA, DSc, *Secretary* Prof Chandi Prasad, MA, BSc, *Treasurer* Prof Pashupati Prasad, MA, BSc 22 Sanpuri Beares City

BHANDARKAR ORIENTAL RESEARCH INSTITUTE, POONA—The Institute was inaugurated on the 6th of July 1917 the 80th birthday of late Sir R G Bhandarkar, at the hands of H E Ford Willingdon who became its first President. Its objects are to publish critical editions of texts and original works bearing on Oriental antiquities, to provide an up to date Oriental library, to train students in the methods of research and to act as an information bureau on all points connected with Oriental Studies. The valuable library of the late Dr Sir R G Bhandarkar, which he had bequeathed already to the Institute, was

after his demise handed over by his executors to the Institute, and is now located in the Central Hall of the Institute. Since the 1st of April 1918 the Government of Bombay have transferred to the custody of the Institute the unique collection of nearly 20 000 manuscripts formerly accommodated in the Deccan College together with a maintenance grant of Rs 3,000 a year. Government have likewise entrusted to the Institute a grant of Rs 10,000 a year for the publication of the B S S and the Government Oriental Series. The Institute has undertaken to edit *Mahabharata* critically (*Idiosyncrasy* Dr V S Sukthankar), at the request of the Raj of Aundh who has promised a total grant of Rs one lakh for that purpose. Grants are being received from the Government of India (Rs 4 000 a year) the University of Bombay (Rs 3 000 a year) and the Government of Bombay (Rs 6 000 a year). Burma, Hyderabad (Deccan) Baroda and Mysore as well as several Southern Mahratta States. The Institute issues a Journal (called *Annals of the Bhandarkar Oriental Research Institute*) published four times a year. It also held under its auspices the First Oriental Conference on the 5th, 6th and 7th of November 1919 under the patronage of H E Sir George Lloyd and the presidency of Sir R G Bhandarkar. Thanks to liberal donations from the Parsis and the Jain community, supplemented by Grants in Aid from the Government of Bombay, the Institute is housed in a fine building near the hills behind the Home of the Servants of India Society. Since August 1927 the Institute has been conducting regular MA classes in Sanskrit, Pali, Ardhamagadhi and Ancient Indian Culture. Lectures by eminent scholars are also delivered occasionally. Membership dues Rs 10 a year or Rs 100 compounded for life. Members can subject to certain conditions, borrow books from the library and get the *Annals* free and other publications (a list covering about 100 titles sent free upon request) at concession rates. *Secretary* Dr V S Sukthankar, MA, PhD (Oxon) P K Godse, MA

THE BHARATA ITIHASA SANSHODHANA MANDALA, POONA—Founded in 1910 by the late Mr V K Rajwade and Sardar K C Mchende and registered under Act XXI of 1860 in 1916 with the object of collecting and conserving historical materials, erecting suitable buildings for preserving and exhibiting them, publishing such materials and other works of historical research and generally to encourage and foster critical study of and research in Indian history. Has a building of its own possesses the best collection of Persian and Marathi historical papers owned by any private society. Has a rare collection of about a thousand Indian paintings now housed in a special wing recently added maintains a coin cabinet and an armoury of old weapons.

Has a section for Copper plates, sculpture and archaeology and has a library of rare books. Holds fortnightly and annual meetings where notes and papers based on original documents are presented, discussed and afterwards published. Has published 5 volumes of original historical letters and other historical and literary books whose total number exceeds 80. It has received Rs. 5000 for publishing materials of the Shivalpi period. Conducts a quarterly journal devoted to research. Work done mostly in Marathi. Celebrated the Silver Jubilee by issuing in All India Modern History Congress. It is planning a commemorative volume in English giving an analytical account of researches in various fields. Depends entirely on public subscriptions. Is supported by many Rajas, Jhagirdars, Sardars and the public. The late Dr. J. L. Abbot of New Jersey, U.S.A. left by will a gift of 30,000 dollars to the Mandali for buildings. Annual membership fees for various classes are Rs. 3, 6, 12, 25, 125 and 300 which can be compounded for life by paying, ten times the annual subscription of a particular class in a single year. *President* Mr. N. C. Kelkar, B.A., LL.B. *Vice Presidents* Shrimant Balasahab Pant Pratinidhi, B.A. Raja of Aundh, Shrimant Babubhai Ghoshide of Ichalkaranji. *Secretaries* Prof. D. V. Potdar, B.A. and corresponding member Indian Historical Records Commission, Sudu G. N. Mujumdar, C.I.E., *Treasurer* Mr. A. V. Patwardhan, B.A., *Readers* Mr. S. N. Joshi and Mr. G. H. Khair. *Librarian* Mr. V. M. Kolhatkar. *Address* 312/13, Sadashiv Path, Pooni City.

BOMBAY ART SOCIETY—Founded 1888, to promote and encourage Art by exhibitions of Pictures and Applied Arts, and to assist in the establishment and maintenance of a permanent gallery for pictures and other works of Art. Spencer. *Vice Presidents* Dr. S. J. Meherhomji and D. H. Dhadha. *Hon. Treasurer* Dr. R. D. I. Modi. *Hon. Librarians* Dr. V. B. Desai and Dr. K. S. Bharucha. *Hon. Secretaries* Dr. Sorab J. Popat and Dr. M. B. Ilukort. Blivatsky Lodge Building, French Bridge, Chowpatty, Bombay.

BOMBAY NATURAL HISTORY SOCIETY (Registered under Act XXI of 1860)—Founded 1883 to promote the study of Natural History in all

its branches. The Society has a membership of about 1,400 all over the world and a museum with a representative collection of the different vertebrates and invertebrates found in the Indian Empire and Ceylon. In 1921 the Society was entrusted with the management of the Natural History Section of the Prince of Wales Museum, and a great part of the Society's collections have been transferred to that Museum. A Journal is published at varying times during the year which contains articles on natural history and sport as well as descriptions of new species and local lists of different orders. The Society's library is open to members and books may be borrowed under special arrangement by members residing in the metropolis. The Society's Taxidermist Department undertakes the curing and mounting of trophies for members. Annual subscription Rs. 25. Entrance fee Rs. 10. *Patron* H. F. The Viceroy of India. *Vice Patrons* H. H. The Maharaja of Travancore, G. C. I. H. H. The Maharaja of Cochin, G. C. I., G. C. I. H. H. The Maharaja of Jodhpur, K. C. S. I. K. C. V. O., H. H. The Maharaja of Baroda, K. C. S. I. H. H. The Maharaja of Bhavnagar, H. H. The Nawab of Junagadh, G. C. S. I. K. C. S. I. and Mr. F. V. Evans, Liverpool. Sir David L. Z. Kt., Mr. A. S. Verma, London. Lt. Col. K. G. Ghumaney, J. M. S. Pooni. *President* H. J. The Rt. Hon. Lord Lybourn, G. C. I., M. P. *Vice Presidents* H. H. The Maharaja of Cochin, G. C. I. G. C. I. R. S. F. I. F. C. S. S. I. R. S. R. R. D. Acland, M. A. *Honorary Secretary* Mr. P. M. D. Sanderson, F. R. S. *Curator* S. H. Prater, C. M. Z. S. M. L. C., J. P. *Asst. Curator* C. McCann, *Head Clerk* Mr. A. K. Fernandes, *Gallery Assistant* Mr. P. F. Gomes. *Office*, 6 Apollo Street, Bombay.

BOMBAY SANITARY ASSOCIATION—Founded to create an educated public opinion with regard to sanitary matters in general, (b) to diffuse the knowledge of sanitation and hygiene generally, and of the prevention of the spread of disease amongst all classes of people by means of lectures, leaflets and practical demonstrations and, if possible by holding classes and examinations, (c) to promote sanitary science by giving prizes rewards or medals to those who may by diligent application add to our knowledge in sanitary science by original research or otherwise, (d) to arrange for homely talk or simple practical lectures for mothers and girls in the various localities and different chawls, provided the people in such localities or chawls give facilities. The Sanitary Institute Building in Princess Street, which has lately been built by the Association at a cost of nearly Rs. 1,00,000 the foundation stone of which was laid by Lady Willingdon in March, 1914, and opened in March, 1915 is a large and handsome structure with a large Lecture Hall Library Museum, etc., and also provides accommodation for King George V. Anti-Tuberculosis League Dispensary transferred to the Municipality in 1924 and Museum and the office of the Assistant Health Officer, C and D Wards and the Vaccination Station. *Hon. Secretary* Dr. J. S. Nerurker, B. Sc., L. M. & S., D. P. H. (Cantab.), Executive Health Officer, Bombay.

BRITISH AND FOREIGN BIBLE SOCIETY—Since 1811 the British and Foreign Bible Society has been at work in this country. It has 6 Auxiliaries in India and an Agency in Burma. The first Auxiliary was established in Calcutta, in 1811, then followed the Bombay Auxiliary in 1813, the Madras Auxiliary in 1820, the North India Auxiliary in 1845, the Punjab Auxiliary in 1863, the Bangalore Auxiliary in 1875, while the Burma Agency was founded in 1899. The Bible or some portion of it is now to be had in over 100 different Indian languages and dialects and the circulation throughout India and Burma reached 1,231,834 issues in 1936. The Bibles, Testaments and Portions in the various vernaculars are sold at rates which the very poorest can pay and at considerable loss to the Society. Grants

of English Scriptures are made to Students who pass University examinations, as under—

The New Testament and Psalms to Matriculates and the Bible to Graduates.

Portions of Scriptures in the important vernaculars have been prepared in raised type for the use of the Blind and large grants of money are annually given to the different Missions, to enable them to carry on Colportage and Bible Women's work. Besides the British and Foreign Bible Society, there is Bible work carried on in India, and Burma in a much smaller way by the Bible Translation Society—which is connected with the Baptist Missionary Society—the National Bible Society of Scotland, the American Bible Society and the Trinquartier Tamil Bible Society.

The following table shows the growth in the British and Foreign Bible Society's work during the past few years in India and Burma—

Mukerji, M.A., B.L. *Vice-President*: Dr. H. W. B. Moreno, *Hon. Secretary*: G. Dhara, *Hon. Treasurer*: B. B. Gosh, 93, Lower Circular Road, Calcutta.

CHILDREN'S AID SOCIETY was established in 1927 to help forward the operation of the Bombay Children Act by taking over res-

pensibility for the maintenance of the Umar Khadi Children's Remand Home for the organisation of inquiry work regarding the cases of boys and girls dealt with by the Juvenile Court, for the upkeep of a Junior Reformatory School for boys under 12, and for the co-ordination of work done by voluntary supervision workers appointed by the Court. The Society is a private charitable organisation with a grant in aid from Government. Its work lies amongst destitute children hailing from all parts of India, juvenile offenders less than 16 years of age and children offended against by adult persons. All of whom have been arrested under the Bombay Children Act in either Bombay City or Suburban District. *President*: H. E. The Rt. Hon. Lord Broughmore, C.I.E. *Vice-President*: The Hon. Sir Robert Bell, K.C.S.I., C.I.E., I.C.S.

Chairman Mr C P Bramble *Hon*
Treasurer Mr B R Tannan *Secretary*
 Miss B Budden

CONSUMPTIVES' HOMES SOCIETY—This Society was started by the late Mr B M Malabari and Mr Dayaram Gudmal on the 1st of June 1909. It was registered under Act XXI of 1860. Mr Malabari secured a large grant of land in a Himalayan pine forest in Dharanpur (Simla Hills) from H H the Maharaja of Patiala, for a Sanatorium for Consumptives. His Highness also gave a donation of Rs one lakh. In 1911 by special permission the Sanatorium was named "The King Edward VII Sanatorium." The Sanatorium has its special water works known as the Lady Hardinge Water Works, presented by the late Sir Chinubhai Madhavji, Bart., of Ahmedabad. The Sanatorium has a Guest House. The Noshirwan Adul Guest House for visitors to Dharanpur. It has accommodation for 90 patients including the special Punjab Block built from a grant of the Punjab Government and reserved for European patients. Most of the blocks and cottages are built by Purus. The Sanatorium has its own dairy and is called the Bal Prabhakar H. Patuck Dairy. The Sir Chinubhai Madhavji Dispensary has an out patient department. The Recreation Hall is called The Sir Bhupinder Singh Recreation Hall after the name of the Maharaja of Patiala. Mr Malabari collected an Endowment Fund of about Rs 67,000 lodged with the Treasurer, Charitable Endowments under Act VI of 1890. Nearly Rs 3,06,000 have been spent on laying out the sites, buildings, etc., and the current annual expenditure is about Rs 56,000. The Senior and Junior Medical Officers are in charge of the Sanatorium. The Office of this Society is situated at the Seva Sadan Buildings, Gamdevi, Bombay. Mr S P Wadia is the Hon. Secretary and Diwan Bahadur K M Jhaveri is the Hon. Treasurer.

EMPLOYERS FEDERATION OF INDIA—The Employers Federation of India was registered early in 1933 with the following among its main objects—To promote and protect the interests of employers engaged in the trade, commerce, industries and manufactures of India to promote or oppose legislation or other measures affecting their interests, to collect and circulate statistics and other information of interest to employers, to nominate legatees and advisers to the International Labour Conferences and to formulate opinions on the subjects coming for discussion before such bodies, and to promote or oppose their recommendations, to secure concerted action on all subjects involving the interests of its members, to consider and support well considered schemes for the welfare and uplift of Labour and establish harmonious relations between Capital and Labour, and to carry on propaganda for the purpose of educating public opinion with regard to the character, scope, importance and needs of industrial enterprise as represented by the Federation.

Most of the leading employers' organisations in India are members of the Federation.

The office bearers for the current year are—
President Sir H P Mody, K B E. *Vice Presidents* Sir Edward Benthall, Sir William Wright and Sir Homi Mehta.

The office of the Federation is at present located at Patel House, Churchgate Street, Bombay.

EUROPEAN ASSOCIATION—The European Association was established in 1883 under the title of the European and Anglo Indian Defence Association and was re-established in 1912 under the title of the European Defence Association but the present title was adopted in 1913. INDIA SUNDAY SCHOOL UNION—The India
Sunday School Union is an interdenominational
organisation having for its object the strength-
ening of religious and moral education in the
Christian schools throughout the Indian
Empire. It has five full time workers, both
Indian and European. It was founded in
Allahabad in 1876. Its General Committee
is composed of representatives from the
National Christian Council, from the Provincial
Representative Councils and from local
Sunday School Unions which are Auxiliaries
of the I.S.S.U.

The headquarters of the Union are at Coonoor
on the Nilgiri Hills, where besides the office
and well stocked book shop, there is the St.
Andrew Teacher Training Institution. In
this institution Summer Schools are held
where a short but intensive course of study
and training is offered to leaders in religious
education from all parts of India.

Besides the activities at headquarters, the
Union offers courses of lectures in any part
of the country, delivered by members of its
staff. A Quarterly Journal is published in
English, and Lesson Notes for teachers in
English and several vernaculars. Text books

on subjects connected with the work of Bible teaching are also published in various languages and Scripture examinations are organised

The officers of the Union are as follows —

President The Hon Sir David Devadass Madras

Vice President Prof B B Malver, Ph D Allahabad

Treasurer W H Warren, Madras

General Secretary E A Annett, Coonoor

The most recent statistics show that there are in India 18 322 Sunday Schools with 30 428 teachers, and 707 204 scholars

P E N INDIA CENTRE—The India Centre of the International Society of eminent poets, playwrights, editors, essayists, novelists (P E N) was founded in 1933 by Sophia Wadia under the Presidency of Dr Rabindranath Tagore for long, an honorary member of the London Centre *See Presidents*, Mr Ramananda Chatterjee, Srimati Sirojini Naidu and Sir S Radhakrishnan. The aim of the P E N everywhere is to promote friendliness among writers and to uphold freedom of speech. The India Centre in addition is working for national cultural unity by spreading appreciation of the many Indian literatures outside their own language areas and also abroad. This it does by means of public lectures and through its monthly journal, *The Indian P E N*, available to the general public in India for Rs 3 per annum. The headquarters of the India Centre are in Bombay with a branch in Calcutta. Membership is open to any Indian of recognized position as a writer subject to the approval of the Managing Committee. Entrance fee Rs 5 and the annual subscription Rs 3 which includes subscription to *The Indian P E N*. *Honorary Secretary* N K Bhigwat, M A 22, Narayan Dabholkar Road, Malabar Hill, Bombay.

PHILATELIC SOCIETY OF INDIA—Formed March 1897, Annual subscription Rs 10. *Secretary*, Dr K D Cooper, Candy House, Apollo Bunder, Bombay 1.

POONA SEVA SADAN SOCIETY—This Institution was started in 1909 by the late Mrs. Ramabai Ranade, the late Mr G K Devadhar, and a few other ladies and gentlemen in Poona and registered in 1917. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brethren, especially the former in backward areas and working on a non-sectarian basis. Nominal fees are now being charged for instruction in all classes. There are eight different departments subdivided into 60 classes. Arrangements are made for training Nurses and Midwives and women Sub Assistant Surgeons at the Sassoon Hospitals, Poona and a hostel is maintained for the former and another for those attending the Sub Assistant Surgeon's Classes. There is a Public Health School affiliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi, with a hostel. The total number of women and girls including about 150 duplications on the rolls, at these various Centres of the Society is over 1,500. There are in Poona five hostels, three of which are located at the headquarters and the other two in the Somwar Peth for Nurses, etc., under training at the Sassoon Hospital. The number of resident students is above 200 in these five hostels. In connection with the medical branch a Committee has been formed in England, which will enable the Society to send fully qualified Nurses there to undergo further

training. Two fully qualified Nurses have so far been sent by the Society for their post graduate course in Public Health Nursing at Bedford College for women, London with the partial help of a scholarship of the League of Red Cross Society, Paris. There is an active Infant Welfare Centre and ante-natal clinics with the average daily attendance of 50 excluding expectant mothers. The Society has extended its medical activities in Bombay by undertaking, with the help of two charitable Trusts in Bombay to work out the scheme of Maternity, Infant Welfare, Child Welfare and General Nursing for the women and children of the Bhatia Community. This scheme has a Maternity Hospital and Nursing Home, and three Infant Welfare centres. Besides, there are Maternity Hospitals and Nursing Homes at Ahmednagar, Allbag, Nasik and Sholapur under the management of the society in connection with other organizations. The Institution is largely dependent upon public contributions and Government assistance. The annual expenditure of the whole organization now exceeds Rs 2,50,000. *President* Shrimant Saubhagyavati H H the Rani Sahab of Sangli. *Local Secretary and Treasurer* Mrs Yamunabai Bhat, *Lady Superintendent and Secretary for Development and Collections* Mrs Janakibai Bhat (Kaiser-i-Hind Silver Medal), *Joint Lady Superintendents* Mrs Saralabai Nalk, M A, and Miss Dwarkabai Bhat, B A, *BT Hon. Secretaries Nursing and Medical Education Committee* *Joint Hon. Secretaries* Dr V C Gokhale, L M & S Dr N J Ranade, B A, M B B S, and Dr V R Dhamdhare, M B B S.

PRESS OWNERS ASSOCIATION, Bombay—Started on 30th April 1919 to promote the interests of the printing and litho presses and allied trades, to bring about harmony and co-operation among press owners and proprietors and to take such steps as may be necessary in furtherance of the above objects.

RECREATION CLUB INSTITUTE—This Institution was started in 1912-13 by the members of the Ismaili Dharmaic (religious) Library in Bombay. Its central office is in Bombay with branches at Ahmedabad, Ahmednagar, Karachi, Hyderabad (Sindh), Poona, Warangal, etc. The aims and objects of the society are to elevate and improve the social, economic and spiritual condition of the depressed and poor classes of people and with that

intent to found primary schools, associations and such departments and to take all constructive means to achieve the above objects. The Institute has 2 orphanages with 150 inmates, industrial works, domestic industries, sales depots, clubs, libraries, etc. It also issues two Anglo Vernacular papers *The Ismaili* (a weekly) and *The Nazari* (a monthly). *Hon Secretary*, Gulamhusein Virjee

ROYAL SOCIETY OF ARTS, INDIAN SECTION—

This Society was founded in 1754 for the encouragement of Arts, Manufactures and Commerce, and devotes itself primarily to the application of science and art to practical purposes. The Society ranks as one of the three oldest learned societies in England, and numbered among its early members most of the famous Englishmen of the 18th century. During its long history it has been the source of many reforms and improvements in all branches of art and industry, and it is from its activities that most of the more specialised British societies have sprung.

The Society has from its earliest days extended its interests and membership to all parts of the British Empire, and in 1869 it founded an Indian Section and a little later a Dominion and Colonies Section. The Indian Section is under the control of a Committee comprised largely of former Lieutenant Governors of Provinces and others who have held the highest Indian administrative posts. Under its auspices a series of important lectures on Indian subjects is given each year, which with the other lectures delivered before the Society are published in the weekly *Journal* and circulated to members of the Society all over the world. There are a large number of Fellows resident in India. *Patron* H. M. the King. *President* H. R. H. the Duke of Connaught. *Chairman of Council* Colonel Sir A. Henry McMahon, GCMG, GVO, KCIE, CSI. *Chairman Indian Section Committee* Sir Atul C. Chatterjee, GIE, KCSI. *Secretary* W. Perry, MA. *Assistant Secretary and Secretary Indian and Dominion and Colonies Sections* K. W. Luckhurst, MA. *Society's House* 18, John Street, Adelphi, London, W.C. 2.

SERVANTS OF INDIA SOCIETY—The Servants of India Society, founded by the late Hon. Mr. G. K. Gokhale in 1905, is a body of men who are pledged to devote all their lives to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means, the interests of the Indian people. Its present strength is 20 Ordinary members, 8 members under training, and 1 permanent assistant. The Society has its headquarters in Poona with branches at Madras, Bombay, Allahabad and Nagpur and other centres of work at Dohad in Gujarat, Mayanur, Mangalore and Calcutta in the Madras Presidency, Lucknow in U. P., Lahore in the Punjab and Cuttack in Orissa.

The Society's work is primarily political but as it believes in all round progress of the Indian people, it has always laid equal emphasis on social, economic, educational, labour and depressed class activities and has worked in these fields. The political work is done through the legislatures, the non official political organizations, deputations to foreign countries and propaganda.

In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U. P. Seva Samiti, the Bhil Seva Mandal catering for the needs and uplift of the aboriginal tribes in Gujarat. The Seva Sadan has been a model institution for the education of women which gives training to over 1,500 girls and women in all useful directions. It has many branches in different parts of India carrying on social and educational work. The Social Service League has done good co-operative, educational and welfare work for the mill workers in Bombay by starting Co-operative Societies, adult night and technical schools and conducting welfare centres. The Seva Samiti is a unique organization in Upper India doing service to the pilgrims going to religious places such as Hardwar and Benares and working in times of epidemics. Its Boy Scouts organization is a well knit body recognised both by the public and Government. Mr. Chitla conducts the Bhagini Samaj for social, educational work among the Gujarati ladies. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities in Malabar district. In the Co-operative movement the Society has done the pioneering work in the Bombay and Madras presidencies. During natural calamities such as floods, famines and epidemics the Society has done relief work in every part of India. By its work in the Moplah rebellion, the Society has become a household name in Malabar.

The Society conducts three papers—The *Servant of India*, an English weekly of which Mr. S. G. Vaze is Editor, the *Dnyan Prakash* the oldest Marathi daily of which Mr. Limaye is the Editor and the *Himavad*, a weekly. Mr. Parulekar conducts the *All India Trade Union Bulletin*, and Mr. A. V. Patwardhan the *Sanshani Sevaraj*, a Marathi weekly for the benefit of the subjects of Indian States. The Society has also published several pamphlets on public questions of the day.

The question of the subjects of the Indian States has also engaged the attention of the Society and some of its members, particularly Messrs. A. V. Patwardhan, S. G. Vaze, and A. V. Thakkar are devoting a part of their energies for that work.

the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfilment of these objects the Association shall carry on educative, and propagandist work by means of leaflets, pamphlets and other publications, (a) representations to Government, (c) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (d) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

President—Shri Chumanilal H. Setlavad
VICE-PRESIDENTS—The Hon. Shri Phiroze C. Sethna, K.T.O.B.F. and Shri G. V. Jhangir (Jr.) K.C.I.F., **Hon. Secretaries**—Mr. K. I. Kabiruddin, Mr. J. R. B. Jeejeebhoy, D. G. Dalvi and Mr. A. D. Shroff.

Assistant Secretary—Mr. V. R. Bhende.

Office—107, Esplanade Road, Fort Bombay.

WOMEN'S INDIAN ASSOCIATION (PUNJAB)
MALABAR (MALABAR)—This Association was started in Madras in July 1917, with aims of service.

Aims and Objects—To present to women their responsibilities as daughters of India. To secure for every girl and boy the right of education through schemes of compulsory Primary Education including the teaching of religion. To secure the abolition of child marriage and to raise the Age of Consent for married girls to sixteen. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative Councils and Assemblies. To secure for women the right to vote and to be elected for the Council of State. To establish equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands, for as wives and mothers they have the task of training guiding and forming the character of the future rulers of India. To band women to groups for the purpose of self-development and education and for the definite service of others.

It has 48 branches and over 4,000 members. Each branch is autonomous and works according to the needs of the locality.

The Association grants scholarships to girls interests women in maternity and child welfare work in the uplift of the depressed class and in other social and welfare activities for the general betterment of Indian society has worked successfully for securing Franchise for women in India, (see pages 93 and 94 of the

Simon Report Vol. II) and compulsory education for girls and also actually helped in the passage of Child Marriage Restraint Act in the Assembly and the Acts for the Suppression of Infant Marriage and Children and the abolition of the Devadasi system in the local legislature. Holds regular meetings of women to educate them as to their duties as wives, mothers and citizens publishes a monthly magazine titled *Stri Dharma* now edited by Dr. (Mrs.) S. Muthulakshmi Reddi for carrying out of the above objects. The Association is an All India body. Its largest branch being in Bombay and its branches are spread throughout India and flourishing as far as Kashmir and Lashkar. It is found that women everywhere welcome the opportunities given for their self-development and self-expression. The Association is affiliated to all the important progressive women's associations in India and throughout the world. It was the initiator of the All India Women's Conference and the first All Asia Women's Conference at Lahore. The Madras Nivasa and the Madras Children's Aid Society, the Montessori School owe their origin to the efforts of this Association. The Association have now opened a Rescue Home to facilitate the working of the Rescue Section of the Immoral Traffic Act which have been enforced by Government. The Home was opened on 21st March 1934 by Lady Beatrice Stanley.

YOUNG MEN'S CHRISTIAN ASSOCIATION—This Association which was founded by the late Sir George Williams in 1844, is now a world wide movement well established in almost every country in both the hemispheres. The aim of the Association is through its religious, social, educational, and physical work to answer the fourfold—spiritual, social, mental and physical—needs of young men and boys.

The Young Men's Christian Association though relatively new to India, is spreading rapidly. The local Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and Ceylon.

There are now over 60 Associations affiliated to the National Council and many other village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as the local headquarters—Allahabad, Alleppey, Bangalore, Bombay, Calcutta, Calicut, Coimbatore, Colombo, Delhi, Galle, Hyderabad, Jabalpur, Kandy, Karachi, Kunnawulam, Kottayam, Lahore, Madras, Madurai, Nagpur, Naini Tal, Ootacamund, Poona, Rangoon, Risalpur, Secunderabad, Simla, Trivandrum, Wellington. The others use rented or rent free buildings.

The work of the National Council and of the local Association is carried on by numerous voluntary workers and Committees, assisted

by 55 specially trained full time Secretaries. A feature of the Y M C A in India is the international character of its Secretariat. It is made up of 7 Americans, 2 Canadians, 5 Englishmen, 3 Scotchmen, 1 Swiss, 1 Swedish, 4 Anglo Indians, 1 Dane, 2 Australians, 1 Burman and 58 Indians and Ceyloneses.

The work of the National Council (excluding that of the 50 local Y M C A's) called for a Budget of Rs 1,25,662 in 1933. Of this sum Rs 28,790 had to be raised from the public in India.

The Headquarters of the National Council is 5, Russell Street, Calcutta. The officers are —

Patron — His Excellency the Earl of Willingdon, GMSI, GMIE, GCMG, GBE
Viceroy and Governor General of India

President of the National Council — The Most Rev Dr Foss Westcott, Metropolitan of India

General Secretary — B L Rallia Ram, B Sc, B T

The Bombay Association now possesses four well equipped buildings — Wodehouse Road, Lamington Road, Rebbsch Street, and Reynolds Road. The President is Mr C G Freke M A, B Sc J P, FSS ICS and the General Secretary is Mr Joseph Callan. In connection with each branch there is a well managed hostel providing accommodation for over 200 young men. These branches are managed by a Committee working under the Board of Directors. Each Branch organisation directs many and varied activities designed to meet the physical, spiritual, social and mental needs of their members. A Welfare Service agency for labourers started in 1924 is now conducting eight centres, serving mill workers, Municipal mental employees, Port Trust and Railway employees. A programme of education, lectures, physical culture, play and general uplift, profitably fills up the leisure time of the workers and their families. The Association is responsible for the direction of three public playgrounds in the city, which are financed by the Municipality.

YOUNG WOMEN'S CHRISTIAN ASSOCIATION OF INDIA, BURMA AND CEYLON — This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual, intellectual, social and physical development. The Association exists for Indian, Anglo Indian and European girls and women. There are members in the following branches: General 39,

Schoolgirl 23, Girl Guide Companies 35, Blue Bird Plocks 19. The needs of girls are met by physical drill, recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for social intercourse. Hostels, some of them holding as many as 70 girls, are established where there is a demand for them and the Association, at present, owns 21. Including 8 Holiday Homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices. Rates vary according to the residents' salaries and accommodation, though all equally receive the benefits of a comfortable home, good food and wholesome surroundings. The holiday Homes provide cheap holidays in healthy surroundings and also accommodate girls who work in the hills during the hot season. In addition to Holiday Homes Summer Conferences are held annually at Anandagiri. The Conference estate owned by the Association, in Ootacamund, Special Girls Camps are arranged from time to time in many centres.

Travellers and work is done in the large ports, especially Colombo, and a large number of transient guests and visitors are accommodated in the Homes in these cities. The Association also runs an Employment Bureau through the agency of which many girls find positions. The commercial schools train girls for office and business life. These large Associations are manned by a staff of trained Secretaries, some of whom come from Great Britain, America, Australia, New Zealand and Canada. The others are found and trained in India. In many of the smaller branches where the work is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year.

The Association, which is affiliated to the World's Young Women's Christian Association, is international and interdenominational. Active membership is open to all who declare their faith in our Lord Jesus Christ and desire to serve others in His spirit of love and Associate membership is open to any girl or woman, regardless of what her religion may be, who wishes to join the world wide fellowship of the Y W C A and declare her sympathy with its purpose, and to share in its activities.

The Patroness of the Association is H I the Marchioness of Linlithgow.

Copies of the Annual Report and other printed matter can be obtained from the National Office which is at 134, Corporation Street, Calcutta. The official organ of the Association is the leaflet "Everymember" which is issued each month and sent to members and friends of the Association.

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA

The Association of British University Women in India was established in 1913. Its objects are —

(1) To facilitate Intercommunication and co-operation between women belonging to the universities of the United Kingdom, resident in India

(2) To provide a means of keeping in touch with the universities of the United Kingdom by communication with the British Federation of University Women, and otherwise as may seem expedient

(3) To act as an organisation which shall afford opportunity for the expression of united opinion and for concerted action by university women

Membership is open only to those women who hold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours (Certificates, but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women

The Association of British University Women has two branches. The addresses of the Honorary Secretaries are as follows —

Honorary Local Secretaries

Bombay	Mrs C M Scott, Divisional Engineer's Quarters, Central Telegraph Office Bombay
Punjab	Mrs Skemp, Race Course Road, Lahore

The Delhi and Punjab Branches came into existence in 1918. The Calcutta and Bombay Branches are influential and have repeatedly intervened with good effect to educate public opinion with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products.

The Bombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special sub-committee, organized public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of the Association was the establishment of **Women's Employment Bureau** in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council, the Calcutta Bureau has ceased to exist.

As a means of promoting friendship between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform.

This Association is Federated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Federation.

Federation of University Women in India

This is an organization conceived to unite for service and fellowship all University Women of whatever race or University who may be resident in India. Units representing British Universities, Indian Universities and American Universities severally have existed since 1913 (Britain) and 1920 (India and America) respectively.

These Units are now affiliated to the F U W I and are as such affiliated to the International Federation of University Women which embraces 31 countries of the world and has its headquarters at Crosby Hall, Chayne Walk, London.

This International Federation is then a kind of League of Nations in which the University is the Unit, and the opportunities it affords for better understanding for world friendship, and world service will easily be imagined.

As forming one Family, its Members help the common cause of women: they help one another by inspiration and interchange of service; they help the country for which as individual Units they stand inasmuch as that country is swept forthwith by reason of its place within the International Federation alone, into world statistics and the dignity of recognition by the League of Nations at Geneva.

The benefit to Members individually also is great. The Club Houses of the Federation all over the world are open to them. Equally so are all Scholarships and Fellowships offered by the Federation.

During 1929 these last have included Scholarships from Great Britain and America which gave free tuition, board and residence at certain Colleges to students for a degree; residential scholarships at Crosby Hall; valuable Fellowships and Prizes offered chiefly for Medical or Scientific research by Australia and America.

A special scholarship was offered in 1929 by Barnard College, Columbia University to under graduates from India.

Membership is open to Women Graduates of any University through the Unit representing that University. Colonial Graduates are at present attached to the British Unit.

The Federation has Branches in Bombay, Lahore, Madras, Kodaikanal. Each Branch has its local committee. But as a whole the Federation is under a Central Committee composed of a President, Hon. General Secretary, Hon. Treasurer, and one corresponding member from each unit.

OFFICE BEARERS, CENTRAL COMMITTEE

Pending the formation of a Central Committee for 1936, all communications, till further notice should be sent to —

Mrs McKenzie M A, J P,
Wilson College
Chowpatty,
Bombay 7

Applications for membership should be made to the Honorary General Secretary who will forward the same by the Local Secretary to whose Unit it may appertain

ASSOCIATION OF COLUMBIA UNIVERSITY ALUMNI IN INDIA — This is an organization conceived to unite for service and fellowship all Columbia alumni who may be resident in India. It was founded in 1931 and is a constituent member of the Alumni Federation of Columbia University, New York, U S A. There are more than fifty such Columbia Associations including one in London, Paris, Madrid and Berlin. The India Association has its Headquarters in Bombay.

President of the Association Dr Jal Dastur C Pavry, M A, Ph D, 63, Pedder Road, Malabar Hill, Bombay

The Church.

The Church of England in India became on March 1, 1930 a self governing branch of the Anglican Communion. Until that date it had been an integral part of the Church of England and its bishops were considered to be suffragans of the Archdiocese of Canterbury. This legal bond was severed by the passing of the Indian Church Act and Measure in 1927, and from the date of severance appointed under the Act the Church of India, Burma and Ceylon has been free to manage its own affairs, although as it states in the Preamble to its Constitution it has no intention or desire to renounce its obligations to the rest of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity.

Like all the other branches of the Anglican communion the Church of India, Burma and Ceylon is Episcopal. It is composed of fourteen sees: Calcutta, Madras, Bombay, Colombo, Lahore, Rangoon, Travancore and Cochin, Chota Nagpur, Lucknow, Tinnevely and Madura, Nagpur, Durnakal, Assam and Nasik. Of these the first to be erected was Calcutta in 1814 and the last was Nasik in 1930. Vacancies on the Episcopal Bench are filled by election each diocese electing its own bishop. The Bishops rule the Church and to them is reserved the final word in all matters of faith and order, but they rule in conjunction with a system of Councils which has been framed so as to give the greatest possible amount of representation to the whole body of the faithful. The foundation of the system is the **Parochial Council** of which the Parish Priest is the convener and chairman. Every baptised, and confirmed member of the Church residing in the parochial area who contributes in some recognised way, to the financial support of the Church is a member of the Parochial Council of the ecclesiastical area in which he resides and is called a Qualified Elector.

Above the Parochial Councils come the **Diocesan Councils**. All Priests holding the Bishop's licence are members of the Diocesan Council and to it are sent lay representatives elected by the Qualified Electors of every Parochial Council. The Diocesan Councils manage all purely domestic matters and have the right of petitioning the General Council about any subject of wider importance which may interest them. They elect a given number of priests and laymen to be their representatives on the General Council. General Councils are held not less than every three years and usually at Calcutta. They consist of three Houses, Bishops, Priests and Laymen. Every Diocesan Bishop has a place in the House of Bishops. The other two Houses are formed by the elected representatives of the Diocesan Councils. The three Houses usually sit and vote together,

but any House has the right to meet alone if it desires to do so in order to formulate its policy or classify its opinions. A Canon of the Church is a Resolution passed with additional precautions ensuring due consideration by all three Houses. In all questions touching faith or Order the position of the episcopate as the divinely authorised teacher of the Church is most carefully safeguarded and the Bishops alone without the concurrence of the other Houses can issue Determinations about both subjects. But no Determination of the Bishops can be the subject of disciplinary action until it has become a Canon.

Every priest before being licensed to work in the Church of India, Burma and Ceylon takes an oath of obedience to the Canons.

The Ecclesiastical Establishment—At the time of the passing of the Indian Church Act and Measure the Government of India acknowledged that it was responsible for providing for the spiritual needs of the Soldiers and Civilians whom it brought out to India. These responsibilities it discharges by maintaining an establishment of chaplains and churches for the four principal denominations of Christians—Anglican, Presbyterian, Roman Catholic and the Free Churches. The Chaplains of the two first named groups are appointed by the Secretary of State for India. The Anglicans on the recommendation of a Selection Committee of which the Archbishop of Canterbury is the Chairman. They are paid by Government and pensioned after a covenanted period of service. Although they form a definite Department of Government they are not subject to the orders of anyone save their own ecclesiastical superiors. The Presbyterian Chaplains are sometimes appointed to stations and sometimes to regiments. The Anglican chaplains are always chaplains of stations and have the pastoral care of all the inhabitants of the station who do not deliberately withdraw themselves from their ministrations, but when troops are included in the number of their prisoners Government orders that they shall have the first claim on their services. The chaplains and their congregations are members of the Church of India, Burma and Ceylon during their residence in India and have full rights of representation in the Councils of the Church. Their right to the use in worship of the Prayer Book of the Church of England is not only acknowledged in the Constitution of the Church but is also safeguarded by clauses in the Indian Church Act.

Government gives to the Metropolitan an annual block grant which is divided between the seven bishops whom Government recognises as having jurisdiction over the Establishment Chaplains and their congregations. These are the Bishops of Calcutta, Madras, Bombay, Lahore, Lucknow, Rangoon and Nagpur.

before 1930 they formed part of the establishment. One of the difficulties which the Church is facing is that the Government Block Grant is not large enough to provide for all the needs of these bishops. In consequence the Church is struggling to raise Diocesan Endowment Funds to make up deficits. More serious still, however, is the situation brought about by the action of Government in 1924, when in pursuance of a general policy of economy necessitated by post war conditions it cut down the number of its chaplains by sixty. This set the dioceses a very difficult task. It became necessary suddenly to provide the salaries of Diocesan Chaplains and to furnish funds for the upkeep of the churches of many civil stations previously maintained by Government. Realising the magnitude of this burden Government agreed to help for a period of seven years by means of a very generous Block Grant. The question of the reduction of this grant is now under consideration. If the grant is considerably reduced the situation in most dioceses will be very serious. Either the Church must raise and devote to its European work a greatly increased sum of money or many of the churches in up country stations will have to be closed. The chief sufferers will be the Anglo Indian and Domiciled community which on account of 'Indianisation' is less able than ever to carry the burden which it seems must inevitably be laid upon it. The difficulty of raising funds for the education of the children of this community and of obtaining priests to work for it becomes greater year by year. Nevertheless the Domiciled Community is the backbone of the Church in India and it is through this community that the conversion of India must come.

The Church in India have not been wholly blind to these facts and have made desperate attempts to cope with the needs of the community in spite of lack of real support from home. The education of its children is very largely in the hands of the Christian denomination though there are a few institutions such as the La Martiniere Schools, on a non-denominational basis, but they are exceptional. In all the large centres there exist schools of various grades as well as orphanages, for the education of Europeans and Anglo-Indians under the control of various Christian bodies. The Roman Catholic Church is honourably distinguished by much activity and financial generosity in this respect. Her schools are to be found throughout the length and breadth of the Indian Empire, and they maintain a high standard of efficiency. The Anglican Church comes next, and the American Methodists have established some excellent schools in the larger hill-stations. The Presbyterians are also well represented in this field, particularly by the admirable institution for destitute children at Kalimpong, near Darjeeling. Schools of all denominations receive liberal grants-in-aid from Government, and are regularly inspected by the Education Departments of the various provinces. Thanks to the free operation of the denominational principle and its frank recognition by Government, there is no "religious difficulty" in the schools of the European and Anglo-Indian communities.

Christian Missions.

The tradition that St. Thomas, the Apostle was the first Christian missionary in India is by no means improbable. History, however, carries us no further back than the sixth century, when a community of Christians is known to have existed in Malabar. Since then the so-called Syrian Church in south-west India has had a continuous life. Except in its infancy this Church (or rather these Churches or the Syrian Christians are now divided into four communions) has displayed little of the missionary spirit until quite recent times. Western Christianity was first introduced into India by the Portuguese, who established their hierarchy throughout their sphere of influence, Goa being the metropolitical see of the Indies. St. Francis Xavier, a Spaniard by race, took full advantage of the Portuguese power in Western India to carry on his Christian propaganda. His almost super-human zeal was rewarded with much success, but many of the fruits of his labour were lost with the shrinkage of the Portuguese Empire. It is really to the work of the missionaries of the Propaganda in the 17th century that the Papacy owes its large and powerful following in India to-day. The Roman Catholics in India number 2,768,598. The total of "Syrian" Christians (exclusive of those who while using the Syrian liturgy, are of the Roman obedience) is 517,247, as against 367,000 in 1901. Protestant Christians (the term throughout this article includes Anglicans) number 3,002,558, an increase of 547,000 since 1911. Thus, the total number of Christians of all denominations in India is now over six millions.

British India was opened to Missions by the Government of India Act of 1813, and the work of the Protestant missions, previously confined to Dutch and Danish India and a few Indian States, may be regarded as having begun to assume its present scale from that date. The statistical results are given above. It is now, however, generally recognized that Christian missions are producing indirect effects in India which lend themselves only incompletely to any sort of tabulation. The main agency of this more diffusive influence of Christianity is the missionary school and college. The Protestant missions fill a considerable part in the elementary education of the country. According to the 1923 Report of the National Christian Council for India they are teaching 420,255 children in 12,699 elementary schools, mostly situated in villages. The majority (243,895) of children in these schools are non-Christian. The same is true also of the secondary schools and in a still greater degree of the colleges. The former number 523 with 70,254 male and 25,303 female pupils. There are 40 colleges affiliated to Universities, containing 20,062 male and 1,309 female students. Of these as many as 14,148 are non-Christians. From the standpoint of missionary policy much importance is attached to these agencies for the indirect propagation of the Christian faith. The statesman and the publicist are chiefly interested in the excellent moral effect produced by these institutions amongst the educated

classes, and the higher educational ideals maintained by their staffs. The principal **University colleges** under Protestant auspices are the **Madras Christian College**, the **Duff College**, **Calcutta**, the **Wilson College**, **Bombay**, the **Forman College**, **Lahore**, and three women's colleges—the **Women's Christian College** at **Madras**, the **Isabella Thoburn College** at **Lucknow**, and the **Women's Christian Medical College** at **Ludhiana**. The **Roman Catholics** have a large number of educational institutions, ranging from small village schools to great colleges preparing students for University degrees. But the proportion of Christian students in their institutions is very much larger than in those of the Protestant bodies. The proportion of literates amongst native **Roman Catholics** is probably lower than amongst the Protestant converts, but compared with **Hindus** and **Mahomedans** it is conspicuously higher. The **Roman Catholics** have some 3,000 elementary schools in which 98,000 boys and 41,000 girls are receiving instruction. In middle and high schools they have 143,000 boys and 73,000 girls and in University colleges about 6,000 students of both sexes. These figures, however, include a large proportion of **Europeans** and **Eurasians**, who are an almost negligible quantity in Protestant mission schools and colleges.

More recent, but producing even more widespread results, is the **philanthropic work** of Christian missions. Before the great famine of 1878, missionaries confined themselves almost exclusively to evangelistic and educational activity. The famine threw crowds of destitute people and orphan children upon their hands. Orphanages and industrial schools became an urgent necessity. But the philanthropic spirit is never satisfied with one kind of organisation or method. A great stimulus was also given to medical missions. **Hospitals and dispensaries** have sprung up in all parts of the mission field, and leper asylums are almost a monopoly of Christian missionary effort. In 1911 the total number of medical missionaries working under Protestant societies in India was 118 men and 217 women, the majority of the former being also ordained ministers of religion. There are 184 industrial institutions in which 59 different arts and crafts are taught, ranging from agriculture to type writing. In this department the **Salvation Army** hold a prominent place, and the confidence of Government in their methods has been shown by their being officially entrusted with the difficult work of winning over certain criminal tribes to a life of industry. The indirect effect of all this philanthropic activity under missionary auspices has been most marked. It has awakened the social conscience of the non-Christian public, and such movements as 'The Servants of India' and the mission to the Depressed Classes are merely the outward and visible sign of a great stirring of the philanthropic spirit far beyond the sphere of Christian missionary operators.

Reunion—For very many years Indian Christians have shown that they felt much more acutely than Europeans the scandal and disadvantage of the divisions of Christen-

dom. These divisions are due to a very much greater extent than is always recognized to political causes, and in the political conflicts of the sixteenth and seventeenth centuries, when they became crystallised, India had no part. Even those differences amongst Christians which have a purely religious origin and foundation seem to be of very little account to Indian converts. For them the great dividing line is that between **Christ** and **Mahomed** or **Shiva** and **Vishnu**. Standing before a background of paganism they are conscious of a real fundamental unity in **Christ**. Compared with the greatness of the gulf which separates Christian from non-Christian, the differences of 'confession' and 'order' which separate Christian from Christian seem to be wholly artificial and negligible. In consequence the reunion movement, which is noticeable all over the world, is nowhere so strong as in India. In South India it has already resulted in the formation of the **South India United Church**, which is a group union of five of the principal Protestant communions, and as these bodies are in communion individually with all, or almost all, the other Protestant bodies at work in India the Union may be regarded as a **Pan-Protestant Union**. The **S I U C** is at present negotiating with the **Anglican Church**. If as seems probable the negotiations are successful the result will amount to a union of all the Christian bodies in South India, except the **Roman Catholics**, on the basis of the last **Lambeth encyclical**. This will mean that a real **National Indian Church** will come into being. Although it will be tolerant of almost every expression of Evangelical opinion and will retain the freedom of development characteristic of Protestantism, by its acceptance of the Catholic creeds and the historic episcopate, it will be linked up with the Catholic tradition of the **Anglican Church**.

Anglican Missionary Societies

The **Church Missionary Society** carries on work in India in seven different missions—the **United Provinces**, **South India**, **Travancore and Cochin**, **Bengal**, **Western India**, **Punjab** and **Sind** and the **Central Provinces** and **Rajputana**. The names are in order of seniority. Work was begun in what are now called the **United Provinces** in 1813, in **Bombay** in 1820, in the **Punjab** in 1851, and in the **Central Provinces** in 1854. The Society has always kept Evangelistic work well to the fore, but it also has important medical missions, especially on the **N-W Frontier**, and many schools of the **Primary**, **Middle** and **High standards**. The **Church of England Zenana Missionary Society** is an offshoot of the **C M S** controlling the work of 162 missionary ladies. The number of ordained European missionaries of the **C M S** in **India** and **Ceylon** is 106, European laymen 30 and European lay women 258. The Society claims a Christian community of 2,21,359 of whom 63,655 are adult communicants.

Society for the propagation of the Gospel Statistics of the work of this Society are not easily ascertained, as much of it is done through Diocesan institutions, which, while financed and in many cases manned by the **S. P. G.**, are

entirely controlled by the Diocesan authorities. The best known of the S. P. G. missions is that at Delhi, commonly called the Cambridge Mission to Delhi, carrying on educational work at St. Stephen's College and School. At the College there are about 200 students under instruction, and at the High School 800. The College hostels accommodate 100 students. Missions to the depressed classes exist in Burma, in the Ahmednagar District and in several parts of South India, especially in the Diocese of Tinnevely Madurai. The S. P. G. also maintains an important Criminal Tribe Settlement at Hubli, in the Bombay Conate. There are 116,000 Indian Christians under theegis of the S. P. G. 90 ordained European missionaries and 98 European lady workers.

Other Anglican Societies—The Oxford Mission to Calcutta was started in 1880. It works in the poorest parts of Calcutta and also at Burisal. There are 11 mission priests of this Society, and 16 Sisters. In addition to its work amongst the poor, the Oxford Mission addresses itself to the educated classes in Bengal and issues a periodical called *Lophany*, which is known all over India.

The Society of St. John the Evangelist (commonly known as the Cowley Fathers) has houses at Bombay and Poona, and small stations in the Bombay Konkan. In Bombay its missionary work centres upon the Church of Holy Cross, Umurkhadi, where there is a school and a dispensary. The Christians are chiefly drawn from the very poorest classes of the Bombay population. At Poona the Society co-operates with the Wantage Sisters and in Bombay with the All Saints Sisters. Other Anglican sisterhoods represented in India are the Clewer Sisters at Calcutta and the Sisters of the Church (Kilburn) at Madras. The St. Hilda's Deaconesses Association of Lahore carries an important educational work (chiefly amongst the domiciled community) in the Punjab. The mission of

the Scottish Episcopal Church at Nagpur, the Dublin University Mission at Hazaribagh and the Mission of the Church of England in Canada working at Kangia and Palampur (Punjab) should also be mentioned under the head of Anglican Missions.

The Bible Churchmen's Missionary Society carries on work in India in three missions—the Central Provinces, the United Provinces, and Burma. Work was begun in all of these Provinces in 1921. The work of the Society is primarily Evangelistic and the work is carried on by means of Hospitals, Dispensaries, Schools and Camps. The Society has 17 principal Stations of which 5 have Hospitals and 7 Schools, the latter including the School for the Deaf in Rangoon. The number of Ordained European missionaries of the B. C. M. S. in India and Burma is 11 Doctors, 4 European laymen, 11 and European laywomen 61. There are 54 Indigenous workers, including 3 Doctors. Statistics of the Christian community from all Stations are not available.

An interesting development has lately taken place in the Anglican communion. In 1922 the foundations were laid of a new Religious community called the Christa Seva Sangh or the Society of the Servants of Christ. The aim of its members is to enable Indians and Europeans to live together a common life based upon the three fold vows of poverty, chastity and obedience and by living together to develop the Religious life along lines peculiarly suited to India. Indians appreciate fully the value of renunciation. The Sangh hopes to commend Christianity to India by presenting it with a concrete illustration of Christian asceticism. The first Ashram of the Brotherhood was consecrated by Dr. Palmer, Bishop of Bombay in 1928. It is situated in Poona and it contained at the time of consecration 13 Brothers, of whom 6 were Indians and 7 Europeans. It shows every sign of life and growth.

THE ROMAN CATHOLIC CHURCH

The Catholic community is composed of the following elements —

- (1) The ' Syrian ' Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599 and placed first under Jesuit bishops and then under Carmelite Vicar Apostolics. They are at present ruled by an Archbishop and three suffragan Bishops of their own Syrian rite.
- (2) Converts of the Portuguese missionaries from 1600 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.
- (3) European immigrants at all times, including British troops.
- (4) Modern converts from Hinduism and Animism in recent mission centres.
- (5) Recent converts from the Jacobite community in Malabar, of which 2 Bishops, 71 priests and some 28,000 laymen have been received into the Catholic Church.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the ' Padroado ' or royal patronage, and the propaganda clergy. This conflict was set at rest by the Concordat of 1886 (amended

by the Agreement of 1923, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows —

Under the Sacred Congregation of **Extraordinary Ecclesiastical Affairs** —

The archbishopric of Goa and Damão (having some extension into British territory) with suffragan bishoprics at Cochim and Mysore (both in British territory).

Under the Sacred Congregation of **Oriental Churches** —

The archbishopric of Ernakulam, with suffragan bishoprics of Changanacherry, Kottayam and Trichur.

The archbishopric of Trivandrum, with suffragan bishopric of Tiruvella.

Under the Sacred Congregation of **Propaganda Fide** —

The archbishopric of Agra, with suffragan bishoprics of Allahabad and Ajmer, and the Prefecture Apostolic of Indore.

The archbishopric of Bombay with suffragan bishoprics of Poona, Mangalore, Calcutta, Trincomopoly and Tuticorin, and the Missions of Ahmedabad and Karachi.

The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishoprics of Nellore, Hyderabad, Vizagapatam and Nagpur, Bewada, the Prefecture Apostolic of Jubbulpore, and the Missions of Cuttack and Bellary.

The archbishopric of Pondicherry (French), with suffragan bishoprics of Mysore, Coimbatore, Kumbakonam, Salem and Madurai.

The archbishopric of Simla, with suffragan bishopric of Lahore and the Prefecture Apostolic of Kashmir and J Mullian.

The archbishopric of Verapoly with suffragan bishoprics of Quilon, Kottar and Vijayapuram.

The archbishopric of Colombo (Ceylon), with suffragan bishoprics at Kandy, Galle, Jaffna and Trincomalee.

Three Vicariates Apostolic and one Prefecture Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregation or mission seminaries, and in the great majority are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number over 2,000 besides which there is a body of secular clergy mostly Indian etc., numbering about 2,400, and probably about 9,000 nuns. The first work of the clergy is parochial ministrations to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people, their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St Xavier's College Calcutta, St Peter's College, Agra, St Xavier's College, Bombay, St Joseph's College Trichinopoly, St Aloysius College, Mangalore, Loyola College, Madras teaching university courses besides a large number of high

schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education in 1936 exceeded half a million. As to missionary work proper, the country is covered with numerous modern mission centres, among which those in the Punjab, Chota Nagpur, Krishnagar, Gujerat, the Ahmednagar district and the Telugu coasts may be mentioned (but particulars on all points will be found in the Catholic Directory already quoted). The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplains are derived mainly from Europe that is, from the collections of the *Society for the Propagation of the Faith* and of the *Holy Childhood*, helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism except for infants or at point of death is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is represented by a Delegate Apostolic of the East Indies who resides at Bangalore. At present this post is occupied by the Most Rev Archbishop Kierkels D.D., appointed in 1931.

THE CHURCH OF SCOTLAND

The Church of Scotland and the United Free Church have become one. The Union effected in October 1929, has already exerted a profound influence upon the life of the Church of Scotland in India. The Chaplaincy work of the Church of Scotland dates from 1814 when the Rev Dr Bryce landed in Calcutta and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated Calcutta 1914 Bombay, 1919, Madras, 1921. Since 1903 there have been eighteen chaplains on the staff of whom nine belong to the Bengal Presidency, five to Bombay, and four to Madras. These minister both to the Scottish troops and to the civil population of the towns where they are stationed, but when there is a Scottish regiment the chaplain is attached to the regiment instead of being posted to the station where the regiment happens to be placed and as a rule moves with the regiment. There are three Presidency senior Chaplains in charge of Bengal, Bombay, and Madras respectively. There are churches in the chief towns of the Presidencies, and churches have also been built in all considerable military stations, e.g., Chakrata Lucknow, Peshawar, Kanikhet, Rawalpindi, Sialkot, Umballa and Jubulpore. In addition to the regular establishment there are a number of acting Chaplains and these are serving in such stations as

Rawalpindi, Lahore Cawnpore Meerut, Mhow and Quetta. The Additional Clergy Societies in India contribute towards the cost of this additional establishment. In other places such as Sialkot Murree, Dalhousie and Darjeeling, regular services are provided by Scottish Missionaries. Simla has a minister of its own sent out from Scotland.

The Mission work of the Church of Scotland dates from 1829, when Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta. He was the first to open schools where English was made the medium for instruction, and where religious teaching was given daily. Similar educational missions were soon afterwards started in Bombay and Madras. Educational work is still an important branch of the mission work of the Church, and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Church College. In the Punjab Evangelistic work is being carried on from eight centres and the baptised Christian community now numbers over 20,000. Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 12,000. In the eight mission districts of Calcutta, the Eastern Himalayas, Madras, Sinal, Manipal, Nepal, Poona, and the

Punjab there were at the end of 1933, over 53,000 baptised Indian Christians in connection with these missions the Women's Association of Foreign Missions does invaluable service in school, medical and zenana work, having in India 41 European missionaries, 163 teachers, over 50 schools three hospitals and six dispensaries

The Church of Scotland has also done much to provide education for European children in India Its two Churches in Bombay have six representatives on the governing body, of the Anglo-Scottish Education Society, and the two churches exercise pastoral supervision over the Bombay Scottish Orphanage In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports a school for poor children The Ayrcliff Girls' Boarding and High School is under the care of the Kirk Session of St. Andrew's Church, Simla The now well known St. Andrew's Colonial Homes at Kalimpong, Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by missionaries of that Church The homes exist for the benefit of the domiciled European Community, and are doing magnificent work

There are now twenty cottages, and about 600 children in residence The Church has many schools in all parts of its field and it has also made a large contribution to the work of higher education in India through five Christian Colleges The Scottish Church College, Calcutta, is well known The Madras Christian College which owes so much to the work of Dr. William Miller, is now under the direction of a Board representing several Missionary Societies Other Colleges are Wilson College, Bombay, Bishop College, Nagpur and Murray College, Sialkot The Church also carries on important medical work There are nineteen Mission Hospitals at different centres among which are four excellently equipped and staffed Women's Hospitals in Madras, Nagpur, Amrit and Poona Further information may be found in "Reports of the Schemes of the Church of Scotland," Blackwood & Sons "The Church of Scotland Year Book" and "The Handbook of the Church of Scotland in India and Ceylon"

Though the former Churches of the United Free Church now belong to the Church of Scotland they remain independent of the establishment recognised by Government They have only three purely European congregations in India, two in Calcutta, and one in Bombay

BAPTIST SOCIETIES

THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar and Orissa, the United Provinces, the Punjab and Ceylon The Baptist Zenana Mission and the Bible Translation Society have been united with this Society The staff of the united Mission in India and Ceylon numbers 202 missionaries and 1,044 Indian and Singhalese workers Connected with the Society are 416 Indian and Singhalese Churches, 299 Primary Day Schools, 20 Middle and High Schools, and 1 Theological Training College The Church membership at the close of 1935 stood at 24,701 and the Christian community at 69,819 Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting

Special work amongst students is carried on in Calcutta, Dacca, Cuttack, Patna and Delhi where hostels have been erected for the prosecution of this form of work

EDUCATIONAL WORK—Ranges from Primary School to Colleges Serampore College with its Royal Charter granted by His Danish Majesty in 1827, confirmed by the British Government in the Treaty of Purchase of the Settlement of Serampore in 1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Educational operations, in Arts and Theology It was affiliated in 1857 to the newly formed Calcutta University, reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an inter-denominational basis

for the granting of Theological Degrees to qualified students of all Churches

In Arts and Science the College prepares for the Calcutta Examinations *Principal* Rev. G. H. C. Angus, M.A., B.D.

There is a vernacular institute also at Cuttack for the training of Indian preachers and Bible schools in several centres

There are 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations Medical work connected with the Society is carried on in 8 Hospitals Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack The Secretary of the Mission is the Rev. D. Scott Wells 41, Lower Circular Road, Calcutta

The Headquarters of the Mission are at 19, Furnival Street, Holborn, London The total expenditure of the Society for 1935 amounted to £164,272 of which £71,757 was expended in India and Ceylon

THE CANADIAN BAPTIST MISSION—Was commenced in 1873, and is located in the Telugu Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts There are 20 stations and 632 outstations with a staff of 101 missionaries including 8 qualified physicians, and 1,525 Indian workers, with Gospel preaching in 1,659 villages Organised Churches number 126, communicants 28,236 and adherents 26,719 for the past year Forty-six Churches are entirely self-supporting In the Educational department are 558 village day schools, with 19,993 children, 12 boarding schools, 2 High schools, 2 Normal Training schools, a

Bible Training School for Women, a Theological Seminary providing in all for 1,000 pupils, and an Industrial school. There are 6 Hospitals, two leper asylums and an Orphanage. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. During the last decade membership has increased by 65 per cent, the Christian community by 20 per cent, and scholars by 105 per cent. Indian Secretary is the Rev J. B. McClure (Cochin).

AMERICAN BAPTIST FOREIGN MISSION SOCIETY, organized in 1814, has Missions in Burma begun 1813, Assam 1836, Bengal and Orissa 1836, South India 1840. It owes its origin to the celebrated Adoniram Judson. Until 1910 the Society was known as the American Baptist Missionary Union. There are 32 main stations of the Mission in Burma, 11 in Assam, 10 in Bengal and Orissa, and 29 in South India, besides many outstations. All forms of missionary enterprise come within the scope of the Society.

The great work of the Mission continues to be evangelistic, educational and medical, and the training of the indigenous pastors, preachers and Bible Women and extends to many races and languages. The most important result of its work in Burma, has been the practical transformation of the Karens and the Kachins whose languages have been reduced to writing by the Mission. The Chins of the Chin Hill Tracts are also progressing along the same under the influence of the Mission. The work in Assam embraces 11 different languages and large efforts are being made amongst the employees of the tea plantations. The Mission Press at Rangoon is the largest and finest in Burma.

In the year 1935 the field staff numbered 351 missionaries, 6,709 indigenous workers. There were 2,868 organised Churches of which 2,139 were self supporting. Church members numbered 2,08,222. In the 2,441 Sunday Schools were enrolled 91,883 pupils. The Mission conducted 2,710 schools of all grades. Judson College at Rangoon and the Agricultural School at Pyn Omying being among them with 9,162 students enrolled. 13 hospitals and 34 dispensaries treated 104,400 inpatients and 1,35,711 outpatients. Christians of all communities among whom the Mission works contributed over Rs. 5,78,819 for this religious and benevolent work during the year.

THE AMERICAN BAPTIST ASSAM MISSION, was opened in 1836, and has 11 main stations staffed by about 53 missionaries. There are 854 native workers, 923 organized churches, 7,817 baptised members, 386 schools of all grades including 2 High, 2 Normal, 3 Bible and 10 station schools, 4 Hospitals and 5 Dispensaries treated 2,18,819 inpatients and 33,788 outpatients during the year. Mission work is carried out in 11 different languages.

Treasurer and Corresponding Secretary Miss Marion G. Burnham, Gauhati, Assam.

AMERICAN BAPTIST, BENGAL ORISSA MISSION, commenced in 1836. Area of occupation Midnapore district of Bengal, Balasore district of Orissa and Jamshedpur Town of Bihar. Mission staff 20, Indian workers 400. English Churches 2, Vernacular Churches 38. Church membership 3,014. Educational 1 Boys High and Technical School and 1 Girls High School, Balasore. 1 Girls High School Midnapore, and 1 Boys High School Bhimpore. Elementary Schools, 103. Pupils under instruction 4,303. Work chiefly for Oriya and Santal peoples.

Secretary The Rev L. C. Frush, Khairapur, Bengul.

THE AMERICAN BAPTIST TELUGU MISSION Was commenced in the year 1836, and covers large parts of Nellore, Guntur, Kistna, and Kurnool Districts, parts of the Deccan and an important work in Madras and the surrounding vicinity. Its main work is evangelism, but there are also Educational and Medical Institutions of importance. Industrial departments are maintained also in connection with the Mission. High Schools at Nellore, Ongole and Kurnool. Teacher Training Schools for men are maintained at Bapatla and Guntur and Teacher Training Schools for Women at Ongole and Nellore. Organized Telugu Churches number 301, with 109,683 communicants. There are 60 missionaries, and 2,829 Indian workers. The Mission maintains a Theological Seminary at Ramapatnam for the training of Indian preachers. A Bible Training School for the training of Telugu women is located at Nellore. A total of 37,187 receive instruction in 1,149 primary schools, 25 secondary schools and 3 high schools. In Medical work 6 Hospitals and 10 Dispensaries report 41,325 patients, and 1,685 operations during 1936.

Secretary—Rev T. Wathne, Ongole, Guntur District, South India.

THE AUSTRALIAN BAPTIST FOREIGN MISSION—(Incorporated) Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal. The staff numbers 27 Australian workers. There are 3,247 communicants and a Christian community of 6,215.

Secretary, Field Council The Rev J. E. Watson, Mission House, Comilla, England.

THE STRICT BAPTIST MISSION—Has 22 European Missionaries and 241 Indian workers in Madras, Chingleput, Salem, Ramanad and Tinnevely Districts. Communicants number 1,532, organised churches 58, elementary schools 87 with 3,218 pupils.

Treasurer and Secretary Rev D. Morling, Kovilpatti, Tinnevely District.

PRESBYTERIAN SOCIETIES

THE IRISH PRESBYTERIAN CHURCH MISSION—Operates in Gujarat and Kathiawar with a staff of 36 Missionaries, of whom 13 are clerical, 14 Educationalists, 6 are Doctors and 2 Nurses. The Indian staff numbers 524, of whom 15 are leaders, 87 Evangelists, 4 Colporteurs, 41 Bible

women, and 348 are Teachers. There are 19 Organised Churches, a communicant roll of 2,358, and a Christian Community of 7,739. In Medical work there are 4 Hospitals and several Dispensaries with 1,714 inpatients and 17,377 new cases, and a total attendance of 67,819. The

Mission conducts 3 High Schools, 1 Anglo Vernacular School, 1 Preparatory School at Parantij and 131 Vernacular schools affording tuition for 6,724 pupils, also 1 crèche, 4 Orphanages, an Industrial School at Borsad a Teachers Training College for Women at Borsad a Divinity College at Ahmedabad and a Mission Press at Surat. The Mission has made a speciality of Farm Colonies of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 7 Missionaries is a branch of the activities of the above working in the Panch Mahals and Rewa Kantha districts with Farm Colonies attached.

Secretary Rev. F. M. Broly, B. A. Surat.

THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA—The Sikhote Mission of this Church was established at Sukot in the Punjab in 1855. It is now carrying on work in the civil districts in the Punjab and two in the Punjab. Its missionaries number 84. Its educational work comprises one Theological Seminary, one College, four High Schools, one Industrial school, seven Middle schools and 181 Primary schools. The enrolment in all schools in 1930 was 10,063. Medical work is carried on through five Hospitals and four Dispensaries. The communicant membership of the Church which has been established is 43,432 and the total Christian community 69,013.

General Secretary Rev. H. C. Chambers, D. D. Gordon College, Rawalpindi.

THE AMERICAN PRESBYTERIAN MISSION operates in three main sections known as the Punjab in (1834) North India (1836) and Western India Missions (1870). The American staff, including women, numbers 209, and the Indian staff 962. There are thirty four main stations and 212 out stations. Organised churches number 103 of which thirty five are self supporting, there are 12,045 communicants and a total baptised community of 73,751.

Educational work as follows:—Two men's college and an interest in the Isabella Thoburn and Kinnaird Colleges for Women, students about 1,820, one Theological College students thirty four, two Training Schools for Village Workers students about 180. Thirteen High Schools students about 3,100, two Industrial Schools, three Agricultural Demonstration Farms, four Teachers Training Departments, The Miraj Medical School and an interest in the Ludhiana Medical College for Women, students about 170, 132 Elementary Schools, 172 Schools of all grades, pupils about 11,920.

Medical Work—Light Hospitals, twenty three Dispensaries.

Evangelistic Work—196 Sunday Schools, with an attendance of 3,321 pupils. Contributions for church and evangelistic work, on the part of the Indian church, Rs. 53,750.

The Hospital at Miraj, founded by the late Sir William J. W. and under the care of I. M. Frank and L. I. Cruikshanks well known throughout the whole of S. W. India, and the Forman Christian College at Lahore, under the principalship of Dr. S. K. Datta, is equally well known and valued in the Punjab. The

Lahore Christian College (Dr. C. H. Rice, Principal) and Allahabad Agricultural Institute (Dr. S. Higginbottom, Principal) have grown rapidly in numbers and influence.

Acting Secretary of Council of A. P. Missions in India—Rev. E. Graham Parker, B. A., B. D., Jhansi U. I.

Secretary, North India Mission—Rev. J. H. Lawrence, I. A., D. D., Mainpuri.

Secretary, Punjab Mission—Rev. T. B. Welford, M. A., Ph. D., D. D., 6, Napier Road, Lahore.

Secretary, Western India Mission—Miss C. Grace Dean, B. A., Kolhapur, Residence P. O.

THE NEW / IATAND PRESBYTERIAN MISSION—Commenced as recently as 1910 at Jagadhri, Punjab.

Secretary Rev. J. L. Gray, Jagadhri, Dist. Ambala.

THE UNITED CHURCH OF CANADA MISSION—Commenced in 1877 has 14 main stations in Indore, Gwalior, Ruttim, Dhu, Jaora, Sitamau, Bhopal and Banswara States. The Mission staff numbers 80, Indian workers 200. This Mission works in conjunction with the Malwa Church Council of the United Church of Northern India, which reports for this part of its territory—Organised churches 22. Unorganised churches 8, Communicants 2,526. Baptised non-communicants 8,332. Unbaptised adherents 942, Total Christian Community 11,820.

Educational work comprises Elementary and Middle Schools for boys and girls, a High School for girls, an Arts College for students of both sexes (The Indore Christian College), a Normal School for girls, and the Union Theological Seminary. Women's industrial work is carried on in Mhow and Ruttim, and Vocational Training for boys is a feature of the Ruttim Boys School, where training is provided in printing, tailoring, carpentry and welding.

The Medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals, and also a number of dispensaries in central and out stations.

General Secretary of Mission—Rev. J. T. Taylor, B. A., D. D., Indore.

Associate Secretary of Mission—Miss G. Littleton, Khurda C. I. (Via Melhapur Road Station).

Secretary of Malwa Church Council—Rev. E. H. Russell, M. A., D. D., Ruttim C. I.

The Canadian Presbyterian Mission operates in two sections, the Northern Section with headquarters at Jhansi in the U. P., and the Central India Section, known as the Southern Bhil Field.

In Central India the five central stations are located in the States of Alwar, Jaipur and Barwani but the Mission comprises within its area the States of Jaipur and Kathiwar, also part of Chhoti Udaipur in the Bombay Presidency and parts of Bhar, Indore and Gwalior States bordering on the Jaipur Barwani Road. The staff in Central India consists of 20 missionaries and 42 Indian workers. There are several elementary schools in the area and a central and vernacular school for boys and girls at Anikhet and Alwar, Jaipur States. At Anikhet

also there is a Children's Nursery Home and dispensary and a General Hospital for the area is located at Jobat. In the district there are five organised and 3 unorganised churches with 273 communicant members and a baptised community of over 1,300.

Secretary—The Rev D J McDonald, Jobat, Via Dohad, Central India.

The Jhansi Section formerly known as the Gwalior Mission was founded by the late Dr J Wilkie in 1905. There is now a staff of eleven missionaries and twenty-five Indian workers who are engaged in Jhansi city, Esagarh, Baragron, Babina and the surrounding villages.

Activities include Anglo vernacular middle schools for both boys and girls and hostels for Christian pupils in each. There are also an orphanage for children under school age, a dispensary and an industrial school for boys. There is an agricultural settlement at Esagarh where the Mission has a farm of 1,200 acres.

There are two organised churches having a communicant membership of 150.

Secretary—The Rev A A Lowther, M A, B D.

THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION established in 1840 with a staff of 40 Missionaries, 950 Indian workers, occupies stations in Assam in the Khassia and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khassia language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Communicants

number 35,396, the total Christian community 92,923, organised Churches 721. Elementary schools number 678. Scholars 20,243, in addition to Industrial Schools and Training Institutions 3 Theological Seminaries, Sunday Schools 822 and Scholars 54,047. Four Hospitals and several Dispensaries provide annually for more than 10,000 patients.

Secretary Rev J J Sandy, Durling Aljal.

THE ARCOOT MISSION OF THE REFORMED CHURCH—In America organised in 1853 occupies most of the North and South Arcot and Chittoor districts in S India with a staff of 39 Missionaries and 628 Indian workers. Churches number 17, Communicants 7,576, Total Christian Community 24,693. Boarding Schools 17. Scholars 1,094, Theological School 1 student, 34. Voorhes College, Vellore, students 137. High Schools 4. Scholars 1,887. Training schools 2, students 120, Industrial Schools 2, Agricultural Farm and School 1, total pupils 280, Elementary schools 225, Scholars 9,716. Two Hospitals and 4 Dispensaries with a staff of 68 provided for 2,617 in patients and 29,571 out-patients excluding the Union Medical College Hospitals and Dispensaries Vellore.

The Union Mission Medical College for South India and a Union Mission Training School are located at Vellore, the headquarters of the Mission. The Union Mission Luberulosis Sanitarium for S India is near Madanapalle Arogiavaram, P O, Chittoor District.

Secretary—Rev C R Wieringa, M A, D D, Vellore. N Arcot.

CONGREGATIONAL SOCIETIES

THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS—The American Board of Commissioners for Foreign Missions has two large missions, the American Marathi Mission and the Madura Mission. The Marathi Mission covers a considerable portion of Bombay Presidency with centres at Bombay, Ahmednagar, Rahuri, Vadli, Sirur, Sholapur, Satara and Wai. It was commenced in 1813 the first American Mission in India. Its activities are large and varied. The staff for 1934 included 38 missionaries and 429 Indian workers operating in 9 stations and 109 outstations. There are 67 churches with 6,626 communicants. The educational work includes 10 secondary and training schools with 993 pupils. There are 55 primary schools and 7 kindergarten with a total of 4,453 pupils. A school for the blind is conducted in Bombay and industrial schools are carried on in three centres. In the hospitals and dispensaries during the year, were treated a total of 80,057 patients. The mission has six major social service centres under its charge including the Nigpada Neighbourhood House in Bombay. At Sholapur a settlement for criminal tribes is carried on by the mission under the supervision of Government. *Secretary* W Q Swart, Ahmednagar.

MADURA MISSION—The Madura Mission celebrated its centenary in January, 1934, and at that time turned over administration of work under its control to the Madura Mission Sangam. The Mission still exists to deal with certain matters relating to the maintenance of missionaries. The Secretary is Rev J J Banunga, Pasumalai.

MADURA CHURCH COUNCIL—The Madura Church Council is a branch of the South India United Church, and is in charge of the Christian community that has developed through the work of the Madura Mission. The Madura Church Council is in charge of 31 pastorates about 181 village schools and five large Elementary Higher Grade Co educational Boarding Schools. The Secretary of this organization is Rev Paul Raj Thomas, Pasumalai.

MADURA MISSION SANGAM—The Madura Mission Sangam was formed in January 1934 to take over work in the Madura and Ramnad Districts which had hitherto been under the control of the Madura Mission. This work consists of a Hospital for men and a Hospital for women and a large High School and Training School for Girls in Madura school, for girls at Rachanyapuram three miles from Madura. A High School Training School Trade School and Theological Seminary at Pasumalai, together with some responsibility for the village work under the immediate control of the Madura Church Council.

The Madura Mission Sangam consists of a little over forty members more than half of whom must by constitution be Indians. The Secretary of the Madura Mission Sangam is Rev R A Dudley, Tirumangalam.

THE AMERICAN COLLEGE MADURA—The American College then located at Pasumalai, was affiliated with the University of Madras as a second Grade College in 1881. In 1904 the College Department was removed to Madura where for five years it was accommodated in

what is now the Union Christian High School building. In 1909 the College was removed to its present site in Tallakulam on the north side of the Valmar river. It was affiliated as a First Grade College in 1913.

In 1934 at the time of the centenary of the Mission, the American College became organically independent under its own Governing Council. In the same year it was granted affiliation as an Honours College.

The present College site comprises about forty acres. On the College grounds are located the Main College Hill, the Ellen S. James Hall of Science, Binghamton Hall, the Chapel, Daniel Poor Memorial Library, Mun Hostel, Zumbro Memorial Hostel, Dining Halls, Principal's residence, Warden's Lodge, four additional bungalows, and athletic fields.

THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA—The mission staff in Khandesh is represented by 23 missionaries, and 30 Indian workers. There are 125 church members in good standing with 94 in Sunday Schools. 15 Elementary Schools provide for 44 pupils.

Secretary—Miss Gladys J. Herrick, en, Amalner, Dist. Khandesh.

THE SWEDISH ALLIANCE MISSION—Working among Hindus, Hindus and Muhammedans in West Khandesh has 20 missionaries and 71 Indian workers. There are 8 congregations with a total membership of 1,236 of whom 608 are communicants. There are 13 Elementary Schools, 2 Training Schools and 5 School Homes. The pupils in all schools number 607.

Secretary—The Rev. Simon A. R. Johansson, Mandulwar, Dhadolun, West Khandesh.

THE CHURCH OF FINLAND MISSION—Total staff is represented by 5 foreign missionaries, 4 catechists and 4 teachers. There are 86 baptized adult christians, 84 children and total community about two hundred. Four day schools, 3 Sunday schools, 4 dispensaries and one weaving, etc., in lustiy.

Home Secretary—Professor J. S. Hoyer, Annankatu, 1 Helsinki, Suomi (Finland).

Field Secretary—Rev. E. A. Ollitt, Ghum, D. H. R.

THE LONDON MISSIONARY SOCIETY—Commenced work in India in 1798 and occupies 3 centres in N. India, 12 in S. India and 7 in Travancore. The Mission engages in every form of Missionary activity.

The European staff numbers 88, Indian workers 2,449, Organised Churches 520, Communicants 29,880 and Christian Community 195,616. There are 1 Christian College, students 159, 2 Theological Institutions, students 70, 4 Training Institutions, pupils 114, 12 high schools, pupils 4,849, 25 Boarding schools, scholars 1,167 and 862 Elementary schools with 46,371 scholars. In medical work Hospitals number 6, Nurses 7 Europeans and 37 Assistants, 14 qualified doctors, 0 Europeans and 62 Assistants and 10,413 in patients and 206,276 out patients for the year.

The main centres of the Mission in N. India are at Calcutta and Murshidabad District, Bengal, 1 M. S. work in the United Provinces has been closed but a Union Mission of the W. M. S. C. M. S. and I. M. S. has been opened in Benares City with the Rev. J. C. Jackson of the I. M. S. as Superintendent. This Mission concentrates especially on work amongst pilgrims and students. Special efforts are made amongst the Nam. Sudras. The S. India district and Travancore are divided into the Kanarese, Malabar, Tamil and Malayalam fields with 19 stations and 950 outstations. At Nagercoil (Travancore) is the Scott Christian College and High School with 985 students, a Church and congregation said to be the largest in India and a Printing Press, the centre of the S. Travancore Tract Society.

THE INDIAN MISSIONARY SOCIETY OF TINNEVELLY (DORNAKAL MISSION)—Opened in 1903 operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travancore Hills. It is the missionary effort of the Tamil Christians of Tinnevely. There are now nearly 8,020 Idugu Christians in 135 villages and 416 Palivar Christians in the hills. The Society publishes monthly *The Missionary Intelligence* containing information about the Society's work in both the fields.

Secretary—Rev D. S. David, Palumcottah.

THE MISSION TO LEPROSERS—Founded in 1874 is an interdenominational and international Society for the establishment and maintenance of Homes and Institutions for Lepers and of their untainted children working in 20 countries but largely in India, China, Korea and Japan. Its work in India is carried on through co-operation with 30 Missionary Societies. In India alone the Mission now has 36 Asylums of its own with upwards of 7,000 inmates and is aiding or has some connection with work for lepers at 22 other places in India. Altogether in India over 8,000 lepers are being helped.

The Mission also provides for the segregation of the healthy children of lepers from their diseased parents. More than 800 children are thus being saved from becoming lepers.

An important feature of the work of the Mission is the measure of successful medical treatment whereby early cases both adults and children are now benefiting.

Most of the Mission's income is received from voluntary contributions. Some funds are raised in India, but the bulk of the money expended by the Mission in India is received from Britain, although the provincial Government give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers, of which H. F. Lady Brabourne, who represents the Bombay Presidency, is a Vice President.

Hon. Treasurer—Mr. William McIntyre & Co. Munnell & Co. 2 Table Place Calcutta.

Hon. Treasurer Bombay—R. C. Lowndes Esq. & Co. Messrs. Killick Nixon & Co., Bombay.

The General Secretary of the Mission is Mr. W. H. P. Anderson 7 Bloomsbury Square London W. C. 1. The Secretary for India is Mr. A. Donald Miller, Furlah, Bihar.

Methodist Church

THE METHODIST MISSIONARY SOCIETY commenced work in India, in 1817. The Mission in India apart from Ceylon is organized into 7 Districts with their separate District Synods working under 2 Provincial Synods. In connection with these Synods there is a large English work with 22 ministers giving their whole time to Military and English work.

The Districts occupied include 148 Circuits in Bengal Madras Mysore, Bombay Punjab, North West Frontier Provinces, Baluchistan, Central Provinces United Provinces and Nizam's Dominions. The European staff numbers 105 with 72 Indian ministers and 1094 catechists. There are 414 Churches with a Christian community of 121,637 and 32,556 Communicants. There are a number of Circuits with their Churches thoroughly organized and self-supporting. Educational work comprises 4 Christian Colleges with 59 teachers and 1,763 students, 5 Theological Institutes with 42 teachers and 373 students, 10 High Schools with 2,497 teachers and 5,047 students, 6 Industrial Institutes with 25 teachers and 242 students, 7 Boarding Schools with 116 teachers and 1,648 scholars, 1,233 Elementary Schools with 2,312 teachers and 41,831 scholars.

Medical work is represented by 17 Medical Institutions with 3 European and 12 Indian doctors, 4,041 in patients and 163,498 Out patients.

THE METHODIST EPISCOPAL CHURCH is the organization in the United States of America which grew out of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces. From that centre it spread until the outposts of its work were found in Baluchistan, Burma, Malaya, Netherlands Indies and the Philippine Islands. In 1920 a rearrangement of the mission field of the Church separated

India, Burma and Baluchistan into what is now known as the Southern Asia division. Within this present field the Church now has a total baptized Christian community of 525,668.

The major task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who came from the Mohammedans and the caste Hindus, and among such its influence is extending.

The educational work of the Church is extensive, it having in this area a total of 1,100 schools of all grades including three colleges, twenty-two high schools, and numerous normal training and theological institutions. The registered attendants in these schools number 40,000.

Special effort is made for the instruction and development of the young people of the Church there now being 336 chapters of the Epworth League with 13,394 enrolled members, and 4,021 organized Sunday Schools with an enrolment of 139,422.

The publishing interests of the Church are represented by the Lucknow Publishing House at Lucknow doing work in English, Urdu, Hindi and other vernaculars. The periodicals issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Methodist and Christian Education being in English, while the Kavakali Hind, and other periodicals are issued in several of the vernaculars.

The governing body of the Church is the General Conferences held quadrennially in America in which the eleven conferences now existing in India are represented by twenty-four dele-

gates. The policy of the Church in India looks forward to complete independence under the general governing body, there at present being but about two hundred American men and women as compared to 600 ordained and 4,000 unordained Indian and Burmese workers. At present the area is divided into seventy-two districts each in charge of a superintendent and among whom are many Indians. The work is supervised by three Bishops elected by the General Conference, and resident as follows: Bishop John W. Robinson, Delhi; Bishop Brenton P. Badley, Bombay; and Bishop Jashwant Rao Chitambar, Jubbulpore.

THE AMERICAN WESLEYAN METHODIST MISSION, Sangli, Poona District Headquarters Stations with Missionaries: Dandi Marol, via Nargole, District Thana; Pardi District Suat, Eight Missionaries on field. Two on furlough. Four main stations. Two boarding schools. One industrial school. One Bible School. One village farm project. Eight village schools. Chairman of Field Committee, Rev P. D. Doty, Sangli, District Thana.

THE METHODIST PROTESTANT MISSION began work in India in 1919, has a staff of four missionaries. The work is confined to Dhulia Taluka with one main station, Dhulia. There are two hostels for orphan children (evangelistic work) and a hospital. *Secretary*: Dr. Edith Lacy, Dhulia, West Khundesh.

THE FREE METHODIST MISSION of North America—established at Yecotul, 1893—operates in Berar with a staff of 11 missionaries and 40 Indian workers. Organized churches 5, 1 Theologic school, 1 Girls' Boarding School, 1 Anglo-Vernacular Middle School, 8 Elementary Schools, 1 Dispensary and 5 centres for Clinical and village health work.

Secretary: Mrs. Ida M. Puffer, M.A. Yecotul, Berar.

THE SALVATION ARMY

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth Tucker and was for many years under his control with Headquarters in India. For some time now the area occupied has been divided for administrative purposes into 6 territories, each under a Territorial Commander, and one smaller Command.

Northern Territory, with Headquarters at Lahore.

Western Territory, with Headquarters at Bombay.

Malabar and Telugu Territory, with Headquarters at Madras.

Southern Territory, with Headquarters at Trivandrum, in Travancore State.

Ceylon Territory, with Headquarters at Colombo.

Lastin Territory, with Headquarters at Calcutta.

Burmah Command with Headquarters at Rangoon.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory—The area in this Territory is the Salvation Army work in the Punjab, Delhi and United Provinces. The Territory is controlled from Lahore.

Evangelistic work, especially among the depressed classes, is extensively carried on, both in the Punjab and the U.P.

A number of Settlements for the reformation of 'Criminal Tribes' are under the control of the Salvation Army in the United Provinces (where this important reformatory work was

commenced), A special Settlement has also been opened in the Andamans during the last few years

A land colony 2,000 acres in extent is in existence in the Multan District, where a population of 1,800 has been settled. The land will ultimately become the property of the holders

Medical work is carried on in two Hospitals, one of which is in the Punjab and the other in the United Provinces, and also in one dispensary

Other institutions include, Day and Boarding Schools, Weaving Schools, Agricultural Colonies, a Hospital for British Military Soldiers, and Civilian at Delhi

Village centres at which the S A Works	1,904
Officers and Employees	675
Social Institutions	19

Territorial Headquarters—Ferozpur Road, Lahore Punjab

Territorial Commander—Commissioner N Muthiah

Chief Secretary—Brigadier I Mortimer

Western Territory—The Western Territory comprises Bombay, Gujrat, Panch Mahals and the Mharashtra

Territorial Headquarters—The Salvation Army Mortmain Road, Byculla, Bombay

Territorial Commander—Lt Colonel Stuart H P Colledge (Ibrahim Singh)

Chief Secretary—Brigadier Stephen J Seal (Hannat Singh)

Corp 287 Outposts 485 Societies 473, Social Institutions 16

Besides the distinctly evangelistic operations there are established a large General Hospital—Lucy Memorial, Amrit—and several Dispensaries, 20 Day Schools, 4 Boarding Schools, a Home for Juvenile Criminals, Industrial and Rescue Home for Women, conditionally released Prisoners Home, the management of the Bombay Helpless Legerus Camp, Weaving Schools, Factory for the making of Weaving, Wiping and Reeling Machines, and a Land Colony having a population of about 375 Salvationists

Madras and Telugu Territory—This Territory comprises the city of Madras and work situated in the Nellore, Guntur, Kistna and West Godavari Districts of the Northern Circars of the Madras Presidency

There are the following agencies at work, viz., places in which work is systematically done, both evangelical and education and social—307 Corps and Outposts, 102 Village primary schools, 1 Criminal Tribes Settlement, 2 institutions for the training of Officers, 11 (per Colony at Bapatla taken over by us in 1928, 1 Hospital for women and children at Nadiobrolu, Guntur District, a Women's Industrial Home in Midras, a Boarding Schools for girls, and another for boys of the Salvation Army

Territorial Headquarters—The Salvation Army, Broadway, Madras G. P. O. Box 206

Territorial Commander—Colonel W D Pennock

General Secretary—Brigadier Edward Walker

The South India Territory—The main portion of our work in the Southern (India) Territory is within the geographical boundaries of the Indian State of Travancore

Travancore is the most southern of the Indian States and occupies the south west portion of the Indian Peninsula. It is bounded on the north by the State of Cochin and the British District of Coimbatore. The British District of Madras, Rannid and Tinnevely constitute its eastern boundary and in the west and south lie the Arabian Sea and the Indian Ocean. Travancore has an area of 7,625 square miles its extreme length from north to south being 174 miles and its extreme width 75 miles

Aggressive measures have carried our flag in the north, over into the Indian State of Cochin and in the East into the British District of Tinnevely. The Gospel is preached in English, Tamil and Malayalam

The outstanding feature of our operations is the Evangelical or Field Work which is divided into twelve Divisions with 513 Corps, 819 Outposts, 51 Societies. With the exception of about twenty centres where Invoys are employed, Field Officers are in command of Corps and regular programme of meetings is carried through. At suitable seasons special campaigns are organised and without exception these always result in the winning of new people that is to say whole families steeped in superstition, darkest heathenism and idol worship, renounce their old life with its bad ways, and come over to us. They attend our meetings and under sound teaching, and by the Holy Ghost are led to Christ and Salvation. In companies of ten, twenty, fifty and one hundred at a time, they come and are received under the Flag as New People. It is a thrilling experience to witness such a ceremony. News reaches us that the Officers and Soldiers of one Corps visited a nearby village where all the people were heathen. After the first Meeting, fifty people decided to come over on the side of Christ. Every Sunday since a Soldier of the Corps has visited that place instructing these babes in Christ

Overcome temptation is a life test, revealing of the tempted one his entry into a real spiritual experience. Our people do stand true to Christ even under severe persecution. Unless you renounce your Christ, I will not employ you or pay you the wages due said an employer to one of our Soldiers. Christ is more to me than wages. I placed the Soldier, and although pressed, hard on every side, he stood firm, and gives a radiant testimony, telling how by grace he conquered

The women Officers are making splendid progress and many have put in all Meetings. Move on, you cannot hold a Meeting here, said a burly policeman once to a tiny slip of a Lieutenant, who with a few Constables was holding an Open air Meeting in the market place. The

crowd expected to see the Official promptly obeyed but this little woman looking up at him said "where is your authority to stop a religious Meeting?" The Policeman beat a hasty retreat and the Meeting continued.

Our young People are mostly keen on obtaining good education, but parents are poor and fees comparatively high. In many villages there are Day Schools in which Primary Education is given and in Trivandrum and Nagercoil there are Schools where the pupils are taken a little higher in their studies.

The Boarding Schools in Trivandrum and Nagercoil continue to prove most useful. There is one for girls and two for boys.

In many villages it is impossible for Officers and Soldiers to get for their children any education beyond the early primary classes and so they are admitted to our boarding schools. In addition there are always Orphans—more than we can take—to be cared for.

The Catherine Booth Hospital with its Branches continues to do splendid service the value of which it is quite impossible to estimate. Rich and poor find it their disposal in efficient organization of which they readily avail themselves.

There is every indication that the Government of Cochin is well pleased with our Management of the State Leprosy Colony. Certainly a spirit of brotherhood and contentment exists amongst the patients, and a Christlike atmosphere pervades the whole place.

There is a Leprosy Colony the land and buildings of which are Salvation Army Property.

The Salvation Army Doctrines have been published in Tamil, and Malayalam.

In a quiet, unobtrusive manner the prisoners and women are regularly visited by our Officers. We rejoice in the many evidences to hand indicating that the prisoners recognize our Officers as their friends.

Territorial Headquarters—S A Kuravancannan, Trivandrum, Travancore State.

Territorial Commander—Lieut. Commissioner J A McKenzie.

Chief Secretary—Brigadier Daya Ratanam (Mashin).

COPYRIGHT

There is no provision of law in British India for the registration of Copyright. Protection for Copyright accrues under the Indian Copyright Act under which there is now no registration of rights, but the printer has to supply copies of these works as stated in that Act and in the Printing Presses and Books Act XXV of 1867. The Indian Copyright Act made such modifications in the Imperial Copyright Act of 1911 as appeared to be desirable for adapting its provisions to the circumstances of India. The Imperial Act of 1911 was brought into force in India by proclamation in the *Gazette of India* on October 30, 1912. Under s. 27 of that Act there is limited power for the legislature of British possessions to modify or add to the provisions of the Act in its application to the possession, and it is under this power that the Indian Act of 1914 was passed. The portions of the Imperial Act applicable to British are scheduled to the Indian Act. The Act to which these provisions are scheduled makes some formal adaptations of them to Indian law and procedure, and some material

modifications of them in their applications translations and musical compositions. In the case of works first published in British India the sole right to produce, reproduce, perform or publish a translation is, subject to an important proviso, to subsist only for ten years from the first publication of the work. The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, "have not been published, i.e., written in staff notation, except through the medium of the phonograph. It is impossible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, printed, reduced to writing, or otherwise graphically produced or reproduced."

Laws and the Administration of Justice.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Mahomedan. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. At first the tendency of the English was to make their law public and territorial, and on the establishment of the Supreme Court at Calcutta in 1773 and the advent of English lawyers as judges, they proceeded to apply it to Europeans and Indians alike. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against a Hindu the Hindu law and usage, and as against a Mahomedan the laws and customs of Islam should be applied. The rules of the Shastras and the Koran have been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829, the Indian Slavery Act, 1843, the (aste Disabilities Removal Act of 1850, the Hindu Widows' Remarriage Act, 1856, and other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older (English) statutes and the English common law are to a limited extent still in force in the Presidency Towns as applicable to Europeans while much of the old Hindu and Mahomedan law is everywhere personal to their native fellow subjects, but apart from these, and from the customary law, which is as far as possible recognised by the Courts, the law of British India is the creation of statutory enactments made for it either at Westminster or by the authorities in India to whom the necessary law-giving functions have from time to time been delegated."

Codification

Before the transfer of India to the Crown the law was in a state of great confusion. Sir Henry Cunningham described it as "hopelessly unwieldy, entangled and confusing." The first steps toward general codification were taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially by Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta. The Penal Code, which became law in 1860, was followed in 1861 by a Code of Criminal Procedure. Substantially the whole criminal law of British India is contained in these two Codes. One of the most eminent lawyers who ever came to India, Sir James Stephen, said the Indian penal code may be described as the criminal law of England freed from all technicalities and superfluities, systematically arranged and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India. It is practically impossible to misunderstand the code." The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Indian Penal Code has from time to time been amended

The Code of Civil Procedure was remodelled in 1908 and the Code of criminal Procedure in 1898. These Codes as amended from time to time are now in force.

Statute Law Revision

In October, 1921, a committee was appointed under the presidency of the Hon. Mr A. P. Muddiman, I.C.S., to deal with the question of statute law revision. The functions of the Committee are to prepare for the consideration of Government such measures of consolidation and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of India. In several branches of the law consolidation has long been overdue, and it is suggested that the preparation of a Bill consolidating the existing law relating to merchant shipping with such amendments therein as are necessitated or rendered desirable by the enactment of the English statutes since 1894 on the same subject should form the first duty undertaken by the Committee. Under the conditions resulting from the establishment of the reformed Constitution, increasing importance will attach hereafter to the periodical examination and revision of the Statute Book and the Government of India hope that the Committee will take its place as a permanent feature of the legislative machinery of the country.

European British Subjects

Whilst the substantive criminal law is the same for all classes, certain distinctions of procedure have always been maintained in regard to criminal charges against European British subjects. Until 1872 European British subjects could only be tried or punished by one of the High Courts. It was then enacted that European British subjects should be liable to be tried for any offences by magistrates of the highest class, who were also justices of the peace, and by judges of the Sessions Courts, but it was necessary in both cases that the magistrate or judge should himself be a European British subject. In 1883 the Government of India announced that they had decided "to settle the question of jurisdiction over European subjects in such a way as to remove from the code at once and completely every judicial disqualification which is based merely on race distinctions." This decision, embodied in the Ilbert Bill, aroused a storm of indignation which is still remembered. The controversy ended in a compromise which is thus summarised by Sir John Strachey ("India"), "The controversy ended with the virtual, though not avowed, abandonment of the measure proposed by the Government. Act III of 1884, by which the law previously in force was amended, cannot be said to have diminished the privileges of European British subjects charged with offences, and it left their position as exceptional as before. The general disqualification of native judges and magistrates remained, but if a native of India be appointed to the post of district magistrate or sessions judge, his powers in regard to jurisdiction over European

British subjects are the same as those of an Englishman holding the same office. This provision however is subject to the condition that every European British subject brought for trial before the district magistrate or sessions judge has the right, however trivial be the charge, to claim to be tried by a jury of which not less than half the number shall be Europeans or Americans. Whilst this change was made in the powers of district magistrates, the law in regard to other magistrates remained unaltered. Since 1836 no distinctions of race have been recognised in the civil courts throughout India.

After a discussion on this subject in the Legislative Assembly in September 1921, the following motion was adopted — "That in order to remove all racial distinctions between Indians and Europeans in the matter of their trial and punishment for offences, a committee be appointed to consider what amendments should be made in the provisions of the Code of Criminal Procedure, 1898, which differentiate between Indians and European British subjects and American and Europeans who are not British subjects in criminal trials and proceedings and to report on the best methods of giving effect to their proposals." As a result of the recommendations of the Racial Distinctions Committee the law on the subject was further modified and by the Criminal Law Amendment Act XII of 1923 in place of the old Chapter XXVIII (sections 443-463) the new Chapter XXXIII (sections 443-449) with certain supplementary provisions were substituted. This has in some measure reduced the differences between the trials of Europeans and of Indians under the Code.

The Federal Court

A Federal Court is according to the Joint Parliamentary Committee's Report a necessary element of any Federal Constitution. It is at once the guardian and interpreter of the Constitution and arbiter of the disputes between the Federal Units. The Government of India Act 1935 accordingly provides (sections 200-218) that there shall be a Federal Court consisting of a Chief Justice of India and such number of other judges as His Majesty may deem necessary, but the number of puisne judges shall not exceed six unless and until an address is submitted by the Federal Legislature for an increase. Every judge of the Federal Court is to be appointed by His Majesty by warrant under the Royal Sign Manual. He shall hold office until he attains the age of 65 years, but is liable to be removed from office on the ground of misbehaviour or of bodily or mental infirmity provided that the Judicial Committee of the Privy Council on a reference reports that the judge ought on any such ground to be removed. The Federal Court shall be a Court of Record and shall sit at Delhi or such other place or places as the Chief Justice may with the approval of the Governor General from time to time appoint.

The Federal Court has exclusive original jurisdiction in any dispute between any two or more of the following parties that is to say the Federation, any of the Provinces, or any of the Federated States if and in so far as the dispute involves any question (of law or of fact) on

which the existence or extent of a legal right depends. Certain instructions are placed upon the Court's jurisdiction over disputes to which a State is a party. In the exercise of its original jurisdiction the Court can pronounce only a declaratory judgment. The Court is invested with appellate jurisdiction over any judgment, decree or final order of a High Court in British India if the High Court certifies that the case involves a substantial question of law as to the interpretation of the Government of India Act or any Order in Council made thereunder. No direct appeal in such a case lies to His Majesty in Council either with or without special leave. The Federal Legislature is empowered to enlarge the appellate jurisdiction of the Federal Court so as to extend to certain civil cases involving large stakes. An appeal also lies to the Federal Court from a High Court in a Federated State on the ground that a question of law has been wrongly decided concerning the interpretation of the Act or of an Order in Council made thereunder or the extent of the executive or legislative authority vested in the Federation by virtue of the Instrument of Accession of the State or arising under Agreement made under Part VI of the Act in relation to the administration in the State of a law of the Federal Legislature.

An appeal may be brought to His Majesty in Council from a decision of the Federal Court in its original jurisdiction in any dispute which concerns the interpretation of the Act or of an Order in Council made thereunder or the extent of the executive or legislative authority vested in the Federation by virtue of an Instrument of Accession or under an agreement made under Part VI of the Act. An appeal may also be brought to the Privy Council where special leave is granted either by the Federal Court or the Privy Council. All authorities civil and judicial throughout the Federation are enjoined to act in aid of the Federal Court. All proceedings in the Federal Court shall be in the English language and judgment must be pronounced in open court in accordance with the opinion of the majority of the judges.

The Federal Court is established and commences to function from 1st October 1937. The Court in the first instance is to consist of a Chief Justice and two puisne judges. The Chief Justice receives a salary of Rs. 7,000 and each of the puisne judges Rs. 5,500 per month.

Sir Munroe Glynn, K.C. is appointed to be the first Chief Justice of India and Sir Shah Mehmood Ismail and Mr. M. R. Jayakar to be judges of the Federal Court.

The functions of the Federal Court are not to be affected in any way by the assumption of emergency powers by the Governor General under section 45 of the Act in case of failure of the Constitutional machinery.

High Courts

High Courts of Judicature were constituted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for the United Provinces and the Punjab superseding the old supreme and Sudder Courts. More recently High Courts have been constituted for Patna and Langoon as well. The Judges are appointed by the Crown, they hold office

during the pleasure of the Sovereign, at least one-third of their number are barristers, one third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for persons who have held certain Judicial Offices in India or lawyers qualified in India. This fixed proportion of Barrister and Civilian judges has now been abolished by Government of India Act 1933. And by law is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in India.

For other parts of India High Courts have been formed under other names. The chief difference being that they derive their authority from the Government of India not from Parliament. In Sindh N W F Province and the Central Provinces and Berar the principal legal tribunal is known as the Court of the Judicial Commissioner. Quite recently the Secretary of State for India has approved the proposal for the establishment of a High Court in the Central Provinces and Berar and Sindh and a High Court has since January 1936 been established at Nagpur.

The High Courts are the Courts of appeal from the superior courts in the districts, criminal and civil, and their decisions are final except in cases in which an appeal lies to His Majesty in Council and is heard by the Judicial Committee of the Privy Council in England. The High Courts exercise supervision over all the subordinate courts. Returns are regularly sent to them at short intervals and the High Courts are able, by examining the returns, by sending for proceedings, and by calling for explanations, as well as from the cases that come before them in appeal, to keep themselves to some extent acquainted with the manner in which the courts generally are discharging their duties.

Lower Courts

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates. Every province, outside the Presidency towns, is divided into sessions divisions consisting of one or more districts, and every sessions division has a court of session and a sessions Judge, with assistants if need be. These stationary sessions courts take the place of the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law, but sentences of death are subject to confirmation by the highest court of criminal appeal in the province. Magistrates courts are of three classes with descending powers. Provision is made and largely utilised in the towns, for the appointment of honorary magistrates, in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases.

Trials before courts of session are either with assessors or juries. Assessors assist, but do not bind the judge by their opinions, on juries the opinion of the majority prevails if accepted by the presiding Judge. The Indian law allows considerable latitude of appeal. But there is no Court of Criminal Appeal, and

as the Judicial Committee of the Privy Council has repeatedly disclaimed all jurisdiction as a Court of Criminal Appeal, there is no adequate machinery for appeal or revision available to persons convicted of serious and even capital offences and sentenced by the High Courts in their original or appellate Criminal Jurisdictions. The prerogative of mercy is exercised by the Governor General-in-Council and the Local Government concerned without prejudice to the superior power of the Crown.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for each district as District Judge he presides in its principal civil court of original jurisdiction, his functions as Sessions Judge have been described. For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Service. Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of India. The civil courts, below the grade of District Judge, are almost invariably presided over by Indians. There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs 500. In the Presidency Towns, where the Chartered High Courts have original jurisdiction Small Cause Courts dispose of money suits up to Rs 2,000. As Insolvency Courts the chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Insolvency Act of 1906.

Coroners are appointed only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by juries.

Legal Practitioners

Legal practitioners in India are divided into Barristers at Law, Advocates of the High Court, Vakils and Attorneys (Solicitors) of High Courts, and Pleaders, Mukhtars and revenue agents. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts, and they alone are admitted to practise on the original side of some of the chartered High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel prevails only on the original side of the Bombay and Calcutta High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts.

Law Officers

The Government of India has its own law colleague in the Legal Member of Council. All Government measures are drafted in this department. Outside the Council the principal law officer of the Government of India is the Advocate General of Bengal, who is appointed by the Crown, is the leader of the local Bar, and is always nominated a member

of the Provincial Legislative Council. In Calcutta he is assisted by the Standing Counsel and the Government Solicitor. There are Advocates-General appointed by the Crown and Government Solicitors for Bombay and Madras, and in Bombay there is attached to the Secretariat a Legal Remembrancer and an Assistant Legal Remembrancer, drawn from the Judicial Branch of the Indian Civil Service. The Government of Bengal consults the Bengal Advocate General, the Standing Counsel and the Government Solicitor, and has besides a Legal Remembrancer (a Civil Servant) and a Deputy Legal Remembrancer (a practising barrister), the United Provinces are equipped with a civilian Legal Remembrancer and professional lawyers as Government Advocate and Assistant Government Advocate, the Punjab has a Legal Remembrancer, Government Advocate and a Junior Government Advocate, and Burma a Government Advocate, besides a Secretary to the Local Legislative Council. Under the Government of India Act 1935 is proposed to appoint an Advocate General for each of the more important provinces.

Sheriffs are attached to the High Courts of Calcutta, Madras and Bombay. They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of the Court.

Law Reports

The Indian Law Reports are now published in seven series—Calcutta, Madras, Bombay, Allahabad, Patna, Lahore and Rangoon. They are under the authority of the Governor General in Council. They contain cases determined by the High Court and by the Judicial Committee on appeal from the particular High Court. These appeals raise questions of very great importance, and the Council of Law Reporting for England and Wales show their appreciation by printing the Indian Appeals in a separate volume, and have also compiled a digest of Indian Appeals covering the period 1874-1893. The other Provinces and States have series of reports issued under the authority either of the Judiciary or the State.

THE INDIAN POLICE

Origins—Cornwallis was the first Indian administrator to take the burden of policing the country off the zemindars and to place it on Government. He ordered the District Judges of Bengal in 1793 to open a Thana (Police Station) for every 400 square miles of their jurisdiction, and to appoint stipendiary Thanadars (Police Station Officers) and subordinates.

In Madras in 1816, Sir Thomas Munro took superintendence of police out of the hands of the sedentary judges and placed it in the hands of the peripatetic Collector, who had the indigenous village police system already under his control. In this way the Revenue Department controlled the police of the districts and still to some extent does so, especially in Bombay Presidency.

In Khandesh from 1826-36 Outram of Mutiny fame showed how a whole time military commandant could turn incorrigible marauders into excellent police and Sir George Clerk, Governor of Bombay in 1848, applied the lesson by appointing full time European Superintendents of Police in many Districts.

Madras had a torture scandal in 1853 which showed that 3 Collectors had no time for real police superintendence. In 1850 the principle of full time European superintendence was introduced in a Madras Act of that year and the control of the Collector was removed.

The Mutiny led to general police overhaul and retrenchment and the Madras Act was mainly followed in India Act V of 1861. An Act for the Regulation of Police, which still governs police working everywhere in India except Madras and Bombay, which has its own Police Act (IV of 1890).

Working—Strictly speaking there is no Indian Police. With the doubtful exceptions of the Delhi Imperial Area Police, and the advisory staff of the Intelligence Bureau attached to the Home Department, the Government of India has not a single police officer directly under its control. The police provided for by the 1861 Act is a provincialised police, administered by the Local Government concerned subject only "to the general control" of the Governor General.

Within the Local Government area the police are enrolled and organised in District forces, at the head of each of which is a District Superintendent of Police with powers of enlistment and dismissal of constabulary, and Police Station Officers may also be dismissed by the D S P.

The D S P is subject to dual control. The force he commands is placed at the disposal of the District Magistrate for the enforcement of law and the maintenance of order in the District. But the departmental working and efficiency of the force is governed by a departmental hierarchy of Deputy Inspector General of Police, Inspector General of Police, and Home Department. Generally speaking, the D S P has to correspond with his District Magistrate on judicial and magisterial topics, and with his departmental chiefs on internal working of his force.

The C I D—The Curzon Police Commission of 1902-3 modernised police working by providing for the direct enlistment and training of Educated Indians as Police Station Officers, and by creating specialised police agencies under each Local Government for the investigation of specialist and professional crime. These agencies are known as **Criminal Investigation Departments** and work under a Deputy Inspector-General. They collate information about crime, edit the *Crime Gazette*, take over from the District Police crimes with ramifications into several jurisdictions, and they control the working of such scientific police developments as the Finger Print Identification Bureaux.

Headquarters and Armed Police—At the chief town of each District the D S P has his office and also his Headquarter Police Lines and parade ground. This is the main centre for accumulation and distribution to the Police Stations and Outposts of the District of clothing, arms, ammunition, and accoutrements. Here are the Stores and the Armoury. Here also constabulary recruits enlisted by the D S P are taught drill, deportment and duties and are turned out to fill vacancies. The Headquarter Lines also contain the two hundred or so armed police who mount guard on Treasuries in the District, and also provide prisoner and treasure escort. Actually they form a small and mobile local army equipped with muskets (single loading) and bayonets. The most highly trained section of them go through a musketry course and are armed with 303 service rifles. At most headquarters but by no means all, there is also a reserve of mounted and armed police.

Thanas and Thanadars—Almost throughout India the popular terms for Police Station and Police Station Officer are Thana and Thanadar. It is at the Police Station that the public are most in touch with the police and the police with the public. Whether it be in a large city or in a mofussil hamlet the Thana is the place where people come with their troubles and their grievances against their neighbours or against a person or persons unknown. In dealing with such callers, the Thanadar, who like police of all ranks, is supposed to be always on duty, is chiefly guided by the Fourteenth Chapter of the Code of Criminal Procedure and the Second Schedule at the end of that Code. This schedule shows nearly all penal offences and states whether or not they are cognisable by the police. The fourteenth Chapter lays down that a cognisable complaint must then and there be recorded, visited and investigated. A non cognisable complaint is merely noted in a separate book and the complainant is told to go to court.

Police Prosecutors—The complainant in a cognisable case not only has his complaint recorded but investigated without payment of fee. If the Thanadar succeeds in establishing a *prima facie* case against the accused, the prosecution in court is conducted free of charge by a police prosecutor, who is generally a junior pleader, engaged by Government to conduct police cases in the lower courts. Cases committed

to the Sessions are conducted by the Public Prosecutor or one of his Assistants, and the reports of these officers and the comments of the judge are a means for the D S P to know whether his Thanadars are doing their work properly

Out-Posts—When the Police Commission of 1860 devised the plan of police that still holds the field, they laid down two criteria of the numbers required. One was one policeman per square mile, the other was one per thousand of population. In towns it is well enough to have the available police concentrated at the police station. But in the mofussil the Thana is very often fifty miles distant from portions of its jurisdiction. It is in such cases profitable to detach a portion of the police station strength under a head constable to man an outpost where complaints can be received and investigation begun without the injured party having to undertake a long journey to the distant Thana. The secret of good mofussil police working in normal times is dispersion. A single policeman however junior, represents the rule of law and is an agent of Government.

The Chain of Promotion—Ordinarily the constable may aspire to become a jamadar, or with ability and luck, a Police Station Officer or even Inspector. The directly recruited matriculate who comes in through the Police Training School as a Thanadar may ordinarily become an Inspector or a Deputy Superintendent, or exceptionally a Superintendent. The direct Deputy an office reserved for Indians, has a good chance of becoming Superintendent, and perhaps Deputy Inspector General. The direct Assistant Superintendent whether from England, or from India, is sure of a Superintendship and has chances of D I G after 25 years service. The period of service for all ranks for full pension is thirty years, and if an officer dies in the process of earning full pension his pension dies with him and all his dependents get his provident fund.

Presidency Police—In the Presidency Towns there is unified police control for the Police Commissioner is responsible for both law and order and for departmental training and efficiency.

The Commissioner of Police of a Presidency Town is not the subordinate of the Provincial Inspector-General of Police and he deals direct with Government, just as the Presidency Magistrates deal directly with the High Court. The Criminal Procedure Code of India is superseded in the Presidency Towns by special police Acts which prescribe police procedure. Justice in criminal cases in Presidency Towns is somewhat rough and ready, not only from this cause, but also because Presidency Magistrates can give upto six months or Rs 200 fine summarily, i.e., without formal record of proceedings, and if only whipping or fine up to Rs 200 is inflicted there need be not even any statement of reasons for the conviction.

Round Figures—The process of reorganisation and retrenchment goes on ceaselessly, annual administration reports for the ten major provinces and four minor administrations appeared tardily, and there are no unified statistics for the police of India and Burma. The following figures are therefore merely to be regarded at approximations, giving a general idea of the numbers of police and the volume of work put through yearly.—There are about 25 000 Military Police chiefly in Burma, Assam, and Bengal, and these cost about one crore. The maintenance of them is a departure from the principles laid down by the 1860 Commission and the 1861 Act.

Provincial Police including Burma total about 200,000 and cost eleven and a half crores or an average of over one crore per major Province.

There are about 10,000 Thanads or Police Stations which annually investigate from five to six thousand murders, four thousand dacoities, twenty-five thousand cattle thefts, one hundred and seventy thousand ordinary thefts and as many burglaries. They place on trial every year about three quarters of a million persons, of whom about half a million or more are convicted. The jail population of India, which is over a hundred thousand consists of many habituals who on release proceed to prey on the public until such time as the police again secure their conviction and incarceration.

STATISTICS OF POLICE WORK

The undesirability of attaching undue importance to statistical results as a test of the merits of police work was a point upon which considerable stress was laid by the Indian Police Commission who referred to the evils likely to result from the prevalence among subordinate officers of an impression that the advancement of an officer would depend upon his being able to show a high ratio of convictions, both to cases and by persons arrested, and a low ratio of crime. The objection applies more particularly to the use of statistics for small areas but they cannot properly be used as a basis of comparison even for larger areas without taking into account the differences in the conditions under which the police work, and, it may be added, they can at the best indicate only very imperfectly the degree of success with which the police carry out that important branch of their duties, which consists in the prevention of crime. These considerations have been emphasized in recent orders of the Government of India. Subject to these observations, the figures below may be given as some indication of the volume of work falling upon the police and of the wide differences between the conditions and the statistical results in different provinces. They are statistics of cognizable crime —

* Includes figures "for cattle theft"

(a) Conviction obtained with regard to one case which was pending from previous year

JAILS

Jail administration in India is regulated generally by the Prisons Act of 1894, and by rules issued under it by the Government of India and the local governments. The punishments authorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment. Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, which consisted of only two members, both officials serving under the Government of India, is extremely long, and reviews the whole question of jail organization and administration in the minutest detail. In most matters the Commission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected *ab initio* as unsuited to local conditions abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible.
